[AD-A090520] p0088 N81-12928
An evaluation of wind tunnel test techniques for
aircraft nozzle afterbody testing at transonic
Mach numbers
[AD-A091775] p0126 N81-13931
Prediction of sound radiated from different
practical jet engine inlets
[NASA-CR-163824] p0137 N81-14789
Validation of a two dimensional primitive variable
computer code for flow fields in jet engine test
cells
[AD-A092138] p0196 N81-16060
Composite containment systems for jet engine fan
blades
[NASA-TM-81675] p0220 N81-17480
Validation of a two-dimensional primitive variable
computer code for flow fields in jet engine test
cells
[AD-A094615] p0254 N81-18067
On the influence of steady state temperature and
pressure distortion on the flow characteristics
in an installed multistage jet engine compressor
--- heated intake air
[PNR-90022] p0275 N81-19126
Issues of commonality. Volume 2: Issue analysis
[AD-A095418] p0331 N81-20046
Issues of commonality. Volume 1: Executive summary
[AD-A095417] p0331 N81-20047
The optimum design of by-pass engines with jet
mixing
[PNR-90017] p0335 N81-20081
Electromagnetic scattering by open circular
waveguides --- modeling jet engine inlets
[AD-A095554] p0336 N81-20345
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073
Investigations of free-jet test requirements and
techniques with emphasis on the adaptable jet
stretcher
[AD-A098710] p0439 N81-25044
JT9D performance deterioration results from a
simulated aerodynamic load test
[NASA-TM-82640] p0443 N81-25082
Selected results from combustion research at the
Lewis Research Center
[NASA-TM-82627] p0443 N81-25083
Contribution to the study of nonstationary signals
emitted by moving jet engines: Application to
spectral analysis and imaging. Part 2
p0447 N81-26013
Prediction of sound radiation from different
practical jet engine inlets
[NASA-CR-164620] p0500 N81-27886
From the civil component program 'IFAS':
Fundamentals of engine simulation, using
turbopowered simulator (TPS) technology in wind
tunnel tests
[BMFT-FB-W-80-030] p0541 N81-28111
CF 6 engine diagnostics
p0597 N81-31197
CF6 high pressure compressor and turbine clearance
evaluations
p0598 N81-31198
JT9D jet engine diagnostics program
p0598 N81-31199
Development of an analytical technique for the
optimization of jet engine and duct acoustic
liners
[NASA-CR-164872] p0639 N81-33205

JET EXHAUST
On screeching jets exhausting from an axisymmetric
supersonic nozzle
p0008 A81-11616
Vector and scalar characteristics of opposing jets
discharging normally into a cross-stream
p0110 A81-17997
Solutions for slightly over- or under-expanded hot
supersonic jets exhausting into cold subsonic
mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
Aircraft NO/X/ emissions and stratospheric ozone
reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20741
Test facility for the measurement of infrared
radiation from jet engine exhaust systems
p0462 A81-39503
Runway and deck temperatures in vertical
takeoff/landing operations
[AIAA PAPER 81-1623] p0525 A81-43132
Noise shielding by a hot subsonic jet
[AIAA PAPER 81-2018] p0624 A81-49731
An improved prediction method for noise generated
by conventional profile coaxial jets
[AIAA PAPER 81-1991] p0624 A81-49743
Trace chemical analysis methodology
[AD-A090762] p0083 N81-12191
Impact of aircraft emissions on air quality in the
vicinity of airports. Volume 2: An updated
model assessment of aircraft generated air
pollution at LAX, JFK and ORD
[AD-A091005] p0096 N81-13545
Organic compounds in the exhaust of a J85-5
turbine engine
[AD-A091712] p0130 N81-13966
Effects of sidewall geometry on the installed
performance of nonaxisymmetric
convergent-divergent exhaust nozzles
[NASA-TP-1771] p0185 N81-15976
Impact of aircraft emissions on air quality in the
vicinity of airports. Volume 1: Recent airport
measurement programs, data analyses, and
submodel development
[AD-A089962] p0201 N81-16628
Advanced technology for controlling pollutant
emissions from supersonic cruise aircraft
p0246 N81-18004
Flap survey test of a combined surface blowing
model: Flow measurements at static flow
conditions
[NASA-CR-152124] p0423 N81-24023
Axisymmetric & non-axisymmetric exhaust jet
induced-effects on a V/STOL vehicle design.
Part 1: Data presentation --- conducted in Ames
11-foot transonic tunnel
[NASA-CR-166146] p0441 N81-25064

JET FLAMES
U JET FLOW

JET FLAPS
Flight test of the 747-JT9D for airframe and
jet-flap interaction noise
[AIAA PAPER 81-2037] p0620 A81-48629
Analytical study of STOL Aircraft in ground
effect. Part 1: Nonplanar, nonlinear wing/jet
lifting surface method
[NASA-CR-152087-PT-1] p0271 N81-19096
A study of a VTOL thrusting ejector in low speed
flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017

A study of a VTOL thrusting ejector in low speed
flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018
JET FLIGHT

Instantaneous velocity measurements in a
periodically pulsed plane turbulent jet
p0066 A81-15895
Numerical calculation of jet-induced ground effect
in VTOL
[AIAA PAPER 81-0015] p0157 A81-20539
Experiments on the linear and non-linear evolution
of the double helical instability in jets
[AIAA PAPER 81-0415] p0168 A81-20818
Perspectives on jet noise
[AIAA PAPER 81-0426] p0168 A81-20829
Drag reduction - Jet breakup correlation with
kerosene-based additives
p0225 A81-23923
A computer simulation of turbulent jet flow
p0230 A81-24424
The effect of jet non-uniformity on the lift of an
augmentor wing
p0298 A81-29144
Roll length of an annular underexpanded jet formed
by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867
Prediction of flyover jet noise spectra
[AIAA PAPER 81-2025] p0618 A81-48610
Noise radiated from inverted velocity profile jets
under simulated flight
[AIAA PAPER 81-2026] p0623 A81-49729
Effect of a semi-annular thermal acoustic shield
on jet exhaust noise
[NASA-TM-81615] p0044 N81-11770
Static source locations for four nozzles mounted
on a J-85 engine
[NASA-CR-152401] p0143 N81-14998
Jet wing interaction to give improved combat
performance
p0188 N81-16007
Jet wing interference for an overwing engine
configuration
p0188 N81-16008
Method for predicting the jet-induced aerodynamics
of V/STOL configurations in transition
[AD-A097356] p0385 N81-23043
Fountain-jet turbulence
[AD-A098098] p0423 N81-24028
An engineering method for estimating the induced
lift on V/STOL aircraft hovering in and out of
ground effect
[AD-A098509] p0441 N81-25069
Evaluation of Ting's method for the calculation of
the lift distribution on a wing in propulsive jets
[NLR-TR-80078-U] p0594 N81-31157
JET FUELS
U JET ENGINE FUELS
JET IMPINGEMENT
An experimental investigation of jet screech by
air jet impingement on solid boundaries
p0005 A81-11302
Numerical calculation of jet-induced ground effect
in VTOL
[AIAA PAPER 81-0015] p0157 A81-20539
Heat transfer from a row of impinging jets to
concave cylindrical surfaces
p0231 A81-24924
Streamwise flow and heat transfer distributions
for jet array impingement with crossflow
[ASME PAPER 81-GT-77] p0313 A81-29985
Interaction of a gas jet from a jet engine with
the destroyed surface of a multiphase disperse
medium
p0319 A81-30152
Wind-tunnel tests of engine-equipped models -
Comparison of two jet wash simulation methods
[ONERA, TP NO. 1981-42] p0460 A81-39245
Vertical momentum of the fountain produced by
multijet vertical impingement on a flat ground
plane
p0529 A81-43396
Investigation of impingement region and wall jets
formed by the interaction of high aspect ratio
lift jets and a ground plane
[NASA-CR-152174] p0261 N81-19017
Simulation of aeroheating or aerocooling Air Force
stores by arrays of impinging jets
[AD-A095464] p0330 N81-20036
JET LIFT
Vertical momentum of the fountain produced by
multijet vertical impingement on a flat ground
plane
p0529 A81-43396
JET MIXING FLOW
Solutions for slightly over- or under-expanded hot
supersonic jets exhausting into cold subsonic
mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
Non-isoenergetic turbulent jet mixing in a
constant area duct --- in turbofan engines
[AIAA PAPER 81-0347] p0165 A81-20768
Partially confined multiple jet mixing
p0234 A81-25513
Cooperative investigation of the noise producing
region of an axisymmetric jet
[AD-A089692] p0045 N81-11774
Turbulence modeling for application to V/STOL
propulsion induced effects: Two dimensional
formulation
[AD-A090331] p0072 N81-12026
The optimum design of by-pass engines with jet
mixing
[PNR-90017] p0335 N81-20081
JET NOISE

JET NOZZLES
On screeching jets exhausting from an axisymmetric
supersonic nozzle
p0008 A81-11616
Effect of a semi-annular thermal acoustic shield
on jet exhaust noise
p0178 A81-22532
The method for calculating the fuel concentration
field in the downstream positions of the
pressure jet atomizer in the high temperature
gas-stream
p0224 A81-23731
Noise characteristics of two parallel jets with
unequal flow
[AIAA PAPER 80-0168] p0354 A81-31601
Jet-diffuser ejector - Attached nozzle design
[NASA-CR-152361] p0278 N81-19412
JET PILOTS
U AIRCRAFT PILOTS
JET PROPULSION
Quiet propulsive-lift technology ready for civil
and military applications
p0359 A81-32521
Simulating study of the interaction between the
propulsion and flight control systems of a
subsonic lift fan VTOL
[NASA-TM-81239] p0036 N81-11043
Evaluation of Levinsky's method for the
calculation of the lift distribution on a wing
in propulsive jets
[NLR-TR-77104-U] p0073 N81-12033
Advanced subsonic transport propulsion
[NASA-TM-82696] p0597 N81-31195
JET STREAMS (METEOROLOGY)
CAT altitude avoidance system
[NASA-CASE-NPO-15351-1] p0202 N81-16677
JET THRUST
Experimental development of an advanced
circulation control wing system for Navy STOL
aircraft
[AIAA PAPER 81-0151] p0161 A81-20632
Jet noise suppression for low bypass engines -
Have we reached a dead end
p0291 A81-29063
Experimental investigation of oscillating subsonic
jets
p0360 A81-32777
Prediction of swirling reacting flow in ramjet
combustors
[AIAA PAPER 81-1485] p0506 A81-40903
Flight evaluation of a simplified gross thrust
calculation technique using an F100 turbofan
engine in an F-15 airplane
[NASA-TP-1782] p0143 N81-15000
Comparison of three thrust calculation methods
using in-flight thrust data
[NASA-TM-81360] p0581 N81-30111

JET VANES
Boron aluminum blades and vanes
[AIAA PAPER 81-1359] p0502 A81-40840
JETAVATORS
U GUIDE VANES
JETTISON SYSTEMS
Microprocessor control of lamps MK III /Seahawk/ helicopter sonobuoy launcher system
[AHS 80-20] p0474 A81-40150
Ergonometric study of ejection through a breakable canopy
p0205 N81-17011
Explosively activated egress area
[NASA-CASE-LAR-12624-1] p0546 N81-29107
AH-1 lightweight airborne launcher jettison evaluation
[AD-A101461] p0582 N81-30119
JETTISONING
Fuel jettisoning by U.S. Air Force aircraft. Volume 1: Summary and analysis
[AD-A089010] p0032 N81-10580
Fuel jettisoning by U.S. Air Force aircraft. Volume 2: Fuel dump listings
[AD-A089076] p0032 N81-10581
JF 101 AIRCRAFT
U F-101 AIRCRAFT
JINDIVIK TARGET AIRCRAFT
Transonic wind tunnel measurements of tailplane and elevator effectiveness of the Jindivik 203B target aircraft

JITTER
U VIBRATION
JOINING
Classification of links of assembly units with respect to the character of their connections, and calculation of the accuracy of their execution --- in airframe construction
p0319 A81-30168
JOINTS (JUNCTIONS)
NT METAL JOINTS
NT RIVETED JOINTS
Non-destructive testing of adhesive-bonded joints
p0153 A81-20162
The joints of aeronautical carbon resin composite structural elements
p0238 A81-26242
Bolt bearing strengths of graphite/epoxy laminates
[AIAA 81-0544] p0301 A81-29396
A fatigue study and an investigation on mechanically fastened joints for the development of a flap
p0481 A81-40581
Elastomers used in aeronautics industry
[SNIAS-801-551-105] p0031 N81-10168
Sealing joints and cracks, thin resurfacing, and locating voids under concrete slabs
[PB80-215635] p0132 N81-14182
Design, fabrication and test of graphite/polyimide composite joints and attachments for advanced aerospace vehicles
[NASA-CR-159112] p0194 N81-16042
Scarf joints in unidirectional carbon fiber reinforced plastics --- tests of repairs made using adhesives
[BU-258] p0336 N81-20193
Thirty years experience with primary adhesive bonded structures --- aircraft construction
[FOK-BO-1240] p0541 N81-28189
Nondestructive testing of adhesive bonded joints
[FOK-BO-1241] p0542 N81-28190
Operational experience with adhesive bonded structures --- aircraft structures
[FOK-BO-1235] p0582 N81-30124
JOURNAL BEARINGS
An analytical method to calculate misalignment in the journal bearing of a planetary gear system
p0004 A81-10839
An experimental and theoretical investigation of pressures in four-lobe bearings
p0004 A81-10840
On the steady state and dynamic performance characteristics of floating ring bearings
[ASME PAPER 80-C2/LUB-17] p0117 A81-18671
Dynamic characteristics of a high-speed rotor with radial and axial foil-bearing supports
[ASME PAPER 80-C2/LUB-35] p0117 A81-18683
Nonlinear analysis of squeeze film dampers applied to gas turbine helicopter engines
[AD-A091905] p0196 N81-16062
JOURNALS (SHAFTS)
U SHAFTS (MACHINE ELEMENTS)
JP-4 JET FUEL
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073
JP-5 JET FUEL
Acceptability of shale derived fuel for Navy aircraft propulsion systems
[AIAA PAPER 81-1424] p0503 A81-40868
Two-stage combustion for reducing pollutant emissions from gas turbine combustors
[NASA-CR-163877] p0196 N81-16056
Effect of refining variables on the properties and composition of JP-5
[AD-A093842] p0219 N81-17281
JP-8 JET FUEL
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073

K

KALMAN FILTERS
Some implementation considerations for numerically stable flight filters
p0156 A81-20485
The reconstruction/refiltering approach to Kalman filter evaluation --- in long-range aircraft avionics
p0326 A81-30339
Implementation of target orientation angles in improved Kalman filter based short range radar tracking
p0326 A81-30340
Dynamic errors of the Kalman filtering of trajectory parameters --- for radar tracking of aircraft maneuvers
p0366 A81-33687
Optimal processing of GPS signals
p0512 A81-41761
DEKFIS user's guide: Discrete Extended Kalman Filter/Smoother program for aircraft and rotorcraft data consistency
[NASA-CR-159081] p0379 N81-22722
The reconstruction of flight paths from AIDS data with the aid of modern filtering methods --- kalman filters
p0383 N81-23021
A Kalman filter approach to navigation on the NAE Convair 580 aeromagnetics research aircraft
[AD-A100836] p0547 N81-29116
KARMAN VORTEX STREET
An example of the transonic flow past a body with a discontinuity in the contour curvature

LEADING EDGE FLAPS
Leading-edge 'Vortex Flaps' for enhanced subsonic aerodynamics of slender wings
p0012 A81-11648
The aerodynamics of inverted leading edge flaps on delta wings
[AIAA PAPER 81-0356] p0165 A81-20775
Effectiveness of leading-edge vortex flaps on 60 and 75 degree delta wings
p0352 A81-31368
Effects of yaw on leading edge vortex flap aerodynamics
[AIAA PAPER 81-1660] p0526 A81-43147
Effect of leading-edge vortex flaps on aerodynamic performance of delta wings
p0559 A81-44424
Overview of the Langley subsonic research effort on SCR configuration
p0243 N81-17982
Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983
Wind tunnel test results of a new leading edge flap design for highly swept wings, a vortex flap
p0243 N81-17986
Leading edge vortex flaps for drag reduction --- during subsonic flight
[NASA-CASE-LAR-12750-1] p0261 N81-19016
Wind-tunnel studies of advanced cargo aircraft concepts --- leading edge vortex flaps for drag reduction
[NASA-CR-164833] p0627 N81-32117
LEADING EDGE SLATS
Design and test of a graphite-epoxy composite A-10 slat
p0006 A81-11339
Design and analysis of slat systems in transonic flow
p0050 A81-14392
Leading edge high lift devices for agricultural aircraft
[SAE PAPER 810608] p0522 A81-42765
Subsonic pitch-up alleviation on a 74 deg delta wing
[NASA-CR-165749] p0584 N81-30137
LEADING EDGE SWEEP
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119
LEADING EDGE THRUST
Supersonic wings with significant leading-edge thrust at cruise
p0244 N81-17990
LEADING EDGES
NT SHARP LEADING EDGES
Optimizing the fixed leading edge shape of a transonic wing to suit the leading high-lift requirements
p0011 A81-11688
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
Numerical prediction of vortex cores of the leading and trailing edges of delta wings
p0659 A81-14475
Numerical lifting line theory applied to drooped leading-edge wings below and above stall
p0066 A81-15861
On a linear theory of a supersonic flow past a delta wing with subsonic leading edges
p0149 A81-19872
Icing tunnel tests of a glycol-exuding porous leading edge ice protection system on a general aviation airfoil
[AIAA PAPER 81-0405] p0168 A81-20837
Role of laminar separation bubbles in airfoil leading-edge stalls
p0354 A81-31613
Leading-edge separation from a thick, conical, slender wing at small angles of incidence
p0355 A81-31687
Applications of dynamic stability parameters to problems in aircraft dynamics
p0410 A81-35552
Calculation of supersonic flow around a wing with constant curvature of its leading edges
p0413 A81-35916
Transonic swept wings studied by the lifting-line theory
p0509 A81-41090
The influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43146
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601
Experimental study of supersonic viscous leeside flow over a slender delta wing
[NASA-TM-81248] p0133 N81-14265
Leading-edge deflection optimization for a highly swept arrow wing configuration
[NASA-TP-1777] p0139 N81-14974
An investigation of a swept wing-body configuration with drooped leading edge at low and transonic speeds
p0189 N81-16012
Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010
Study of the vortex conditions of wings with large sweepback by extrapolation of the Jones method
[NASA-TM-75863] p0262 N81-19026
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
On the role of laminar separation bubbles in airfoil leading edge stalls
[NLR-MP-80010-U] p0339 N81-21042
Design and experimental results for a natural-laminar-flow airfoil for general aviation applications
[NASA-TP-1861] p0423 N81-24022
Aerodynamic investigation of C-141 leading edge modifications for cruise drag reduction, test 2
[AD-A099662] p0492 N81-27051

Investigation of aerodynamic stall alleviation on a swept planform wing using leading edge modifications
[AD-A101239] p0548 N81-29122
MM&T: Low cost production/installation of urethane leading edge guards on rotor blades
[AD-A101603] p0582 N81-30117
LEAKAGE
Rotor-tip leakage. I - Basic methodology
[ASME PAPER 81-GT-71] p0313 A81-29980
Rotor-tip leakage. II - Design optimization through viscous analysis and experiment
[ASME PAPER 81-GT-72] p0313 A81-29981
LEAR JET AIRCRAFT
Lear fan propulsion system
[SAE PAPER 800609] p0062 A81-15332
Aircraft accident report: Champion Home Builders company, Gates Learjet 25B, N999HG, Sanford, North Carolina, September 8, 1977

Angle of attack - Its measurement and usage. I
p0149 A81-19799
Experimental development of an advanced
circulation control wing system for Navy STOL
aircraft
[AIAA PAPER 81-0151] p0161 A81-20632
An approximate analytical method for vortex-lift
and centre of pressure on the slender wing
p0223 A81-23726
On the unsteady wake-induced lift on a slotted
airfoil. II - The influence of displacement
thickness fluctuations
p0229 A81-24237
Wing flapping with minimum energy
p0283 A81-27889
The effect of jet non-uniformity on the lift of an
augmentor wing
p0298 A81-29144
Wing-body carryover at supersonic speeds with
finite afterbodies
p0354 A81-31622
Quiet propulsive-lift technology ready for civil
and military applications
p0359 A81-32521
A comparison of propulsion systems for V/STOL
supersonic combat aircraft
[SAE PAPER 801141] p0398 A81-34171
Spanwise lift distribution of forward-and
aft-swept wings in comparison to the optimum
distribution form
p0453 A81-38017
Aerodynamic features of designed strake-wing
configurations
[AIAA PAPER 81-1214] p0454 A81-38084
Quasi-hybrid airships
[AIAA 81-1333] p0456 A81-38538
The calculation of lift and drag characteristics
of subsonic wings with winglets
p0480 A81-40442
Airfoils for light transport aircraft
[SAE PAPER 810576] p0519 A81-42740
Summary of high-lift and control surface research
on NASA general aviation airfoils
[SAE PAPER 810629] p0524 A81-42781
The use of direct lift control of an aircraft in a
guided landing run
p0624 A81-49928
Experimental and theoretical aerodynamic
characteristics of two hypersonic cruise
aircraft concepts at Mach numbers of 2.96, 3.96,
and 4.63
[NASA-TP-1767] p0072 N81-12021
Evaluation of Levinsky's method for the
calculation of the lift distribution on a wing
in propulsive jets
[NLR-TR-77104-U] p0073 N81-12033
Unsteady pressure distributions on airfoils in
cascade
[AD-A091173] p0090 N81-13033
The high lift characteristics in the case of the
v-wing concept
[NASA-TM-75872] p0253 N81-18061
Basic research in wake vortex alleviation using a
variable twist wing
p0267 N81-19050
An asymptotic unsteady lifting-line theory with
energetics and optimum motion of
thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Design and experimental results for a
natural-laminar-flow airfoil for general
aviation applications
[NASA-TP-1861] p0423 N81-24022
Comparison of selected lift and sideslip
characteristics of the Ayres Thrush S2R-800,
winglets off and winglets on, to full-scale
wind-tunnel data
[NASA-CR-165710] p0423 N81-24026
An engineering method for estimating the induced
lift on V/STOL aircraft hovering in and out of
ground effect
[AD-A098509] p0441 N81-25069
Prediction of transonic flutter for a
supercritical wing by modified strip analysis
and comparison with experiment
[NASA-TM-83126] p0445 N81-25432
Preliminary design of a tip-jet-driven heavy lift
helicopter incorporating circulation control
[AD-A099192] p0486 N81-26120
Evaluation of Ting's method for the calculation of
the lift distribution on a wing in propulsive jets
[NLR-TR-80078-U] p0594 N81-31157
LIFT AUGMENTATION
Circulation Control Wing /CCW/ flight tests
p0122 A81-19469
An analytical solution of lift loss for a round
planform with a central lifting jet
[AIAA PAPER 81-0011] p0157 A81-20535
Some recent applications of high-lift
computational methods at Boeing
[AIAA PAPER 81-1657] p0534 A81-43940
Lift-enhancing surfaces on several advanced V/STOL
fighter/attack aircraft concepts
[AIAA PAPER 81-1675] p0534 A81-43946
Downwash calculation at close range behind a
trapezoidal wing in supersonic flow
[FFA-TN-AU-1661] p0125 N81-13925
Feasibility study for C-141B reduction of wing
loads by uprigging the ailerons
[AD-A094634] p0272 N81-19105
High lift technology
p0593 N81-31147
Evaluation of pressure and thermal data from a
wind tunnel test of a large-scale, powered, STOL
fighter model

Design, analyses, and model tests of an
aeroelastically tailored lifting surface
[AIAA PAPER 81-1673] p0566 A81-45974
A higher-order trapezoidal vector vortex panel for
subsonic flow
[AD-A094775] p0263 N81-19032
A study of high-altitude manned research aircraft
employing strut-braced wings of high-aspect-ratio
[NASA-CR-159262] p0333 N81-20067

A design of multi-element aerofoils for high lift
[NAL-TR-631] p0337 N81-21012
An asymptotic unsteady lifting-line theory with energetics and optimum motion of thrust-producing lifting surfaces
[NASA-CR-165679] p0305 N81-23035
Experimental and theoretical study of three interacting, closely-spaced, sharp-edged 60 deg delta wings at low speeds
[NASA-CR-3460] p0635 N81-33160
LIFT DISTRIBUTION
U FORCE DISTRIBUTION
U LIFT
LIFT DRAG RATIO
Calculation of the lift dependent drag polar of cambered fighter plane configurations with deflected maneuver flaps in the subsonic region by means of a modified procedure according to Lamar
[DGLR PAPER 80-109] p0120 A81-19395
The optimal lift-drag ratio of a civil aircraft
[AAAF PAPER NT 80-35] p0369 A81-33923
Jet wing interaction to give improved combat performance
p0188 N81-16007
A study of wing body blending for an advanced supersonic transport
p0244 N81-17987
Analytic development of improved supersonic cruise aircraft based on wind tunnel data
p0244 N81-17989
Preliminary wind-tunnel investigation of the effects of engine nacelles on a transport configuration with high lift drag ratios to a Mach number of 1.00
[NASA-TM-82312] p0272 N81-19099
LIFT FANS
A design analysis technique for evaluating size and weight of V/STOL lift fans
[SAWE PAPER 1386] p0354 A81-31402
LIFT FORCES
U LIFT
LIFTING BODIES
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
A nonlinear, discrete-vortex-perturbation method for unsteady lifting-surface problems with edge separations
p0058 A81-14394
A lifting surface theory for the sound generated by the interaction of velocity disturbances with a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
An analysis of gap effects on wing-elevon aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-20783
Lifting surface theory and the numerical method of wings with small angles of sideslip at subsonic and supersonic speeds
p0224 A81-23851
On the inter-relationship of the basic parameters and characteristics of various flight vehicles
p0236 A81-25694
On some methods of supersonic unsteady lifting surface analysis
[AIAA 81-0644] p0307 A81-29497
A hybrid state vector approach to aeroelastic analysis with application to composite lifting surfaces
[AIAA 81-0626] p0308 A81-29512
A theoretical treatment of lifting surface theory of an elliptic wing
p0347 A81-30653
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 1: Aeroelastic effects
[AD-A091674] p0129 N81-13955
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 2: Aerodynamic effects

LIQUID AMMONIA
NT LIQUID FUELS
LIQUID ATOMIZATION
Droplet breakup regimes and criteria for their existence
p0614 A81-48079
LIQUID CHROMATOGRAPHY
Quality assurance of an epoxy resin prepreg using HPLC
p0531 A81-43642
The 1H and 13C fourier transform NMR characterization of jet fuels derived from alternate energy sources
[AD-A098305] p0437 N81-24284
Chromatographic separation of conventional and experimental fuels
[AD-A101673] p0586 N81-30282
LIQUID COOLING
NT FILM COOLING
Application of water cooling for improved gas turbine fuel flexibility and availability
[ASME PAPER 81-GT-68] p0313 A81-29977
Heat pipe avionic cooling
p0326 A81-30343
Control of particulate emissions from turbine engine test cells by cooling water injection
p0453 A81-37796
LIQUID CRYSTALS
The application of liquid crystals in experimental aerodynamics
p0238 A81-26123
Advancement on visualization techniques
[AGARD-AG-255] p0211 N81-17063
Flat panel display technology review
p0211 N81-17065
Liquid crystal displays
p0212 N81-17068
Investigation of the use of liquid crystal thermography to study flow over turbomachinery blades
[AD-A097289] p0391 N81-23089
LIQUID DROPS
U DROPS (LIQUIDS)
LIQUID FUELS
A comparison of two droplet models for gas-turbine combustion chamber flows
p0294 A81-29086
Some factors affecting altitude relighting performance of turbojet engine combustor
[ASME PAPER 81-GT-49] p0312 A81-29962
Modified Brayton cycles utilizing alcohol fuels
[ASME PAPER 81-GT-103] p0315 A81-30009
Some advantages of methane in an aircraft gas turbine
[SAE PAPER 801154] p0398 A81-34177
Semi-empirical analysis of liquid fuel distribution downstream of a plain orifice injector under cross-stream air flow
[AIAA PAPER 81-1467] p0505 A81-40807
Ignition of a liquid fuel
[AD-A089295] p0030 N81-10128
Chromatographic separation of conventional and experimental fuels
[AD-A101673] p0586 N81-30282
LIQUID HYDROGEN
NT LIQUID FUELS
On the utilization of hydrogen as a fuel for gas turbine. I - On the utilization of low temperature exergy of liquid hydrogen
p0055 A81-14075
Status of the program to develop LH2 for aircraft
[SAE PAPER 801153] p0407 A81-34244
Alternative aircraft fuels - When will the action start
p0465 A81-39987
LIQUID OXYGEN
Contaminant increase in aircraft liquid oxygen converters: Analysis of data
[AD-A090975] p0092 N81-13049
LIQUID PROPELLANT ROCKET ENGINES
Hydrodynamic modelling of the starting process in liquid-propellant engines
p0351 A81-31287
LIQUID ROCKET PROPELLANTS
NT LIQUID FUELS
NT SLURRY PROPELLANTS
LIQUID ROTATION
U ROTATING LIQUIDS
LIQUID SLOSHING
Damping in the problem of natural vibrations of an elastic system with internal resonance
p0236 A81-25696
LIQUID-GAS MIXTURES
NT FOG
LIQUID-SOLID INTERFACES
Drag reduction of an oscillating flat plate with an interface film
p0239 A81-26504
LIQUIDS

LOGISTICS
Commercial engine logistics cost projections - A dynamic and flexible approach
[ASME PAPER 81-GT-114] p0315 A81-30018
Container Life Adapter-Helicopter (CLAH) operational prototype (preproduction) militarized units for flight evaluation and operational testing
[AD-A089794] p0035 N81-11034
Design to life cycle cost research
p0045 N81-11907
Testing aircraft instruments
[AD-A095680] p0334 N81-20075
Weapons system support resources demand parameters - logistics
[AD-A097517] p0394 N81-23937

LOGISTICS MANAGEMENT
NT INVENTORY CONTROLS
NT INVENTORY MANAGEMENT
Avionic architectural standardisation - logistic support perspective
p0050 A81-13171
Determination of cargo container inventories through logistics simulation --- for air shipment
p0616 A81-48380
An analysis of Air Force management of Turbine Engine Monitoring Systems (TEMS)
[AD-A089365] p0028 N81-10070
Digital Avionics Information System (DAIS): Life Cycle Cost Impact Modeling System (LCCIM). A managerial overview
[AD-A093201] p0211 N81-17062
Turbine engine fault detection and isolation program, phase 1. Volume 2: Requirements definition for an integrated engine monitoring system
[AD-A093226] p0215 N81-17068

Application of scheduling heuristics on the aircraft maintenance depot
[AD-A098815] p0261 N81-19015
Aircraft modification management evaluation
[AD-A096458] p0381 N81-22974
F-16 integrated logistics support: Still time to consider economical alternatives
[PB81-137473] p0389 N81-23079
NAVAIR Avionics Master Plan
[AD-A097522] p0389 N81-23082
Development of maintenance METRICS to forecast resource demands of weapon systems (parameter polarization), revision A
[AD-A097692] p0392 N81-23325
Operational and support costs of the Navy's F/A-18 can be substantially reduced
[PB81-160814] p0487 N81-26125
A study of the factors affecting productivity at the Naval Air Rework Facilities
[AD-A103783] p0631 N81-33134
A prescriptive model for resource allocation at the intermediate level engine facility
[AD-A103785] p0632 N81-33135
Development of maintenance metrics to forecast resource demands of weapon systems
[AD-A104089] p0632 N81-33136

LONG RANGE NAVIGATION
U LORAN

LONG TERM EFFECTS
Effects of commercial aircraft operating environment on composite materials
p0182 A81-22681
Environmental exposure effects on composite materials for commercial aircraft
[NASA-CR-165649] p0198 N81-16139

LONGITUDINAL CONTROL
A stability augmentation system which covers the complete flight envelope for a F-4c aircraft without gain scheduling
p0009 A81-11622
Piloting techniques on the backside - Flight path angle control
p0171 A81-21673
Analysis of aircraft longitudinal handling qualities
[AIAA 81-1771] p0554 A81-44092
Longitudinal equivalent systems analysis of Navy tactical aircraft
[AIAA 81-1775] p0554 A81-44094
Modern control synthesis applied to the longitudinal decoupled motion of an aircraft
[AIAA 81-1839] p0555 A81-44123
Closed-loop criteria for assessing longitudinal-axis handling qualities of transports in final approach
[AIAA 81-1773] p0556 A81-44133
A unifying framework for longitudinal flying qualities criteria
[AIAA PAPER 81-1889] p0561 A81-44580
Inverse problems of guided-flight dynamics - Longitudinal motion
p0577 A81-46749
Landing flying qualities evaluation criteria for augmented aircraft
[NASA-CR-163097] p0130 N81-13969
Application of vector performance optimization to a robust control loop design for a fighter aircraft
[DFVLR-FB-80-14] p0130 N81-13970
System identification of the longitudinal motion of the DFVLR HFB 320 research aircraft with particular consideration of control surface effectiveness
[DFVLR-MITT-79-16] p0130 N81-13971
Pitch attitude stabilization system utilizing engine pressure ratio feedback signals
[NASA-CASE-LAR-12562-1] p0490 N81-26152
Determination of low-speed longitudinal maneuvering criteria for transport aircraft with advanced flight control systems
[NLR-TR-79127-U] p0498 N81-27118
Subsonic pitch-up alleviation on a 74 deg delta wing
[NASA-CR-165749] p0584 N81-30137
Simulator evaluation of the effects of reduced spoiler and thrust authority on a decoupled longitudinal control system during landings in wind shear
[NASA-TM-83188] p0639 N81-33211

LONGITUDINAL STABILITY
Longitudinal motion of low-flying vehicles in nonlinear flowfields
p0009 A81-11626
Longitudinal instability in braked landing gear
[ASME PAPER 80-WA/DSC-12] p0170 A81-21083
Dynamics of longitudinal motion of a variable-sweepback aeroplane with a deformable control system
p0231 A81-24722
Aircraft stability at high incidence
p0282 A81-27878
A hybrid composite horizontal stabilizer for the XH-2/CCW Flight Demonstrator Aircraft
[AHS 80-35] p0476 A81-40164
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
Application of reduced natural longitudinal stability in the Airbus program
[DGLR PAPER 81-062] p0610 A81-47609
Aerodynamics, aeroelasticity, and stability of hang gliders. Experimental results --- Ames 7- by 10-ft wind tunnel tests
[NASA-TM-81269] p0423 N81-24025

LORAN
RT LORAN C
Omega - An economic Loran A replacement
p0113 A81-18077
Recommended short-term ATC improvements for helicopters. Volume 3: Operational description of experimental LORAN-C flight following (LOFF) in the Houston area
[AD-A089385] p0024 N81-10030
Proposed ATC system for the Gulf of Mexico: Helicopter operations development program
[AD-A089430] p0025 N81-10036
Preliminary test plans of ATC concepts for longer term improvement helicopter development program
[AD-A089407] p0025 N81-10037
DMAHTC's support to National Ocean Survey LORAN-C-charting
[AD-A093748] p0206 N81-17027
Production of LORAN-C reliability diagrams at the Defense Mapping Agency
[AD-A093749] p0206 N81-17028

LORAN C
Flight test investigation of LORAN-C for civil aviation applications
p0512 A81-41762
Evaluation of LORAN-C for non-precision approach applications
p0512 A81-41763
Evaluation of Loran-C for enroute navigation and non-precision approach within the state of Vermont
p0516 A81-42433
Flight test investigation of LORAN-C for en route navigation in the Gulf of Mexico
[AD-A091637] p0128 N81-13945
DC-to-DC power supply for light aircraft flight testing
[NASA-CR-163850] p0141 N81-14989
Evaluation of the performance of the Remote Area Precision Positioning System (RAPPS)
[AD-A094169] p0250 N81-18036
Use of Loran-C for general aviation aircraft navigation
p0371 N81-22002
An analysis of the adaptability of Loran-C to air navigation
p0371 N81-22003
Results of a Loran-C flight test using an absolute data reference --- vhf omnirange navigation system and discrete address beacon system
p0371 N81-22006
Microcomputer processing for Loran-C
p0371 N81-22007

LOUDNESS
Community reaction to impulse noise: Initial Army survey
[AD-A101674] p0588 N81-30659

LOW ALLOY STEELS
U HIGH STRENGTH STEELS

LOW ALTITUDE
Low level, adverse attitude escape using a vertical seeking ejection seat
p0176 A81-22098
A new approach to low speed-low height testing and flight manual data presentation
p0471 A81-40119

Impact of low altitude coverage requirements on air-ground communications
[AD-A101642] p0586 N81-30338

LOW ASPECT RATIO
High-lift investigations on some small aspect ratio wings
p0011 A81-11643
Coriolis effect on the vibration of flat rotating low aspect ratio cantilever plates
p0348 A81-30914

LOW ASPECT RATIO WINGS
NT DELTA WINGS
NT TRAPEZOIDAL WINGS
Determination of the vorticity of a small-aspect-ratio wing in hypersonic flow
p0054 A81-13544
On the theory of a wing with small aspect ratio in a hypersonic flow
p0309 A81-29860
Determination of the vorticity on a wing of small aspect ratio in a hypersonic stream
p0411 A81-35660
Analytical estimation on nonlinear longitudinal characteristics of wings with small and moderate aspect ratio by the vortex lattice method in incompressible flow
[ESA-TT-585] p0022 N81-10018
The high lift characteristics in the case of the v-wing concept
[NASA-TM-75872] p0253 N81-18061

LOW COST
ECS integration for fuel efficient/low life cycle cost design --- Environmental Control Systems in aircraft
p0015 A81-11676
Low cost technology for expendable RPV applications
p0049 A81-12795
Commuter turboprop propulsion technology
[SAE PAPER 801243] p0406 A81-34239
Low cost start-up for rigid-pressure airship
[AIAA 81-1337] p0457 A81-38541
Design concepts for low-cost composite turbofan engine frame
[NASA-CR-165217] p0376 N81-22053

LOW FREQUENCIES
NT VERY LOW FREQUENCIES
Low-frequency radio navigation for the Army's Mobile Automated Field Instrumentation System /MAFIS/
p0517 A81-42437
Low-frequency radio navigation system
[NASA-CASE-NPO-15264-1] p0373 N81-22036

LOW FREQUENCY BANDS
NT VERY LOW FREQUENCIES
A Kalman filter approach to navigation on the NAE Convair 580 aeromagnetics research aircraft
[AD-A100836] p0547 N81-29116

LOW LEVEL TURBULENCE
Wind shear effects on aircraft - Low-level shear and clear-air turbulence as accident causes
p0067 A81-16136
Microbursts as an aviation wind shear hazard
[AIAA PAPER 81-0386] p0167 A81-20798
Effect of contraction on screen-generated turbulence
p0284 A81-27900
Wind shear detection - Automatic alerting system for airport applications
p0412 A81-35771

LOW PRESSURE
NT HIGH ALTITUDE PRESSURE
Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594

LOW SPEED
Air augmentation of rockets for low speed application
p0292 A81-29068
Stability and flutter analysis of turbine blades at low speed
p0612 A81-47959
A computer program for the design and analysis of low-speed airfoils, supplement
[NASA-TM-81862] p0125 N81-13921
A study of a VTOL thrusting ejector in low speed flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017
A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018
Determination of low-speed longitudinal maneuvering criteria for transport aircraft with advanced flight control systems
[NLR-TR-79127-U] p0490 N81-27118

LOW SPEED STABILITY
A method of helicopter low airspeed estimation based on measurement of control parameters
[MBB-UD-276-79-O] p0018 A81-12094
Concerning Khristianovich's transformation of a subsonic flow past an airfoil into a low-speed flow
p0349 A81-31045
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters
p0470 A81-40111
An empirical prediction method for helicopter performance in low speed level flight and in vertical and forward flight climbs
p0471 A81-40118
A new approach to low speed-low height testing and flight manual data presentation
p0471 A81-40119
Flight tests and statistical data analysis for flying qualities investigations
p0471 A81-40121
Equivalent system analysis of translation rate command systems for hover and low speed flight
[AIAA PAPER 81-1858] p0560 A81-44557
Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983
Simulator investigation of arrow-wing low-speed handling qualities
p0246 N81-17993
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters --- hingeless rotor helicopters
[MBB-UD-306/80-OE] p0584 N81-30139

LOW SPEED WIND TUNNELS
NT SUBSONIC WIND TUNNELS
Low-speed airfoil section research at Delft University of Technology
p0010 A81-11636
High-lift investigations on some small aspect ratio wings
p0011 A81-11643
Roll and spin measurements in the low speed wind tunnel at Braunschweig
p0065 A81-15704
Flow visualization through the use of the smoke-wire technique
[AIAA PAPER 81-0412] p0160 A81-20816
Low-speed wind tunnels with deformable walls
p0299 A81-29304
Evaluation of the influence of local disturbances of flow past trailing and leading flaps from wind tunnel data on a rectangular wing section
p0299 A81-29307
Subcritical flutter and oscillatory pressure testing of a full-scale 727 inboard aileron in a low-speed wind-tunnel
[AIAA 81-0656] p0308 A81-29508
Wind tunnel test results of a new leading edge flap design for highly swept wings, a vortex flap
p0243 N81-17986

LOW TEMPERATURE
Behavior of fuels at low temperatures
[AD-A100332] p0542 N81-28276

LOW THRUST PROPULSION
Hydrogen fueled catalytic combustion for low thrust expendable turbojet engine
[AIAA PAPER 81-1715] p0527 A81-43165

LOW TURBULENCE
Experimental investigation into the reaction of a boundary layer to external periodic disturbances
p0309 A81-29866

LOW VELOCITY
U LOW SPEED

LOW VISIBILITY
A head-up display for low-visibility approach and landing
[AIAA PAPER 81-0130] p0161 A81-20623
Landings according to CAT II
p0230 A81-24523
Low-visibility visual simulation with real fog
[AIAA 81-0982] p0415 A81-36569
Helicopter external load acquisition technology investigation

[AD-A094672] p0272 N81-19106
LOW WEIGHT
Effect of the discharge circuit parameters on the weight, dimensions, and energy characteristics of the power supply source --- aircraft equipment p0288 A81-28574

LOW WING AIRCRAFT
Equilibrium spinning of a typical single-engine low-wing light aircraft p0354 A81-31598
A geometrical study of the steady-state spin for a typical low-wing general aviation aircraft p0454 A81-38023

LOWER ATMOSPHERE
NT OZONOSPHERE
NT TROPOSPHERE
LOWER BODY NEGATIVE PRESSURE (LBNP)
U ACCELERATION STRESSES (PHYSIOLOGY)
LOX (OXYGEN)
U LIQUID OXYGEN
LSI

ASW helicopter/sonar dynamics mathematical model p0470 A81-40115

A study of the effect of aft fuselage shape on helicopter drag p0470 A81-40116

Modeling of ramjet combustors using simple reactor theory [AIAA PAPER 81-1429] p0515 A81-42196

Adaptive multivariable model following --- for aircraft control p0564 A81-45540

Spin - Angles and inertial moments p0567 A81-46023

The use of parametric cost estimating relationships as they pertain to aircraft airframes: A new perspective [AD-A089525] p0027 N81-10060

Disk residual life studies. Part 2: TF30 10th-stage compressor disk (INCOLOY 901) [AD-A089524] p0029 N81-10074

A method of performance prediction for centrifugal compressors. Part 1: Analysis. Part 2: Comparison with experiment [ARC-R/M-3843] p0031 N81-10436

Predictability of moisture absorption in graphite/epoxy sandwich panels p0039 N81-11131

Transducer installation for the Sea King MK 50 mathematical model validation flight tests [AD-A089924] p0043 N81-11365

An analytical technique for approximating unsteady aerodynamics in the time domain [NASA-TP-1738] p0043 N81-11422

Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation [AD-A090331] p0072 N81-12026

Multivariable identification using centralized fixed modes p0079 N81-12091

Mixing and combustion in high speed air flows [AD-A090536] p0083 N81-12192

The implications of alternative aviation fuels on airbase air quality [AD-A090283] p0087 N81-12652

Transonic rotor noise - theoretical and experimental comparisons [AD-A090806] p0088 N81-12824

The response of turbine engine rotors to interference rubs [AD-A090408] p0093 N81-13060

A contribution to stabilization of flight vehicle parachute systems [DFVLR-MITT-80-05] p0126 N81-13926

Service life determination for the UH-60-A (UTTAS) helicopter elastomeric bearings [AD-A091756] p0134 N81-14324

An analytic model of subsonic flow around an airflow with a spoiler p0138 N81-14966

Application of transonic potential calculations to aircraft and wind tunnel configurations p0186 N81-15992

Sample data effects of high-pass filters [NASA-TP-1797] p0193 N81-16040

Propulsion system mathematical model for a lift/cruise fan V/STOL aircraft [NASA-TM-81663] p0195 N81-16055

Validation of a two dimensional primitive variable computer code for flow fields in jet engine test cells [AD-A092138] p0196 N81-16060

Demonstration of a method for determining critical store configurations for wing store flutter [AD-A092257] p0197 N81-16068

Evaluation of bird load models for dynamic analysis of aircraft transparencies [AD-A092909] p0204 N81-16995

Air traffic control simulation models. Citations from the NTIS data base [PB81-800104] p0207 N81-17037

A method for the prediction of wing response to nonstationary buffet loads [AD-A093037] p0208 N81-17043

Modeling, acquisition and processing during large displacements --- associated with experiments in flight mechanics [AAAF-NT-80-16] p0210 N81-17056

Analysis and modeling of information handling
tasks in supervisory control of advanced aircraft
[AD-A092906] p0211 N81-17061
Turbine modeling technique to generate off-design
performance data for both single and multistage
axial-flow turbines
[NASA-CR-165244] p0213 N81-17078
Combustor liner durability analysis
[NASA-CR-165250] p0213 N81-17079
Active controls for flutter suppression and gust
alleviation in supersonic aircraft --- YF-17
flutter model
[NASA-CR-163934] p0216 N81-17097
Continued development and correlation of
analytically based weight estimation codes for
wings and fuselages
[NASA-CR-152331] p0251 N81-18044
Research in multirate estimation and control
[AD-A094070] p0253 N81-18062
Analytical prediction of the interior noise for
cylindrical models of aircraft fuselages for
prescribed exterior noise fields. Phase 1:
Development and validation of preliminary
analytical models
[NASA-CR-159363] p0258 N81-18799
Math model study, runway 16R instrument landing
system localizer at Seattle-Tacoma Airport,
Washington
[AD-A095076] p0270 N81-19085
Development of advanced techniques for rotorcraft
state estimation and parameter identification
[NASA-CR-159297] p0271 N81-19098
Leading-edge separation from a slender rolling
wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
Optimum manoeuvers of supersonic aircraft, volumes
1 and 2
p0332 N81-20060
Extended frequency turbofan model
[NASA-CR-165261] p0335 N81-20078
Sea King mathematical model validation trials.
Flight data channel calibration
[AD-A096587] p0374 N81-22043
The development of a theoretical and experimental
model for the study of active suppression of
wing flutter
p0376 N81-22058
SCI model structure determination program (OSR)
user's guide --- optimal subset regression
[NASA-CR-159084] p0380 N81-22725
An evaluation of a simplified near field noise
model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836
MLS: Airplane system modeling
[NASA-CR-165700] p0386 N81-23059
An airport community noise-impact assessment model
[NASA-TM-80198] p0393 N81-23713
Continued research on selected parameters to
minimize community annoyance from airplane noise
[NASA-CR-164299] p0438 N81-24602
Semi-actuator disk theory for compressor choke
flutter
[NASA-CR-3426] p0442 N81-25075
A mathematical model for Vertical Attitude Takeoff
and Landing (VATOL) aircraft simulation. Volume
1: Model description application
[NASA-CR-166129-VOL-1] p0538 N81-28084
A mathematical model for Vertical Attitude Takeoff
and Landing (VATOL) aircraft simulation. Volume
2: Model equations and base aircraft data
[NASA-CR-166129-VOL-2] p0538 N81-28085
A mathematical model for Vertical Attitude Takeoff
and Landing (VATOL) aircraft simulation. Volume
3: User's manual for VATOL simulation program
[NASA-CR-166129-VOL-3] p0538 N81-28086
Optimization of strategic airlift in flight
refueling
[AD-A101137] p0539 N81-28090
An investigation of the linear and angular
vibration environments of trials aircraft
p0545 N81-29087
Investigation of high-angle-of-attack
maneuver-limiting factors. Part 3: Appendices,
aerodynamic models
[AD-A101648] p0581 N81-30115
The effect of boundary layer growth on the
stability of compressible flows
p0587 N81-30389
Computer modeling of internal combustion engines:
Combustion and related processes
[NTS/79/3] p0587 N81-30454
Aerodynamic mathematical modeling - basic concepts
p0590 N81-31106
A model-following technique for insensitive
aircraft control systems
p0600 N81-31223
Sting interference effects on the static dynamic
and base pressure measurements of the standard
dynamics model aircraft at Mach numbers 0.3
through 1.3
[AD-A102612] p0627 N81-32124
Simplified off-design performance model of a day
turbofan engine cycle
[NASA-TM-83204] p0639 N81-33206
MATHEMATICAL PROGRAMMING
NT DYNAMIC PROGRAMMING
NT LINEAR PROGRAMMING
NT NONLINEAR PROGRAMMING
Discrete-continuous variable structural synthesis
using dual methods

MILITARY OPERATIONS
NT COMBAT
Planning for and evaluating the potential of a land based aircraft for carrier operations
p0122 A81-19470
Aerodynamic trials with the linear motor-driven platform at the Toulouse Aeronautic Testing Center --- for aircraft acceleration and deceleration tests
[AAAF PAPER NT 80-41] p0369 A81-33943
AV-8B operational features for rapid deployment
[SAE PAPER 801228] p0405 A81-34231
MATASS/LAMPS MK III --- Moored Airship Towed Array Sonar System/Light Airborne Multipurpose System
[AIAA 81-1309] p0455 A81-38527
More fight for the Fighting Falcon
p0622 A81-49075
An assessment of technical factors influencing the potential use of RPVS for minefield detection
[AD-A092682] p0194 N81-16047
Air Force and Navy plans to acquire trainer aircraft
[AD-A096237] p0342 N81-21072
The Impact of Military Applications on Rotorcraft and V/STOL Aircraft Design
[AGARD-CP-313] p0632 N81-33137
Vertical lift capabilities for the 80's and 90's
p0632 N81-33139
Ten years of US Marine Corps Harrier operations
p0632 N81-33140
Controls and displays for all-weather operation of helicopters
p0633 N81-33145

MILITARY TECHNOLOGY
Head-up displays. III
p0005 A81-11320
Low cost technology for expendable RPV applications
p0049 A81-12795
History and prospects for mini-RPVs and drones
p0049 A81-12797
Advanced Attack Helicopter /YAH-64/ - Status report
p0099 A81-16580
Head-Up-Display flight tests
p0099 A81-16582
Measurement of radar in radio service aircraft
p0151 A81-20079
A case study - Real time simulation and structured design
p0172 A81-21721
Development of the first ram air emergency parachute for personnel applications
p0174 A81-22078
Ejection system evolution
p0175 A81-22080
QF-100 Full-Scale Aerial Target program
p0179 A81-22612
A low cost multiple drone command and tracking system
p0179 A81-22613
A distributed airborne surveillance system
p0180 A81-22618
Superconducting generator design for airborne applications
p0241 A81-26662
Offensive avionics system /OAS/ design
p0321 A81-30259
The USAF Armament Division Structural Dynamics Lab
p0347 A81-30689
An X-band power GaAs FET amplifier for military avionics radar applications
p0350 A81-31122
Development and applications of MIL-STD-1553 --- for avionics data buses
[SAE PAPER 801142] p0398 A81-34172
U.S. Navy/USAF development of Tactical Aircrew Combat Training System/Air Combat Maneuvering Instrumentation /TACTS/ACMI/
[SAE PAPER 801183] p0401 A81-34196
New hydraulic system technology for future aircraft
[SAE PAPER 801188] p0401 A81-34200
The development of a lightweight aircraft towing tractor
[SAE PAPER 801237] p0405 A81-34235
Coming challenge - Integrating the technologies for forward-swept-wing fighters
p0420 A81-37522
Topside weapons release - An analytical study
[AIAA PAPER 81-1655] p0533 A81-43939
Military aircraft technology - Needs and trends for the 80's
[AIAA PAPER 81-1691] p0535 A81-43952
Survivors on the RPV front
p0577 A81-46725
Combat cockpit design
p0622 A81-49173
US Army design-to-cost experience
p0045 N81-11905
Air Force technical objective document FY 1981
[AD-A089709] p0048 N81-12010
Navstar field test results
p0484 N81-26100
US military V/STOL: Who needs it? Wants it? Can afford it?
p0634 N81-33156

MILITARY VEHICLES
Soviet military air cushion vehicles - Mechanised amphibious assault
p0577 A81-46714

MILLIMETER WAVES
LPI, short-range communications between aircraft
in rendezvous --- Low Probability of Intercept
p0177 A81-22493

MINERALS
NT GRAPHITE
MINES (ORDNANCE)
An assessment of technical factors influencing the
potential use of RPVS for minefield detection
[AD-A092682] p0194 N81-16047
MINIATURE ELECTRONIC EQUIPMENT
Tactical miniature crystal oscillator
[AD-A098490] p0440 N81-25058
MINIATURIZATION
NT MICROMINIATURIZATION
Mini-RPV radar test program
p0180 A81-22619

MINICOMPUTERS
Weights information systems using minicomputers
[SAWE PAPER 1347] p0353 A81-31385
AIRCAT 500 ATC systems for Australia and Mexico
p0407 A81-34329
A simulation approach to MIL-STD-1553 Multiplex
Bus interfacing
[AIAA 81-0971] p0415 A81-36560
An economical approach to automated flight test
data reduction
p0576 A81-46643

MINIMIZATION
U OPTIMIZATION
MIRAGE AIRCRAFT
NT MIRAGE 3 AIRCRAFT
Mirage 2000, a totally multi-purpose aircraft
p0419 A81-37166
Mirage 2000 and Mirage 4000 fiber structures
[AAAF-NT-79-48] p0083 N81-12183
Limiting application of the concept 'damage
tolerance' with regard to fighter aircraft
[AAAF-NT-79-32] p0210 N81-17054
The specification of development tests for the
engine of a combat aircraft --- engines for the
Mirage 2000 and 4000 aircraft
p0430 N81-28082
The interface arrangement of digibus systems ---
Mirage 2000 aircraft
p0545 N81-29084
MIRAGE 3 AIRCRAFT
Application of BFRP Crack Patching to Mirage III
aircraft
p0481 A81-40586
MIRRORS
NT SOLAR COLLECTORS
Figure control of flexible structures - Optical
surfaces of thin deformable primary mirrors
p0060 A81-14994
MISALIGNMENT
An analytical method to calculate misalignment in
the journal bearing of a planetary gear system
p0004 A81-10839
MISCIBILITY
U SOLUBILITY
MISORIENTATION
U MISALIGNMENT
MISS DISTANCE
The collision course: Conditions, guidance laws
and properties
[DFVLR-FB-80-06] p0127 N81-13942
Velocity tolerance of escape systems
[AD-A096881] p0373 N81-22035
Gun harmonisation using the sector acoustic miss
distance indicator
p0544 N81-29074
MISSILE BODIES
Aerodynamic effects of body slots on a guided
projectile with cruciform surfaces
[AIAA PAPER 79-1658] p0066 A81-15087
MISSILE CASES
U MISSILE BODIES
MISSILE COMPONENTS
NT MISSILE BODIES
MISSILE CONFIGURATIONS
Effect of wing location and strakes on stability
and control characteristics of a monoplanar
circular missile with low-profile tail fins at
supersonic speeds
[NASA-TM-81878] p0186 N81-15978
Aerodynamic subsonic/transonic aircraft design
studies by numerical methods
p0187 N81-15999

Application of the joined wing to cruise missiles
[AD-A096450] p0441 N81-25068
MISSILE CONSTRUCTION
U MISSILE STRUCTURES
MISSILE CONTROL
Computer-aided methods for redesigning the
stabilized pitch control system of a semi-active
thermal homing missile
p0051 A81-13250
Design of guidance and control digital autopilots
p0183 A81-22973
Forward looking infrared /FLIR/ image enhancement
for the automatic target cuer system
p0461 A81-39335
Autopilot design via improved discrete modal control
[AIAA 81-1777] p0554 A81-44095
Boost-glide range-optimal guidance
[AIAA 81-1781] p0554 A81-44096
Vortex bursting on slender delta wings in
transonic flow and its influence on missile
aerodynamic characteristics
[DGLR PAPER 81-047] p0611 A81-47622
Missile motion sensitivity to dynamic stability
derivatives
[AD-A089750] p0038 N81-11093
The collision course: Conditions, guidance laws
and properties
[DFVLR-FB-80-06] p0127 N81-13942
Auto-adaptive piloting --- of missiles
[GA-380] p0217 N81-17102
Dynamic Stability Parameters --- conferences
[AGARD-LS-114] p0590 N81-31105
Impact of high-alpha aerodynamics on dynamic
stability parameters of aircraft and missiles
p0590 N81-31107
Rotary and Magnus balances
p0591 N81-31111
Analytical determination of dynamic stability
parameters
p0592 N81-31117

MISSILE DEFENSE
General Electric infrared suppressors for the
Black Hawk helicopter
p0106 A81-17520
MISSILE DESIGN
Computer-aided methods for redesigning the
stabilized pitch control system of a semi-active
thermal homing missile
p0051 A81-13250
Wing-alone aerodynamic characteristics at high
angles of attack
[AIAA PAPER 81-0008] p0157 A81-20532
A computer-aided design system geared toward
conceptual design in a research environment ---
for hypersonic vehicles
[AIAA PAPER 81-0372] p0166 A81-20789
Autopilot design via improved discrete model control
[AIAA 81-1777] p0554 A81-44095

Spin - Angles and inertial moments p0567 A81-46023
MOMENTUM ENERGY
U KINETIC ENERGY

MOMENTUM THEORY
An extension of the local momentum theory to a distorted wake model of a hovering rotor
[NASA-TM-81258] p0329 N81-20030
MOMENTUM TRANSFER
Vertical momentum of the fountain produced by multijet vertical impingement on a flat ground plane
p0529 A81-43396
MONITORS
NT INFRARED RADIOMETERS
Turbine engine fault detection and isolation program, phase 1. Volume 1: Requirements definition for an integrated engine monitoring system
[AD-A093225] p0215 N81-17089
Simulation and control engineering studies of NASA-Ames 40 foot by 80 foot/80 foot by 120 foot wind tunnels
[NASA-CR-152145] p0276 N81-19136
Structural Integrity recording System (SIRS) for U.S. Army AH-1S helicopters
[AD-A098236] p0427 N81-24060
Application of an in-line contamination monitoring unit to the AHT-64 Hydraulic Test Stand
[AD-A100696] p0550 N81-29140

MOVING TARGET INDICATORS
Time-compressed displays for target detection
p0064 A81-15686
Detection of moving objects --- Russian book
p0118 A81-18773
Target detection and parameter estimation in surveillance radars using MTI-FFT processing
p0152 A81-20094
Detection of direction changes of flying targets from position coordinates of the radar data
p0152 A81-20099
Mini-RPV radar test program
p0180 A81-22619
An MTI /moving target indicator/ algorithm for passive sensors
p0320 A81-30239
Ground moving target radar signal simulation
p0323 A81-30304
Moving target identification /MTI/ algorithm for passive sensors
p0359 A81-32502
MRCA AIRCRAFT
Back to basics - The philosophy adopted for the flight testing of the Panavia Tornado avionics system in hack aircraft
p0282 A81-27881
RB.199 - Compact Tornado power
p0567 A81-46338

Structural integration as a means of cost reduction
p0046 N81-11912
TORNADO: Flight characteristics at high angles of
incidence
[MBB-FE-127/S/PUB/23] p0495 N81-27085
Fuel system testing and test instrumentation ---
MRCA aircraft
p0544 N81-29076
MTBF
The necessity of 'testing-in' hardware reliability
p0229 A81-24277
MTI RADAR
U MOVING TARGET INDICATORS
MULTI-ROLE COMBAT AIRCRAFT
U MRCA AIRCRAFT
MULTICHANNEL COMMUNICATION
IMUX - High speed communications bus
[SAE PAPER 801146] p0398 A81-34175
MULTIENGINE VEHICLES
Critical field length calculations for preliminary
design
p0183 A81-23366
Assessment of propeller influence on
lateral-directional stability of multiengine
aircraft
p0411 A81-35632
An investigation of the recovery from an engine
failure in a twin engine augmentor wing aircraft
using the NAE Airborne Simulator
p0509 A81-41199
Spin research on a twin-engine aircraft
[AIAA PAPER 81-1667] p0534 A81-43943
MULTILAYER STRUCTURES
U LAMINATES
MULTILOOP SYSTEMS
U CASCADE CONTROL
MULTIPATH TRANSMISSION
Multipath and interference effects in secondary
surveillance radar systems
p0183 A81-23359
Radio direction finding on high frequency short
duration signals
[AD-A092136] p0192 N81-16029
Active BCAS: Design and validation of the
surveillance subsystem
[AD-A095049] p0270 N81-19084
NAVTOLAND microwave scanning beam tests at NOSC.
Three landing guidance systems tested in a
specular multipath environment
[AD-A099298] p0484 N81-26086
Radar Beacon Transponder (RBX) functional
description
[AD-A100665] p0547 N81-29112
MULTIPHASE FLOW
NT TWO PHASE FLOW
Interaction of a gas jet from a jet engine with
the destroyed surface of a multiphase disperse
medium
p0319 A81-30152
QCGAT mixer compound exhaust system design and
static big model test report
[NASA-CR-135386] p0274 N81-19119
MULTIPLE ACCESS
NT TIME DIVISION MULTIPLE ACCESS
MULTIPLE TARGET TRAJECTORY SYSTEMS
U MATTS (SYSTEMS)
MULTIPLEX TRANSMISSION
U MULTIPLEXING
MULTIPLEXERS
U MULTIPLEXING
MULTIPLEXING
A multiplexed digital voice intercommunications
system for military applications
[SAE PAPER 801144] p0398 A81-34173
IMUX - High speed communications bus
[SAE PAPER 801146] p0398 A81-34175
A simulation approach to MIL-STD-1553 Multiplex
Bus interfacing
[AIAA 81-0971] p0415 A81-36560
Integrated multiplex for the Agusta A-129 attack
helicopter
p0472 A81-40131
Multiplexing in general aviation aircraft
[SAE PAPER 810570] p0519 A81-42735
The interface arrangement of digibus systems ---
Mirage 2000 aircraft
p0545 N81-29084
High speed multiplex bus protocol study
[AD-A102113] p0597 N81-31191
A multiplexed digital voice intercommunications
system compatible with future voice conversion
techniques
p0605 N81-31474
MULTIPROCESSING (COMPUTERS)
NT PIPELINING (COMPUTERS)
A fault tolerant multiprocessor system with
reconfiguration suitable for multiaxial flight
stabilization and trimming
p0118 A81-19296
A six-channel quick-look unit for the aerodynamics
division MKI airborne data acquisition package
[AD-A089975] p0043 N81-11364
Microcomputer array processor system --- design
for electronic warfare
p0044 N81-11673
Discrete Address Beacon System (DABS) computer
performance/test and evaluation
[AD-A099326] p0484 N81-26088
MULTISPECTRAL BAND SCANNERS
A solid-state airborne sensing system for remote
sensing
p0183 A81-23034
MULTISTAGE COMPRESSORS
U TURBOCOMPRESSORS
MULTIVARIATE STATISTICAL ANALYSIS
NT COVARIANCE
NT DISCRETE FUNCTIONS
NT ORTHOGONALITY
NT REGRESSION ANALYSIS
Some experiences with numerical optimisation in
aircraft specification and preliminary design
studies
p0007 A81-11609
Multivariable closed-loop analysis and flight
control synthesis for air-to-air tracking
[AD-A090050] p0037 N81-11046
A multivariate approach to handling qualities
rating scale development
[AD-A089825] p0037 N81-11047
Research in multirate estimation and control
[AD-A094070] p0253 N81-18062
MYLAR (TRADEMARK)
Design and engineering of solar balloons
p0455 A81-38333
MYSTERE 20 AIRCRAFT
Finite element method study of
wing-fuselage-nacelle interactions of a Falcon
20 type aircraft at Mach = 0.79
p0187 N81-15994

N

N-156 AIRCRAFT
U F-5 AIRCRAFT
NACELLES
Optimum subsonic, high-angle-of-attack nacelles
p0012 A81-11646
Calculation of shells in aircraft turbine engines
p0285 A81-28078
Propulsion system installation design for
high-speed prop-fans
[AIAA PAPER 81-1649] p0526 A81-43144
High-char-forming composite laminates
p0532 A81-43652
Aircraft engine nacelle fire test simulator.
Volume 1: Technical
[AD-A089629] p0030 N81-10081
Experimental and theoretical aerodynamic
characteristics of two hypersonic cruise
aircraft concepts at Mach numbers of 2.96, 3.96,
and 4.63
[NASA-TP-1767] p0072 N81-12021
The development of the composite material engine
nacelle
[AAAF-NT-79-38] p0083 N81-12180
P-3 Orion fuel-saving modification wind tunnel study
[AD-A091906] p0194 N81-16044
Aircraft EMP isolation study
[AD-A093772] p0219 N81-17333
Prediction of nacelle aerodynamic interference
effects at low supersonic Mach numbers
p0244 N81-17988
Investigation of powered nacelles on a high aspect
ratio NASA supercritical wing, phase 2 ---
Langley 8 Foot Transonic Pressure Tunnel
p0260 N81-19008
Advanced turboprop installation aerodynamics
p0260 N81-19013

Preliminary wind-tunnel investigation of the effects of engine nacelles on a transport configuration with high lift drag ratios to a Mach number of 1.00
[NASA-TM-82312] p0272 N81-19099
Design of a V/STOL propulsion system for a large-scale fighter model
[NASA-CR-166162] p0442 N81-25074
Additional testing of the inlets designed for a tandem fan V/STOL nacelle
[NASA-CR-165310] p0483 N81-26075
Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-30085
Performance retention of the RB211 powerplant in service
p0593 N81-31201

NAP-OF-THE-EARTH NAVIGATION
A pilot's assessment of helicopter handling-quality factors common to both agility and instrument flying tasks
p0471 A81-40120
A preliminary flight investigation of cross-coupling and lateral damping for nap-of-the-earth helicopter operations
p0574 A81-46626

NASA PROGRAMS
NT GLOBAL ATMOSPHERIC RESEARCH PROGRAM
NT QUIET ENGINE PROGRAM
NT SUPERSONIC CRUISE AIRCRAFT RESEARCH
NT TACT PROGRAM
NT TERMINAL CONFIGURED VEHICLE PROGRAM
NT TILT ROTOR RESEARCH AIRCRAFT PROGRAM
NASA presses fighter gains --- long-range supersonic cruise aircraft
p0002 A81-10575
The future of airfreight - NASA study looks into the next century
p0056 A81-14242
Shipboard trials of the Quiet Short-Haul Research Aircraft /QSRA/
p0099 A81-16581
A status report on NASA general aviation stall/spin flight testing
p0122 A81-19471
NASA's activities in the conservation of strategic aerospace materials
p0179 A81-22535
NASA research in aeropropulsion
[ASME PAPER 81-GT-96] p0314 A81-30003

[SAE PAPER 801120] p0396 A81-34156
NASA aeronautics R&T - A resource for aircraft design
[AIAA PAPER 81-0925] p0408 A81-34363
Recommendations for the NASA Avionics program for the 1980's
p0517 A81-42436
Progress in supersonic cruise technology
[AIAA PAPER 81-1687] p0535 A81-43950
Research and technology of the Langley Research Center
[NASA-TM-81910] p0089 N81-12977
Productivity in aerospace research and development
[NASA-TM-82388] p0097 N81-13804
An overview of general aviation propulsion research programs at NASA Lewis Research Center
[NASA-TM-81666] p0195 N81-16052
Posture hearings (NASA and FAA)
[GPO-65-265] p0203 N81-16952
NASA authorization, 1981
[GPO-71-290] p0203 N81-16953
The 1980 Aircraft Safety and Operating Problems, part 1
[NASA-CP-2170-PT-1] p0264 N81-19035
Scientific and Technical Information Output of the Langley Research Center, for calendar year 1976
[NASA-TM-82310] p0279 N81-19964
An evaluation of NASA's program for advancing rotorcraft technology
[PB81-144180] p0369 N81-23078
Aircraft energy efficiency. Overview
[NASA-FACTS-96/9-80] p0538 N81-28083
NASA's aeronautics program: Systems technology and experimental program
[NASA-CR-164642] p0543 N81-29034
Aerospace in the future
[NASA-TM-82664] p0543 N81-29063
NASA authorization, 1982, volume 4
[GPO-79-432-VOL-4] p0590 N81-31030
Ames Research Center publications: A continuing bibliography, 1980
[NASA-TM-81308] p0641 N81-34138

NASA STRUCTURAL ANALYSIS PROGRAM
U NASTRAN

NASTRAN
Initial development for a flutter analysis of damaged T-38 horizontal stabilators using NASTRAN
[AIAA PAPER 81-0365] p0166 A81-20784
Fatigue life evaluation of a helicopter main rotor hub
p0180 A81-22631
Investigations of helicopter structural dynamics and a comparison with ground vibration tests
p0467 A81-40087
Crashworthy design concepts for airframe structures of light aircraft
[SAE PAPER 810613] p0522 A81-42769
Calculation of airloads for a flexible wing via NASTRAN
[AD-A094770] p0263 N81-19031
Investigation of an improved flutter speed prediction technique for damaged T-38 horizontal stabilators using NASTRAN
[AD-A094769] p0273 N81-19109
Aeroelastic and dynamic finite element analyses of a bladder shrouded disk
[NASA-CR-159728] p0278 N81-19479
Nastran level 16 theoretical manual updates for aeroelastic analysis of bladed discs
[NASA-CR-159823] p0279 N81-19480
NASTRAN level 16 user's manual updates for aeroelastic analysis of bladed discs
[NASA-CR-159824] p0279 N81-19481
NASTRAN level 16 programmer's manual updates for aeroelastic analysis of bladed discs
[NASA-CR-159825] p0279 N81-19482
A comparison of laboratory measured temperatures with predictions for a spar/skin type aircraft structure
[NASA-TM-81359] p0387 N81-23067

NATIONAL AIRSPACE UTILIZATION SYSTEM
The evolution of operational systems --- approach to National Airspace System automation
p0064 A81-15699
NAS automation equipment operating cost estimates, FY 1978 - 1979
[AD-A102023] p0595 N81-31182
Airport and airway system development act of 1981
[GPO-75-804] p0601 N81-31231

NATIONAL AVIATION SYSTEM
Canada's national aviation forecasting models
p0112 A81-16072
Summary of Federal Aviation Administration responses to National Transportation Safety Board safety recommendations
[AD-A089971] p0033 N81-11022

NATURAL FREQUENCIES
G RESONANT FREQUENCIES

NATURAL LASERS
U LASERS

NAVIER-STOKES EQUATION
Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659
Numerical study on viscous shear flow past a circular cylinder
p0228 A81-24077
On the solution of Navier Stokes equations of the flow in turbomachines
p0296 A81-29099
A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077
Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14964
An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NACA 64A010 airfoils
p0249 N81-18024
Analysis of turbulent flow about an isolated airfoil using a time dependent Navier-Stokes procedure
p0385 N81-23053

Gyrostabilizers for inertial control systems --- Russian book
p0017 A81-12024
Air-traffic police steer a new approach
p0061 A81-15167
International Air Transportation Conference, New Orleans, La., April 30-May 3, 1979, Proceedings. Volumes 1 & 2
p0110 A81-18051
Omega - An economic Loran A replacement
p0113 A81-18077
Map-type displays --- for air navigation
p0121 A81-19443
Improved secondary radar antennas for flight safety installations
p0151 A81-20083
New techniques and development trends in the system architecture of EDP systems for radar data processing and airspace control
p0153 A81-20103
Pulsed Doppler radar detects weather hazards to aviation
[AIAA PAPER 81-0235] p0163 A81-20691
New navigation systems for helicopters
p0177 A81-22167
The ANK - A four dimensional navigation/flight management system for today
p0180 A81-22615
New technology for the NDB system and its reliability. II --- omnidirectional radio beacons
p0230 A81-24524
Aircraft radar equipment and its operation --- Russian book
p0289 A81-28759
Information requirements for airborne electronic terrain maps
p0325 A81-30334
Some design and procedural aspects of in-flight collision avoidance
[AIAA PAPER 81-0805] p0368 A81-33885
Integration of navigational information in aircraft
p0407 A81-34336
SINTAC and its position-finding performance
p0409 A81-35021
The optical-fiber interferometer gyroscope for aviation navigation
p0451 A81-37650
The DME-aided Azimuth System - DAS
p0452 A81-37653
Subsystem status monitor --- for military helicopters
[AHS 80-17] p0474 A81-40148
Summary of interface testing of the digital AN/ASN-123 tactical navigation avionic system in the SH-3H helicopter
[AHS 80-18] p0474 A81-40149
Evaluation of LORAN-C for non-precision approach applications
p0512 A81-41763
Helicopter navigation in the 80's
p0516 A81-42432
CAINS II - An application of standard laser gyro inertial and computer technology for existing naval carrier aircraft
p0516 A81-42434
Low-frequency radio navigation for the Army's Mobile Automated Field Instrumentation System /MAFIS/
p0517 A81-42437
Doppler aided low accuracy strapdown inertial navigation system
[AIAA 81-1798] p0555 A81-44101
Automated celestial position determination
p0557 A81-44324
Trends in the future development of air traffic control systems
p0566 A81-45764
Errors of phase VLF-navigation systems under conditions of auroral disturbances
p0607 A81-47533
A fail-operational duplex sensor concept for flight control systems on the basis of analytical redundancy
[DGLR PAPER 81-066] p0610 A81-47616
Ten years activity in the area of flight control for helicopters at night and in bad weather
[DGLR PAPER 81-064] p0611 A81-[illegible]
LR-80 flight test report --- attitude and heading reference system
[AD-A090284] p0075 N81-1205[illegible]
Development of a computer program data base of a navigation aid environment for simulated IFR flight and landing studies
[NASA-TM-80064] p0129 N81-1[illegible]
A preliminary human factors flight assessment of the Marconi automatic map
[AD-A092585] p0193 N81-16036
DMAHTC's support to National Ocean Survey LORAN-C-charting
[AD-A093748] p0206 N81-17027
Hydrographic applications of the global positioning system
[AD-A093750] p0206 N81-17029
MIT Annotated Bibliography
p0371 N81-22001
Use of Loran-C for general aviation aircraft navigation
p0371 N81-22002
An analysis of the adaptability of Loran-C to air navigation
p0371 N81-22003
Investigation of air transportation technology at Ohio University, 1980 --- general aviation aircraft and navigation aids
p0371 N81-22005
Low-frequency radio navigation system
[NASA-CASE-NPO-15264-1] p0373 N81-22036
Navaids calibration evaluation with a computer-controlled avionics data acquisition system
p0383 N81-23020
Functional testing airborne navigation equipment
[AD-A097115] p0387 N81-23062
Definition of a system concept study for future air traffic guidance
[BMFT-FB-W-80-008] p0425 N81-24046
Navstar GPS receiver for satellite applications
p0485 N81-26111
A method for evaluating radio navigation systems for the terminal maneuvering area --- approach control
[DFVLR-MITT-81-02] p0538 N81-28080
Microwave system for real time space position measurement
p0545 N81-29089

p0233 A81-25374
The behavior of quartz oscillators in the presence of accelerations --- in missile and aircraft time-frequency navigation systems
[ONERA, TP NO. 1981-31] p0351 A81-31285
Aircraft equipment /2nd revised and enlarged edition/ --- Russian book
p0355 A81-31823
Navigation errors encountered using weather-mapping radar for helicopter IFR guidance to oil rigs
[AHS 80-16] p0474 A81-40147
Night flight of helicopters
p0510 A81-41335
Aircraft radio systems --- Book
p0513 A81-41871
Preliminary test plans of ATC concepts for longer term improvement helicopter development program
[AD-A089407] p0025 N81-10037
Functional testing airborne navigation equipment
[AD-A097115] p0387 N81-23062
Tactical navigation system testing
p0544 N81-29066
Flight testing and instrumentation of aircraft navigation systems
p0544 N81-29067
Alignment of a navigation and attack system for the alpha jet aircraft
p0544 N81-29070

NAVIGATION SATELLITES
NT NAVSTAR SATELLITES
NT TRANSIT SATELLITES
The use of satellite systems for communication
p0051 A81-13310
Satellites to aid flight safety
[IAF PAPER 80-IAA-17] p0115 A81-18410
Hydrographic applications of the global positioning system
[AD-A093750] p0206 N81-17029

NAVIGATORS
A microprocessor based land navigator
p0360 A81-32833

NAVSTAR SATELLITES
The use of satellite systems for communication
p0051 A81-13310
Geometric dilution of precision in Global Positioning System navigation
p0115 A81-18100
Characteristics of NAVSTAR user stations
p0121 A81-19425
Civil aviation applications of Navstar/GPS through differential techniques
p0177 A81-22374
GPS Navstar, the universal positioning system of the future
p0349 A81-30975
Perspectives on the civil utilization of the Navstar/GPS
p0409 A81-35023
Status report - Global Positioning System
p0511 A81-41752
Optimal processing of GPS signals
p0512 A81-41761
Navstar field test results
p0484 N81-26100
Rapid alignment of aircraft strapdown inertial navigation systems using Navstar Global Positioning System (GPS)
p0485 N81-26107
Navstar GPS receiver for satellite applications
p0485 N81-26111

NAVY
US Navy service experience with advanced composites --- in aircraft composite structures
p0041 N81-11149
Naval aircraft operating and support cost-estimating model: FY78 revision
[AD-A090044] p0071 N81-12013
NAVAIR Avionics Master Plan
[AD-A097522] p0389 N81-23082
A study of the factors affecting productivity at the Naval Air Rework Facilities
[AD-A103783] p0631 N81-33134

NC-130 AIRCRAFT
U C-130 AIRCRAFT

NEAR FIELDS
Lightning near fields generated by return stroke current
p0056 A81-14257
An acoustic source modelling technique to predict the near sound field of axisymmetric turbulent jets
[AIAA PAPER 81-2022] p0618 A81-48606
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836

NEAR WAKES
Mean-flow and turbulence measurements in the vicinity of the trailing edge of an NACA (63 sub 1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410

NEGATIVE FEEDBACK
NT SENSORY FEEDBACK

NERVOUS SYSTEM
Neurotramatological aspects in ejected pilots
p0205 N81-17012

NETS
Titanium net shapes by a new technology. I - F-14A parts evaluation
p0511 A81-41649

NETWORK ANALYSIS
The S3 transition --- flight control logic circuit analysis
p0240 A81-26617
Theoretical study of network design methodologies for the aerial relay system --- energy consumption and air traffic control
[NASA-CR-159365] p0249 N81-18033

NETWORK CONTROL
Contention information transfer systems analysis
p0322 A81-30274

NETWORK SYNTHESIS
Design of guidance and control digital autopilots
p0183 A81-22973
Analysis and synthesis of the digital attitude control system of the aerospace vehicle
p0224 A81-23837
ISSYS: An integrated synergistic Synthesis System
[NASA-CR-159221] p0543 N81-28783

NEUMANN PROBLEM
New approach to the solution of large, full matrix equations --- Neumann problem for inviscid incompressible flow past airfoils
p0171 A81-21552

NEUROLOGY
Neurotramatological aspects in ejected pilots
p0205 N81-17012

NEUROSCIENCE
U NEUROLOGY

NEWTON-BUSEMANN LAW
Unsteady Newton-Busemann flow theory. I - Airfoils
p0234 A81-25512

NEWTON-RAPHSON METHOD
Helicopter trim by periodic shooting with Newton-Raphson iteration
p0573 A81-46621
A comparison of Newton-like methods for the transonic small disturbance equation
[AD-A090270] p0033 N81-11017

NICKEL ALLOYS
NT RENE 77
Low cycle fatigue of Rene 77 at elevated temperatures
p0289 A81-28909
Directionally solidified Soviet superalloy - ZHS6-K
p0532 A81-43770
Creep properties of single-crystal nickel-based superalloys. II - Creep at medium temperature /760 C/
p0567 A81-46345
Low-cost directionally-solidified turbine blades, volume 2 --- TFE731-3 turbofan engine
[NASA-CR-159562] p0078 N81-12088
The stress behavior of three advanced nickel base superalloys during high temperature low cycle fatigue
[AD-A091694] p0131 N81-14061

NASA's activities in the conservation of strategic aerospace materials
[NASA-TM-81617] p0550 N81-29205
NICKEL CADMIUM BATTERIES
A new airborne nickel cadmium battery concept
p0235 A81-25618
NIGHT FLIGHTS (AIRCRAFT)
The flying hologram - Latest in head-up display systems
p0123 A81-19500
French Army testing of Forward Looking Infra-Red System /FLIR/ on helicopters /November 1976-June 1977/
p0464 A81-39680
Helicopter cockpit design for night goggle compatibility
p0472 A81-40128
Night flight of helicopters
p0510 A81-41335
CH-53 Helicopter Night Vision System simulation experiments
p0573 A81-46617
Ten years activity in the area of flight control for helicopters at night and in bad weather
[DGLR PAPER 81-064] p0611 A81-47620
Helicopter electro-optical system display requirements. 1. The effects of CRT display size, system gamma function, and terrain type on pilots required display luminance
[AD-A089755] p0035 N81-11035
Survivability study of a FLIR equipment fighter on a night penetration of a Soviet army
[AD-A101186] p0547 N81-29120
Flight evaluation of the STOL flare and landing during night operations
[NASA-TM-81312] p0629 N81-32151
NIGHT VISION
Development of an aviator's night vision imaging system /ANVIS/
p0463 A81-39573
Helicopter cockpit design for night goggle compatibility
p0472 A81-40128
CH-53 Helicopter Night Vision System simulation experiments
p0573 A81-46617
Helicopter electro-optical system display requirements. 1. The effects of CRT display size, system gamma function, and terrain type on pilots required display luminance
[AD-A089755] p0035 N81-11035
Operational problems associated with head-up displays during instrument flight

NOISE GENERATORS
Experiments on effective source locations and velocity dependence of the broad band noise from a rotating rod
p0016 A81-11724
Status of knowledge of sonic booms -
p0017 A81-11822
The status of rotor noise technology
p0019 A81-12737
Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594
A lifting surface theory for the sound generated by the interaction of velocity disturbances with a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
Perspectives on jet noise
[AIAA PAPER 81-0428] p0168 A81-20829
Core noise measurements from a small, general aviation turbofan engine
p0178 A81-22531
The role of the helical jet mode in aerodynamic noise generation
[AIAA PAPER 81-1963] p0618 A81-48607
Flight test of the 747-JT9D for airframe and jet-flap interaction noise
[AIAA PAPER 81-2037] p0620 A81-48629
Cooperative investigation of the noise producing region of an axisymmetric jet
[AD-A089692] p0045 N81-11774
NOISE HAZARDS
U HAZARDS
U NOISE (SOUND)
NOISE INTENSITY
Community response to noise from a general aviation airport
p0017 A81-11821
Helicopter internal noise - An overview
p0150 A81-20055
Fuel consumption aspects of some noise abatement procedures
p0154 A81-20350
Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements
p0454 A81-38062
Airport noise. Citations from the NTIS data base
[PB80-813231] p0088 N81-12667
NOISE MEASUREMENT
Experimental investigations on shock-associated noise
p0107 A81-17735
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922
Installation effects on propeller noise
[AIAA PAPER 80-0993] p0352 A81-31369
Noise characteristics of two parallel jets with unequal flow
[AIAA PAPER 80-0168] p0354 A81-31601
Improvement of the imaging of moving acoustic sources by the knowledge of their motion
[CNERA, TP NO. 1981-17] p0359 A81-32534
Contribution to the study of non stationary signals emitted by moving jet engine - Application to special analysis and imaging. I.
p0365 A81-33280
Acoustic performance evaluation of an advanced UH-1 helicopter main rotor system
[AHS PAPER 81-58] p0370 A81-33957

In-flight jet engine noise measurement system
p0410 A81-35553
The influence of helicopter operating conditions on rotor noise characteristics and measurement repeatability
p0468 A81-40095
Aircraft noise identification system - Application for inflight position detector
p0570 A81-46376
Acoustic and turbulence measurements of a tone-excited jet with and without flight simulation
[AIAA PAPER 81-2007] p0621 A81-48640
A novel airborne technique for free-field measurements of aircraft noise above the flight path with application to noise-shielding studies
[AIAA PAPER 81-2028] p0621 A81-48647
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-49728
Noise radiated from inverted velocity profile jets under simulated flight
[AIAA PAPER 81-2026] p0623 A81-49729
Core noise measurements from a small, general aviation turbofan engine
[NASA-TM-81610] p0044 N81-11769
A comparison of the three methods used to obtain acoustic measurements for the NASA Flight Effects Program
[NASA-TM-81906] p0008 N81-12822
Spectral analysis of nonstationary random processes. Application to noise of flyover type
[ESA-TT-639] p0008 N81-12826
Noise levels and data correction analysis for seven general aviation propeller aircraft
[AD-A091292] p0096 N81-13717
Correction procedures for aircraft noise data. Volume 3: Filter effects
[AD-A091016] p0096 N81-13719
Correction procedures for aircraft noise data. Volume 5: Propeller aircraft noise
[AD-A091017] p0096 N81-13720
The measurement of aero gas turbine noise
[PNR-90032] p0138 N81-14795
The need for airport noise monitoring systems. Their uses, and value in promoting civil aviation
[AD-A092240] p0201 N81-16627
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 1: Europe, July 1980
[NASA-CR-152356] p0220 N81-17623
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 2: Pacific basin, August 1980
[NASA-CR-152357-VOL-2] p0220 N81-17624
NOISECHECK procedures for measuring noise exposure from aircraft operations
[AD-A093948] p0221 N81-17849
The role of coherent structures in the generation of noise for subsonic jets
[NASA-CR-164214] p0380 N81-22833
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0380 N81-22836
Diagnostic experiments on supersonic jet noise
[NASA-CR-164348] p0438 N81-24856
NOISEMAP: The USAF'S computer program for predicting noise exposure around an airport
[AD-A094264] p0446 N81-25578
Additional noise data on the SR-3 propeller
[NASA-TM-81736] p0447 N81-25767
YC-15 interior noise measurements. Technical discussion
[AD-A098788] p0492 N81-26847
YC-14 interior noise measurements program
[NASA-CR-164523] p0492 N81-26849
Incidences from modifications of the computational methods of the psophic index
[NASA-TM-76577] p0542 N81-28608
Helicopter noise exposure level data: Variations with test target. Indicated airspeed, distance, main rotor RPM and takeoff power
[AD-A100691] p0552 N81-29661
Flight test of a pure-tone acoustic source --- aircraft noise
[NASA-TP-1898] p0641 N81-33945
Helicopter noise analysis: Round-robin test
[AD-A103724] p0641 N81-33948

NOISE POLLUTION
Community response to noise from a general aviation airport
p0017 A81-11821
Model for airport noise exposure on a national basis - 1960 to 2000
p0568 A81-46363
Airbase induced community noise - Facilitating the military/civil interface
p0569 A81-46368
Aircraft noise and land use compatibility tradeoff analyses
p0569 A81-46370
A program to support the full utilization of data from existing social surveys of environmental noise
p0570 A81-46374
Survey population response to airplane noise, part 1
[NASA-TM-75790] p0031 N81-10576
Annoyance from light aircraft investigation carried out around four airports near Paris
[NASA-TM-75823] p0032 N81-10577
Airport noise. Citations from the NTIS data base
[PB80-813231] p0088 N81-12667
Maneuvering aircraft: Noise pollution and control. Citations from the NTIS data base

The effect of airplane noise on the inhabitants of areas near Okecie Airport in Warsaw
[NASA-TM-75879] p0379 N81-22592
An airport community noise-impact assessment model
[NASA-TM-80198] p0393 N81-23713
Continued research on selected parameters to minimize community annoyance from airplane noise
[NASA-CR-164299] p0438 N81-24602
Aviation noise overload in the immediate proximity of the Warsaw-Okecie airport
[NASA-TM-75892] p0500 N81-27883
Incidences from modifications of the computational methods of the psophic index
[NASA-TM-76577] p0542 N81-28608
Evaluation of the disturbance caused by aircraft noise by opinion surveys
[NASA-TM-76579] p0542 N81-28610
Community reaction to impulse noise: Initial Army survey
[AD-A101674] p0588 N81-30659
Minimum noise impact aircraft trajectories
[NASA-CR-164719] p0594 N81-31159

NOISE PREDICTION (AIRCRAFT)
Some thoughts on the effects of flight on jet noise as observed in actual flight and in wind tunnels
p0016 A81-11723
The status of rotor noise technology
p0019 A81-12737
Simple method for prediction of aircraft noise contours
p0050 A81-13217
Experiments on the validity of ground effect predictions for static noise testing of propeller aircraft
p0054 A81-13811
Numerical prediction of bypass engine jet noise
[AIAA PAPER 80-1006] p0057 A81-14300
The effects of noise on laminar flow control drag reduction systems
p0058 A81-14390
Development and application of an analytical method for predicting helicopter transmission noise
p0150 A81-20062
Acoustic radiation from honeycomb sandwich plates
p0151 A81-20070
A lifting surface theory for the sound generated by the interaction of velocity disturbances with a leaned vane stator
[AIAA PAPER 81-0091] p0160 A81-20595
Experiments on the linear and non-linear evolution of the double helical instability in jets
[AIAA PAPER 81-0415] p0168 A81-20818
Empirical method for the prediction of business executive jet cabin noise levels
p0224 A81-23884
An experimental study of transmission, reflection and scattering of sound in a free jet flight simulation facility and comparison with theory
p0289 A81-28943

Transonic rotor noise - Theoretical and experimental comparisons p0364 A81-33049

Trailing-edge airframe noise source studies on aircraft wings [AIAA PAPER 80-0976] p0411 A81-35634

Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements p0454 A81-38062

Trailing edge noise from hovering rotors [AHS 80-60] p0479 A81-40184

A study of the economic impact of noise limits on new design and current production helicopters [AHS 80-64] p0479 A81-40187

General aviation propeller noise reduction - Penalties and potential [SAE PAPER 810585] p0520 A81-42746

Helicopter noise - Is technology the answer [SAE PAPER 810591] p0520 A81-42750

A prediction procedure for propeller aircraft flyover noise based on empirical data [SAE PAPER 810604] p0521 A81-42761

Integrated noise model - The Federal Aviation Administration's computer program for predicting noise exposure around an airport p0568 A81-46354

Remaining problems in the prediction, measurement, evaluation, and control of aircraft noise p0568 A81-46356

Airport noise contour predictions - Improving their accuracy p0569 A81-46367

Helicopter manufacturers economic impact assessment of FAA proposed helicopter certification noise rules /NPRM 79-13/ p0576 A81-46647

Prediction of helicopter rotor noise from measured blade surface pressure p0577 A81-46649

The influence of the airspeed on jet turbulence and the consequences for the jet noise [DGLR PAPER 81-021] p0609 A81-47595

Trailing edge noise prediction from measured surface pressures p0616 A81-48395

Ray-theory predictions of the sound radiated from realistic engine intakes [AIAA PAPER 81-1982] p0618 A81-48602

An acoustic source modelling technique to predict the near sound field of axisymmetric turbulent jets [AIAA PAPER 81-2022] p0618 A81-48606

The role of the helical jet mode in aerodynamic noise generation [AIAA PAPER 81-1963] p0618 A81-48607

Prediction of flyover jet noise spectra [AIAA PAPER 81-2025] p0618 A81-48610

Laboratory study of efficient add-on treatments for interior noise control in light aircraft [AIAA PAPER 81-1969] p0619 A81-48618

Prediction of jet exhaust noise on airframe surfaces during flight [AIAA PAPER 81-2035] p0619 A81-48626

Comparison of predicted engine core noise with current and proposed aircraft noise certification requirements [AIAA PAPER 81-2053] p0620 A81-48635

Ground effects on aircraft noise for a wide-body commercial airplane [AIAA PAPER 81-1988] p0620 A81-48638

Prediction method for aeroacoustic loads on under the wing blown flaps [AIAA PAPER 81-2038] p0621 A81-48644

High bypass ratio engine noise component separation by coherence technique [AIAA PAPER 81-2054] p0621 A81-48653

An iterative finite element-integral technique for predicting sound radiation from turbofan inlets [AIAA PAPER 81-1981] p0624 A81-49736

An improved prediction method for noise generated by conventional profile coaxial jets [AIAA PAPER 81-1991] p0624 A81-49743

Weapon bay cavity noise environments, data correlation and prediction for the B-1 aircraft [AD-A089770] p0045 N81-11778

Prediction of sound radiated from different practical jet engine inlets [NASA-CR-163824] p0137 N81-14789

Fluid-dynamic and aeroacoustic investigations of shrouded jets --- noise prediction (aircraft) p0256 N81-1831

Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models [NASA-CR-159363] p0258 N81-18799

Sources, control, and effects of noise from aircraft propellers and rotors --- noise prediction (aircraft p0269 N81-19073

NASA progress in aircraft noise prediction p0269 N81-19074

Handbook of aircraft noise metrics [NASA-CR-3406] p0345 N81-21871

Subjective field study of response to impulsive helicopter noise [NASA-TP-1833] p0345 N81-21873

Sources, control, and effects of noise from aircraft propellers and rotors [NASA-TM-81971] p0345 N81-21904

The relationship between noise and annoyance around Orly [NASA-TM-76573] p0379 N81-22594

Airframe noise of a small model transport aircraft and scaling effects --- Boeing 747 [NASA-TP-1858] p0380 N81-22832

Comparison of predicted engine core noise with proposed FAA helicopter noise certification requirements [NASA-TM-81739] p0381 N81-22839

[AIAA PAPER 81-1885] p0561 A81-44577

General describing function method for systems with many nonlinearities, with application to aircraft performance
p0564 A81-45508

Self-oscillations of a wheel on a self-aligning landing gear strut with a nonlinear damper
A81-46847

A technique for the implementation of nonlinear models as real-time digital simulations --- with application to aircraft turbine engine design
p0615 A81-48333

Analytical estimation on nonlinear longitudinal characteristics of wings with small and moderate aspect ratio by the vortex lattice method in incompressible flow
[ESA-TT-585] p0022 N81-10018

Application of the MNA design method to a nonlinear turbofan engine --- multivariable Nyquist array method
[NASA-CR-163855] p0143 N81-15001

Nonlinear rotor dynamics analysis --- computerized simulation
p0257 N81-18405

NLSCIDNT user's guide maximum likehood parameter identification computer program with nonlinear rotorcraft model
[NASA-CR-159083] p0380 N81-22724

INDES User's guide multistep input design with nonlinear rotorcraft modeling
[NASA-CR-159085] p0380 N81-22726

A nonlinear propulsion system simulation tehnique for piloted simulators
[NASA-TM-82600] p0390 N81-23085

NONLINEARITY

Study of the characteristics of a base-vented wing in nonlinear theory
[AAAF PAPER NT 80-40] p0369 A81-33927

Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds
[NASA-TP-1718] p0021 N81-10004

Effects of nonlinearities on wing store flutter
[MBB-FE-17/S/PUB/27] p0131 N81-13978

Development of a nonlinear vortex method --- steady and unsteady aerodynamic loads of highly sweptback wings
[NASA-CR-164351] p0423 N81-24024

Flap-lag-torsional dynamic modelling of rotor blades in hover and in forward flight, including the effect of cubic nonlinearities
[NASA-CR-166194] p0486 N81-26116

Investigation of low level aircraft nonavionic nonlinear interference
[AD-A098784] p0491 N81-26349

NONREFLECTION
U ENERGY ABSORPTION

NONRIGIDITY
U FLEXIBILITY

NONSTABILIZED OSCILLATION

The problems with the interface system of the visual simulator as a cause of Pilot Induced Oscillations (PIO's) in flight simulators
[MBB-UA-528-80-OE] p0276 N81-19180

NONSYNCHRONIZATION

A technique for recovering nonsynchronized data from a digital flight data recorder
p0328 N81-20020

NONUNIFORM FLOW

Aerodamping of turbine blade vibrations under conditions of flow separation by an inhomogeneous stream
p0060 A81-14959

The linear instability due to the compressible crossflow on a swept wing
p0170 A81-21168

Calculation of circular flow inhomogeneities downstream of the turbine wheel
p0281 A81-27372
The effect of jet non-uniformity on the lift of an augmentor wing
p0296 A81-29144
Damping of turbomachine blade variations by subsonic flow
p0612 A81-47957
Factors influencing the predicted performance of advanced propeller designs
[NASA-TM-82676] p0492 N81-27042
NONVISCOUS FLOW
U INVISCID FLOW
NORMAL DENSITY FUNCTIONS
A correlated random numbers generator and its use to estimate false alarm rates of airplane sensor failure detection algorithms
p0154 A81-20448
NORMAL DISTRIBUTIONS
U NORMAL DENSITY FUNCTIONS
NORMAL FORCE DISTRIBUTION
U FORCE DISTRIBUTION
NORTH AMERICAN AIRCRAFT

NOSE INLETS
Calculation of internal and external flow field and cowl pressure drag in the supersonic axisymmetric nose inlets
p0224 A81-23730
NOTCH TESTS
Prediction of structural fatigue response under aircraft loads from material stress-strain behavior
p0226 A81-24009
Effects of truncation of a predominantly compression load spectrum on the life of a notched graphite/epoxy laminate
p0418 A81-37137
Selection of notch geometry and notching technique for studying the fracture toughness of materials and full-scale structures --- of Al alloys
p0516 A81-42356
NOTCHED METALS
U NOTCH TESTS
NOXIOUS MATERIALS
U CONTAMINANTS
NOZZLE COEFFICIENT
U NOZZLE FLOW
NOZZLE DESIGN
Analysis and design of a ceramic nozzle insert for the Langley 8-foot high temperature structures tunnel
p0060 A81-14996
One-dimensional considerations concerning the stability behavior of inlet diffusers for supersonic aircraft --- German thesis
p0107 A81-17548
The sweep finite element method for calculating the flow field and performance of supersonic ejector nozzles
p0291 A81-29061
Development and validation of computational flow analysis for design of inlets and nozzles
p0298 A81-29117
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1218] p0458 A81-39006
Advanced nozzle integration for supersonic strike fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40878
Development of exhaust nozzle internal performance prediction techniques for advanced aircraft applications
[AIAA PAPER 81-1490] p0506 A81-40908
An overview of ejector theory
[AIAA PAPER 81-1678] p0534 A81-43947
Graphite/polyimide augmentor and nozzle components --- of advanced military gas turbine engines
[AIAA PAPER 81-1358] p0625 A81-49976
Investigation of convergent-divergent nozzles applicable to reduced-power supersonic cruise aircraft
[NASA-TP-1766] p0139 N81-14972
Effects of sidewall geometry on the installed performance of nonaxisymmetric convergent-divergent exhaust nozzles
[NASA-TP-1771] p0185 N81-15976
QCGAT mixer compound exhaust system design and static big model test report
[NASA-CR-135386] p0274 N81-19119
Design of an exhaust mixer nozzle for the Avco-Lycoming Quiet Clean General Aviation Turbofan (QCGAT)
[NASA-CR-159425] p0274 N81-19120
Jet-diffuser ejector - Attached nozzle design
[NASA-CR-152361] p0278 N81-19412
Aeroacoustics of a porous plug jet noise suppressor
[NASA-CR-164549] p0500 N81-27884
NOZZLE EFFICIENCY
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27374
Effectiveness of a gas curtain in Laval nozzles under nonrated flow conditions
p0417 A81-36737
Static test of a fan-powered chin nozzle for V/STOL applications
[NASA-CR-165361] p0546 N81-29093
NOZZLE FLOW
Investigation of lateral forces and moments in the case of asymmetric gas flows in nozzles
p0004 A81-10913
An experimental investigation of jet screech by air jet impingement on solid boundaries
p0005 A81-11302
Calibration of the high speed wind tunnel TVM 150 in the supersonic range
p0016 A81-11778
Attainability of an attached flow in a nozzle with heavily curved walls
p0054 A81-13540
Interferometric study of the initial stage of supersonic jets of gases with various specific-heat ratios from conical nozzles
p0068 A81-16231
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics
p0110 A81-18022
A study of multiple jets
p0110 A81-18024
Effect of facility variation on the acoustic characteristics of three single stream nozzles
p0176 A81-22534
Transonic flows of a multireacting gas mixture through a Laval nozzle
p0225 A81-23909
Numerical computation of transonic potential flow through nozzles
p0233 A81-25353
Partially confined multiple jet mixing
p0234 A81-25513
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27374
Numerical solution of the direct one-dimensional problem of a critical flow in nozzles
p0288 A81-28578
Development and validation of computational flow analysis for design of inlets and nozzles
p0298 A81-29117
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1218] p0458 A81-39006
Analysis of steady, two-dimensional, chemically reacting nonequilibrium flow by an unsteady, asymptotically consistent technique --- for performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869
An overview of ejector theory
[AIAA PAPER 81-1678] p0534 A81-43947
Some ejector characteristics
[AIAA PAPER 81-1679] p0534 A81-43948
Comparison of computational and experimental jet effects
[AIAA PAPER 81-1492] p0626 A81-49979
Adiabatic gas flow. Citations from the NTIS data base
[PB80-808546] p0023 N81-10048

Jet wing interference for an overwing engine configuration
p0188 N81-16008
Exhaust emission characteristics and variability for maintained General Electric CF6-50 turbofan engines
[AD-A092291] p0196 N81-16064
Rig investigation of a two stage single shaft low cost turbine
p0432 N81-24099
The criticality of engine exhaust simulation on VSTOL model-measured ground effects
p0486 N81-26115
Application of computer generated color graphic techniques to the processing and display of three dimensional fluid dynamic data
[NASA-TM-82658] p0552 N81-29782

NOZZLE GEOMETRY
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics
p0110 A81-18022
Suppression of jet noise peak by velocity profile reshaping
p0458 A81-39039
Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40878
Some ejector characteristics
[AIAA PAPER 81-1679] p0534 A81-43948
Effect of excitation on coaxial jet noise as observed by an elliptic mirror
[AIAA PAPER 81-2044] p0621 A81-48651
Cooperative investigation of the noise producing region of an axisymmetric jet
[AD-A089692] p0045 N81-11774
NASA contributions to radial turbine aerodynamic analyses
[NASA-TM-81644] p0090 N81-13019
Static source locations for four nozzles mounted on a J-85 engine
[NASA-CR-152401] p0143 N81-14998
Effects of sidewall geometry on the installed performance of nonaxisymmetric convergent-divergent exhaust nozzles
[NASA-TP-1771] p0185 N81-15976
Effects of nozzle design on the noise from supersonic jets
p0246 N81-18001
Axisymmetric & non-axisymmetric exhaust jet induced-effects on a V/STOL vehicle design. Part 1: Data presentation --- conducted in Ames 11-foot transonic tunnel
[NASA-CR-166146] p0441 N81-25064
Shock associated noise reduction from inverted-velocity-profile coannular jets
[NASA-CR-3454] p0589 N81-30908

NOZZLE INSERTS
Analysis and design of a ceramic nozzle insert for the Langley 8-foot high temperature structures tunnel
p0060 A81-14996
Roll length of an annular underexpanded jet formed by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867

NOZZLE THRUST COEFFICIENTS
Comparison of three thrust calculation methods using in-flight thrust data
[NASA-TM-81360] p0581 N81-30111

NOZZLE WALLS
Effects of sidewall geometry on the installed performance of nonaxisymmetric convergent-divergent exhaust nozzles
[NASA-TP-1771] p0185 N81-15976

NUCLEAR AUXILIARY POWER UNITS
NT SNAP

NUCLEAR ELECTRIC POWER GENERATION
NT SNAP

NUCLEAR EMULSIONS
The emulsion chamber experiment on super-sonic Concorde /Echos/
p0019 A81-12476

NUCLEAR EXPLOSION EFFECT
Nuclear hardness assurance for aeronautical systems

Robustness properties of a new multirate digital control system
[AIAA PAPER 81-0022] p0158 A81-20545
Bounds for the additional cost of near-optimal controls
p0170 A81-21075
Piloting techniques on the backside - Flight path angle control
p0171 A81-21673
A vehicle attitude control system forming the error signal by way of the optimal rotation axis
p0224 A81-23732
Analytic design of regulators with limitations
p0235 A81-25688
Trajectory generation techniques for multivariable control of aircraft turbine engines
p0240 A81-26609
Control design for reduction of aerodynamic tail forces using quadratic synthesis
p0240 A81-26610
Suboptimal constant output feedback and its application to modern flight control system design
p0288 A81-28740
Sensitivity reduction in aircraft control systems by double Perfect Model Following
p0299 A81-29205
Control settings for a trimmed, stalled rotor by an automatic feedback system
[AIAA 81-0617] p0305 A81-29478
Evaluation of the effect of actuator time lag on the minimum control power of a VTOL aircraft
p0319 A81-30160
Cybernetic airborne fire control - Issues and potential
p0326 A81-30347
Energy modeling for aviation fuel efficiency
[AIAA PAPER 81-0789] p0368 A81-33883
The problem of the minimum-time turn of a maneuverable aircraft velocity vector to a specified course angle
p0413 A81-36472
Finite-difference gradients versus error-quadrature gradients in the solution of parameterized optimal control problems
p0421 A81-37568
Pole placement with output feedback
p0458 A81-38899
Helicopter gust alleviation - An optimal sampled-data approach
[AHS 80-31] p0476 A81-40161
Flight control strategies for performance computers
p0512 A81-41759
LQG controls for highly maneuverable aircraft --- Linear quadratic Gaussian
[AIAA PAPER 81-1709] p0527 A81-43163
Effects of displacement and rate saturation on the control of statically unstable aircraft
[AIAA 81-1752] p0554 A81-44082
A mode decomposition control logic for system performance enhancement
[AIAA 81-1753] p0554 A81-44083
Analysis of aircraft longitudinal handling qualities
[AIAA 81-1771] p0554 A81-44092
An analytical pilot rating method for highly elastic aircraft
[AIAA 81-1772] p0554 A81-44093
Boost-glide range-optimal guidance
[AIAA 81-1781] p0554 A81-44096
Multiobjective insensitive design of airplane control systems with uncertain parameters
[AIAA 81-1818] p0555 A81-44108
Optimal multirate flight control design
p0563 A81-45522
Optimization theory applied to higher harmonic control of circulation controlled rotors
p0571 A81-46606
A piloted simulation of the backup control system engagement for the YAH-64

p0576 A81-46646
Application of optimal control and estimation to autopilot and autothrottle systems
p0615 A81-48371
Model following control of gas turbine engines
p0624 A81-49900
Realization of a method of extremal targeting in a problem of aircraft landing control
p0625 A81-49943
Multivariable closed-loop analysis and flight control synthesis for air-to-air tracking
[AD-A090050] p0037 N81-11046
Performance seeking controls
p0079 N81-12092
Road map to adaptive optimal control --- jet engine control
p0079 N81-12098
Practical optimal flight control system design for helicopter aircraft. Volume 2: Software user's guide
[NASA-CR-152306] p0081 N81-12110
Research in multirate estimation and control
[AD-A094070] p0253 N81-18062
Pilot-optimal multivariable control synthesis by output feedback
[NASA-CR-163112] p0540 N81-28102
A structural load alleviation control system for a large transport aircraft
[TT-8002] p0541 N81-28106
OPTIMIZATION

U OXYGEN SUPPLY EQUIPMENT
OZONE
Aircraft NO/x/ emissions and stratospheric ozone reductions - Another look
[AIAA PAPER 81-0306] p0164 A81-20781
Ozone contamination in aircraft cabins: Results from GASP data and analyses
[NASA-TM-81671] p0191 N81-16021
OZONOMETRY
Ozone contamination in aircraft cabins - Results from GASP data and analyses
[AIAA PAPER 81-0305] p0164 A81-20780
Tabulations of ambient ozone data obtained by GASP airliners, March 1975 to December 1977
[NASA-TM-81528] p0096 N81-13568

Analysis of atmospheric ozone levels at commercial airplane cruise altitudes in winter and spring, 1976 - 1977 --- Global Atmospheric Sampling Program
[NASA-TP-1607] p0345 N81-21685

OZONOSPHERE
The aircraft in the stratosphere --- effects on ozone layer equilibrium
p0002 A81-10499

P

P-3 AIRCRAFT
P-3 Orion fuel-saving modification wind tunnel study
[AD-A091906] p0194 N81-16044

P-531 HELICOPTER
Fly-by-wire versus dual mechanical controls for the Advanced Scout Helicopter: Quantitative comparison
[AD-A096089] p0343 N81-21085
Crashworthiness design parameter sensitivity analysis
[AD-A096550] p0374 N81-22041

PACIFIC ISLANDS
Transport jet aircraft noise abatement in foreign countries: Growth, structure, impact. Volume 2: Pacific basin, August 1980
[NASA-CR-152357-VOL-2] p0220 N81-17624

PACKAGING
NT ELECTRONIC PACKAGING
Evaluation/redesign of the P-105 pitch rate gyro pack
[AD-A092109] p0194 N81-16048

PACKING DENSITY
High-density avionic power supply
p0005 A81-11157

PADE APPROXIMATION
An analytical technique for approximating unsteady aerodynamics in the time domain
[NASA-TP-1738] p0043 N81-11422

PAINTS
Technology for rustproofing aircraft and helicopters --- Russian book
p0529 A81-43520
Development of a water displacing, touch-up paint
[AD-A097125] p0392 N81-23288
PACER LIME: An environmental corrosion severity classification system, part 1
[AD-A100496] p0539 N81-28089

PANEL FLUTTER
Response of stiffened sandwich panels
[AIAA 81-0557] p0303 A81-29455
Effect of post buckling on the fatigue of composite structures
p0418 A81-37127

PANEL METHOD (FLUID DYNAMICS)
Numerical optimization of circulation control airfoils
[AIAA PAPER 81-0016] p0157 A81-20540
An optimal-surface-transpiration subsonic panel-method for iterative design of complex aircraft configurations
[AIAA PAPER 81-1254] p0458 A81-39012
Solution of plane cascade flow using improved surface singularity methods --- application of panel method to internal aerodynamics
[NASA-TM-81589] p0140 N81-14979
The influence of the compressibility in simulating the conduct of exterior loads of a carrier
[MBB-FE-122/S/PUB/17] p0220 N81-17483
A higher order panel method for linearized supersonic flow
[NASA-CR-3062] p0262 N81-19022
A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039
Computation of pressure distribution on the DFVLR wing-body model by the panel method
[DFVLR-FB-80-02] p0372 N81-22029

PANELS
NT WING PANELS
Design and fabrication of stabilized organic matrix composites
p0005 A81-11338
Crack propagation in panels of pressurized fuselages upon simultaneous action of cyclic loading by pressurization and high-frequency vibrations
p0054 A81-13612
Acoustic fatigue strength of fiber-reinforced plastic panels
p0169 A81-20873
Sonic fatigue design techniques for graphite-epoxy stiffened-skin panels
[AIAA 81-0633] p0305 A81-29488
Transient vibrations of elastic panels due to the impact of shock waves
p0616 A81-48385
Fabrication and physical testing of graphite composite panels utilizing woven graphite fabric with current and advanced state-of-the-art resin systems
[NASA-CR-152292] p0218 N81-17175
Development of assembly techniques for fire resistant aircraft interior panels
[NASA-CR-152119] p0254 N81-18097
Design and fabrication of a stringer stiffened discrete-tube actively cooled panel for a hypersonic aircraft
[NASA-CR-3403] p0279 N81-19484
Behavior of continuous filament advanced composite isogrid structure
p0377 N81-22095

PANT PROGRAM
Correlation of artificially induced boundary-layer transition data at hypersonic speeds
p0285 A81-27911

PARABOLIC BODIES
A comparison of Newton-like methods for the transonic small disturbance equation
[AD-A090270] p0033 N81-11017

PARABOLIC DIFFERENTIAL EQUATIONS
Hyperbolic/parabolic development for the GIM-STAR code --- flow fields in supersonic inlets
[NASA-CR-3369] p0201 N81-16416

PARABOLIC REFLECTORS
Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p0378 N81-22358
Parabolic Dish Solar Thermal Power Annual Progress Review Proceedings
[NASA-CR-164696] p0587 N81-30525
First phase testing of solar thermal engine at United Stirling
p0588 N81-30530
Non-heat pipe receiver/p-40 Stirling engine
p0588 N81-30531

PARABOLOIDS
U PARABOLIC BODIES

PARACHUTE DESCENT
Subsonic parachute design, performance, and similarity laws /scale effects/ - A review of the Institute's activities during the last years
p0060 A81-14799
Preliminary consideration of parameter identification analysis from parachute aerodynamic flight test data
p0067 A81-16020
Effects of drive slots on parachute performance
p0453 A81-38020

PARACHUTE FABRICS
System for refurbishing and processing parachutes
[NASA-CASE-KSC-11042-1] p0138 N81-14967

PARACHUTES
NT DRAG CHUTES
NT RECOVERY PARACHUTES
The measurement of pressure distribution around a parachute canopy
p0067 A81-16019
The design, testing, certification and production of an emergency parachute for use in light aircraft
[AIAA PAPER 81-0413] p0168 A81-20817
Development of the first ram air emergency parachute for personnel applications
p0174 A81-22078
Some experimental study on parachute dynamics by utilizing a deceleration system simulator
p0481 A81-40871
System for refurbishing and processing parachutes
[NASA-CASE-KSC-11042-1] p0138 N81-14967

PARACHUTING
U PARACHUTE DESCENT

PARAGLIDERS
NT FLEXIBLE WINGS

PARALLEL FLOW
NT PIPE FLOW

NT THREE DIMENSIONAL FLOW
Noise characteristics of two parallel jets with unequal flow [AIAA PAPER 80-0168] p0354 A81-31601

PARALLEL PLATES
Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures [NASA-CR-3444] p0507 N81-30392

PARALLEL PROCESSING (COMPUTERS)
Dispersed flight control computer systems p0321 A81-30250
The array processor - A real-time simulator p0614 A81-48328
An approach to real-time simulation using parallel processing [NASA-TM-81731] p0345 N81-21803

PARALLEL STRIP LINES
U MICROSTRIP TRANSMISSION LINES

PARAMETER IDENTIFICATION
Preliminary consideration of parameter identification analysis from parachute aerodynamic flight test data p0067 A81-16020
Parameter identification and discriminant analysis for jet engine mechanical state diagnosis p0156 A81-20474
Aircraft lateral parameter estimation from flight data with unsteady aerodynamic modelling [AIAA PAPER 81-0221] p0162 A81-20684
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters p0470 A81-40111
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability p0471 A81-40123
Data analysis for aircraft parameter estimates [AIAA PAPER 81-1664] p0560 A81-44561
An aircraft landing system employing observers p0562 A81-44699
Real-time estimation in advanced turbofan engines p0564 A81-45553
Simulating study of the interaction between the propulsion and flight control systems of a subsonic lift fan VTOL [NASA-TM-81239] p0036 N81-11043
Multivariable identification using centralized fixed modes p0079 N81-12091
Theoretical investigation of the influence of spoiler dynamics on the handling qualities of an aircraft with direct lift control [DFVLR-FB-80-07] p0131 N81-13975
Federal Radionavigation Plan. Volume 3: Radionavigation system characteristics [AD-A093776] p0207 N81-17032
Modeling, acquisition and processing during large displacements --- associated with experiments in flight mechanics [AAAF-NT-80-16] p0210 N81-17056
Development of advanced techniques for rotorcraft state estimation and parameter identification [NASA-CR-159297] p0271 N81-19098
Flight test evaluation of predicted light aircraft drag, performance, and stability [NASA-CR-159062] p0494 N81-27078
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability [MBB-UD-307/80-OE] p0584 N81-30140
Determination of aircraft dynamic stability and control parameters from flight testing p0591 N81-31115
Estimation of dynamic stability parameters from drop model flight tests p0591 N81-31116
Analytical determination of dynamic stability parameters p0592 N81-31117
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response p0592 N81-31118
Control derivatives p0592 N81-31119
Sensitivity of aircraft motion to cross coupling and acceleration derivatives p0592 N81-31120
Some applications of aerodynamic formulations to problems in aircraft dynamics p0592 N81-31121
Applications of dynamic stability parameters to problems in aircraft dynamics p0592 N81-31122
Design of optimal inputs for the identification of characteristics of aircraft flights --- parameter identification control theory p0631 N81-33131
System identification for controlled aircraft --- maximum likelihood estimates, parameter identification p0631 N81-33132

PARAMETERIZATION
NT PARAMETER IDENTIFICATION
Application of the parameter space method to aerospace vehicle digital control system design p0359 A81-32647
A nonlinear propulsion system simulation technique for piloted simulators p0454 A81-38064
Parametric synthesis of an automatic system for flight-vehicle stabilization p0625 A81-49940
Economic evaluation of flying-qualities design criteria for a transport configured with relaxed static stability [NASA-TP-1760] p0130 N81-13968

PARTIAL DIFFERENTIAL EQUATIONS
NT PARABOLIC DIFFERENTIAL EQUATIONS
The calculation of quasi-three-dimensional frictionless compressible flow in axial turbomachines --- partial differential equations [PNR-90047] p0275 N81-19127

PARTIAL PRESSURE
Conditioned pressure spectra and coherence measurements in the core of a turbofan engine [NASA-TM-82688] p0589 N81-30907

PARTICLE DENSITY (CONCENTRATION)
Gravimetric investigation of the particle number density distribution function in the high speed cascade wind tunnel for laser anemometry measurements [ESA-TT-625] p0197 N81-16069

PARTICLE EMISSION
NT ELECTRON EMISSION

PARTICLE INTERACTIONS
NT NUCLEAR INTERACTIONS

PARTICLE MOTION
Particulate flow in centrifugal compressors used in helicopters p0297 A81-29109

PARTICLE PRECIPITATION
Electromagnetic precipitation and ducting of particles in turbulent boundary layers p0239 A81-26506
The analytical ferrograph - Some factors affecting deposit formation p0293 A81-29077

PARTICLE SIZE DISTRIBUTION
An automatic isokinetic sampler for particulate emissions from aircraft gas turbine engines [AD-A090280] p0088 N81-12653
Laser scattering applications development test in AEDC tunnel B at Mach number 8 [AD-A093929] p0217 N81-17105
Ultrasonic dispersion of particulate high density fuels [AD-A102771] p0630 N81-32290

PARTICLE TRAJECTORIES
Particle dynamics of inlet flow fields with swirling vanes [AIAA PAPER 81-0001] p0156 A81-20523
Improved particle trajectory calculations through turbomachinery affected by coal ash particles [ASME PAPER 81-GT-53] p0312 A81-29965

PARTICLES
NT ANIONS
NT CHARGED PARTICLES
NT DROPS (LIQUIDS)
NT FOG
NT MICROPARTICLES
NT MIST

Program Navigate - A simulation computer program to verify CAS navigation capability --- Offensive Avionics System
p0322 A81-30289
Integrated displays and controls design factors for the 1990's transport aircraft
p0325 A81-30338
Acoustic performance evaluation of an advanced UH-1 helicopter main rotor system
[AHS PAPER 81-58] p0370 A81-33952
Loss model for off-design performance analysis of radial turbines with pivoting-vane, variable-area stators
[SAE PAPER 801135] p0397 A81-34166
SINTAC and its position-finding performance
p0409 A81-35021
Numerical solution of a supersonic ejector pump
p0413 A81-35939
Predictive steering control of dirigibles using the switching curve approach
[AIAA 81-1327] p0456 A81-38535
A survey of heating and turbulent boundary layer characteristics of several hypersonic research aircraft configurations
[AIAA PAPER 81-1145] p0459 A81-39134
A theoretical and experimental study of combustion chambers with recirculation
[ONERA, TP NO. 1981-39] p0460 A81-39242
Aircraft penetration under cloud cover
p0463 A81-39640
Experimental and analytical studies of a model helicopter rotor in hover
p0465 A81-39898
Recent progress in performance prediction of high advance ratio circulation controlled rotors
p0468 A81-40100
ASW helicopter/sonar dynamics mathematical model
p0470 A81-40115
Aerodynamic design of engine air intakes for improved performance
p0470 A81-40117
An empirical prediction method for helicopter performance in low speed level flight and in vertical and forward flight climbs
p0471 A81-40118
On the use of approximate models in helicopter flight mechanics
p0471 A81-40122
Interpretation of ramjet combustor test data
[AIAA PAPER 81-1433] p0504 A81-40870
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904
Development of exhaust nozzle internal performance prediction techniques for advanced aircraft applications
[AIAA PAPER 81-1490] p0506 A81-40908
Critical considerations in the design of supersonic combustion ramjet /scramjet/ engines
[AIAA PAPER 80-1284] p0511 A81-41740
Engine life methodologies for conceptual design
[AIAA PAPER 81-1398] p0515 A81-42188
Factors influencing the predicted performance of advanced propeller designs
[AIAA PAPER 81-1564] p0516 A81-42210
Comparison of model testing with computer simulations of an air landing system
[AIAA PAPER 81-1663] p0534 A81-43942
A model-following technique for insensitive aircraft control systems
[AIAA PAPER 81-1867] p0560 A81-44563
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
General describing function method for systems with many nonlinearities, with application to aircraft performance
p0564 A81-45508
The predictability of turbine vane convection heat transfer
[AIAA PAPER 81-1435] p0566 A81-45892
Prediction of range and endurance of jet aircraft at constant altitude
p0611 A81-47725
Operational characteristics comparison /ACV and SES/
[AIAA PAPER 81-2064] p0616 A81-48401
Performance prediction for light airplanes
p0622 A81-49374
A method of performance prediction for centrifugal compressors. Part 1: Analysis. Part 2: Comparison with experiment
[ARC-R/M-3843] p0031 N81-10436
Definitive generic study for the effect of high lift airfoils on wind turbine effectiveness, executive summary
[SERI/TR-98003-2] p0043 N81-11492
Engine diagnostics program: CF6-50 engine performance deterioration
[NASA-CR-159867] p0078 N81-12085
Mixing and combustion in high speed air flows
[AD-A090536] p0083 N81-12192
Prediction and evaluation of thrust augmenting ejector performance at the conceptual design stage
[AD-A093953] p0216 N81-17694
Recent progress toward predicting aircraft ground handling performance
p0268 N81-19068
Evaluation of emergency-locator-transmitter performance in real and simulated crash tests
p0268 N81-19070
Method for computation of structural failure probability for an aircraft
[AD-A098294] p0426 N81-24050
JT9D performance deterioration results from a simulated aerodynamic load test
[NASA-TM-82640] p0443 N81-25082
Factors influencing the predicted performance of advanced propeller designs
[NASA-TM-82676] p0492 N81-27082
The supersonic fan engine: An advanced concept in supersonic cruise propulsion
[NASA-TM-82657] p0496 N81-27094
Statistics of some atmospheric turbulence records relevant to aircraft response calculations
[NASA-CR-3464] p0637 N81-33191

PERFORMANCE TESTS
Comparative performance of two centrifugal fan impellers differing in blade section
p0001 A81-10162
Airfield pavement demonstration-validation study
p0003 A81-10718
Model tests for an active rotor isolation system
[MBB-276-79-0] p0018 A81-12095
United States Army helicopter icing qualification 1980
[AIAA PAPER 81-0406] p0167 A81-20812
The design, testing, certification and production of an emergency parachute for use in light aircraft
[AIAA PAPER 81-0413] p0168 A81-20817
The necessity of 'testing-in' hardware reliability
p0229 A81-24277
Helicopter-ship qualification testing
p0232 A81-24981
Film cooling performance of liner cooling devices
p0293 A81-29075
Application of scaling in afterburner test and development
[ASME PAPER 81-GT-194] p0317 A81-30086
Helicopter rotor blade effects on mast-mounted sensor images
p0350 A81-31114
Design, fabrication, calibration, application, and testing of advanced aircraft weighing systems
[SAWE PAPER 1383] p0353 A81-31399
Quarter-scale testing of an advanced rotor system for the UH-1 helicopter
p0395 A81-34121
Supersonic aircraft test experience - Test techniques and data analysis methods
p0419 A81-37299
Fundamental investigation on jet engine ignition of fuel sprays and its application
p0420 A81-37381
KS-127A long range oblique reconnaissance camera for RF-4 aircraft
p0462 A81-39419
The requirements for and evolution of a test rig for exhaust gas recirculation studies of V/STOL aircraft
p0469 A81-40106

Summary of interface testing of the digital AN/ASN-123 tactical navigation avionic system in the SH-3H helicopter
[AHS 80-18] p0474 A81-40149
Results of a simulator investigation of control system and display variations for an attack helicopter mission
[AHS 80-28] p0475 A81-40158
NASA/FAA flight-test investigation of helicopter microwave landing system approaches
[AHS 80-55] p0478 A81-40180
An experimental study on air intake performance for a rocket/ramjet engine
[AIAA PAPER 81-1488] p0506 A81-40906
Evolution of transport wings - From C-130, C-141, and C-5 to C-XX
p0510 A81-41333
F-16 variable-geometry inlet design and performance
[AIAA PAPER 81-1394] p0514 A81-42184
F100 engine diagnostic system status to date
[AIAA PAPER 81-1448] p0515 A81-42199
NASA service experience with composite components --- for aircraft structures
p0529 A81-43607
S-3A composite spoilers service experience
p0529 A81-43615
Aircraft ground mobility system for the F-16 aircraft
[AIAA PAPER 81-1735] p0536 A81-43960
Investigation of performance, noise and detectability characteristics of small-scale remotely piloted vehicle /RPV/ propellers
[AIAA PAPER 81-2005] p0624 A81-49732
Performance of a steel spar wind turbine blade on the Mod-0 100 kW experimental wind turbine
[NASA-TM-81588] p0043 N81-11448
Pilatus porter: Provision of revised take-off and landing performance data
[AD-A089964] p0076 N81-12068
An automatic isokinetic sampler for particulate emissions from aircraft gas turbine engines
[AD-A090280] p0088 N81-12653
Statistical relationship between median visibility and conditions of worstcase manmade impact on visibility
[LA-UR-80-2485] p0135 N81-14550
Investigation of convergent-divergent nozzles applicable to reduced-power supersonic cruise aircraft
[NASA-TP-1766] p0139 N81-14972
Discrete Address Beacon System (DABS) receiver and Air Traffic Control Radar Beacon System (ATCRBS) and DABS processor subsystem tests
[AD-A094124] p0250 N81-18037
An assessment of the use of antimisting fuel in turbofan engines
[NASA-CR-165258] p0277 N81-19316
Investigation of Flight Test Methods for measuring the performance of general aviation aircraft
[NASA-CR-164057] p0333 N81-20065
Minimum operational performance standards for airborne radar approach and beacon systems for helicopters
[RTCA/DO-172] p0336 N81-20322
Minimum operational performance standards for airborne weather and ground mapping pulsed radars
[RTCA/DO-173] p0336 N81-20323
Functional analysis and operational assessment of an onboard glide path guidance system for visual approaches (visual approach monitor VAM)
[ESA-TT-655] p0373 N81-22038
Erosion resistant coatings
[NASA-TM-75870] p0377 N81-22098
Functional testing airborne navigation equipment
[AD-A097115] p0387 N81-23062
Functional testing airborne radars
[AD-A097562] p0392 N81-23358
performance control and qualification tests of civil aviation turbine engines in tests conducted by airframe manufacturers
p0430 N81-24078
Development test requirements --- impact of weapon systems on propulsion system performance
p0430 N81-24080
Turbine engine tests as seen by an aircraft company
p0430 N81-24084
Investigation of performance deterioration of the CF6/JT9D high bypass ratio turbofan engines
p0431 N81-24086
Performance assessment of an advanced reheated turbo fan engine
p0432 N81-24094
Effect of a part-span variable inlet guide vane on the performance of a high-bypass turbofan engine
[NASA-TM-82617] p0443 N81-25081
High performance auxiliary power unit technology demonstrator
[AD-A098618] p0444 N81-25085
Flight test evaluation of a nonlinear hub spring on a UH-1H helicopter
[AD-A098794] p0486 N81-26121
Mixing effectiveness test of an exhaust gas mixer in a high bypass turbofan at altitude
[NASA-TM-82663] p0496 N81-27095
Full authority digital electronic control turbofan engine demonstration
p0498 N81-27112
Fuel system testing and test instrumentation --- MRCA aircraft
p0544 N81-29076
Research on the functional limits of a helicopter rotor: Speed and load factor
p0545 N81-29078
Aircraft brake systems testing handbook
[AD-A101516] p0548 N81-29123
Testing and evaluation of a stall-flutter-suppression system for helicopter rotors using individual-blade-control
[NASA-CR-166233] p0549 N81-29135
Computer analysis of 400 HZ Aircraft electrical generator test data
[AD-A100785] p0552 N81-29354
Aircraft sensor quality in SESAME 1979: Results of tower fly-bys and aircraft intercomparison
[PB81-176596] p0552 N81-29722
JT9D jet engine diagnostics program
p0598 N81-31199
JT8D engine performance retention
p0598 N81-31200
Performance retention of the RB211 powerplant in service
p0598 N81-31201
Voice communication capability of selected inflight headgear devices
p0604 N81-31467
An automated multiple choice intelligibility testing system
p0604 N81-31468
Minimum operational performance standards for Microwave Landing System (MLS) airborne receiving equipment
[RTCA/DO-177] p0628 N81-32133

PRECIPITATION PARTICLE MEASUREMENT
Electromagnetic precipitation and ducting of particles in turbulent boundary layers
p0239 A81-26506
PRECISION
Characteristics of a digital filter for a precision DME system in microwave landing systems
[PUB-43-1980] p0628 N81-32136
PREDICTION ANALYSIS TECHNIQUES
Prediction of changes in aircraft noise exposure
p0017 A81-11820
Preliminary consideration of parameter identification analysis from parachute aerodynamic flight test data
p0067 A81-16020
Numerical investigation of a model of turbulent combustion of hydrocarbons
[AIAA PAPER 81-0039] p0158 A81-20559
Prediction method for the overall performance of turbofan engines
[AIAA PAPER 81-0367] p0166 A81-20796
Empirical method for the prediction of business executive jet cabin noise levels
p0224 A81-23044
Development of conceptual Navy aircraft Reliability Prediction Models
p0229 A81-24280
The Modular Life Cycle Cost Model for advanced aircraft systems - An overview
[SAWE PAPER 1351] p0353 A81-31386
Aerodynamic characteristics of two VSTOL fighter configurations
[AIAA PAPER 81-1292] p0454 A81-38119
Airship survivability in atmospheric turbulence
[AIAA 81-1323] p0456 A81-38533
A perspective on developing new inlet distortion measurement and predictive methods
[AIAA PAPER 81-1589] p0507 A81-40964
Engine usage prediction for advanced fighter aircraft
[AIAA PAPER 81-1367] p0514 A81-42178
Predicting fatigue crack growth on aircraft structures
[SAE PAPER 810593] p0520 A81-42752
A prediction procedure for propeller aircraft flyover noise based on empirical data
[SAE PAPER 810604] p0521 A81-42761
Development of airframe structural design loads prediction techniques for flexible military aircraft - Theoretical development
[AIAA PAPER 81-1696] p0535 A81-43953
Development of airframe structural design loads prediction techniques for flexible military aircraft - Applications
[AIAA PAPER 81-1697] p0535 A81-43954
Output predictive algorithmic control - Precision tracking with application to terrain following
p0567 A81-46280
Prediction method for aeroacoustic loads on under the wing blown flaps
[AIAA PAPER 81-2030] p0621 A81-48644
An evaluation of statistical methods for the prediction of maximum time-variant inlet total pressure distortion
[AD-A089817] p0036 N81-11040
Optimal bodies for minimum total drag at supersonic speeds
[AD-A091235] p0091 N81-13036
Service life determination for the UH-60-A (UTTAS) helicopter elastomeric bearings
[AD-A091756] p0134 N81-14324
Study of transonic flow fields about aircraft: Application to external stores
p0187 N81-15998
Data base for the prediction of inlet external drag
p0190 N81-16010
A method for the prediction of wing response to nonstationary buffet loads
[AD-A093037] p0208 N81-17043
Prediction of nacelle aerodynamic interference effects at low supersonic Mach numbers
p0244 N81-17988
Predicting cost/reliability/maintainability of advanced general aviation avionics equipment
[NASA-CR-152149] p0273 N81-19111
Identification of jet engine damages by engine trend analysis LEADS 200 data
p0328 N81-20014

Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52
[NASA-TM-81358] p0387 N81-23066
Validation of helicopter noise prediction techniques
[NASA-CR-165715] p0447 N81-25768
Impact of prediction accuracy on costs - noise technology applications in helicopters
[AD-A101768] p0589 N81-30911
Aeroelastic buffeting prediction techniques: A general review
[DFVLR-FB-81-15] p0601 N81-31226

PREDICTIONS
NT NOISE PREDICTION (AIRCRAFT)
NT PERFORMANCE PREDICTION
Robust autoregressive models for predicting aircraft motion from noisy data

PRESSURE CABINS
U PRESSURIZED CABINS

PRESSURE DISTRIBUTION
Engine air intake design support by use of computational methods and comparison of theoretically derived pressure distributions with experimental data
p0008 A81-11614
Experimental investigations on a harmonically swinging trail edge flap with a space
[DGLR PAPER 80-029] p0055 A81-13925
The measurement of pressure distribution around a parachute canopy
p0067 A81-16019
Some characteristics of subsonic flow over the root area of a sweptback wing
p0123 A81-19633
An approximate analytical method for vortex-lift and centre of pressure on the slender wing
p0223 A81-23726
The influence of a wake splitter plate on the aerodynamic characteristics of a two-dimensional cylinder
p0226 A81-23949
Plane transonic solution with shock by direct iteration
p0231 A81-24814
Experimental investigations of the base pressures found on a bluff body in ground effect
p0234 A81-25379
Analysis of the difficulties in high performance compressor data reduction
[ONERA, TP NO. 1981-7] p0296 A81-29107
Comparison of computed and measured unsteady pressure fields on a supercritical wing
[ONERA, TP NO. 1981-12] p0359 A81-32541
Pressure distribution computation on a non-lifting symmetrical helicopter blade in forward flight
p0365 A81-33291
Experimental and analytical studies of a model helicopter rotor in hover
p0465 A81-39890
Prediction of helicopter rotor noise from measured blade surface pressure
p0577 A81-46649
Measured pressure distributions and shock shapes on a simple delta wing
p0617 A81-48479
An investigation of scale effects on the transonic flow over swept wings. Part 2: Measurements on a model of a variable-sweep strike-fighter configuration
[ARC-R/M-3842-PT-2] p0021 N81-10010
Comparison of Unsteady Pressure Fields Computed and Measured on the ZKP model
[AGARD-R-688] p0033 N81-11019
System to measure the pressure distribution on fan aerofoil surfaces during flutter conditions
[PNR-90013] p0072 N81-12029
Measured pressure distributions and shock shapes on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026
Unsteady pressure distributions on airfoils in cascade
[AD-A091173] p0090 N81-13033
Analysis of unsteady pressure measurements on an aerofoil section with an harmonically oscillating, slotted flap
[DFVLR-FB-80-22] p0126 N81-13929
Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with

underwing: Store
[AD-A077370] p0139 N81-14969
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-14984
A constrained inverse method for the aerodynamic design of thick wings with given pressure distribution in subsonic flow
p0188 N81-16006
Jet wing interference for an overwing engine configuration
p0188 N81-16008
The prediction of pressure distributions on an arrow-wing configuration including the effect of camber, twist, and a wing fin
p0243 N81-17984
Advanced turboprop installation aerodynamics
p0260 N81-19013
Pressure distributions for the GA(W)-2 airfoil with 20% aileron, 25% slotted flap and 30% Fowler flap
[NASA-CR-2948] p0262 N81-19023
VTOL in ground effect flows for closely spaced jets --- to predict pressure and upwash forces on aircraft structures
[NASA-CR-152321] p0271 N81-19095
Effects of window configuration on model pressure distribution in wind tunnels with perforated walls
[AD-A094213] p0277 N81-19142
Computation of pressure distribution on the DFVLR wing-body model by the panel method
[DFVLR-FB-80-02] p0372 N81-22029
Two-dimensional aerodynamic characteristics of the NACA 0012 airfoil in the Langley 8 foot transonic pressure tunnel
[NASA-TM-81927] p0385 N81-23036
Development of a nonlinear vortex method --- steady and unsteady aerodynamic loads of highly sweptback wings
[NASA-CR-164351] p0423 N81-24024
Wind tunnel corrections for high angles of attack: A brief review of recent UK work
p0436 N81-24127
Pressure distribution computation on a nonlifting symmetrical helicopter blade in forward flight
p0447 N81-26010
A procedure for designing forebodies with constraints on cross-section shape and axial area distribution
[NASA-TP-1881] p0483 N81-26078
The criticality of engine exhaust simulations on VSTOL model-measured ground effects
p0486 N81-26115
Subsonic tests of an all-flush-pressure-orifice air data system
[NASA-TP-1871] p0489 N81-26144
Static test of a fan-powered chin nozzle for V/STOL applications
[NASA-CR-165361] p0546 N81-29093
A program to evaluate a control system based on feedback of aerodynamic pressure differentials, part 1
[NASA-CR-164684] p0583 N81-30134
User's manual for FSLIP-3, FLEXSTAB loads integration program
[NASA-TM-81364] p0589 N81-30815
PRESSURE DRAG
NT SUPERSONIC DRAG
NT WAVE DRAG
Calculation of internal and external flow field and cowl pressure drag in the supersonic axisymmetric nose inlets
p0224 A81-23730
The influence of a wake splitter plate on the aerodynamic characteristics of a two-dimensional cylinder
p0226 A81-23949
PRESSURE EFFECTS
Discussion of the pressure-source aerosonic theory and of Doak's criticism
p0238 A81-26189
Core compressor exit stage study. Volume 2: Data and performance report for the baseline configuration
[NASA-CR-159498] p0195 N81-16051
On the influence of steady state temperature and pressure distortion on the flow characteristics in an installed multistage jet engine compressor --- heated intake air
[FBB-90022] p0275 N81-19126
PRESSURE FIELDS
U PRESSURE DISTRIBUTION
PRESSURE GRADIENTS
Fundamental studies on the control of turbulent boundary layers. I Theoretical and experimental analyses of velocity profiles and parameters with and without adverse pressure gradient, with uniform suction through a porous flat plate
p0228 A81-24079
An experimental investigation of separating flow on a convex surface
p0230 A81-24488
Eddy viscosity in accelerated and retarded cascade-wake flows
p0233 A81-25267
Stalling pressure rise capability of axial flow compressor stages
[ASME PAPER 81-GT-3] p0310 A81-29928
Wind tunnel wall interference
[AD-A093301] p0217 N81-17104
Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010
PRESSURE MEASUREMENTS
An experimental and theoretical investigation of pressures in four-lobe bearings
p0004 A81-10840
Unsteady fan blade pressure and acoustic radiation from a JT15D-1 turbofan engine at simulated forward speed
[AIAA PAPER 81-0096] p0161 A81-20598
Investigation of transient processes in the perforated working section of a wind tunnel
p0237 A81-26122
Measurement of heat flux and pressure in a turbine stage
[ASME PAPER 81-GT-88] p0314 A81-29995
Centralized in-place pressure calibration system for multiple turbine engine aerodynamic pressure measurement systems
p0360 A81-32847
Trailing-edge airframe noise source studies on aircraft wings
[AIAA PAPER 80-0976] p0411 A81-35634
Onboard procedure for the measurement of wind shear gradients
[DGLR PAPER 81-060] p0610 A81-47612
Trailing edge noise prediction from measured surface pressures
p0616 A81-48395
Flow in bent pipes
[CETIM-14-F-091] p0256 N81-18322
Unsteady pressure measurements during stall and buffeting --- wind tunnel tests
[ESA-TT-641] p0339 N81-21041
Study of an experimental probe for the measurement of the acoustic pressure inside an air flow
[ESA-TT-633] p0344 N81-21340
Preliminary calibration of the transonic test section of the NIAST trisonic tunnel
[NIAST-80/19] p0435 N81-24116
Surface pressure measurements on a projectile shape at Mach 0.908
[AD-A098589] p0439 N81-25045
Measurements of temperature and pressure fluctuations in the T prime 2 cryogenic wind tunnel
[NASA-TM-75408] p0490 N81-26158
Development of an instrument for the accurate measurement of aircraft airspeed and altitude
[AD-A103421] p0638 N81-33204
PRESSURE OSCILLATIONS
Subcritical flutter and oscillatory pressure testing of a full-scale 727 inboard aileron in a low-speed wind-tunnel
[AIAA 81-0656] p0308 A81-29508
Analysis of total and static pressure fluctuations in an air intake at high incidence
[AAAF PAPER NT 80-61] p0370 A81-33950
Fluctuation of gas parameters behind the combustion chamber of gas turbine engines
p0466 A81-40024
Excitation of surging type oscillations due to aperiodic external effects --- in multishaft turbojet engines
p0509 A81-41032
Pressure fluctuations on the surface of a small passenger aircraft. I - Periodic disturbances caused by the rotation of the propeller

p0561 A81-44615
Pressure fluctuations on the surface of a small passenger aircraft. II - The effect of the turbulent boundary layer
p0562 A81-44618
Contributions to the theory of side edge flap noise
[AIAA PAPER 81-2036] p0619 A81-48625
Evaluation of flow quality in two large NASA wind tunnels at transonic speeds
[NASA-TP-1737] p0095 N81-13303
Analysis of unsteady pressure measurements on an aerofoil section with an harmonically oscillating, slotted flap
[DFVLR-FB-80-22] p0126 N81-13929
PRESSURE PROBES
U PRESSURE SENSORS
PRESSURE PULSES
Influence of boundary-layer suction on the emission spectrum on a thin plate performing oscillations under the action of pressure pulsations --- in aircraft noise reduction
p0054 A81-13573
Influence of boundary-layer suction on the spectrum of radiation from a thin plate vibrating under the action of pressure fluctuations --- in aircraft noise reduction
p0238 A81-26137
PRESSURE RATIO
Test results from an analytically designed axial compressor stage of 1.65:1 pressure ratio
[SAE PAPER 800629] p0063 A81-15344
Fuel character effects on current, high pressure ratio, can-type turbine combustion systems
[AD-A089182] p0029 N81-10073
PRESSURE REDUCTION
Losses of total pressure during mixing of flows in a step diffuser
p0242 A81-26991
The M.45SD-02 variable pitch geared fan engine demonstrator test and evaluation experience
p0283 A81-27897
Application of model laws when determining the heat transfer coefficients by experiments on cooled turbine blades
p0089 N81-12998
Flame tube and ballistic evaluation of Explosafe aluminum foil for aircraft fuel tank explosion protection --- suppressing combustion overpressure
[AD-A093542] p0208 N81-17046
Thermal and flow analysis of a convection air-cooled ceramic coated porous metal concept for turbine vanes
[NASA-TM-81749] p0376 N81-22056
Experimental development of an advanced circulation control wing system for Navy STOL aircraft
[AD-A101309] p0581 N81-30116
PRESSURE REGULATORS
Cabin pressure control systems for general aviation aircraft
[SAE PAPER 800606] p0061 A81-15329
PRESSURE SENSORS
Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354
System to measure the pressure distribution on fan aerofoil surfaces during flutter conditions
[PNR-90013] p0072 N81-12029
Comparison of flight load measurements obtained from calibrated strain gages and pressure transducers
[AD-A093758] p0208 N81-17044
Study of an experimental probe for the measurement of the acoustic pressure inside an air flow
[ESA-TT-633] p0344 N81-21340
PRESSURE TRANSDUCERS
U PRESSURE SENSORS
PRESSURE VESSELS
The use of acoustic emission for detecting and evaluating of fatigue cracks severity during static and cyclic loading of structure elements

p0152 A81-20089
Detection of direction changes of flying targets from position coordinates of the radar data
p0152 A81-20099
Automatic clustering of synthetic aperture radar /SAR/ targets
p0323 A81-30303
Maximum likelihood elevation angle estimates of radar targets using subapertures
p0359 A81-32691
An original method for the analysis of the power diffraction pattern of a radar target for shape recognition purposes
p0607 A81-47143
Adaptive features and measurement requirements for advanced surveillance radars
p0617 A81-48544
RADAR TRACKING
A mobile computer-aided detection and tracking system for low-flying attack aircraft
p0152 A81-20098
Detection of direction changes of flying targets from position coordinates of the radar data
p0152 A81-20099
Application of Doppler information to automatic target tracking
p0153 A81-20101
New techniques for the monopulse-radar tracking of high-manoeuverability aircraft
p0153 A81-20102
Adaptive control for electronic countermeasures
p0155 A81-20470
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21828
Implementation of target orientation angles in improved Kalman filter based short range radar tracking
p0326 A81-30340
Maximum likelihood elevation angle estimates of radar targets using subapertures
p0359 A81-32691
Dynamic errors of the Kalman filtering of trajectory parameters --- for radar tracking of aircraft maneuvers
p0366 A81-33687
AIRCAT 500 ATC systems for Australia and Mexico
p0407 A81-34329
Nonlinear estimation of generalized vector shot processes
p0529 A81-43583
Three edge-point estimation schemes for tracking airborne targets
p0562 A81-44681
Aircraft recognition by means of monostatic radar
p0607 A81-47142
The semi-operational evaluation of the trajectory prediction method for Signal Automatic Radar Processing (SARP) 2 --- air traffic control
[NLR-MP-79038-U] p0332 N81-20059
Airport Surface Detection Equipment (ASDE)-3 operational evaluation
[AD-A098480] p0440 N81-25059
Analytical investigation of time correction in alpha-beta tracking filters with application to en route tracking
[AD-A099218] p0484 N81-26090
Multiple arrested synthetic aperture radar
[AD-A101143] p0551 N81-29317
RADAR TRANSMISSION
Multipath and interference effects in secondary surveillance radar systems
p0183 A81-23359
RADARSCOPES
NT PLAN POSITION INDICATORS
Proceedings of the 1979 Seminar on Air Traffic Control. Terminal Radar Approach Control (TRACON) facility supervisory desk complex
[AD-A089914] p0034 N81-11024
RADIAL FLOW
Cooled radial in-flow turbines for advanced gas turbine engines
[ASME PAPER 81-GT-213] p0318 A81-30102
Loss model for off-design performance analysis of radial turbines with pivoting-vane, variable-area stators
[SAE PAPER 801135] p0397 A81-34166
An experimental and theoretical investigation of a twin-entry radial flow turbine under non-steady flow conditions
[SAE PAPER 801136] p0397 A81-34167
Experiments with a supersonic multi-channel radial diffuser
[AD-A094192] p0257 N81-18374
The role of coherent structures in the generation of noise for subsonic jets
[NASA-CR-164214] p0300 N81-22833
RADIANT HEATING
Ignition of a liquid fuel
[AD-A089295] p0030 N81-10120
RADIATION ABSORPTION
NT ATMOSPHERIC ATTENUATION
NT ELECTROMAGNETIC ABSORPTION
RADIATION DISTRIBUTION
NT ANTENNA RADIATION PATTERNS
NT DIFFRACTION PATTERNS
Radiation boundary conditions for wave-like equations --- numerical jet acoustics experimentation
p0153 A81-20223
RADIATION FIELDS
U RADIATION DISTRIBUTION
RADIATION HARDENING
Improving surface current injection techniques via one- and two-dimensional models
p0149 A81-19940
Nuclear hardness assurance for aeronautical systems
[SAE PAPER 801227] p0405 A81-34230
Optimal nuclear radiation criteria for aeronautical systems
[AD-A101651] p0546 N81-29125
RADIATION HEATING
U RADIANT HEATING
RADIATION MEASUREMENT
Microcomputer system for controlling an infrared scanning camera --- with application to rocket plume radiation measurement
p0453 A81-37749
Test facility for the measurement of infrared radiation from jet engine exhaust systems
p0462 A81-39503
RADIATION MEASURING INSTRUMENTS
NT FLIR DETECTORS
NT INFRARED DETECTORS
NT INFRARED INSTRUMENTS
NT INFRARED RADIOMETERS
NT INFRARED SCANNERS
NT INFRARED SPECTROMETERS
NT MICROWAVE RADIOMETERS
RADIATION NOISE
U ELECTROMAGNETIC NOISE
RADIATION PRESSURE
NT SOUND PRESSURE
RADIATION PROTECTION
NT RADIATION SHIELDING
RADIATION PYROMETERS
Surface pyrometry in presence of radiation from other sources with application to turbine blade temperature measurement
[NASA-TP-1754] p0036 N81-11039
RADIATION RESISTANCE
U RADIATION TOLERANCE

RADIATION SHIELDING
General Electric infrared suppressors for the Black Hawk helicopter
p0106 A81-17520
RADIATION SPECTRA
NT EMISSION SPECTRA
NT INFRARED SPECTRA
NT RAMAN SPECTRA
RADIATION TOLERANCE
Nuclear hardness assurance for aeronautical systems
[SAE PAPER 801227] p0405 A81-34230
RADIATIVE HEAT TRANSFER
Analysis of a reverse flow, annular combustion chamber
p0294 A81-29081
RADIATIVE TRANSFER
NT RADIATIVE HEAT TRANSFER
RADIO ALTIMETERS
Accuracy of noise-modulated radio altimeter
p0359 A81-32694
Seasat altimeter height calibration --- related to sea surface heights near bermuda
[NASA-TM-82040] p0279 N81-19526
RADIO ANTENNAS
Excitation of a circular array of cylinders with longitudinal slits --- in radio antennas
p0019 A81-12619
Antenna-to-antenna coupling in aircraft radio systems
p0057 A81-14280
Flight-vehicle antennas /2nd revised and enlarged edition/ --- Russian book
p0281 A81-27534
RADIO BEACONS
NT OMNIDIRECTIONAL RADIO RANGES
New technology for the NDB system and its reliability. II --- omnidirectional radio beacons
p0230 A81-24524
New technology for the NDB system and its reliability. III --- omnidirectional radio beacon
p0231 A81-24525
Investigation of Wilcox model 585B very high frequency omnidirectional radio range system, part 2
[AD-A099525] p0094 N81-27073
RADIO COMMUNICATION
NT TIME DIVISION MULTIPLE ACCESS
The use of satellite systems for communication
p0051 A81-13310
Aeronautical-Maritime Engineering Satellite /AMES/ program of Japan
[IAF PAPER 80-D-171] p0115 A81-18318
Automated pilot advisory system test and evaluation at Manassas Municipal Airport
p0264 N81-19040
A Kalman filter approach to navigation on the NAE Convair 580 aeromagnetics research aircraft
[AD-A100836] p0547 N81-29116
Transverse Voice Radio Link for Stratospheric Balloons
[INPE-1992-RPE/285] p0586 N81-30331
Impact of low altitude coverage requirements on air-ground communications
[AD-A101642] p0586 N81-30338
Clear speech: A strategem for improving radio communications and automatic speech recognition in noise
p0603 N81-31453
RADIO CONTROL
Aerial surveying of small areas from a small remotely controlled drone
p0107 A81-17525
RADIO DIRECTION FINDERS
Passive location finding with a multiwavelength two element interferometer
p0350 A81-31125
Hyperbolic origins --- of radio position-fixing systems
p0612 A81-47842
Radio direction finding on high frequency short duration signals
[AD-A092136] p0192 N81-16029
RADIO EQUIPMENT
NT OMNIDIRECTIONAL RADIO RANGES
NT RADIO ANTENNAS
NT RADIO BEACONS
NT RADIO RECEIVERS
NT RADIO TRANSMITTERS

RADIO FREQUENCY INTERFERENCE
NT ELECTROMAGNETIC NOISE
RF compatibility-environment to component part
p0056 A81-14260
Determination if fiber-optic immunity is adequate for deployment in the V/STOL airframe --- to compensate nonmetallic material LF transparency
p0057 A81-14265
Rotating blades radio interference in a helicopter-borne CW Doppler radar
p0224 A81-23813
Dielectric electrostatic charge reduction
[SAE PAPER 810571] p0519 A81-42736
A supplementary EMC analysis of the proposed Airport Surface Detection Equipment (ASDE-3) radar
[AD-A092965] p0219 N81-17342
Evaluation of Discrete Address Beacon System (DABS) EMC
[PB81-154387] p0441 N81-25062
RADIO FREQUENCY NOISE
U ELECTROMAGNETIC NOISE
RADIO FREQUENCY RADIATION
U RADIO WAVES
RADIO INTERFERENCE
U RADIO FREQUENCY INTERFERENCE
RADIO INTERFEROMETERS
Passive location finding with a multiwavelength two element interferometer
p0350 A81-31125
RADIO METEOROLOGY
An observational experiment using a monostatic sodar at the airport of Fiumicino
p0282 A81-27548
RADIO NAVIGATION
NT HYPERBOLIC NAVIGATION
NT LORAN
NT LORAN C
NT TACAN
NT VHF OMNIRANGE NAVIGATION
The outfitting of regional airports in the future with radio assistance for approach and landing, with emphasis on landing site obstacles for general aviation
p0051 A81-13313
Omega - An economic Loran A replacement
p0113 A81-18077
Radio navigation for aircraft: Handbook --- Russian book
p0116 A81-16599
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21828
Band sharing - A case study
p0173 A81-21869
GPS Navstar, the universal positioning system of the future
p0349 A81-30975
Perspectives on the civil utilization of the Navstar/GPS
p0409 A81-35022
Omega station 10.2 kHz signal coverage prediction diagrams
p0512 A81-41760
Aircraft radio systems --- Book
p0513 A81-41871

Low-frequency radio navigation for the Army's Mobile Automated Field Instrumentation System /MAFIS/
p0517 A81-42437
The selection of air radio navigation system for the post-1990 period
p0556 A81-44322
An integrated Omega/satellite radio navigation system
p0566 A81-45767
Errors of phase VLF-navigation systems under conditions of auroral disturbances
p0607 A81-47533
Federal Radionavigation Plan. Volume 1: Radionavigation plans and policy
[AD-A093774] p0206 N81-17030
Federal Radionavigation Plan. Volume 2: Requirements
[AD-A093775] p0207 N81-17031
Federal Radionavigation Plan. Volume 3: Radionavigation system characteristics
[AD-A093776] p0207 N81-17032
Federal Radionavigation Plan. Volume 4: Radionavigation research, engineering and development
[AD-A093777] p0207 N81-17033
A method for evaluating radio navigation systems for the terminal maneuvering area --- approach control
[DFVLR-MITT-81-02] p0538 N81-28080
RADIO PROBING
Measurement of radar in radio service aircraft
p0151 A81-20079
RADIO RANGES
U RADIO BEACONS
RADIO RECEIVERS
GPS receiver simulation
p0173 A81-21913
A review of current and future components for electronic warfare receivers
p0357 A81-32252
Low cost airborne microwave landing system receiver, task 3
[NASA-CR-152409] p0075 N81-12054

AN/TPX-54 interrogator
p0350 A81-31131
Low-frequency radio navigation system
[NASA-CASE-NPO-15264-1] p0373 N81-22036
RADIO WAVES
NT MICROWAVES
NT MILLIMETER WAVES
Lightning electric field measurements which correlate with strikes to the NASA F-106B aircraft, 22 July 1980
[NASA-TM-82142] p0491 N81-26643
RADIOACTIVE ELEMENTS
U RADIOACTIVE ISOTOPES
RADIOACTIVE ISOTOPES
Bearing wear detection using radioactive iron-55 tagging
[ASLE PREPRINT 81-AM-6A-3] p0367 A81-33868
RADIOACTIVE MATERIALS
Aviation safety: Hazardous materials handling
[GPO-69-199] p0439 N81-25049
RADIOACTIVE NUCLIDES
U RADIOACTIVE ISOTOPES
RADIOGRAPHY
X-ray pulse method for investigation of the internal structure of a fuel jet
p0059 A81-14592
RADIOMETERS
NT INFRARED DETECTORS
NT INFRARED RADIOMETERS
NT INFRARED SCANNERS
NT MICROWAVE RADIOMETERS
RADIONUCLIDES
U RADIOACTIVE ISOTOPES
RADIOSENSITIVITY
U RADIATION TOLERANCE
RADIOSONDES
Helicopter-borne radiosonde system and its experimental uses
p0231 A81-24870
RADOME MATERIALS
Captive carry and free flight rain erosion considerations for reinforced ablative fluorocarbon radome materials
p0103 A81-17453
RADOMES
An investigation of the liquid impact properties of a GFRP radome material
p0427 A81-30571
RAFTS
Development of retardation and automatic flotation system (R.A.F.T.)
[AD-A096828] p0439 N81-25047
RAIL TRANSPORTATION
Drag estimations for stream-line and cylindrical contour distortions on aircraft fuselages and train cars
[DGLR PAPER 80-116] p0121 A81-19399
Alternative energy sources for non-highway transportation, appendices
[DOE/CS-05438/T1-VOL-3] p0044 N81-11500
Published results of the program of university research. Transportation research results
[PB81-210130] p0641 N81-34108
Dual-powered Gas Turbine/Electric (GT/E) computer commuter rail cars: Test, evaluation and economics
[PB81-211757] p0641 N81-34109
RAILROADS
U RAIL TRANSPORTATION
RAILS
Study of a crack propagation on the flap rail of a transport aircraft
p0181 A81-22633
RAIN
NT ACID RAIN
RAIN EROSION
Captive carry and free flight rain erosion considerations for reinforced ablative fluorocarbon radome materials
p0103 A81-17453
The effect of the in-service environment on composite materials (resume of the April 1980 Athens conference)
p0199 N81-16146
RAINSTORMS
NT THUNDERSTORMS
The effect of heavy rain on windshear attributed accidents
[AIAA PAPER 81-0390] p0167 A81-20800
RAKES
An application of wake survey rakes to the experimental determination of thrust for a propeller driven aircraft
[NASA-CR-163967] p0251 N81-18046
RAMAN EFFECT
U RAMAN SPECTRA
RAMAN SCATTERING
U RAMAN SPECTRA
RAMAN SPECTRA
Laser-Raman/Rayleigh flow diagnostic techniques applied to subsonic flow
[AD-A091695] p0133 N81-14275
RAMJET ENGINES
NT SUPERSONIC COMBUSTION RAMJET ENGINES
Comparison of systems of power generation during emergencies /aboard aircraft/
p0177 A81-22203
Light transmission measurements in solid fuel ramjet combustors
p0284 A81-27910
Flowfield studies of dump combustors
p0282 A81-29064
Performance analysis of primary and secondary systems of a rocket ramjet engine burning fuel-rich metallized propellants
p0292 A81-29066
Preliminary experimental study of combustion in the solid rocket-ramjet
p0292 A81-29067
Sudden expansion injection for ram-rockets
p0293 A81-29071

Analysis of steady, two-dimensional, chemically reacting nonequilibrium flow by an unsteady, asymptotically consistent technique --- for performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869
Interpretation of ramjet combustor test data
[AIAA PAPER 81-1433] p0504 A81-40870
Prediction of swirling reacting flow in ramjet combustors
[AIAA PAPER 81-1485] p0506 A81-40903
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904
An experimental study on air intake performance for a rocket/ramjet engine
[AIAA PAPER 81-1488] p0506 A81-40906
Modeling of ramjet combustors using simple reactor theory
[AIAA PAPER 81-1429] p0515 A81-42196
Effects of advances in propulsion technology on missile effectiveness --- solid fuel ramjets
[AD-A090645] p0081 N81-12106
Mixing and combustion in high speed air flows
[AD-A090536] p0083 N81-12192
High-speed cowlings, air inlets and outlets, and internal-flow systems
p0185 N81-15973
The 17th JANNAF combustion meeting, volume 1
[NASA-TM-82238] p0200 N81-16253
An investigation of the reacting and non-reacting flow characteristics of solid ramjets
[AD-A094567] p0253 N81-18059
Aerodynamic characteristics of a hypersonic cruise aircraft concept with wing-mounted propulsion systems at Mach numbers of 2.96, 3.96 and 4.63 --- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025
Multiple-scale turbulence modeling of boundary layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23411
An investigation of the combustion behavior of solid fuel ramjets
[AD-A098481] p0445 N81-25240
Combustion in high speed air flows
[AD-A102336] p0602 N81-31320

RAMJET MISSILES
An approach to ramjet trajectory simulation test
p0292 A81-29065
O.N.E.R.A. ramjet test facilities
p0365 A81-33285
Firebrand ramjet propulsion system development
[AIAA PAPER 81-1486] p0506 A81-40904

RAMP FUNCTIONS
Results of oscillatory pitch and ramp tests on the NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024

RANDOM ACCESS MEMORY
New storage medium - Greater safety. II - Testing, fabrication, implementation --- MNOS block oriented random access memory (BORAM) circuits
p0227 A81-24044

RANDOM LOADS
NT GUST LOADS
Active gust- and maneuver load control concepts, taking into account, as example, the Airbus A300. I - Design of a controller in the temporal domain for the alleviation of gust loads and the control of the effectiveness for stochastic gusts
[DGLR PAPER 81-065A] p0608 A81-47552

RANDOM NOISE
Robust autoregressive models for predicting aircraft motion from noisy data
p0155 A81-20473
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922
Accuracy of noise-modulated radio altimeter
p0359 A81-32694
Contribution to the study of non stationary signals emitted by moving jet engine - Application to special analysis and imaging. I.
p0365 A81-33288
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
Contribution to the study of nonstationary signals emitted by moving jet engines: Application to special analysis and imaging. Part 1
p0447 N81-26006

RANDOM NUMBERS
A correlated random numbers generator and its use to estimate false alarm rates of airplane sensor failure detection algorithms
p0154 A81-2044
A correlated random numbers generator and its use to estimate false alarm rates of airplane sensor failure detection algorithms
p0453 A81-37822

RANDOM PROCESSES
NT RANDOM WALK
Detection of moving objects --- Russian book
p0118 A81-18773
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922

RANDOM WALK
Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model
p0228 A81-24078

RANGE (EXTREMES)
Prediction of range and endurance of jet aircraft at constant altitude
p0611 A81-47725

RANGE CONTROL
U TRAJECTORY CONTROL

RANGE FINDERS
NT LASER RANGE FINDERS

RANGE SAFETY
Flight termination receiver/decoders design, performance and certification
[AD-A089746] p0037 N81-1108

RANGEFINDING
NT SOUND RANGING

RANGES (FACILITIES)
NT BALLISTIC RANGES

RAPCON (CONTROL)
U RADAR APPROACH CONTROL

RAREFACTION WAVES
U ELASTIC WAVES

RAREFIED GAS DYNAMICS
Nonstationary method for the direct statistical modeling of rarefied-gas flows
p0069 A81-1645

RAREFIED PLASMAS
A new helicopter map display device MKG-5
p0418 A81-3696

RATE METERS

RAY OPTICS
U GEOMETRICAL OPTICS
RAY TRACING
Volumetric pattern prediction of antennas on aircraft using the geometrical theory of diffraction
[DFVLR-FB-80-01] p0132 N81-14195
RAYLEIGH SCATTERING
Laser-Raman/Rayleigh flow diagnostic techniques applied to subsonic flow
[AD-A091695] p0133 N81-14275
REACTION CONTROL
Air combat advantages from reaction control systems
[SAE PAPER 801177] p0400 A81-34190
REACTION JETS
U JET FLOW
U JET THRUST
REACTION KINETICS
Sudden expansion injection for ram-rockets
p0293 A81-29071
A theoretical and experimental study of combustion chambers with recirculation
[ONERA, TP NO. 1981-39] p0460 A81-39242
Critical considerations in the design of supersonic combustion ramjet /scramjet/ engines
[AIAA PAPER 80-1204] p0511 A81-41748
REACTION RATE
U REACTION KINETICS
REACTION TIME
The speed of response to synthesized voice messages
p0603 N81-31456
READ-ONLY MEMORY DEVICES
Logistics support of avionic software stored on erasable programmable read only memory
p0327 A81-30356
READERS
A preliminary human factors flight assessment of a Marconi automatic map
[AD-A092585] p0193 N81-16036
READING MACHINES
U READERS
READOUT
Recent improvements on generating voltmeters
[DOE/ER-01388/463] p0257 N81-18359
REAL TIME OPERATION
A case study - Real time simulation and structured design
p0172 A81-21721
A flight test real-time GW-C6 computing system
p0361 A81-32860
Real-time microprocessor technology applied to automatic braking systems
[SAE PAPER 801194] p0402 A81-34204
A nonlinear propulsion system simulation technique for piloted simulators
p0454 A81-38064
The Bundeswehr Drone Program - Where are we today
p0458 A81-38806
Real time analysis for helicopter flight testing
p0470 A81-40112
An active control system for helicopter vibration reduction by higher harmonic pitch
[AHS 80-71] p0479 A81-40189
Real-time fluoroscopic imaging system for honeycomb bond structures
p0529 A81-43563
Real-time estimation in advanced turbofan engines
p0564 A81-45553
The array processor - A real-time simulator
p0614 A81-48328
Function generation techniques --- in real time hybrid simulations
p0614 A81-48329
A technique for the implementation of nonlinear models as real-time digital simulations --- with application to aircraft turbine engine design
p0615 A81-48333
Development considerations for real-time aircraft/avionic distributed computer control systems
p0616 A81-48376
ATARS implementation tradeoff
[AD-A089977] p0034 N81-11026
Experimental analysis of IMEP in a rotary combustion engine
[NASA-TM-81662] p0195 N81-16054
Possible online uses of AIDS data in future ATC systems
p0328 N81-20018
An approach to real-time simulation using parallel processing
[NASA-TM-81731] p0345 N81-21803
A study of real-time computer graphic display technology for aeronautical applications
[NASA-CR-164221] p0380 N81-22727
Tests of large compressors at CE Pr
p0432 N81-24096
Programmable multipurpose flight test instrumentation system
p0545 N81-29065
Microwave system for real time space position measurement
p0549 N81-29089

RESONANT FREQUENCIES

Resonance of forwards and backwards vibration mode of impeller with gyroscopic effect
[AIAA 81-0524] p0303 A81-29405

Determining the natural frequency of the combinative system of the helicopter rotor and elastic fuselage with mechanical impedance technique
[AIAA 81-0613] p0305 A81-29475

Damage recognition and localization by means of differential modal analysis
[DGLR PAPER 81-056] p0610 A81-47603

The resonance frequencies of ventilated wind tunnels
[ARC-R/M-3841] p0144 N81-15009

RESONANT VIBRATION

Development of antiresonance force isolators for helicopter vibration reduction
p0467 A81-40091

LIVE - Liquid inertia vibration eliminator
[AHS 80-22] p0475 A81-40152

Calculation of natural vibrations for thin-walled irregular reinforced shells of the helicopter fuselage type using the finite-element work method
p0614 A81-48097

Finite strip analysis of singly curved skin-stringer structures
p0616 A81-48390

Total main rotor isolation system analysis
[NASA-CR-165666] p0329 N81-20027

Developement of antiresonance force isolators for helicopter vibration reduction
[MBB-UD-305/80-OE] p0582 N81-30123

RESOURCES

NT CRUDE OIL

RESOURCES MANAGEMENT

NASA's activities in the conservation of strategic aerospace materials
p0179 A81-22535

Guidelines for line-oriented flight training, volume 1
[NASA-CP-2184] p0580 N81-30101

A prescriptive model for resource allocation at the intermediate level engine facility

[AD-A096828] p0439 N81-25047

RETROFITTING

CFM56 rejuvenates the DC-8
p0455 A81-38196

REUSABLE SPACECRAFT

NT SPACE SHUTTLES

REVERSE TIME

U REACTION TIME

REVERSED FLOW

Analysis of a reverse flow, annular combustion chamber
p0294 A81-29081

Reverse flow, pre-rotation and unsteady inlet flow in centrifugal pumps
[VKI-PREPRINT-1979-15] p0085 N81-12433

REVISIONS

Transonic cascade wind tunnel modification and initial tests
[AD-A091080] p0090 N81-13031

Aircraft modification management evaluation
[AD-A096458] p0381 N81-22974

A method for estimating the cost of aircraft structural modification
[AD-A099327] p0483 N81-26035

REYNOLDS NUMBER

Some problems of modeling high-speed aerodynamics --- in wind tunnels and tubes
p0237 A81-26118

Factors affecting afterbody drag
p0292 A81-29069
Tests of air inlets at Reynolds numbers comparable to flight in the ONERA F1 and S1MA wind tunnels
[ONERA, TP NO. 1981-36] p0460 A81-39239
Experiments on the nonlinear characteristics of noise propagation from low and moderate Reynolds number supersonic jets
[AIAA PAPER 81-2041] p0618 A81-48613
A fan pressure ratio correlation in terms of Mach number and Reynolds number for the Langley 0.3 meter transonic cryogenic tunnel
[NASA-TP-1752] p0021 N81-10005
The principles and applications of cryogenic wind tunnels
p0037 N81-11049
Wind-tunnel measurements and comparison with flight of the boundary layer and heat transfer on a hollow cylinder at Mach 3
[NASA-TP-1789] p0140 N81-14975
Experimental flutter at high subsonic speeds and its theoretical prediction, taking into account wing thickness and Reynolds number
p0385 N81-23052
High angle of attack missile aerodynamic at Mach numbers 0.30 to 1.5
[AD-A010210] p0585 N81-30159
Wall interference effects: Status review
p0592 N81-31141
Comments on Reynolds number effects and the role of NTF in the development of air vehicles
p0592 N81-31142
Aircraft design using the National Transonic Facility
p0593 N81-31143
Proposed aeroelastic and flutter tests for the National Transonic Facility
p0593 N81-31144
Preliminary user planning for the NASA National Transonic Facility
p0593 N81-31145
Report of the panel on fluid dynamics
p0593 N81-31146
High lift technology
p0593 N81-31147
Configuration aerodynamics
p0593 N81-31148
Report of the panel on aeroelasticity and unsteady aerodynamics
p0593 N81-31149
Report of the wind tunnel/flight correlation panel
p0593 N81-31150
High Reynolds number research requirements for space vehicle design
p0593 N81-31151
Report of the panel on theoretical aerodynamics
p0593 N81-31152

REYNOLDS STRESS
Partially confined multiple jet mixing
p0234 A81-25513
Mean-flow and turbulence measurements in the vicinity of the trailing edge of an NACA (63 sub 1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410

RF-8 AIRCRAFT
U F-8 AIRCRAFT

RF-4 AIRCRAFT
KS-127A long range oblique reconnaissance camera for RF-4 aircraft
p0462 A81-39419

RH-2 HELICOPTER
U UH-1 HELICOPTER

RIBBONS
An assessment of buffer strips for improving damage tolerance
p0247 N81-18009

RIBS (SUPPORTS)
Drag characteristics of V-groove and transverse curvature riblets
p0239 A81-26510
Unistructure - A new concept for light weight integrally stiffened skin structures
[SAE PAPER 801231] p0405 A81-34233

RIGID ROTOR HELICOPTERS
Engine-airframe transient compatibility - Analysis and test
p0106 A81-17517
An ABC status report --- Advancing Blade Concept for XH-59A rotors
p0572 A81-46610

RIGID ROTORS
An exact solution of the problem of the motion of a gyroscope in a Cardan suspension
p0019 A81-12708
Hingeless tailrotor in fiber composite construction and vibration-isolation systems /ARIS, ASIS/ for helicopters
[MBB-UD-311-80-0] p0119 A81-19300
A Galerkin type finite element method for rotary-wing aeroelasticity in hover and forward flight
p0364 A81-33050
Analysis and application of compliant rotor technology
p0467 A81-40086
Rotor blade aeroelastic stability and response in forward flight
p0467 A81-40089
Aeroelastic stability analysis of hingeless rotor helicopters in forward flight using blade and airframe normal modes
[AHS 80-24] p0475 A81-40154
Advancing Blade Concept (ABC) technology demonstrator
[AD-A100181] p0538 N81-28087
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters --- hingeless rotor helicopters
[MBB-UD-306/80-OE] p0584 N81-36139

RIGID STRUCTURES
NT RIGID ROTORS
NT RIGID WINGS
Design and fabrication of stabilized organic matrix composites
p0005 A81-11338
Introduction to a rigid pavement design procedure
p0111 A81-18054
Unistructure - A new concept for light weight integrally stiffened skin structures
[SAE PAPER 801231] p0405 A81-34233

RIGID WINGS
The development of the secondary wing structure for a rigid wing hang glider --- sandwich structure techniques
[BU-251] p0375 N81-22046

RING LASERS
Ring laser gyro
[AD-A090643] p0085 N81-12395
Investigation of a strapdown attitude and heading reference system utilizing ring laser gyros
p0484 N81-26092
Flight test results of an advanced development model Ring Laser Gyro Navigator (RLGN)
p0485 N81-26193

RING STRUCTURES
On the steady state and dynamic performance characteristics of floating ring bearings
[ASME PAPER 80-C2/LUB-17] p0117 A81-18671

RISK
ORLA - An assessment of risks --- Optimum Repair Level Analysis
p0229 A81-24257
Assessment of the impact of advanced air-transport technology
p0247 N81-18015
Risk to the public from carbon fibers released in civil aircraft accidents
[NASA-SP-448] p0254 N81-18096
Carbon/graphite composite material study
[AR-3] p0585 N81-30188
Carbon/graphite composite material study, appendix A and appendix B
p0585 N81-30190

RIVETED JOINTS
Measures for increasing the service life of riveted, aircraft-relevant joints
[DGLR PAPER 81-052] p0609 A81-47568
Application of fracture mechanics to built-up structures --- aircraft handbooks
[NLR-MP-79044-U] p0006 N81-12475

RIVETING
The possibility of single-impact riveting of flat-top countersunk-head rivets --- for aircraft structures

p0319 A81-30164
Automatic riveting installation for spherical aircraft parts
p0450 A81-37641

ROBUSTNESS (MATHEMATICS)
Robust autoregressive models for predicting aircraft motion from noisy data
p0155 A81-20473
Robustness properties of a new multirate digital control system
[AIAA PAPER 81-0022] p0150 A81-20545
Application of vector performance optimization to a robust control loop design for a fighter aircraft
[DFVLR-FB-80-14] p0130 N81-13970

ROCKET BOOSTERS
U BOOSTER ROCKET ENGINES

ROCKET CHAMBERS
U THRUST CHAMBERS

ROCKET ENGINE CASES
Kevlar - Thermophysical properties
[AIAA PAPER 81-1104] p0459 A81-39104

ROCKET ENGINE DESIGN
Performance analysis of primary and secondary systems of a rocket ramjet engine burning fuel-rich metallized propellants
p0292 A81-29066
Preliminary experimental study of combustion in the solid rocket-ramjet
p0292 A81-29067
Air augmentation of rockets for low speed application
p0292 A81-29068

ROCKET ENGINES
NT BOOSTER ROCKET ENGINES
NT LIQUID PROPELLANT ROCKET ENGINES
NT SOLID PROPELLANT ROCKET ENGINES
A study of air breathing rockets - Subsonic mode combustion
[IAF PAPER 80-F-270] p0115 A81-18371
An experimental study on air intake performance for a rocket/ramjet engine
[AIAA PAPER 81-1488] p0506 A81-40906
Design of production processes for flight-vehicle engines --- Russian book
p0623 A81-49475
Investigation of plume induced separation on a full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Velocity tolerance of escape systems
[AD-A096881] p0373 N81-22035
Free-jet testing of powerplants for aircraft and missiles
p0431 N81-24089

ROCKET EXHAUST
An approach to ramjet trajectory simulation test
p0292 A81-29065
Microcomputer system for controlling an infrared scanning camera --- with application to rocket plume radiation measurement
p0453 A81-37749

ROCKET FLIGHT
Helicopter airflow and wake characteristics for low speed and hovering flight from rocket interference investigations
p0572 A81-46608

ROCKET LAUNCHERS
AH-1 lightweight airborne launcher jettison evaluation
[AD-A101461] p0582 N81-30119

ROCKET MOTOR CASES
U ROCKET ENGINE CASES

ROCKET PROPELLANTS
NT GASEOUS ROCKET PROPELLANTS
NT LIQUID FUELS
NT METAL PROPELLANTS
NT SLURRY PROPELLANTS
NT SOLID ROCKET PROPELLANTS

ROCKET TEST FACILITIES
O.N.E.R.A. ramjet test facilities
p0365 A81-33285

ROCKET THRUST
Velocity tolerance of escape systems
[AD-A096881] p0373 N81-22035

RODS
Geometrically nonlinear theory for calculating thin rods of a wing profile
p0625 A81-49935
Strength calculation of thin-wall rods of significant taper
p0625 A81-49937

ROGALLO WINGS
U FLEXIBLE WINGS
U FOLDING STRUCTURES

ROLL
Roll and spin measurements in the low speed wind tunnel at Braunschweig
p0065 A81-15704
The effect of aerodynamic coupling on the dynamics of aircraft in fast rolling motion
p0104 A81-17471
Roll stabilization of flight vehicles by means of rollerons
p0290 A81-29016
Kinematic properties of the helicopter in coordinated turns
[NASA-TP-1773] p0374 N81-22039

ROLL CONTROL
U LATERAL CONTROL

ROLL FORMING
Computer-aided roll pass design in rolling of airfoil shapes
p0065 A81-15796
Isothermal rolling of aircraft parts - Versatile process saves costly materials
p0227 A81-24047
Titanium forging - Stamping /stamp, screw-press/, circular rolling and isothermal forging
p0416 A81-36657
Metalspinning, shear- and flowforming
p0551 N81-29281
Cold-forming of internal threads
p0551 N81-29294

ROLLER BEARINGS
Calculated and experimental data for a 118-mm bore roller bearing to 3 million DN
[ASME PAPER 80-C2/LUB-14] p0117 A81-18668
Performance of computer-optimized tapered-roller bearings to 2.4 million DN
[ASME PAPER 80-C2/LUB-18] p0117 A81-18672
Lubrication of rolling element bearings
p0118 A81-18738
Bearing wear detection using radioactive iron-55 tagging
[ASLE PREPRINT 81-AM-6A-3] p0367 A81-33868
Advanced transmission components investigation program: Bearing and seal development
[AD-A090675] p0076 N81-12075
Application of ion implantation for the improvement of localized corrosion resistance of M50 steel bearings
[AD-A097230] p0393 N81-23466

ROLLING CONTACT LOADS
Performance of aircraft pneumatic tyres in soft soil
p0226 A81-24000
Self-oscillations of a self-aligned landing gear strut in the case of classical nonholonomic rolling constraints
p0563 A81-45315

ROLLING MOMENTS
Stability of aircraft motion in critical cases
[AIAA PAPER 81-1885] p0561 A81-44577
A piloted simulator investigation of static stability and stability/control augmentation effects on helicopter handling qualities for instrument approach
[NASA-TM-81188] p0029 N81-10077
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
The prediction of normal force and rolling moment coefficients for a spinning wing
[NASA-CR-165680] p0333 N81-20068
Static and yawed-rolling mechanical properties of two type 7 aircraft tires

ROTOR AERODYNAMICS

An experimental and theoretical investigation of pressures in four-lobe bearings
p0004 A81-10840

Towing tank tests on model wind turbine rotors
p0055 A81-13860

Wind speed measurement for wind turbine testing
p0055 A81-13873

An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826

Practical aerodynamics of the helicopter Mi-6A --- Russian book
p0116 A81-18600

Prediction of tilt rotor outwash
[AIAA PAPER 81-0013] p0157 A81-20537

Noise generation mechanism of low pressure propeller fans
[AIAA PAPER 81-0090] p0160 A81-20594

Forced vortices near a wall
[AIAA PAPER 81-0256] p0163 A81-20704

Computer simulation of unsteady flow past lifting rotors of coaxial configuration
p0230 A81-24389

Calculation of shells in aircraft turbine engines
p0285 A81-28078

Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter
p0295 A81-29094

The effect of the atmospheric turbulence on the rotor blade flap-leadlag motion stability in hovering
[AIAA 81-0610] p0308 A81-29472

Feasibility of a rotor flight-dynamics model with first-order cyclic inflow and multiblade modes

[AIAA 81-0611] p0304 A81-29473
New correlations of the two-dimensional turbine
cascade aerodynamic performance
[ASME PAPER 81-GT-128] p0316 A81-30032
Use of multiblade sensors for on-line rotor
tip-path plane estimation
p0356 A81-32010
Comparison of calculated and measured helicopter
rotor lateral flapping angles
p0357 A81-32016
A Galerkin type finite element method for
rotary-wing aeroelasticity in hover and forward
flight
p0364 A81-33050
Pressure distribution computation on a non-lifting
symmetrical helicopter blade in forward flight
p0365 A81-33291
Prop-Fan technical progress leading to technology
readiness
[AIAA PAPER 81-0810] p0367 A81-33878
Finite element analysis of self-excited vibrations
of helicopter rotor blades
p0395 A81-34120
Quarter-scale testing of an advanced rotor system
for the UH-1 helicopter
p0395 A81-34121
Co-axial rotor aerodynamics in hover
p0465 A81-39899
Gust response of rotary wing aircraft and its
alleviation
p0465 A81-39900
A review of some topics of UK research on
helicopters
p0466 A81-40080
Rotor blade aeroelastic stability and response in
forward flight
p0467 A81-40089
Experimental and analytical studies of a model
helicopter rotor in hover
p0468 A81-40097
Aerodynamic study of a hovering rotor
p0468 A81-40098
Aerodynamic design of the Aerospatiale SA 365 N
Dauphin 2 helicopter
p0468 A81-40099
Recent progress in performance prediction of high
advance ratio circulation controlled rotors
p0468 A81-40100
An integrated performance and air data system for
helicopters
p0470 A81-40110
Identification of a linear model of rotor-fuselage
dynamics from nonlinear simulation data
p0472 A81-40125
Optimal higher harmonic blade pitch control for
minimum vibration of a hinged rotor
p0473 A81-40134
Computerized three-dimensional aerodynamic design
of a lifting rotor blade
[AHS 80-2] p0473 A81-40137
Hover performance methodology at Bell Helicopter
Textron
[AHS 80-3] p0473 A81-40138
Wind tunnel evaluation of aeroelastically
conformable rotors
[AHS 80-23] p0475 A81-40153
An experimental investigation of the effects of
aeroelastic couplings on aeromechanical
stability of a hingeless rotor helicopter
[AHS 80-25] p0475 A81-40155
Aerodynamic characteristics of an advanced
technology propeller for commuter aircraft
[AIAA PAPER 81-1565] p0507 A81-40948
Change of static pressure on the rotating blades
of an axial-flow compressor during surging
p0509 A81-41039
Helicopter theory --- Book
p0513 A81-41823
Wind tunnel tests of sailwings for Darrieus rotors
p0518 A81-42678
Pressure fluctuations on the surface of a small
passenger aircraft. I - Periodic disturbances
caused by the rotation of the propeller
p0561 A81-44615
The calculation of transonic blade tip flow at
helicopter rotors
[DGLR PAPER 81-025] p0608 A81-47554
Stability and flutter analysis of turbine blades
at low speed
p0612 A81-47959
Experimental and analytical studies of a model
helicopter rotor in hover
[AD-A089780] p0035 N81-11033
The effects of solidity, interblade phase angle
and reduced frequency on the time-variant
aerodynamic response of a compressor stator
[AD-A090546] p0081 N81-12108
Results of oscillatory pitch and ramp tests on the
NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467
A flight investigation of performance and loads
for a helicopter with RC-SC2 main-rotor blade
sections
[NASA-TM-81898] p0186 N81-15982
Some wake-related operational limitations of
rotorcraft
[NASA-TM-81920] p0186 N81-15985
Mean rotor wake characteristics of an
aerodynamically loaded 0.5 m diameter fan
[NASA-TM-81657] p0195 N81-16053
Multicyclic controllable twist rotor data analysis
[NASA-CR-152251] p0249 N81-18028
Some dynamic properties of rigid two-bladed fully
gimballed tip-jet helicopter rotor with
circulation control
[AD-A094031] p0252 N81-18054
Nonlinear rotor dynamics analysis --- computerized
simulation
p0257 N81-18405
Total main rotor isolation system analysis
[NASA-CR-165666] p0329 N81-20027
Fluid mechanics mechanisms in the stall process of
helicopters
[NASA-TM-81956] p0338 N81-21027
Wind tunnel tests of large- and small-scale rotor
hubs and pylons
[AD-A090510] p0439 N81-25043
Total main rotor isolation system analysis
[NASA-CR-165667] p0494 N81-27076
Blade loss transient dynamics analysis, volume 1.
Task 1: Survey and perspective --- aircraft gas
turbine engines
[NASA-CR-165373-VOL-1] p0496 N81-27089
Blade loss transient dynamics analysis, volume 2.
Task 2: Theoretical and analytical development.
Task 3: Experimental verification
[NASA-CR-165373-VOL-2] p0496 N81-27099
Aerodynamic and aeroelastic research on tipvane
turbines
[VTH-LR-302] p0540 N81-28100
Alleviation of helicopter fuselage-induced rotor
unsteady loads through deterministic variation
of the individual blade pitch
[NASA-CR-166234] p0549 N81-29138
Determination of aerodynamically adequate fillet
geometry in turbocompressor blade rows
[AD-A102170] p0600 N81-31215
Two-dimensional dynamic stall as simulated in a
varying freestream
[NASA-CR-164029] p0629 N81-32154
ROTOR BLADES
Helicopter flight characteristics improvement
through swept-tip rotor blades
[MBB-UD-275-79-0] p0018 A81-12097
Rotating blades radio interference in a
helicopter-borne CW Doppler radar
p0224 A81-23813
Dynamic stability of a rotor blade using finite
element analysis
[AIAA 81-0615] p0309 A81-29513
Helicopter rotor blade effects on mast-mounted
sensor images
p0350 A81-31114
Use of multiblade sensors for on-line rotor
tip-path plane estimation
p0356 A81-32010
ABC development status and design considerations
for several military applications --- Advancing
Blade Concept for helicopter
[AHS 80-12] p0474 A81-40185
Acoustic emission as a NDE technique for
determining composite rotor blade reliability
[AD-A090440] p0076 N81-12070
ROTOR BLADES (TURBOMACHINERY)
Comparative performance of two centrifugal fan
impellers differing in blade section

p0001 A81-10162
Discrete frequency noise due to irregularity in
  blade row of axial fan rotor
p0002 A81-10633
Structure and decay characteristics of turbulence
  in the near- and far-wake of a moderately loaded
  compressor rotor-blade
  [ASME PAPER 80-GT-95] p0109 A81-17954
Dynamic pressure response with stall on axial flow
  compressor rotor blades
  [AIAA PAPER 81-0069] p0159 A81-20578
Mean rotor wake characteristics of an
  aerodynamically loaded 0.5 m diameter fan
  [AIAA PAPER 81-0208] p0168 A81-20830
Stability of large horizontal-axis axisymmetric
  wind turbines
p0178 A81-22526
Linearized analysis of the three-dimensional
  compressible flow through a rotating annular
  blade row
p0234 A81-25446
Coupled bending-torsion vibrations of rotating
  blades of asymmetric aerofoil cross section with
  allowance for shear deflection and rotary
  inertia by use of the Reissner method
p0289 A81-28942
Experimental verification of unsteady aerodynamic
  models of supersonic unstalled flutter
p0295 A81-29094
Reduction of strut induced rotor blade vibration
  with the modified stator setting angles
p0295 A81-29097
The influence of gyroscopic forces on the dynamic
  behavior of rotating blades
p0295 A81-29098
Evaluation of blade element performance of
  compressor rotor blade cascades in transonic and
  low supersonic flow range
p0296 A81-29102
Analysis of turbulent boundary layer on cascade
  and rotor blades of turbomachinery
p0296 A81-29106
Resonance of forwards and backwards vibration mode
  of impeller with gyroscopic effect
  [AIAA 81-0524] p0303 A81-29445
The effect of the atmospheric turbulence on the
  rotor blade flap-leadlag motion stability in
  hovering
  [AIAA 81-0610] p0304 A81-29472
Feasibility of a rotor flight-dynamics model with
  first-order cyclic inflow and multiblade modes
  [AIAA 81-0611] p0304 A81-29473
The development of a substitute bird model
  [ASME PAPER 81-GT-23] p0311 A81-29939
Improved particle trajectory calculations through
  turbomachinery affected by coal ash particles
  [ASME PAPER 81-GT-53] p0312 A81-29965
Rotor-tip leakage. I - Basic methodology
  [ASME PAPER 81-GT-71] p0313 A81-29980
Rotor-tip leakage. II - Design optimization
  through viscous analysis and experiment
  [ASME PAPER 81-GT-72] p0313 A81-29981
Inverse or design calculations for non-potential
  flow in turbomachinery blade passages
  [ASME PAPER 81-GT-78] p0314 A81-29986
New features in the design of axial-flow
  compressors with tandem blades
  [ASME PAPER 81-GT-113] p0315 A81-30017
Fatigue strength of gas turbine engine rotor
  blades in connection with structural changes in
  service
p0355 A81-31673
Study of the secondary flow in the downstream of a
  moving blade row in an axial flow fan
p0355 A81-31767
Inlet distortion and blade vibration in
  turbomachines
p0421 A81-37631
Investigation of the cooling of the turbine rotor
  blade of a gas-turbine power system
p0465 A81-40020
Prevention of corrosion and fatigue failure of
  helicopter gas turbine compressors
p0469 A81-40107
Computerized three-dimensional aerodynamic design
  of a lifting rotor blade
  [AHS 80-2] p0473 A81-40137
An experimental study of heat transfer on turbine
  rotor blades
p0509 A81-41033
Effects of blade-vane ratio and rotor-stator
  spacing on fan noise with forward velocity
  [AIAA PAPER 81-2032] p0620 A81-48628
Preliminary airworthiness evaluation AH-1S
  helicopter with ogee tip shape rotor blades
  [AD-A089625] p0027 N81-10061
Fatigue and damage propagation in composite rotor
  blades
p0041 N81-11145
An investigation of the dynamic stalling
  characteristics of rotating axial-flow
  compressor blades
p0093 N81-13054
Gerry casing treatment
  [CUED/A-TURBO/TR-101] p0093 N81-13059
Rotor model for verification of computation methods
  [ISD-262] p0145 N81-15467
Multi-plane high speed balancing techniques and
  the use of a high specific stiffness Ti-Borsic
  material for vibration control
  [AD-A093122] p0215 N81-17092
Compressor blade monitoring system for a VA1310
  (Allis Chalmers) Wind Tunnel Compressor
  [AD-A092920] p0217 N81-17103
Flap-lag-torsional dynamic modelling of rotor
  blades in hover and in forward flight, including
  the effect of cubic nonlinearities
  [NASA-CR-166194] p0486 N81-26116
Flag-lag-torsional dynamics of extensional and
  inextensional rotor blades in hover and in
  forward flight
  [NASA-CR-164475] p0486 N81-26117
End wall flows in rotors and stators of a single
  stage compressor
  [NASA-CR-164635] p0540 N81-28097
MM&T: Low cost production/installation of
  urethane leading edge guards on rotor blades
  [AD-A101603] p0582 N81-30117
Rotor wake characteristics relevant to
  rotor-stator interaction noise generation
  [NASA-TM-82703] p0583 N81-30130
Recent darrieus Vertical-Axis Wind Turbine
  aerodynamical experiments at Sandia National
  Laboratories

SEPARATED FLOW
NT BOUNDARY LAYER SEPARATION
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
Local properties of three-dimensional separation lines --- in vortex layers
[DGLR PAPER 79-063] p0016 A81-11780
Calculation of separated viscous flows on wing profiles by a coupling approach
[ONERA, TP NO. 1980-122] p0017 A81-11920
Aerodamping of turbine blade vibrations under conditions of flow separation by an inhomogeneous stream
p0060 A81-14959
Separation of laminar boundary layer induced by aerodynamic interference
p0067 A81-15897
Experimental investigation of a right angle wing with partially separated flow with and without ground effects
[DGLR PAPER 80-111] p0120 A81-19397
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AIAA PAPER 81-0051] p0159 A81-20567
Calculation of viscous, sonic flow over hemisphere-cylinder at 19 deg incidence - The capturing of nose vortices
[AIAA PAPER 81-0189] p0162 A81-20661
3-D viscous analysis of ducts and flow splitters
[AIAA PAPER 81-0277] p0163 A81-20720
Flight experiments with a slender cone at angle of attack
[AIAA PAPER 81-0337] p0165 A81-20761
A discrete vortex method for the non-steady separated flow over an airfoil
p0179 A81-22560
Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model
p0228 A81-24078
Numerical simulation of supersonic flow around solids of revolution with a leading detachment zone
p0231 A81-24757
A method for measuring the velocity field in a stalled flow
p0287 A81-28523
Flow separation in inlets at incidence angles
p0297 A81-29114
Leading-edge separation from a thick, conical, slender wing at small angles of incidence
p0355 A81-31687
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0365 A81-33281
The challenge of unsteady separating flows
p0411 A81-35647
The effect of the aspect ratio of delta wings on the structure of the near vortex wake
p0413 A81-36467
The calculation of separated flow at helicopter bodies
[DGLR PAPER 81-026] p0608 A81-47555
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601
The prediction of the bursting of laminar separation bubbles in the design of two dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12038
Experimental study of supersonic viscous leeside flow over a slender delta wing
[NASA-TM-81248] p0133 N81-14265
An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-14984
Discussion of test results in the design of laminar airfoils for competition gliders
[NASA-TM-75402] p0186 N81-15984
Structures of flow separations over swept wings
p0255 N81-18246
Experimental study of the separation at the trailing edge of an axisymmetrical contoured after-body
p0255 N81-18257
Separation behavior of boundary layers on three-dimensional wings
[NASA-TM-75877] p0262 N81-19027
Investigation of plume induced separation on a full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
Topology of three-dimensional separated flows
[NASA-TM-81294] p0385 N81-23037
Analysis of laminar and turbulent symmetric blunt trailing-edge flows
[AD-A098703] p0439 N81-25046
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response
p0592 N81-31118
Determination of aerodynamically adequate fillet geometry in turbocompressor blade rows
[AD-A102170] p0600 N81-31219

SHATTERING
U FRAGMENTATION
SHEAR FATIGUE
U SHEAR STRESS
SHEAR FLOW
Numerical study on viscous shear flow past a
circular cylinder
p0228 A81-24077
An experimental investigation of separating flow
on a convex surface
p0230 A81-24488
Turbulence modeling for application to V/STCL
propulsion induced effects: Two dimensional
formulation
[AD-A090331] p0072 N81-12026
SHEAR LAYERS
Dialogue on bridging some gaps in stability and
transition research --- in external, internal
and free-shear layer through-flow systems
p0115 A81-18105
Shear layer instability noise produced by various
jet nozzle configurations
[FNR-90018] p0088 N81-12825
The velocity induced by the wake of a wind turbine
in a shear layer, including ground effect
[FFA-TN-HU-2189-PT-3] p0141 N81-14985
SHEAR PROPERTIES
NT SHEAR STRENGTH
Alleviation of helicopter fuselage-induced rotor
unsteady loads through deterministic variation
of the individual blade pitch
[NASA-CR-166234] p0549 N81-29134
SHEAR STRENGTH
Stability and ultimate strength of carbon fiber
reinforced plastic panels
p0481 A81-40521
Air Force Geophysics Laboratory aerodynamically
tethered balloon, 45,000 cubic feet
[AD-A096758] p0372 N81-22023
SHEAR STRESS
NT TORSIONAL STRESS
Miniature pressure probe for measuring the
surface-shear-stress vector in turbulent flow
p0233 A81-25354

A new method for torsion of shaft with variable diameter using non-orthogonal curvilinear coordinates and its application
[AIAA 81-0477] p0300 A81-29378
Developments in the analysis and repair of cracked and uncracked structures
p0354 A81-31561
Review of theoretical and experimental results on three dimensional turbulent wakes and boundary layers
[ONERA-NT-1980-4] p0126 N81-13930

SHEARING
Metalspinning, shear- and flowforming
p0551 N81-29281

SHEARING STRESS
U SHEAR STRESS

SHEET METAL
U METAL SHEETS

SHELL STABILITY
Finite element calculation of thin-wall reinforced shells of the fuselage type with account for physical nonlinearity and loss of stability of certain elements
p0235 A81-25679
Instability of short stiffened and composite cylindrical shells acting under pure bending moments considering prebuckling displacements
[AIAA 81-0571] p0302 A81-29405
Post-buckling and membrane structural capability of composite shell structures
p0482 A81-40602

SHELL THEORY
Calculation of shells in aircraft turbine engines
p0285 A81-28078

SHELLS (STRUCTURAL FORMS)

NT THIN WALLED SHELLS
Flutter of plates and shells in practice
p0282 A81-27611
Shape optimization of plate and shell structures
[AIAA 81-0553] p0302 A81-29403
Vibrations of turbine engine blades by shell analysis
p0257 N81-18404

SHIELDING
NT ELECTROMAGNETIC SHIELDING
NT HEAT SHIELDING
NT RADIATION SHIELDING
Shielding concepts for jet noise
[AIAA PAPER 81-2020] p0623 A81-49730
Noise shielding by a hot subsonic jet
[AIAA PAPER 81-2018] p0624 A81-49731
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
EMC, lightning and NEMP-protection-new requirements for approved specifications when using CFRP
p0199 N81-16152

SHIPS
NT AIRCRAFT CARRIERS
NT SURFACE EFFECT SHIPS
Sarsat - A rescue system for ships and aircraft
p0100 A81-16680
Alternative energy sources for non-highway transportation, appendices
[DOE/CS-05438/T1-VOL-3] p0044 N81-11500
Collision avoidance systems. Citations from the NTIS data base
[PB80-815020] p0193 N81-16038

SHOCK ABSORBERS
Landing gear shock absorber design criteria and the assessment of tire/wheel configurations
p0232 A81-24940
Dynamics and calculations for an aircraft landing gear pneumatic shock absorber system
p0417 A81-36718

SHOCK DIFFUSERS
U DIFFUSERS
U SHOCK WAVE ATTENUATION

SHOCK LOADS
NT BLAST LOADS
Measured pressure distributions and shock shapes on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026

A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039

SHOCK RESISTANCE
NT IMPACT RESISTANCE
Evaluation/redesign of the F-105 pitch rate gyro pack
[AD-A092109] p0194 N81-16048

SHOCK SIMULATORS
Evaluation of lightning-induced transients in aircraft using high-voltage shock excitation techniques
p0057 A81-14269

SHOCK TESTS
Development of high-temperature turbine subsystem technology to a technology readiness status, phase 2
[FZ-1806-72] p0134 N81-14332
Test and evaluation of foam-in-place fuel tank container
[AD-A095747] p0334 N81-20073

SHOCK TUBES
Computational design of large-scale blast simulators
[AIAA PAPER 81-0159] p0162 A81-20639
Droplet breakup regimes and criteria for their existence
p0614 A81-48079

SHOCK WAVE ATTENUATION
Design of advanced technology transonic airfoils and wings
p0187 N81-16000

SHOCK WAVE GENERATORS
NT SHOCK TUBES

SHOCK WAVE INTERACTION
An experimental investigation of the interaction between a glancing shock wave and a turbulent boundary layer
p0012 A81-11649
Transient vibrations of elastic panels due to the impact of shock waves
p0616 A81-48305
Physical and numerical aspects of shock boundary layer interactions
p0256 N81-18324
Influence of free-stream Mach number on transonic shock-wave boundary-layer interaction
[NLR-MP-78013-U] p0256 N81-18325

SHOCK WAVE PROFILES
Calculation of plane transonic flows using the integral equation method and shock fitting
p0016 A81-11779
Measured pressure distributions and shock shapes on a simple delta wing
p0617 A81-48479

SHOCK WAVE PROPAGATION
Stationary displacement of a body by a shock wave
p0107 A81-17622
Experimental investigations on shock-associated noise
p0107 A81-17735
Comparison of experimental and computational shock structure in a transonic compressor rotor
[ASME PAPER 80-GT-81] p0109 A81-17953
The sonic boom from an aircraft flying along an arbitrary path in a stratified atmosphere in the presence of a three-component wind
p0123 A81-19636
Self-excited oscillations of supersonic flow in a sudden enlargement of a duct
p0228 A81-24081
A method for obtaining shockless transonic flows past two-dimensional airfoils whose profiles are partially modified from a given arbitrary profile
p0298 A81-29201

SHOCK WAVES
NT MACH CONES
NT OBLIQUE SHOCK WAVES
NT SONIC BOOMS
A cost-effective method for shock-free supercritical wing design
[AIAA PAPER 81-0383] p0166 A81-20796
New interpretations of shock-associated noise with and without screech
p0178 A81-22527
Plane transonic solution with shock by direct iteration
p0231 A81-24814

Semi-inverse method of computation in inviscid
transonic flows - Application to the design of
turbomachines blades profiles
[ASME PAPER 81-GT-206] p0318 A81-30096
Acoustic shock waves generated by a transonic
helicopter blade
[AHS 80-63] p0479 A81-40186
New interpretations of shock-associated noise with
and without screech
[NASA-TM-81590] p0032 N81-10807
Unsteady transonic small disturbance theory with
strong shock waves
[NASA-CR-166157] p0261 N81-19020
A panel method to determine loads on oscillating
airfoils in transonic flow with embedded shock
waves
[NLR-MP-80005-U] p0330 N81-20039
Oscillatory flows from shock induced separations
on biconvex aerofoils of varying thickness in
ventilated wind tunnels
p0386 N81-23056
Shock associated noise reduction from
inverted-velocity-profile coannular jets
[NASA-CR-3454] p0589 N81-30908
Analysis and design of supersonic aircraft based
on inviscid nonlinear Eulerian equations. Part
1: Rotational Euler solutions with explicit
shock fitting
[AD-A103434] p0637 N81-33192

SHORT HAUL AIRCRAFT
NT A-300 AIRCRAFT
NT CESSNA 402B AIRCRAFT
NT EUROPEAN AIRBUS
Shipboard trials of the Quiet Short-Haul Research
Aircraft /QSRA/

Piloting techniques on the backside - Flight path
angle control
p0171 A81-21673
Aircraft thrust augmentors of ejector type ---
Russian book
p0289 A81-28760
The effect of jet non-uniformity on the lift of an
augmentor wing
p0298 A81-29144
Establishing cruise-engine cycle payoffs for a
supersonic VSTOL aircraft
[ASME PAPER 81-GT-100] p0315 A81-30007
On-line wind shear generation for flight simulator
applications
[AIAA 81-0970] p0414 A81-36559
STOL performance of the tilt rotor
p0467 A81-40085
Flight evaluation of stabilization and command
augmentation system concepts and cockpit
displays during approach and landing of
powered-lift STOL aircraft
[NASA-TP-1551] p0037 N81-11044
A computer program to calculate the longitudinal
aerodynamic characteristics of
upper-surface-blown wing-flap configurations
[NASA-CR-3005] p0071 N81-12014
Pilatus porter: Provision of revised take-off and
landing performance data
[AD-A089964] p0076 N81-12068
Development and evaluation of automatic landing
control laws for power lift STOL aircraft
[NASA-CR-152399] p0253 N81-18960
Flight investigation of a four-dimensional
terminal area guidance system for STOL aircraft
[NASA-TM-81271] p0260 N81-19016
A method for determining landing runway length for
a STOL aircraft
p0264 N81-19081
Analytical study of STOL Aircraft in ground
effect. Part 1: Nonplanar, nonlinear wing/jet
lifting surface method
[NASA-CR-152087-PT-1] p0271 N81-19096
Analytical study of STOL Aircraft in ground
effect. Part 2: Nonplanar, nonlinear method
applicable to three dimensional jets of finite
thickness
[NASA-CR-152088-PT-2] p0271 N81-19097
Flight-test evaluation of STOL control and flight
director concepts in a powered-lift aircraft
flying curved decelerating approaches
[NASA-TP-1641] p0275 N81-19131
Application of variable structure system theory to
aircraft flight control --- AV-8A and the
Augmentor Wing Jet STOL Research Aircraft
[NASA-CR-164321] p0391 N81-23093
Design of a V/STOL propulsion system for a
large-scale fighter model
[NASA-CR-166162] p0442 N81-25074
YC-14 interior noise measurements program
[NASA-CR-164523] p0492 N81-26849
Conceptual/preliminary design study of subsonic
v/stol and stovl aircraft derivatives of the S-3A
[NASA-TM-81310] p0547 N81-29118
Experimental development of an advanced
circulation control wing system for Navy STOL
aircraft
[AD-A101309] p0581 N81-30116
Flight evaluation of the STOL flare and landing
during night operations
[NASA-TM-81312] p0629 N81-32151
V/STOL aircraft technology in Canada
p0634 N81-33152
Evaluation of pressure and thermal data from a
wind tunnel test of a large-scale, powered, STOL
fighter model
[NASA-CR-166170] p0635 N81-33162
A flight test evaluation of the Ball-Bartoe
jetwing propulsive lift concept
[AD-A103579] p0637 N81-33195

SIGHT
U VISUAL PERCEPTION
SIGNAL ANALYSIS
Detection of moving objects --- Russian book
p0118 A81-18773
Ground moving target radar signal simulation
p0323 A81-30308
An original method for the analysis of the power diffraction pattern of a radar target for shape recognition purposes
p0607 A81-47103
SIGNAL DETECTION
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21020
Application of signal detection theory to decision making in supervisory control - The effect of the operator's experience
p0351 A81-31288
Aircraft alerting systems standardization study
[AD-A090834] p0093 N81-13053
SIGNAL DETECTORS
Systems analysis of the installation, mounting, and activation of emergency locator transmitters in general aviation aircraft
[NASA-CR-160036] p0023 N81-10020
SIGNAL DISCRIMINATORS
U SIGNAL DETECTORS
SIGNAL DISTORTION
The intelligibility of speech presented over the telephones of the Mk 4 flying helmet --- earphones
[RAE-TR-FS-313] p0004 N81-12320
SIGNAL FADEOUT
U SIGNAL FADING
SIGNAL FADING
Antenna design and development for the microwave subsystem experiments for the terminal configured vehicle project
[NASA-CR-164220] p0378 N81-22202
SIGNAL GENERATORS
NT FUNCTION GENERATORS
Integrated control system for a gas turbine engine
[NASA-CASE-LEW-12594-2] p0274 N81-19116
SIGNAL PROCESSING
Signal processing for a six-component strain-gage wind tunnel balance
p0049 A81-12968
Improvement of effective minor lobe behavior of radar antennas through signal processing
p0152 A81-20091
Side lobe suppression with digital signal processing
p0152 A81-20092
Target detection and parameter estimation in surveillance radars using MTI-FFT processing
p0152 A81-20094
Coherent signal processing in frequency agile pulse radar units
p0152 A81-20097
Application of Doppler information to automatic target tracking
p0153 A81-20101
Some implementation considerations for numerically stable flight filters
p0156 A81-20405
New airborne weather radar systems
[AIAA PAPER 81-0237] p0163 A81-20692
SPASYN - An electromagnetic relative position and orientation tracking system
p0173 A81-21020
A digital technique for the analysis of the response of compressor/duct systems in unsteady flow
p0294 A81-29078
Synergistic benefits of fully integrating JTIDS and GPS --- Joint Tactical Information Distribution System and Global Positioning System
p0323 A81-30311
The RLU - An advanced remote terminal for avionic systems
p0327 A81-30358
AN/TPX-54 interrogator
p0350 A81-31131
Improvement of the imaging of moving acoustic sources by the knowledge of their motion
[ONERA, TP NO. 1981-17] p0359 A81-32538
Maximum likelihood elevation angle estimates of radar targets using subapertures
p0359 A81-32691
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
AIRCAT 500 ATC systems for Australia and Mexico
p0407 A81-34329
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
p0471 A81-40123

Optimal processing of GPS signals p0512 A81-41761
Nonlinear estimation of generalized vector shot processes p0529 A81-43583
Three edge-point estimation schemes for tracking airborne targets p0562 A81-44681
High bypass ratio engine noise component separation by coherence technique [AIAA PAPER 81-2054] p0621 A81-48653
Optimized computer systems for avionics applications [AD-A089570] p0028 N81-10063
Active BCAS: Design and validation of the surveillance subsystem [AD-A095089] p0270 N81-19084
Microcomputer processing for Loran-C p0371 N81-22007
A microcomputer-based signal data converter for runway visual range measurements [AD-A097568] p0386 N81-23060
Precision Positioning and Inertial Guidance Sensors: Technology and Operational Aspects [AGARD-CP-298] p0484 N81-26091
Development of a ground signal processor for digital synthetic array radar data [NASA-CR-161074] p0602 N81-31421
Design of optimal inputs for the identification of characteristics of aircraft flights --- parameter identification control theory p0631 N81-33131

SLANT PERCEPTION
U SPACE PERCEPTION
SLENDER BODIES
NT SLENDER CONES
Two methods for calculating the load on the surface of a slender body executing axisymmetric vibrations in a sonic gas flow
p0004 A81-10920
Numerical solution of transonic flow through a cascade with slender profiles
p0170 A81-21197
The distributed parameter system theory of the autopilot design of the slender vehicle
p0224 A81-23835
Holographic investigation of slender body vortex wakes
[AD-A089496] p0021 N81-10008
Leading-edge separation from a slender rolling wing-body combination --- vortex sheet model
[RAE-TR-80039] p0330 N81-20040
SLENDER CONES
Flight experiments with a slender cone at angle of attack
[AIAA PAPER 81-0337] p0163 A81-20761
SLENDER WINGS
NT INFINITE SPAN WINGS
Flow past a slender profile in a channel with permeable walls
p0004 A81-10916
Leading-edge 'Vortex Flaps' for enhanced subsonic aerodynamics of slender wings
p0012 A81-11648
Simplified vortex models for slender lifting surfaces with leading edge separation
p0016 A81-11777
The determination of the induced drag on slim wings with high lift systems in the transonic region
[MBB-FE122] p0121 A81-19400
Nonlinear aerodynamic characteristics of a thin airfoil of arbitrary plane configuration
p0123 A81-19629
Thin minimum-drag airfoils
p0123 A81-19630
Lifting-line theory of oblique wings - Application of the Galerkin method to the lifting-line equation
p0149 A81-19873
An approximate analytical method for vortex-lift and centre of pressure on the slender wing
p0223 A81-23726
Leading-edge separation from a thick, conical, slender wing at small angles of incidence
p0355 A81-31687
Vortex-flow aerodynamics - An emerging design capability
p0366 A81-33717
Preliminary design characteristics of a subsonic business jet concept employing an aspect ratio 25 strut braced wing
[NASA-CR-159361] p0032 N81-11013
Transonic wing technology for transport aircraft
p0180 N81-16002
Design and experimental verification of a transonic wing for a transonic aircraft
p0188 N81-16003
Leading edge vortex flaps for drag reduction --- during subsonic flight
[NASA-CASE-LAR-12750-1] p0261 N81-19016
Experimental flutter at high subsonic speeds and its theoretical prediction, taking into account wing thickness and Reynolds number
p0385 N81-23052
SLIP CASTING
NASA gas turbine stator vane ring
[ASME PAPER 81-GT-208] p0318 A81-30097
SLIPSTREAMS
NT PROPELLER SLIPSTREAMS
Aerodynamic effects of nearly uniform slipstreams on thin wings in the transonic regime
[NASA-CR-152351] p0249 N81-18027
Advanced turboprop installation aerodynamics
p0260 N81-19013
SLOPES
NT GLIDE PATHS
SLOSHING
U LIQUID SLOSHING
SLOT ANTENNAS
Excitation of a circular array of cylinders with longitudinal slits --- in radio antennas
p0019 A81-12619
Input impedance of a resonator-slot ring antenna on a spherical layer --- for aircraft
p0420 A81-37433
SLOTS
NT WING SLOTS
Aerodynamic effects of body slots on a guided projectile with cruciform surfaces
[AIAA PAPER 79-1658] p0066 A81-15887
Effects of drive slots on parachute performance
p0453 A81-38020
An experimental study of heat transfer in rotating slots and bends --- in gas turbine engines
p0509 A81-41089
Wind tunnel wall interference
[AD-A093301] p0217 N81-17104
Design of a slot height distribution for increased hover control power on a circulation control rotor
[AD-A103535] p0637 N81-33194
SLOTTED ANTENNAS
U SLOT ANTENNAS

SLOTTED WIND TUNNELS
Hybrid suction surface for turbulent boundary layer flow
p0240 A81-26513
The resonance frequencies of ventilated wind tunnels
[ARC-R/M-3841] p0144 N81-15009
Transonic wind tunnel development (1940 - 1950)
p0185 N81-15971
Evaluation of the acoustic and aerodynamic characteristics of several slot-baffle configurations for transonic wind tunnel walls
[AD-A093957] p0217 N81-17106
A review of research at NLR on wind-tunnel corrections for high angle of attack models
p0436 N81-24125
A review of some investigations on wind tunnel wall interference carried out in Sweden in recent years
p0436 N81-24126
SLURRY PROPELLANTS
NT LIQUID FUELS
Compound Cycle Turbofan Engine (CCTE). Task 9: Carbon-Slurry Fuel Combustion Evaluation Program
[AD-A089451] p0029 N81-10072
Ultrasonic dispersion of particulate high density fuels
[AD-A102771] p0630 N81-32290
SMALL PERTURBATION FLOW
Numerical solution of transonic flow through a cascade with slender profiles
p0170 A81-21197
Analysis of a symmetric transonic aerofoil with the finite element method - A new upwinding technique
p0183 A81-22984
Transonic flow calculations over two-dimensional canard-wing systems
[AIAA PAPER 79-1565] p0183 A81-23367
Transonic swept wings studied by the lifting-line theory
p0509 A81-41090
A comprehensive evaluation and analysis of transonic flow calculations on three related wing-body configurations
[FFA-TN-AU-1418-PT-1] p0022 N81-10013
Experimental flutter at high subsonic speeds and its theoretical prediction, taking into account wing thickness and Reynolds number
p0385 N81-23052
SMOKE ABATEMENT
Fuel microemulsions for jet engine smoke reduction
[AD-A100489] p0542 N81-28277
SMOOTHING
NT DATA SMOOTHING
SNAP
Experimental study of the snap-through oscillations of an empennage
p0299 A81-29313
SOARING
From paleoaeronautics to altostratus - A technical history of soaring
[AIAA PAPER 81-1611] p0533 A81-43933
SODAR
An observational experiment using a monostatic sodar at the airport of Fiumicino

SOUND FIELDS
Experimental investigations on shock-associated noise
p0107 A81-17735
Investigation of transient processes in the perforated working section of a wind tunnel
p0237 A81-26122
Contribution to the study of non stationary signals emitted by moving jet engine - Application to special analysis and imaging. I.
p0365 A81-33288
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
An iterative finite element-integral technique for predicting sound radiation from turbofan inlets
[AIAA PAPER 81-1981] p0624 A81-49736
SOUND GENERATORS
Sound generation by vortex shedding from a profile within a channel
p0054 A81-13570
Aerodynamic sound generated by a slotted trailing edge
p0066 A81-15798
Sound sources in aerodynamics - Fact and fiction
[AIAA PAPER 81-0056] p0159 A81-20570
Generation of vortex noise in flow past a profile in a channel
p0238 A81-26134
Roll length of an annular underexpanded jet formed by a sonic nozzle with cylindrical rod on its axis
p0309 A81-29867
SOUND INTENSITY
NOISECHECK procedures for measuring noise exposure from aircraft operations
[AD-A093948] p0221 N81-17849
Effect of aircraft noise on the equilibrium of airport residents: Longitudinal study around Roissy, phase 3
[NASA-TM-75906] p0499 N81-27692

Computer program to predict aircraft noise levels
[NASA-TP-1913] p0641 N81-33947
SOUND MEASUREMENT
U ACOUSTIC MEASUREMENTS
SOUND PERCEPTION
U AUDITORY PERCEPTION
SOUND PRESSURE
On the unsteady wake-induced lift on a slotted airfoil. II - The influence of displacement thickness fluctuations
p0229 A81-24237
Discussion of the pressure-source aerosonic theory and of Doak's criticism
p0238 A81-26189
The influence of blade number ratio and blade row spacing on axial-flow compressor stator blade dynamic load and stage sound pressure level
[ASME PAPER 81-GT-165] p0317 A81-30064
Procedure for evaluation of engine isolators for reduced structure-borne interior noise transmission
[AIAA PAPER 81-1970] p0618 A81-48608
Prediction of jet exhaust noise on airframe surfaces during flight
[AIAA PAPER 81-2035] p0619 A81-48626
New interpretations of shock-associated noise with and without screech
[NASA-TM-81590] p0032 N81-10807
A comparison of the three methods used to obtain acoustic measurements for the NASA Flight Effects Program
[NASA-TM-81906] p0088 N81-12822
Analysis of pressure spectra measurements in a ducted combustion system
[NASA-TM-81583] p0146 N81-15768
Handbook of aircraft noise metrics
[NASA-CR-3406] p0345 N81-21871
Prediction of sound radiation from different practical jet engine inlets
[NASA-CR-164620] p0500 N81-27886
SOUND PROPAGATION
NT VOICE
Numerical techniques in linear duct acoustics - A status report
[ASME PAPER 80-WA/NC-2] p0170 A81-21120
Sound radiation from vortex systems
p0171 A81-21591
Acoustic shock waves generated by a transonic helicopter blade
[AHS 80-63] p0479 A81-40186
An iterative finite element-integral technique for predicting sound radiation from turbofan inlets
[AIAA PAPER 81-1981] p0624 A81-49736
Static tests of excess ground attenuation at Wallops Flight Center
[NASA-CR-3435] p0491 N81-26846
SOUND RANGING
Hyperbolic origins --- of radio position-fixing systems
p0612 A81-47842
Remote sensing methods for the determination of slant range visibility
[ESA-TT-627] p0086 N81-12536
SOUND TRANSDUCERS
NT ELECTROACOUSTIC TRANSDUCERS
NT MICROPHONES
SOUND TRANSMISSION
An experimental study of transmission, reflection and scattering of sound in a free jet flight simulation facility and comparison with theory
p0289 A81-28943
Summary of typical parameters that affect sound transmission through general aviation aircraft structures
[SAE PAPER 810562] p0518 A81-42728
Procedure for evaluation of engine isolators for reduced structure-borne interior noise transmission
[AIAA PAPER 81-1970] p0618 A81-48608
Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models
[NASA-CR-159363] p0258 N81-18799
Effect of propagation distance on aircraft flyover sound duration
[AD-A099694] p0500 N81-27889
SOUND VELOCITY
U ACOUSTIC VELOCITY
SOUND WAVES
NT AERODYNAMIC NOISE
NT AIRCRAFT NOISE
NT ENGINE NOISE
NT JET AIRCRAFT NOISE
NT NOISE (SOUND)
NT SONIC BOOMS
Sound radiation from a finite length unflanged circular duct with uniform axial flow. I - Theoretical analysis. II - Computed radiation characteristics
p0100 A81-16712
Periodically stiffened fluid-loaded plates. I - Response to convected harmonic pressure and free wave propagation. II - Response to line and point forces
p0102 A81-17067
Propagation of three-dimensional acoustic perturbations in channels of variable cross-sectional area at frequencies close to cutoff frequency
p0119 A81-19338
The effect of sound on the vortex-shedding from a circular cylinder - Acoustical vibrations directed along axis of cylinder
p0233 A81-25312
Ray-theory predictions of the sound radiated from realistic engine intakes
[AIAA PAPER 81-1982] p0618 A81-48602
Prediction of sound radiated from different practical jet engine inlets
[NASA-CR-163824] p0137 N81-14789
Improved methods for fan sound field determination
[NASA-CR-165180] p0147 N81-15769
SOUNDING
NT ATMOSPHERIC SOUNDING
SOVIET UNION
U U.S.S.R.
SPACE BASE COMMAND CENTER
An integrated transportation and operations comparison of space and ground based OTV's
[AIAA PAPER 81-1456] p0505 A81-40882
SPACE COMMUNICATION
NT INTERPLANETARY COMMUNICATION
NT SPACECRAFT COMMUNICATION
SPACE COOLING (BUILDINGS)
Simulation of aeroheating or aerocooling Air Force stores by arrays of impinging jets
[AD-A095464] p0330 N81-20034
SPACE DIVERSITY
U RECEPTION DIVERSITY
SPACE ENVIRONMENT SIMULATION
A new helicopter map display device HKG-5
p0418 A81-36967
SPACE FLIGHT
NT MANNED SPACE FLIGHT
SPACE HEATING (BUILDINGS)
Simulation of aeroheating or aerocooling Air Force stores by arrays of impinging jets
[AD-A095464] p0330 N81-20034
SPACE NAVIGATION
Position-determination accuracies of navigation methods
p0233 A81-25374
SPACE PERCEPTION
Stochastic surfaces for flight simulator displays
p0324 A81-30330
SPACE PLASMAS
A new helicopter map display device HKG-5
p0418 A81-36967
SPACE PROGRAMS
Project Prosat --- communication satellite network for land, sea and air traffic control
p0565 A81-45760
Aeronautics and Space Report of the President, 1979 activities
p0089 N81-12956
Posture hearings (NASA and FAA)
[GPO-65-265] p0203 N81-16952
SPACE SCIENCES
U AEROSPACE SCIENCES
SPACE SHUTTLE ORBITAL FLIGHT TEST 1
U SPACE TRANSPORTATION SYSTEM 1 FLIGHT
SPACE SHUTTLE ORBITER 101
Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52

[NASA-TM-81358] p0387 N81-23066
SPACE SHUTTLE ORBITERS
NT SPACE SHUTTLE ORBITER 101
Application of a tip-fin controller to the Shuttle Orbiter for improved yaw control
[AIAA PAPER 81-0074] p0159 A81-20582
Annual report to the NASA Administrator by the Aerospace Safety Advisory Panel on the space shuttle program. Part 2: Summary of information developed in the panel's fact-finding activities
[NASA-TM-82252] p0198 N81-16114
Correlation of predicted and flight derived stability and control derivatives with particular application to tailless delta wing configurations --- application to the space shuttle orbiter
[NASA-TM-81361] p0490 N81-26150
Analyses of shuttle orbiter approach and landing conditions
[NASA-CR-163108] p0498 N81-27113
SPACE SHUTTLE PAYLOADS
The Passive Optical Sample Assembly (POSA) on STS-1
[NASA-TM-82407] p0337 N81-20868
SPACE SHUTTLES
Multiple-component lightning high-current testing
p0056 A81-14255
A parametric study of the static longitudinal aerodynamic characteristics of parallel lift delta wing configurations at low Reynolds numbers
[AIAA PAPER 81-0409] p0168 A81-20814
Structural tests on space shuttle thermal protection system constructed with nondensified and densified LI 900 and LI 2200 tile
[NASA-TM-81903] p0257 N81-18410

SPACECRAFT ORBITS
NT SATELLITE ORBITS
SPACECRAFT PERFORMANCE
An integrated transportation and operations comparison of space and ground based OTV's
[AIAA PAPER 81-1456] p0505 A81-40082
SPACECRAFT POWER SUPPLIES
High power silver zinc and thermal batteries for missiles and aviation applications
p0235 A81-25612
SPACECRAFT PROPULSION
A study of air breathing rockets - Subsonic mode combustion
[IAF PAPER 80-F-270] p0115 A81-18371
Development for new laboratories for future testing
p0433 N81-24105
SPACECRAFT SENSORS
U SPACECRAFT INSTRUMENTS
SPACECRAFT STRUCTURES
Crack growth propagation under variable amplitude loading in aerospace structures
p0181 A81-22632
IPAD applications to the design, analysis, and/or machining of aerospace structures --- Integrated Program for Aerospace-vehicle Design
[AIAA 81-0512] p0301 A81-29388
High intensity acoustic testing to determine structural fatigue life and to improve reliability in nuclear reactor and aerospace structures
p0455 A81-38372
Electrical/electromagnetic concerns associated with advanced composite materials in aerospace systems
p0530 A81-43630
SPACECRAFT TRACKING
NT SATELLITE TRACKING
SPACECREWS
Annual survey of spaceflight safety systems: 11th supplement. Survey period - July 1980-June 1981
[IAF PAPER 81-251] p0607 A81-47425
SPACING
NT AIRCRAFT APPROACH SPACING
SPANLOADER AIRCRAFT
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119
SPANWISE BLOWING
NT BLOWING
Influence of jet location on the efficiency of spanwise blowing
p0154 A81-20352
In-flight research - At low cost
p0299 A81-29208
Evaluation of pressure and thermal data from a wind tunnel test of a large-scale, powered, STOL fighter model
[NASA-CR-166170] p0635 N81-33162
SPARE PARTS
Naval aircraft operating and support cost-estimating model: FY78 revision
[AD-A090044] p0071 N81-12013
SPARK IGNITION
Semi-empirical correlations for gas turbine

emissions, ignition, and flame stabilization
p0171 A81-21505
Basic ignition research related to altitude relight problems
p0237 A81-26014
Fundamental investigation on jet engine ignition of fuel sprays and its application
p0420 A81-37341
Advanced Technology Spark-Ignition Aircraft Piston Engine Design Study
[NASA-CR-165162] p0130 N81-13963
Computer modeling of internal combustion engines: Combustion and related processes
[NTS/79/3] p0587 N81-30454

SPATIAL DISTRIBUTION
Conflict monitoring analysis of parallel route spacing in the high altitude conus airspace, volume 1
[AD-A094071] p0250 N81-18041
Flight simulator: Use of spacegraph display in an instructor/operator station
[AD-A101951] p0602 N81-31235

SPATIAL FILTERING
Improvement of effective minor lobe behavior of radar antennas through signal processing
p0152 A81-20091

SPATIAL ISOTROPY
U SPATIAL DISTRIBUTION

SPATIAL RESOLUTION
Characteristics of flight simulator visual systems
[AGARD-AR-164] p0541 N81-28107

SPECIFIC HEAT
Calculation of flow with variable specific heat around a profile
p0235 A81-25689

SPECIFIC IMPULSE
Simplified design point performance model of a dry turbofan engine cycle
[NASA-TM-83112] p0490 N81-26148

SPECIFICATIONS
NT AIRCRAFT SPECIFICATIONS
NT EQUIPMENT SPECIFICATIONS
NT FUNCTIONAL DESIGN SPECIFICATIONS
Fuel/engine/airframe trade off study
[AD-A097391] p0388 N81-23073
Specification requirements for fighter engines
p0429 N81-24073
Specification and requirements rationale for military and civil helicopter engines
p0429 N81-24075
Practical aspects of instrumentation installation in support of subsystem testing
p0546 N81-29090

SPECKLE PATTERNS
Use of speckle-holographic interferometry to study the strain-strain state of a gas-turbine engine disk close to the blade root fixing
p0170 A81-21366

SPECTRA
NT EMISSION SPECTRA
NT ENERGY SPECTRA
NT INFRARED SPECTRA
NT NOISE SPECTRA

SPECTRUM ANALYSIS
The spectral analysis of nonstationary random processes - Applications to aircraft overflight-type noises --- French thesis
p0174 A81-21922
Contribution to the study of non-stationary signals emitted by moving jet engines - Application to spectral analysis and imaging. II
p0366 A81-33294
Acoustic spectrum analysis for gyro bearings
[AIAA PAPER 81-1616] p0524 A81-43128
Spectral analysis of nonstationary random processes. Application to noise of flyover type
[ESA-TT-639] p0088 N81-12826
Methodology for determining sampling intervals
[AD-A092591] p0202 N81-16825
Contribution to the study of nonstationary signals emitted by moving jet engines: Application to special analysis and imaging. Part 1
p0447 N81-26006
Contribution to the study of nonstationary signals emitted by moving jet engines: Application to spectral analysis and imaging. Part 2
p0447 N81-26013
Digital spectral analysis: A guide based on experience with aircraft vibration
[RAE-TR-81014] p0605 N81-3150

SPEECH
Noise suppression methods for robust speech processing
[AD-A100629] p0551 N81-29323
Clear speech: A strategem for improving radio communications and automatic speech recognition in noise
p0603 N81-31453
Comparative intelligibility of speech materials processed by standard Air Force voice communication systems in the presence of simulated cockpit noise
p0604 N81-31462

SPEECH DISCRIMINATION
U SPEECH RECOGNITION

SPEECH RECOGNITION
The intelligibility of speech presented over the telephones of the Mk 4 flying helmet --- earphones
[RAE-TM-FS-313] p0084 N81-12320
Phonological variants in medial stop consonants under simulated operational environments: Implications for voice activated controls in aircraft
p0603 N81-31452
Clear speech: A strategem for improving radio communications and automatic speech recognition in noise
p0603 N81-31453
Sidetone-level considerations in aircraft communication systems
p0605 N81-3147

SPEED CONTROL
Classical and modern control design of a speed-hold system for a STOL airplane
[AIAA PAPER 81-0017] p0157 A81-2050
Velocity command/position hold - A new flight control concept for hovering VTOL aircraft
[SAE PAPER 801206] p0403 A81-34210

SPEED INDICATORS
NT ANEMOMETERS
NT LASER ANEMOMETERS
An airspeed vector sensor for V/STOL aircraft
[AIAA 80-1938] p0052 A81-1330
Measurement of aircraft speed and altitude --- Book
p0357 A81-3240
Flight investigations of a helicopter low airspeed estimation system based on measurement of control parameters --- hingeless rotor helicopters
[MBB-UD-306/80-OE] p0584 N81-301
Development of an instrument for the accurate measurement of aircraft airspeed and altitude
[AD-A103421] p0638 N81-332

SPEED REGULATION
U SPEED CONTROL

SPEEDOMETERS
U SPEED INDICATORS

SPHERICAL COORDINATES
An analytical solution of the two star sight problem of celestial navigation
p0614 A81-48121
SPHERICAL SHELLS
Solution of nonautomodeled problems of boundary-layer theory taking into account nonstationary conjugate heat exchange and blowing
p0059 A81-14581
SPIN
NT METAL SPINNING
SPIN DYNAMICS
Roll and spin measurements in the low speed wind tunnel at Braunschweig
p0065 A81-15704
Concerning the motion of a piloted aircraft
p0299 A81-29312
The prediction of normal force and rolling moment coefficients for a spinning wing
[NASA-CR-165680] p0333 N81-20068
SPIN FORGING
U METAL SPINNING
SPIN REDUCTION
Applications of dynamic stability parameters to problems in aircraft dynamics
p0410 A81-35552
SPIN STABILIZATION
Thrust augmented spin recovery device
[NASA-CASE-LAR-11970-2] p0275 N81-19130
SPIN TESTS
A status report on NASA general aviation stall/spin flight testing
p0122 A81-19471
Equilibrium spinning of a typical single-engine low-wing light aircraft
p0354 A81-31598
TA-4J spin training through simulation
[AIAA 81-0965] p0414 A81-36556
Analytical techniques for the analysis of stall/spin flight test data
[SAE PAPER 810599] p0521 A81-42756
SPINNING (METALLURGY)
U METAL SPINNING
SPLINES
Cost benefits of nonmetallic spline couplings
[SAE PAPER 801101] p0513 A81-41777
Prevention of spline wear by soft metallic coatings --- aircraft engines
[AD-A091861] p0132 N81-14064
SPOILERS
The possibility of improving the lateral-directional characteristics of a twin-engine aircraft by spoilers in the case of sudden engine failure
p0049 A81-12967
Effects of design variables on spoiler control effectiveness, hinge moments, and wake turbulence
[AIAA PAPER 81-0072] p0159 A81-20581
A computational model for low speed flows past airfoils with spoilers
[AIAA PAPER 81-0253] p0163 A81-20702
S-3A composite spoilers service experience
p0529 A81-43615
Theoretical investigation of the influence of spoiler dynamics on the handling qualities of an aircraft with direct lift control
[DFVLR-FB-80-07] p0131 N81-13975
An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966
Wake vortex attenuation flight tests: A status report
p0267 N81-19057
The 737 graphite composite flight spoiler flight service evaluation
[NASA-CR-159362] p0343 N81-21131
An introduction to the aerodynamics of spoilers
[PB81-166183] p0487 N81-26122
Some qualitative experiments on the local flow about spoilers in unsteady motion at low speeds
[PB81-166159] p0487 N81-26124
Simulator evaluation of the effects of reduced spoiler and thrust authority on a decoupled longitudinal control system during landings in wind shear
[NASA-TM-83108] p0639 N81-33211
SPRAYED COATINGS
Coatings in the aero gas turbine
p0103 A81-17167
High-solids coatings for exterior aircraft
p0169 A81-20861
Aircraft surface coatings study: Energy efficient transport program --- sprayed and adhesive bonded coatings for drag reduction
[NASA-CR-158954] p0084 N81-12225
Automated Plasma Spray (APS) process feasibility study
[NASA-CR-165410] p0597 N81-31193

Pilot-optimal multivariable control synthesis by output feedback
[NASA-CR-163112] p0540 N81-28102
MADY-1, a FORTRAN program for the compressible stability analysis of three-dimensional boundary layers
p0586 N81-30388
The effect of boundary layer growth on the stability of compressible flows
p0587 N81-30389
STABILITY AUGMENTATION
A stability augmentation system which covers the complete flight envelope for a F-4c aircraft without gain scheduling
p0009 A81-11622
Precision flight path control in carrier landing approach - A case for integrated system design
[AIAA PAPER 81-1710] p0535 A81-43956
Effects of displacement and rate saturation on the control of statically unstable aircraft

[AIAA 81-1752] p0554 A81-44082
Economic evaluation of flying-qualities design criteria for a transport configured with relaxed static stability
[NASA-TP-1760] p0130 N81-13968
Velocity vector control system augmented with direct lift control
[NASA-CASE-LAR-12268-1] p0433 N81-24106

STABILITY DERIVATIVES
NT PITCHING MOMENTS
NT ROLLING MOMENTS
NT YAWING MOMENTS
A method for calculating the aerodynamic forces and moments on external stores of aircraft
p0226 A81-24006
Curved-flow, rolling-flow, and oscillatory pure-yawing wind-tunnel test methods for determination of dynamic stability derivatives
p0241 A81-26933
Analytical techniques for the analysis of stall/spin flight test data
[SAE PAPER 810599] p0521 A81-42756
Data analysis for aircraft parameter estimates
[AIAA PAPER 81-1864] p0560 A81-44561
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
A unifying framework for longitudinal flying qualities criteria
[AIAA PAPER 81-1889] p0561 A81-44580
Theoretical analysis of an augmentor wing for a VTOL fighter
[NASA-CR-152254] p0261 N81-19018
An introduction to the aerodynamics of spoilers
[PB81-166183] p0487 N81-26122
Correlation of predicted and flight derived stability and control derivatives with particular application to tailless delta wing configurations --- application to the space shuttle orbiter
[NASA-TM-81361] p0490 N81-26154
Parameter identification of a hingeless rotor helicopter in flight conditions with increased instability
[MBB-UD-307/80-OE] p0584 N81-30140
Dynamic Stability Parameters --- conferences
[AGARD-LS-114] p0590 N81-31105
Review of techniques for determination of dynamic stability parameters in wind tunnels
p0590 N81-31108
Direct forced-oscillation techniques for the determination of stability derivatives in wind tunnels
p0590 N81-31109
Wind-tunnel measurement of aerodynamic derivatives using flexible-sting rigs
p0591 N81-31110
Curved-flow, rolling-flow, and oscillatory pure-yawing wind-tunnel test methods for determination of dynamic stability derivatives
p0591 N81-31112
Applications of half-model technique in dynamic stability testing
p0591 N81-31114
Determination of aircraft dynamic stability and control parameters from flight testing
p0591 N81-31115
Estimation of dynamic stability parameters from drop model flight tests
p0591 N81-31116
Analytical determination of dynamic stability parameters
p0592 N81-31117
Aeroelasticity, including dynamic effects of separated flow --- launch vehicle response
p0592 N81-31118
Control derivatives
p0592 N81-31119
Sensitivity of aircraft motion to cross coupling and acceleration derivatives
p0592 N81-31120
Applications of dynamic stability parameters to problems in aircraft dynamics
p0592 N81-31122
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124

STABILITY TESTS
NT FLIGHT STABILITY TESTS
NT WIND TUNNEL STABILITY TESTS
A new concept for dynamic stability testing --- for aircraft model in orbital path
[AIAA PAPER 81-0158] p0161 A81-20638
Experimental study of the stability of aircraft fuels at elevated temperatures
[NASA-CR-165165] p0088 N81-12255

STABILIZATION
NT SPIN STABILIZATION
Two-axis, fluidically controlled thrust vector control system for an ejection seat
[AD-A093888] p0204 N81-16996
Impact of high-alpha aerodynamics on dynamic stability parameters of aircraft and missiles
p0590 N81-31107

STABILIZED PLATFORMS
Gyrostabilizers for inertial control systems --- Russian book

Problem of rotor passing through critical speed with gyroscopic effect. III - Case of rotating shaft on flexible supports
p0228 A81-24089
Use of optimization in helicopter vibration control by structural modification
p0241 A81-26945
Vibrations of multispan stiffened plates via modified Bolotin method
p0241 A81-26954
Aerodynamic blade excitation in turbocompressors
p0282 A81-27612
Structures, Structural Dynamics and Materials Conference, 22nd, Atlanta, Ga., April 6-8, 1981, and AIAA Dynamics Specialists Conference, Atlanta, Ga., April 9, 10, 1981, Technical Papers. Part 2
p0303 A81-29428
Attenuation of propeller related vibration and noise
[AIAA 81-0521] p0303 A81-29442
Response characteristics of a linear rotorcraft vibration model
[AIAA 81-0616] p0305 A81-29477
Unsteady aerodynamic propulsion
[AIAA 81-0645] p0307 A81-29498
Inflight aircraft vibration modes and their effect on aircraft radar cross section
p0352 A81-31370
High frequency angular vibration measurements in vehicles
[AAS PAPER 81-024] p0361 A81-32886
Helicopter vibration control - A survey
p0364 A81-33047
A new method for modal identification
p0365 A81-33293
Finite element analysis of asymmetric, lateral natural vibrations of a deformable aeroplane
p0366 A81-33736
Oscillating airfoils in shock-free transonic flows
p0410 A81-35026
Helicopter vibration reduction through structural manipulation
p0467 A81-40090
Coupled rotor/airframe vibration analysis by a combined harmonic-balance, impedance-matching method
[AHS 80-21] p0474 A81-40151
Effects of rotor-body coupling in a linear rotorcraft vibration model
[AHS 80-26] p0475 A81-40156
Vibrations in technical equipment. Volume 3 - Oscillations of machines, structures, and their components --- Russian book
p0511 A81-41725
The effect of various factors on the vibration characteristics of composite blades of gas turbine engines
p0524 A81-42793
Acoustic spectrum analysis for gyro bearings
[AIAA PAPER 81-1616] p0524 A81-43128
The influence of structural parameters and velocity on the shimmy of self-aligned wheels
p0556 A81-44260
A formulation of the shimmy problem for swiveling wheels
p0607 A81-47260
Damping applications for vibration control; Proceedings of the Winter Annual Meeting, Chicago, Il, November 16-21, 1980
p0613 A81-47993
Static deflection and eigenfrequency analysis of the Nibe wind turbine rotors. Theoretical background --- structural vibration
[RISOE-M-2199] p0279 N81-19497
Model vibrations below low speed stall
p0447 N81-26017
YC-15 interior noise measurements. Technical discussion
[AD-A098788] p0492 N81-26047
Digital spectral analysis: A guide based on experience with aircraft vibration
[RAE-TR-81014] p0605 N81-31508

STRUCTURAL WEIGHT
Weight optimization of wing structures according to the gradient method
p0012 A81-11650
Structural weight comparison of a joined wing and a conventional wing
[AIAA PAPER 81-0366] p0166 A81-20785
The 'light-weight' system - A novel concept for on-board weight and balance measurement using fiber optics
[SAWE PAPER 1336] p0352 A81-31377
Test procedures used in determining aircraft suitability for STAN integral weight and balance system
[SAWE PAPER 1339] p0352 A81-31379
Development and testing of a new technology weight and balance indicator
[SAWE PAPER 1341] p0353 A81-31381
An Interactive Weight Accounting Program /IWAP/
[SAWE PAPER 1345] p0353 A81-31383
Computer aided technology interface with weights engineering --- aircraft design
[SAWE PAPER 1346] p0353 A81-31384
The structural weight fraction - Revisited for fighter/attack type aircraft
[SAWE PAPER 1365] p0353 A81-31387
Design, fabrication, calibration, application, and testing of advanced aircraft weighing systems
[SAWE PAPER 1383] p0353 A81-31399
Unistructure - A new concept for light weight integrally stiffened skin structures
[SAE PAPER 801231] p0405 A81-34233
Components in hybrid- and fiber technology for commercial aircraft of the Airbus family /flap support, spoiler, and window frame/
p0450 A81-37644
Computer aided helicopter design
p0572 A81-46613
Continued development and correlation of analytically based weight estimation codes for wings and fuselages
[NASA-CR-152331] p0251 N81-18014

GASP- General Aviation Synthesis Program. Volume 5: Weights. Part 1: Theoretical development [NASA-CR-152303-VOL-5-PT-1] p0271 N81-19092

Application of a structural optimization procedure for advanced wings [AGARD-R-691] p0333 N81-20064

Aircraft wing weight build-up methodology with modification for materials and construction techniques [NASA-CR-166173] p0387 N81-23068

STRUTS

Reduction of strut induced rotor blade vibration with the modified stator setting angles p0295 A81-29097

Self-oscillations of a self-aligned landing gear strut in the case of classical nonholonomic rolling constraints p0563 A81-45315

Self-oscillations of a wheel on a self-aligning landing gear strut with a nonlinear damper A81-46847

A formulation of the shimmy problem for swiveling wheels p0607 A81-47268

Preliminary design characteristics of a subsonic business jet concept employing an aspect ratio 25 strut braced wing [NASA-CR-159361] p0032 N81-11013

A study of high-altitude manned research aircraft employing strut-braced wings of high-aspect-ratio [NASA-CR-159262] p0333 N81-20067

STS-1

U SPACE TRANSPORTATION SYSTEM 1 FLIGHT

SUBASSEMBLIES

Design, fabrication and test of graphite/polyimide composite joints and attachments for advanced aerospace vehicles [NASA-CR-159112] p0194 N81-16082

SUBCIRCUITS

U SUBASSEMBLIES

SUBCRITICAL FLOW

Aerodynamic calculations and design of subcritical aerofoils p0108 A81-17804

Calculation of nonlinear compressibility effects of airfoils in subcritical conditions p0225 A81-23853

SUBLATTICES

U LATTICES (MATHEMATICS)

SUBLAYERS

U SUBSTRATES

SUBROUTINES

Estimation of aerodynamic forces acting on Earth satellites, application to an experimental satellite [INPE-1944-RPE/262] p0585 N81-30158

SUBSONIC AIRCRAFT

A survey of recent atmospheric turbulence measurements from a subsonic aircraft [AIAA PAPER 81-0298] p0164 A81-20736

The role of flight research vehicles in prop-fan technology development [ASME PAPER 81-GT-216] p0318 A81-30104

V/STOL advanced technology rewards and risk --- aircraft design [SAWE PAPER 1385] p0354 A81-31401

Aerodynamic surface cooling for laminar flow control for hydrogen-fueled subsonic aircraft [SAE PAPER 801155] p0407 A81-34245

Minimum fuel paths for a subsonic aircraft p0411 A81-35636

Zero-length inlets for subsonic V/STOL aircraft [AIAA PAPER 81-1396] p0515 A81-42186

The improvement of aircraft specific range by periodic control [AIAA 81-1748] p0553 A81-44080

Comparative acoustic wind-tunnel measurements and theoretical correlations on subsonic aircraft propellers at full-scale and model-scale [AIAA PAPER 81-2004] p0620 A81-48634

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport: Project plan [NASA-CR-3305] p0332 N81-20062

A study of high-altitude manned research aircraft employing strut-braced wings of high-aspect-ratio [NASA-CR-159262] p0333 N81-20067

Tendencies in the development of subsonic transport-aircraft under special considerations of aerodynamics [DFVLR-MITT-80-15] p0338 N81-21080

SUBSONIC FLOW

Asymmetric flow of subsonic and sonic jets over an infinite wedge p0004 A81-10919

The aerodynamics of pure subsonic flow /4th revised edition/ --- German book p0006 A81-11441

Study of a variable sweep wing in sub or transonic flow [ONERA, TP NO. 1978-106] p0058 A81-14391

Calculation of critical flutter speeds on an aircraft in subsonic flow p0068 A81-16301

A study of air breathing rockets - Subsonic mode combustion [IAF PAPER 80-F-270] p0115 A81-18371

Some characteristics of subsonic flow over the root area of a sweptback wing p0123 A81-19633

Plane vortex gas flows --- emphasizing supersonic case p0123 A81-19634

Viscous-inviscid interaction on oscillating airfoils in subsonic flow [AIAA PAPER 81-0051] p0159 A81-20567

Solutions for slightly over- or under-expanded hot supersonic jets exhausting into cold subsonic mainstreams [AIAA PAPER 81-0257] p0163 A81-20705

Computer simulation of airfoil icing without runback [AIAA PAPER 81-0402] p0167 A81-20809

Spanwise distribution of control points in the method of finite elementary solutions [AIAA PAPER 79-1879] p0169 A81-21011

Lifting surface theory and the numerical method of wings with small angles of sideslip at subsonic and supersonic speeds p0224 A81-23851

Calculation of nonlinear compressibility effects of airfoils in subcritical conditions p0225 A81-23853

Unsteady subsonic motion of a wing near a screen p0225 A81-23889

A one-dimensional analysis and performance prediction of subsonic radial turbines p0228 A81-24086

Research on vortex bursting in compressible flow --- Thesis p0230 A81-24477

Subsonic cascade flow analysis by a finite element method p0233 A81-25311

Factors affecting afterbody drag p0292 A81-29069

The accuracy of mean-stream-line method in subsonic and transonic regions p0296 A81-29105

Subsonic gas flow past a wing profile p0349 A81-31034

Concerning Khristianovich's transformation of a subsonic flow past an airfoil into a low-speed flow p0349 A81-31045

Subsonic and transonic flow on a wing at different sweep angles. I p0351 A81-31249

Subsonic and transonic flow on a wing at different sweep angles. II p0351 A81-31250

Experimental investigation of oscillating subsonic jets p0360 A81-32777

A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections [AIAA PAPER 81-1195] p0454 A81-38077

An optimal-surface-transpiration subsonic panel-method for iterative design of complex aircraft configurations [AIAA PAPER 81-1254] p0438 A81-39012

The calculation of lift and drag characteristics of subsonic wings with winglets p0480 A81-40442

An approach to conformal inlet diffuser design for integrated propulsion systems [AIAA PAPER 81-1395] p0514 A81-42185

Damping of turbomachine blade variations by subsonic flow

p0612 A81-47957
Evaluation of two-dimensional subsonic oscillatory airforce coefficients and loading distributions
p0617 A81-48480
Noise shielding by a hot subsonic jet
[AIAA PAPER 81-2018] p0624 A81-49731
Calculation of the aerodynamic characteristics of a deformable wing, moving near a screen
p0625 A81-49948
Theoretical determination of subsonic oscillatory airforce coefficients for fin-tailplane configurations
[RAE-TR-79125] p0022 N81-10016
Unsteady three-dimensional subsonic flow in a solid propellant rocket motor including the effect of motor rotation
p0095 N81-13085
Laser-Raman/Rayleigh flow diagnostic techniques applied to subsonic flow
[AD-A091695] p0133 N81-14275
An analytic model of subsonic flow around an airflow with a spoiler
p0138 N81-14966
Finite element analysis of inviscid subsonic boattail flow
[NASA-TM-81650] p0140 N81-14977
A constrained inverse method for the aerodynamic design of thick wings with given pressure distribution in subsonic flow
p0188 N81-16006
Viscous-inviscid interaction on oscillating airfoils in subsonic flow
[AD-A093970] p0203 N81-16983
Leading edge vortex flaps for drag reduction --- during subsonic flight
[NASA-CASE-LAR-12750-1] p0261 N81-19016
A higher-order trapezoidal vector vortex panel for subsonic flow
[AD-A094775] p0263 N81-19032
Some remarks on the unsteady airloads on oscillating control surfaces in subsonic flow
p0386 N81-23055
Technical evaluation report on the Fluid Dynamic Panel Symposium on Subsonic/Transonic Configuration/Aerodynamics
[AGARD-AR-146] p0392 N81-23431
Civil component program Wing Section. New calculation methods for subsonic and transonic interference with planar and spatial flows
[BMFT-FB-W-80-022] p0424 N81-24034
Investigations of free-jet test requirements and techniques with emphasis on the adaptable jet stretcher
[AD-A098710] p0439 N81-25044
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091

SUBSONIC FLUTTER
Calculation of critical flutter speeds on an aircraft in subsonic flow
p0068 A81-16301
Measurement of the aerodynamic forces acting on a harmonically oscillating wing at high subsonic speeds
p0349 A81-31042
System to measure the pressure distribution on fan aerofoil surfaces during flutter conditions
[PNR-90013] p0072 N81-12029
Experimental flutter at high subsonic speeds and its theoretical prediction, taking into account wing thickness and Reynolds number
p0385 N81-23052

SUBSONIC SPEED
Subsonic parachute design, performance, and similarity laws /scale effects/ - A review of the Institute's activities during the last years
p0060 A81-14799
Calculation of the lift dependent drag polar of cambered fighter plane configurations with deflected maneuver flaps in the subsonic region by means of a modified procedure according to Lamar
[DGLR PAPER 80-109] p0120 A81-19395
Contribution to the determination of the drag coefficient for air breathing flight vehicles on the basis of wind tunnel measurements
[DGLR PAPER 81-036] p0610 A81-47604
Evaluation of aircraft interference effects on external stores at subsonic and transonic speeds
p0187 N81-15997
Development for new laboratories for future testing
p0433 N81-24105
Subsonic tests of an all-flush-pressure-orifice air data system
[NASA-TP-1871] p0489 N81-26144

SUBSONIC WIND TUNNELS
Three years of operation of the ONERA pressurized subsonic wind tunnel
[ONERA, TP NO. 1980-129] p0014 A81-11669
Prediction and experimental verification of transient airfoil motion in a small wind tunnel
[AIAA PAPER 81-0052] p0159 A81-20568
Wind tunnel model support, controlled by four microprocessors
[ONERA, TP NO. 1980-149] p0174 A81-21917
Store separation simulation in subsonic wind tunnels
[MBB-FE-123/S/PUB/20] p0203 N81-16988
Evaluation of a subsonic cascade wind tunnel for compressor blade testing
[AD-A093591] p0218 N81-17107

SUBSTRATES
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048

SUBSTRUCTURES
Optimal design of frames with substructuring
p0068 A81-16276
An aeronautical structural analysis system for static analysis /HAJIF-I/
p0224 A81-23728
Supermatrix method for multi-substructure analysis
p0225 A81-23854
Wind loads for bar-truss structures
p0259 N81-18997

SUCTION
Thin minimum-drag airfoils
p0123 A81-19630
Compressible boundary-layer stability calculations for sweptback wings with suction
[AIAA PAPER 81-0196] p0169 A81-20840
Fundamental studies on the control of turbulent boundary layers. I Theoretical and experimental analyses of velocity profiles and parameters with and without adverse pressure gradient, with uniform suction through a porous flat plate
p0228 A81-24079
Transient three-dimensional flow along a porous plate
p0231 A81-24815
Hybrid suction surface for turbulent boundary layer flow
p0240 A81-26513
Experimental investigation of the flow on the suction side of a thin Delta wing
[NASA-TM-75897] p0338 N81-21024
Program of research in laminar flow control in the JIAFS at NASA Langley Research Center

Integrated active controls impact on supersonic cruise vehicle structural design [SAE PAPER 801210] p0404 A81-34218

Supersonic aircraft test experience - Test techniques and data analysis methods p0419 A81-37299

Propellers for economic flight at high speeds p0464 A81-39698

Multi-mission V/STOL with vectored thrust engines [AIAA PAPER 81-1363] p0502 A81-40843

Advanced nozzle integration for supersonic strike fighter application [AIAA PAPER 81-1441] p0504 A81-40875

The supersonic fan engine - An advanced concept in supersonic cruise propulsion [AIAA PAPER 81-1599] p0508 A81-40973

Experimental and analytical development of an advanced supersonic fighter concept [AIAA PAPER 81-1659] p0534 A81-43941

SR-71 impressive in high-speed regime p0565 A81-45747

SR-71 imposes burden on maintenance units p0565 A81-45748

Experimental and theoretical aerodynamic characteristics of two hypersonic cruise aircraft concepts at Mach numbers of 2.96, 3.96, and 4.63 [NASA-TP-1767] p0072 N81-12021

A simulator study for the development and evaluation of operating procedures on a supersonic cruise research transport to minimize airport-community noise [NASA-TP-1742] p0073 N81-12043

A system for aerodynamic design and analysis of supersonic aircraft. Part 1: General description and theoretical development [NASA-CR-3351] p0139 N81-14970

A system for aerodynamic design and analysis of supersonic aircraft. Part 3: Computer program description [NASA-CR-3353] p0139 N81-14971

A system for aerodynamic design and analysis of supersonic aircraft. Part 4: Test cases [NASA-CR-3354] p0185 N81-15977

Progress with variable cycle engines p0245 N81-17997

A family of supersonic airplanes: Technical and economic feasibility p0248 N81-18017

Supersonic cruise vehicle research/business jet p0248 N81-18022

Optimum maneuvers of supersonic aircraft, volumes 1 and 2 p0332 N81-20060

Turbine bypass engine: A new supersonic cruise propulsion concept [NASA-TM-82608] p0489 N81-26145

The supersonic fan engine: An advanced concept in supersonic cruise propulsion [NASA-TM-82657] p0496 N81-27094

Multi-mission STOVL with vectored thrust engines p0633 N81-33149

Wind tunnel testing of a windshield material or supersonic aircraft [AD-A103383] p0635 N81-33163

Analysis and design of supersonic aircraft based on inviscid nonlinear Eulerian equations. Part 1: Rotational Euler solutions with explicit shock fitting [AD-A103434] p0637 N81-33192

SUPERSONIC AIRFOILS

Rotor redesign for a highly loaded 1800 ft/sec tip speed fan, 2 [NASA-CR-159879] p0078 N81-12087

The high-speed airfoil program p0185 N81-15970

The high-speed propeller program p0185 N81-15972

Some aerodynamic interference effects that influence the transonic performance of combat aircraft p0189 N81-16014

Design study for the inner wing of a transonic wing-body combination of aspect ratio 8 p0190 N81-16015

Civil component program Wing Section. The design of the transonic airfoil Va 2 [BMFT-FB-W-80-023] p0426 N81-24053

SUPERSONIC BOUNDARY LAYERS

The coordinate-deformation method in the problem of a supersonic gas flow over an airfoil --- delta wings p0123 A81-19631

The influence of flow disturbances on the laminar-turbulent transition in a supersonic boundary layer p0124 A81-19643

Wind-tunnel measurements and comparison with flight of the boundary layer and heat transfer on a hollow cylinder at Mach 3 [NASA-TP-1789] p0140 N81-14975

SUPERSONIC COMBUSTION

Multiple-scale turbulence modeling of boundary layer flows for scramjet applications [NASA-CR-3433] p0392 N81-23411

SUPERSONIC COMBUSTION RAMJET ENGINES

A numerical study of candidate transverse fuel injector configurations in the Langley scramjet engine p0003 A81-10709

Flameholding characteristics of a swept-strut H2 fuel-injector for scramjet applications p0003 A81-10711

Numerical study of a scramjet engine flow field [AIAA PAPER 81-0186] p0162 A81-20659

O.N.E.R.A. ramjet test facilities p0365 A81-33205

Scramjet combustor wall boundary layer analysis [AIAA PAPER 81-1434] p0504 A81-40871

A parametric study of staged fuel injector configurations for scramjet applications [AIAA PAPER 81-1468] p0505 A81-40888

Critical considerations in the design of supersonic combustion ramjet /scramjet/ engines [AIAA PAPER 80-1284] p0511 A81-41749

Operating characteristics of the Langley Mach 7 Scramjet Test Facility [NASA-TM-81929] p0335 N81-20083

SUPERSONIC COMMERCIAL AIR TRANSPORT

A successful step toward an advanced supersonic transport engine - Acoustic and emission results from the Pratt and Whitney Aircraft Variable Cycle Engine Program [AIAA PAPER 81-1593] p0508 A81-40966

Turbine bypass engine - A new supersonic cruise propulsion concept [AIAA PAPER 81-1596] p0508 A81-40971

Design of a multivariable integrated control for a supersonic propulsion system --- variable stream control engine p0079 N81-12094

Structural concept trends for commercial supersonic cruise aircraft design

p0246 N81-18006
Opportunities for structural improvements for an advanced supersonic transport vehicle
p0246 N81-18007
Evaluation of high-temperature structural adhesives for extended service
p0247 N81-18010
Long-range airplane study: The consumer looks at SST travel
p0247 N81-18014
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport --- SCAT-15F model test in the Langley Transonic Dynamics Tunnel
[NASA-TM-81962] p0388 N81-23071
SUPERSONIC CRUISE AIRCRAFT RESEARCH
NASA presses fighter gains --- long-range supersonic cruise aircraft
p0002 A81-10575
The influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43146
Progress in supersonic cruise technology
[AIAA PAPER 81-1687] p0535 A81-43950
Model aerodynamic test results for two variable cycle engine coannular exhaust systems at simulated takeoff and cruise conditions --- Lewis 8 by 6-foot supersonic wind tunnel tests
[NASA-CR-159818] p0093 N81-13057
Bibliography of Supersonic Cruise Research (SCR) program from 1977 to mid-1980
[NASA-RP-1063] p0139 N81-14973
A wind tunnel investigation of the aerodynamic characteristics of forward swept wings --- supersonic cruise aircraft research
p0189 N81-16011
Complex configuration analysis at transonic speeds
p0190 N81-16016
Active controls for flutter suppression and gust alleviation in supersonic aircraft --- YF-17 flutter model
[NASA-CR-163934] p0216 N81-17097
Supersonic Cruise Research 1979, part 1
[NASA-CP-2108-PT-1] p0243 N81-17981
Overview of the Langley subsonic research effort on SCR configuration
p0243 N81-17982
Results of a low-speed wind tunnel test of the MDC 2.2M supersonic cruise aircraft configuration
p0243 N81-17983
Exploratory subsonic investigation of vortex-flap concept on arrow wing configuration
p0243 N81-17985
Analytic development of improved supersonic cruise aircraft based on wind tunnel data
p0244 N81-17989
Flying qualities design criteria applicable to supersonic cruise aircraft
p0244 N81-17991
Development of SCR Aircraft takeoff and landing procedures for community noise abatement and their impact on flight safety
p0245 N81-17994
VCE test bed engine for supersonic cruise research
p0245 N81-17995
Effects on inlet technology on cruise speed selection
p0245 N81-17998
VCE early acoustic test results of General Electric's high-radius ratio coannular plug nozzle
p0245 N81-17999
Effects of nozzle design on the noise from supersonic jets
p0246 N81-18001
Status of noise technology for advanced supersonic cruise aircraft
p0246 N81-18002
Advanced technology for controlling pollutant emissions from supersonic cruise aircraft
p0246 N81-18004
Supersonic Cruise Research 1979, part 2 --- airframe structures and materials, systems integration, economic analysis
[NASA-CP-2108-PT-2] p0246 N81-18005
Supersonic cruise research aircraft structural studies: Methods and results
p0246 N81-18008
Overview of Boeing supersonic transport efforts, 1971 - 1979
p0247 N81-18016
Impact of changing fuel characteristics on supersonic cruise airplane
p0248 N81-18018
Charts for determining potential minimum sonic-boom overpressures for supersonic cruise aircraft
[NASA-TP-1820] p0337 N81-21016
SUPERSONIC DIFFUSERS
One-dimensional considerations concerning the stability behavior of inlet diffusers for supersonic aircraft --- German thesis
p0107 A81-17548
Some optimization problems of internal aerodynamics
p0237 A81-26120
Numerical solution of a supersonic ejector pump
p0413 A81-35939
Experiments with a supersonic multi-channel radial diffuser
[AD-A094192] p0257 N81-18374
Analysis of the performance of the drive system and diffuser of the Langley unitary plan wind tunnel
[NASA-TM-83168] p0635 N81-33158
SUPERSONIC DRAG
Procedures for optimal drag design of camber and flap deflection in supersonic regions with consideration to geometric limits
[DGLR PAPER 80-110] p0120 A81-19396
Experimental and theoretical aerodynamic characteristics of two hypersonic cruise aircraft concepts at Mach numbers of 2.96, 3.96, and 4.63
[NASA-TP-1767] p0072 N81-12021
Data base for the prediction of inlet external drag
p0190 N81-16018
SUPERSONIC FLIGHT
The emulsion chamber experiment on super-sonic Concorde /Echos/
p0019 A81-12476
Delta canard configuration at high angle of attack
p0154 A81-20351
Application of aerodynamic jump prediction theory to supersonic, high fineness ratio, cruciform finned bodies
[AIAA PAPER 81-0222] p0162 A81-20685
Contribution to the determination of the drag coefficient for air breathing flight vehicles on the basis of wind tunnel measurements
[DGLR PAPER 81-036] p0610 A81-47604
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-49728
Computational aerodynamic design tools and techniques used at fighter development
[MBB-FE-122/S/PUB/13] p0128 N81-13950
Prediction of supersonic store separation characteristics including fuselage and stores of noncircular cross section. Volume 2: Users manual for the computer program
[AD-A099391] p0494 N81-27080
Prediction of supersonic store separation characteristics including fuselage and stores of noncircular cross section. Volume 1: Theoretical methods and comparisons with experiment
[AD-A099330] p0495 N81-27081
SUPERSONIC FLOW
Investigation of lateral forces and moments in the case of asymmetric gas flows in nozzles
p0004 A81-10913
Review of numerical methods for the problem of the supersonic flow around bodies at angle of attack
p0011 A81-11639
Solution of nonautomodeled problems of boundary-layer theory taking into account nonstationary conjugate heat exchange and blowing
p0059 A81-14501
Thin-layer approximation for three-dimensional supersonic corner flows
p0067 A81-15900
Variational problems of gas dynamics
p0069 A81-16455
Characteristics of the velocity field near a wing-body combination located at an angle of attack to an oncoming supersonic flow
p0119 A81-19337
Plane vortex gas flows --- emphasizing supersonic case

p0123 A81-19634
On a linear theory of a supersonic flow past a delta wing with subsonic leading edges
p0149 A81-19872
A cost-effective method for shock-free supercritical wing design
[AIAA PAPER 81-0383] p0166 A81-20796
Calculation of supersonic gas flows about wings
p0179 A81-21201
Calculation of internal and external flow field and cowl pressure drag in the supersonic axisymmetric nose inlets
p0224 A81-23730
Lifting surface theory and the numerical method of wings with small angles of sideslip at subsonic and supersonic speeds
p0224 A81-23851
Slightly blunted cone in a supersonic flow at angle of attack
p0225 A81-23908
Self-excited oscillations of supersonic flow in a sudden enlargement of a duct
p0228 A81-24031
Numerical simulation of supersonic flow around solids of revolution with a leading detachment zone
p0231 A81-24757
Evaluation of blade element performance of compressor rotor blade cascades in transonic and low supersonic flow range
p0296 A81-29102
On some methods of supersonic unsteady lifting surface analysis
[AIAA 81-0644] p0307 A81-29497
An improved potential gradient method to calculate airloads on oscillating supersonic interfering surfaces
[AIAA 81-0646] p0307 A81-29499
Interaction of a gas jet from a jet engine with the destroyed surface of a multiphase disperse medium
p0319 A81-30152
Calculation of supersonic flow around a wing with constant curvature of its leading edges
p0413 A81-35916
Calculation of supersonic flow past interfering wings
p0413 A81-36455
Calculation of flow past wings with supersonic sharp edges
p0418 A81-36944
Accuracy and application of a second-order theory for three-dimensional supersonic and low hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077
Measured pressure distributions and shock shapes on a simple delta wing
p0617 A81-48479
Analytical characteristics methods: Applications
[VKI-PREPRINT-1980-10] p0021 N81-10011
Measured pressure distributions and shock shapes on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026
Downwash calculation at close range behind a trapezoidal wing in supersonic flow
[FFA-TN-AU-1661] p0125 N81-13925
Transonic wind tunnel development (1940 - 1950)
p0185 N81-15971
A higher order panel method for linearized supersonic flow
[NASA-CR-3062] p0262 N81-19022
Investigation of plume induced separation on a full-size missile at supersonic velocities
[AD-A094742] p0277 N81-19212
Investigations of free-jet test requirements and techniques with emphasis on the adaptable jet stretcher
[AD-A098710] p0439 N81-25044
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091
Basic studies of body vortices at high angles of attack and supersonic speeds
[AD-A102241] p0594 N81-31154

SUPERSONIC FLOW INLETS
U SUPERSONIC INLETS

SUPERSONIC FLUTTER
Experimental verification of unsteady aerodynamic models of supersonic unstalled flutter
p0295 A81-29094
Supersonic stall flutter of high-speed fans
[ASME PAPER 81-GT-188] p0317 A81-30078
Experimental determination of unsteady blade element aerodynamics in cascades. Volume 2: Translation mode cascade
[NASA-CR-165166] p0140 N81-14976

SUPERSONIC INLETS
Experimental investigation of a high-aspect-ratio supersonic inlet
[AIAA PAPER 81-1397] p0515 A81-42187
Supersonic stall flutter of high speed fans --- in turbofan engines
[NASA-TM-81613] p0140 N81-14978
High-speed cowlings, air inlets and outlets, and internal-flow systems
p0185 N81-15973
Data base for the prediction of inlet external drag
p0190 N81-16018
Hyperbolic/parabolic development for the GIM-STAR code --- flow fields in supersonic inlets
[NASA-CR-3369] p0201 N81-16416
Top-mounted inlet system feasibility for transonic-supersonic fighter aircraft --- V/STOL aircraft
[NASA-TM-81292] p0428 N81-24066

SUPERSONIC JET FLOW
Interferometric study of the initial stage of supersonic jets of gases with various specific-heat ratios from conical nozzles
p0068 A81-16231
Solutions for slightly over- or under-expanded hot supersonic jets exhausting into cold subsonic mainstreams
[AIAA PAPER 81-0257] p0163 A81-20705
New interpretations of shock-associated noise with and without screech
p0176 A81-22527
Calculation of the boundary of a supersonic inviscid jet flowing into a submerged space or a supersonic wake
p0229 A81-24172
Experiments on the nonlinear characteristics of noise propagation from low and moderate Reynolds number supersonic jets
[AIAA PAPER 81-2041] p0616 A81-48613
Shock associated noise reduction from inverted-velocity-profile coannular jets
[NASA-CR-3454] p0589 N81-30908

SUPERSONIC NOZZLES
On screeching jets exhausting from an axisymmetric supersonic nozzle
p0008 A81-11616
Some optimization problems of internal aerodynamics
p0237 A81-26120
Characteristics of thermal energy separation in a gas ejector
p0281 A81-27371
The sweep finite element method for calculating the flow field and performance of supersonic ejector nozzles
p0291 A81-29061
Effectiveness of a gas curtain in Laval nozzles under nonrated flow conditions
p0417 A81-36737
Numerical simulation for the design of a supersonic cruise nozzle with a fluid noise shield
[AIAA PAPER 81-1216] p0458 A81-39006
Flight effects on supersonic convergent-divergent nozzle jet noise
[AIAA PAPER 81-2027] p0623 A81-45728
Effects of nozzle design on the noise from supersonic jets
p0246 N81-18001
Status of noise technology for advanced supersonic cruise aircraft
p0246 N81-18002

SUPERSONIC SPEEDS
Wing-alone aerodynamic characteristics at high angles of attack
[AIAA PAPER 81-0008] p0157 A81-20532
Wing-body carryover at supersonic speeds with finite afterbodies
p0354 A81-31622
Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds

[NASA-TP-1718] p0021 N81-10004
Optimal bodies for minimum total drag at supersonic speeds
[AD-A091235] p0091 N81-13036
Effect of wing location and strakes on stability and control characteristics of a monoplanar circular missile with low-profile tail fins at supersonic speeds
[NASA-TM-81878] p0106 N81-15978
Prediction of nacelle aerodynamic interference effects at low supersonic Mach numbers
p0244 N81-17988
Supersonic wings with significant leading-edge thrust at cruise
p0244 N81-17990
An evaluation of a simplified near field noise model for supersonic helical tip speed propellers
[NASA-TM-81727] p0300 N81-22036
Development for new laboratories for future testing
p0433 N81-24105
Wing-alone aerodynamic characteristics for high angles of attack of supersonic speeds
[NASA-TP-1889] p0579 N81-30087
SUPERSONIC TRANSPORTS
NT CONCORDE AIRCRAFT
NT SUPERSONIC COMMERCIAL AIR TRANSPORT
The aircraft in the stratosphere --- effects on ozone layer equilibrium
p0002 A81-10499
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Advanced supersonic transport propulsion and configuration technology improvements
[AIAA PAPER 81-1595] p0508 A81-40970
Motion-base simulator results of advanced supersonic transport handling qualities with active controls
[AIAA 81-1819] p0555 A81-44109
Optimization of takeoff flight paths with respect to FAR Part 36 noise using dynamic programming
p0569 A81-46371
Advanced supersonic transport fixed-base simulator evaluations at landing approach
p0244 N81-17992
Assessment of the impact of advanced air-transport technology
p0247 N81-18015
Technology development status at McDonnell Douglas
p0248 N81-18019
Supersonic market and economic analyses
p0248 N81-18020
The impact of materials technology and operational constraints on the economics of cruise speed selection
p0248 N81-18021
SUPERSONIC TURBINES
Gas dynamic characteristics of the nozzle diaphragms of partial supersonic turbines
p0281 A81-27374
Experimental investigation of a low hub-to-tip ratio single stage transonic fan
[ASME PAPER 81-GT-209] p0318 A81-30098
ATES activity and status at Detroit Diesel Allison --- Advanced Technology Engine Studies
[AIAA PAPER 81-1504] p0516 A81-42206
SUPERSONIC WAKES
Calculation of the boundary of a supersonic inviscid jet flowing into a submerged space or a supersonic wake
p0229 A81-24172
SUPERSONIC WIND TUNNELS
Calibration of the high speed wind tunnel TVM 150 in the supersonic range
p0016 A81-11778
The influence of flow disturbances on the laminar-turbulent transition in a supersonic boundary layer
p0124 A81-19643
Wall cooling and the laminar-turbulent boundary layer transition at supersonic flow velocities
p0124 A81-19644
Investigation of the starting process of a supersonic wind tunnel
p0228 A81-24080
A half-model free-oscillation rig for pitch-damping measurements in high speed wind tunnels
p0461 A81-39263
An experimental investigation of a large delta P settling chamber for a supersonic pilot quiet tunnel
[NASA-CR-3436] p0434 N81-24112
A rectangular rod-wall sound shield
[NASA-CASE-LAR-12883-1] p0550 N81-29138
Analysis of the performance of the drive system and diffuser of the Langley unitary plan wind tunnel
[NASA-TM-83168] p0635 N81-33158
SUPPORT INTERFERENCE
An investigation of support-interference effects
[NAL-TR-622] p0141 N81-14984
Support interference of wind tunnel models: A selective annotated bibliography
[NASA-TM-81909] p0335 N81-20084
Support interference
p0591 N81-31113
SUPPORT SYSTEMS
NT EMERGENCY LIFE SUSTAINING SYSTEMS
NT GROUND SUPPORT SYSTEMS
NT LIFE SUPPORT SYSTEMS
F-16 integrated logistics support: Still time to consider economical alternatives
[PB81-137473] p0309 N81-23079
SUPPORTS
NT PYLONS
Experimental study of the influence of supports on the aerodynamic loads on an ogive cylinder at high angles of attack
[AIAA PAPER 81-0007] p0156 A81-20531
Problem of rotor passing through critical speed with gyroscopic effect. III - Case of rotating shaft on flexible supports
p0228 A81-24089
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124
SUPPRESSORS
Active flutter suppression design and test - A joint U.S.-F.R.G. program
p0049 A81-11621
Advanced technology turboshaft IR suppression
p0106 A81-17519
General Electric infrared suppressors for the Black Hawk helicopter
p0106 A81-17520
SURFACE ACOUSTIC WAVE DEVICES
AN/TPX-54 interrogator
p0350 A81-31131
The behavior of quartz oscillators in the presence of accelerations --- in missile and aircraft time-frequency navigation systems
[ONERA, TP NO. 1981-31] p0351 A81-31285
SURFACE COOLING
Wall cooling and the laminar-turbulent boundary layer transition at supersonic flow velocities
p0124 A81-19644
Heat transfer from a row of impinging jets to concave cylindrical surfaces
p0231 A81-24924
Aerodynamic surface cooling for laminar flow control for hydrogen-fueled subsonic aircraft
[SAE PAPER 801155] p0407 A81-34245
SURFACE DEFECTS
Runway rehabilitation, Washington National Airport
p0112 A81-18066
SURFACE EFFECT SHIPS
Noise control design problems on air cushion vehicles and surface effect ships
p0017 A81-11818
Operational characteristics comparison /ACV and SES/
[AIAA PAPER 81-2064] p0616 A81-48401
SURFACE FINISHING
Surface analysis of bearing steels after solvent treatments. II - Lubricant-coated bearing surfaces
[ASLE PREPRINT 80-LC-8A-6] p0118 A81-18748
Compatibility of aircraft operational fluids with a graphite/epoxy composite: Development of an exterior coating system and remover
[AD-A090049] p0039 N81-11120
Aircraft surface coatings study: Energy efficient transport program --- sprayed and adhesive bonded coatings for drag reduction
[NASA-CR-158954] p0084 N81-12225
Surface finishing
[NASA-CASE-MSC-12631-3] p0132 N81-14077

Evaluation of a pneumatic boot deicing system on a general aviation wing model
[NASA-TM-82363] p0441 N81-25065
Manual on the fatigue of structures. 2: Causes and prevention of damage. 7: Mechanical surface damage --- aircraft structures
[AGARD-MAN-10(ENG)] p0640 N81-33503

SURFACE GEOMETRY
Stochastic surfaces for flight simulator displays

Prediction of helicopter rotor noise from measured blade surface pressure
p0577 A81-46649
Procedure for pressure contact on high-power semiconductor devices free of thermal fatigue
[NASA-TM-75733] p0376 N81-22054
Application of ion implantation for the improvement of localized corrosion resistance of M50 steel bearings
[AD-A097230] p0393 N81-23466

SURFACE REACTIONS
Dynamic, hot surface ignition of aircraft fuels and hydraulic fluids
[NASA-CR-163979] p0254 N81-18139

SURFACE ROUGHNESS
Correlation of artificially induced boundary-layer transition data at hypersonic speeds
p0285 A81-27911
A computer program for the design and analysis of low-speed airfoils, supplement
[NASA-TM-81862] p0125 N81-13921
Modal analysis for aircraft response to runway surface roughness
[AD-A092057] p0194 N81-16043
National runway friction measurement program
[AD-A097334] p0391 N81-23097

SURFACE ROUGHNESS EFFECTS
Effect of surface roughness over the blade in compressor cascade
p0060 A81-14924
The influence of surface roughness on boundary layer flow and separation at transonic speeds
p0413 A81-36468

SURFACE STABILITY
Manual on the fatigue of structures. 2: Causes and prevention of damage. 7: Mechanical surface damage --- aircraft structures
[AGARD-MAN-10(ENG)] p0640 N81-33503

SURFACE TEMPERATURE
NT WALL TEMPERATURE
Runway and deck temperatures in vertical takeoff/landing operations
[AIAA PAPER 81-1623] p0525 A81-43132

SURFACE TO SURFACE MISSILES
NT CRUISE MISSILES
NT TOW MISSILES

SURFACE TREATMENT
U SURFACE FINISHING

SURFACE VEHICLES
NT AIRCRAFT CARRIERS
NT AUTOMOBILES
NT ELECTRIC HYBRID VEHICLES
NT ELECTRIC MOTOR VEHICLES
NT SURFACE EFFECT SHIPS
NT TRACTORS

SURFACE WATER
Determination of wind stress from water level fluctuations
N81-30774

SURGES
An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826
Turbo-compressors surge and surge control
[AIAA PAPER 81-0070] p0159 A81-20579

SURVEILLANCE
Analysis, design and simulation of line scan aerial surveillance systems
p0357 A81-32492

SURVEILLANCE RADAR
NT AIRBORNE SURVEILLANCE RADAR
Performance evaluation of an interrogation-reply scheduling technique for a discrete address beacon system --- of radar surveillance and aircraft communication in ATC
p0121 A81-19417
Side lobe suppression with digital signal processing
p0152 A81-20092
Target detection and parameter estimation in surveillance radars using MTI-FFT processing
p0152 A81-20094
A distributed airborne surveillance system
p0180 A81-22618
Mini-RPV radar test program
p0180 A81-22619
Multipath and interference effects in secondary surveillance radar systems
p0183 A81-23359
Discrete Address Beacon System
p0350 A81-31134
Adaptive features and measurement requirements for advanced surveillance radars
p0617 A81-48584
New terminal radar approach control in tower cab concept for Love Field, Dallas, Texas
[AD-A089996] p0034 N81-11025
Test and evaluation of the Airport Surveillance Radar (ASR)-8 wind shear detection system (phase 2), revision
[AD-A090111] p0042 N81-11290
Definition of the problems associated with air traffic control of closely spaced helicopter traffic performing decelerated instrument approaches
[AD-A094073] p0251 N81-18042

SURVEYING
U SURVEYS

SURVEYS
Survey population response to airplane noise, part 1
[NASA-TM-75790] p0031 N81-10576
General Aviation Activity and Avionics Survey
[AD-A097604] p0389 N81-23081
Nature of the annoyance and noise annoyance relation around airports
[NASA-TM-75873] p0542 N81-28606
Evaluation of the disturbance caused by aircraft noise by opinion surveys
[NASA-TM-76579] p0542 N81-28610
A compendium of aircraft cockpit vision surveys, 1950 through 1980, volume 1
[AD-A101473] p0580 N81-30104

SURVIVAL
A study of factors affecting aircrew survivability following emergency escape over water
p0409 A81-34697
Optimal nuclear radiation criteria for aeronautical systems
[AD-A101651] p0548 N81-29125

SURVIVAL EQUIPMENT
Survival and Flight Equipment Association, Annual Symposium, 17th, Las Vegas, Nev., December 2-6, 1979, Proceedings
p0174 A81-22076
Seat pack for fighter aircraft operating on the NATO Northern Flank
p0205 N81-17010
The evolution of the helicopter seat pan mounted Personal Survival Pack (PSP)
p0205 N81-17016
Aeronautical systems technology needs: Escape, rescue and survival and test facilities and test equipment

[AD-A097827] p0423 N81-24020
SUSPENDING (HANGING)
NT MAGNETIC SUSPENSION
SUSPENSION SYSTEMS (VEHICLES)
Heave instabilities of amphibious air cushion suspension systems
[UTIAS-246] p0144 N81-15156
SWEAT COOLING
Transpiration air cooled turbine blade - A technology for future generation aircraft and industrial gas turbine engines using coal or coal derived fuels
p0297 A81-29115
Comparative efficiency of penetrating steam and air cooling of gas turbine blades
p0509 A81-41003
SWEEP ANGLE
NT LEADING EDGE SWEEP
An investigation of drag associated with the upswept rear fuselage of a helicopter
[BU-257] p0330 N81-20043
SWEEPBACK
NT LEADING EDGE SWEEP
SWEPT FORWARD WINGS
NT TRAPEZOIDAL WINGS
How to improve the performance of transport aircraft by variation of wing aspect-ratio and twist /12th Daniel and Florence Guggenheim International Memorial Lecture/
p0006 A81-11602
Forward swept wings and business airplanes
[SAE PAPER 800605] p0061 A81-15328
Active control of forward swept wings with divergence and flutter aeroelastic instabilities
[AIAA 81-0637] p0306 A81-29491
Feasibility of forward-swept wing technology for V/STOL aircraft
[SAE PAPER 801176] p0400 A81-34189
Coming challenge - Integrating the technologies for forward-swept-wing fighters
p0420 A81-37522
Goals of flight management system integration for a forward-swept-wing demonstrator aircraft
p0421 A81-37524
Spanwise lift distribution of forward-and aft-swept wings in comparison to the optimum distribution form
p0453 A81-38017
Development and hardware verification of an aeroelastically tailored forward swept composite wing
p0557 A81-44355
Stability characteristics of a forward swept wing aircraft at high angles of attack
[AIAA PAPER 81-1884] p0561 A81-44576
Dynamic response of a forward-swept-wing model at angles of attack up to 15 deg at a Mach number of 0.8 --- Langley transonic dynamics tunnel tests
[NASA-TM-81863] p0085 N81-12448
Design of advanced technology transonic airfoils and wings
p0187 N81-16000
A wind tunnel investigation of the aerodynamic characteristics of forward swept wings --- supersonic cruise aircraft research
p0189 N81-16011
Aeropropulsive characteristics of twin nonaxisymmetric vectoring nozzles installed with forward-swept and aft-swept wings --- in the Langley 16 Foot Transonic Tunnel
[NASA-TP-1778] p0261 N81-19019
SWEPT WINGS
NT ARROW WINGS
NT DELTA WINGS
NT SWEPT FORWARD WINGS
NT SWEPTBACK WINGS
NT TRAPEZOIDAL WINGS
Laminar boundary layer on swept-back wings of infinite span at an angle of attack
p0107 A81-17656
Three-dimensional boundary layer transition via the mechanisms of 'attachment line contamination' and 'cross flow instability'
p0115 A81-18122
Some characteristics of subsonic flow over the root area of a sweptback wing
p0123 A81-19633
The linear instability due to the compressible crossflow on a swept wing
p0170 A81-21168
Transonic swept wings studied by the lifting-line theory
p0509 A81-41090
Wind tunnel experiments on the divergence of swept wings with composite structures
[AIAA PAPER 81-1670] p0526 A81-43152
Instrumentation for measurement of flow properties on a swept wing in flight
[DGLR PAPER 81-034] p0609 A81-47585
The effects of warhead-induced damage on the aeroelastic characteristics of lifting surfaces. Volume 1: Aeroelastic effects
[AD-A091674] p0129 N81-13955
Development of finite-volume methods for three-dimensional transonic flows
[AD-A090829] p0141 N81-14986
Interference aspects of the A310 high speed wing configuration
p0188 N81-16001
A constrained inverse method for the aerodynamic design of thick wings with given pressure distribution in subsonic flow
p0188 N81-16006
An investigation of a swept wing-body configuration with drooped leading edge at low and transonic speeds
p0189 N81-16012
Some aerodynamic interference effects that influence the transonic performance of combat aircraft
p0189 N81-16014
Overview of the Langley subsonic research effort on SCR configuration
p0243 N81-17982
Exploratory subsonic investigation of vortex-flap concept on arrow wing configuration
p0243 N81-17985
Wind tunnel test results of a new leading edge flap design for highly swept wings, a vortex flap
p0243 N81-17986
The high lift characteristics in the case of the v-wing concept
[NASA-TM-75872] p0253 N81-18061
Structures of flow separations over swept wings
p0255 N81-18246
Leading edge vortex flaps for drag reduction --- during subsonic flight
[NASA-CASE-LAR-12750-1] p0261 N81-19016
Investigation of aerodynamic stall alleviation on a swept planform wing using leading edge modifications
[AD-A101239] p0548 N81-29122
MADY-1, a FORTRAN program for the compressible stability analysis of three-dimensional boundary layers
p0586 N81-30388
SWEPTBACK WINGS
NT ARROW WINGS
NT DELTA WINGS
NT TRAPEZOIDAL WINGS
Compressible boundary-layer stability calculations for sweptback wings with suction
[AIAA PAPER 81-0196] p0169 A81-20840
Spanwise lift distribution of forward-and aft-swept wings in comparison to the optimum distribution form
p0453 A81-38017
Transonic dip mechanism of flutter of a sweptback wing. II
p0559 A81-44447
Some particular configuration effects on a thin supercritical variable camber wing
p0188 N81-16005
Aerodynamic interaction between a close-coupled canard and a sweptback wing in transonic flow
p0189 N81-16013
Examination of the vortex regime for highly swept wings by extrapolation of the Jones method
[AAAF-NT-80-25] p0204 N81-16992
Aeropropulsive characteristics of twin nonaxisymmetric vectoring nozzles installed with forward-swept and aft-swept wings --- in the Langley 16 Foot Transonic Tunnel
[NASA-TP-1778] p0261 N81-19019
Study of the vortex conditions of wings with large sweepback by extrapolation of the Jones method
[NASA-TM-75863] p0262 N81-19026

Investigation of aerodynamic characteristics of wings having vortex flow using different numerical codes
[NASA-CR-165706] p0384 N81-23034
Development of a nonlinear vortex method --- steady and unsteady aerodynamic loads of highly sweptback wings
[NASA-CR-164351] p0423 N81-24024
SWIRLING
The combustion modelling of swirling flows for gas turbine combustors
p0295 A81-29087
SWIRLING WAKES
U TURBULENT WAKES
SWITCHES
NT SWITCHING CIRCUITS
SWITCHING
Predictive steering control of dirigibles using the switching curve approach
[AIAA 81-1327] p0456 A81-38535
SWITCHING CIRCUITS
The S3 transition --- flight control logic circuit analysis
p0240 A81-26617
SWITCHING ELEMENTS
U SWITCHING CIRCUITS
SWIVELS
A formulation of the shimmy problem for swiveling wheels
p0607 A81-47268
SYMBOLIC PROGRAMMING
ISSYS: An integrated synergistic Synthesis System
[NASA-CR-159221] p0543 N81-28783
SYMBOLS
Flight test evaluation of advanced symbology for general aviation approach to landing displays
[AIAA PAPER 81-1643] p0526 A81-43142
A pilot training manual for the terminal configured vehicle electronic horizontal situation indicator
[NASA-TM-81959] p0330 N81-20044
SYMMETRICAL BODIES
NT AXISYMMETRIC BODIES
NT BODIES OF REVOLUTION
NT CONICAL BODIES
NT CYLINDRICAL BODIES
NT FAIRINGS
NT PARABOLIC BODIES
NT ROTATING CYLINDERS
NT SLENDER CONES
NT STREAMLINED BODIES
Pressure distribution computation on a nonlifting symmetrical helicopter blade in forward flight
p0447 N81-26010
SYMMETRY
Anti-symmetric elastic properties of composite plates of satin weave cloth
[NAL-TR-649T] p0639 N81-33238
SYNCHRONIZERS
A quick-look system for the processing of flight data recordings
p0329 N81-20021
SYNCHRONOUS SATELLITES
Aeronautical-Maritime Engineering Satellite /AMES/ program of Japan
[IAF PAPER 80-D-171] p0115 A81-18318
Satellite constellations for three-dimensional coverage of the Atlantic Ocean --- for geosynchronous navigation systems
p0323 A81-30291
Project Prosat --- communication satellite network for land, sea and air traffic control
p0565 A81-45760
SYNOPTIC METEOROLOGY
Terminal Forecast Reference Notebook (TFRN) for George AFB, California
[AD-A098438] p0446 N81-25637
Terminal Forecast Reference Notebook (TFRN) for Luke AFB, Arizona
[AD-A098445] p0446 N81-25638
SYNTHETIC APERTURE RADAR
Automatic clustering of synthetic aperture radar /SAR/ targets
p0323 A81-30303
Experimental study of multiple paths by a bistatic method of synthetic aperture
p0412 A81-35891
Integrated strike avionics study, volume 1
[AD-A094705] p0273 N81-19113
Multiple arrested synthetic aperture radar
[AD-A101143] p0551 N81-29317
SYNTHETIC FIBERS
NT DACRON (TRADEMARK)

SYSTEMS INTEGRATION

Promoting rational standardization --- for military avionics systems architecture p0050 A81-13172

Application of advanced technology for improving the integration of engine and airframe for future transport aircraft p0058 A81-14389

Integrated flight displays p0064 A81-15681

An overview - 1980 generation avionic developments p0111 A81-18061

Airline navigation planning p0174 A81-21966

Integrated avionics studies target future technologies p0223 A81-23499

A look at comprehensive engine/airframe integration for high performance aircraft p0298 A81-29118

Contention information transfer systems analysis p0322 A81-30274

Synergistic benefits of fully integrating JTIDS and GPS --- Joint Tactical Information Distribution System and Global Positioning System p0323 A81-30311

Integrated Flight/Weapon Control system concepts p0324 A81-30328

Integration of the F-16 Weapon System Trainer p0325 A81-30332

Tailoring software logic to the needs of the pilot - A software designer's nightmare p0325 A81-30335

DAIS controls and displays - A systems approach to avionics subsystem integration p0325 A81-30336

KC-135 modernization program --- cockpit avionics subsystems integration for pilot workload reduction p0325 A81-30337

Integrated flight and fire control development and demonstration of an F-15B aircraft p0327 A81-30359

Rapport tactical self protection systems design p0349 A81-31113

A new generation IFF - The AN/APX-100/V/ transponder p0350 A81-31132

Airborne electronic displays p0364 A81-32999

Future challenges in V/STOL flight propulsion control integration [SAE PAPER 801140] p0397 A81-34179

Flight control systems go digital - More than a binary mechanization of analog predecessors [SAE PAPER 801166] p0399 A81-34181

Integrated CAD/CAM for the 1980s [SAE PAPER 801170] p0400 A81-34185

Development requirements for integrated aircraft power systems [SAE PAPER 801149] p0406 A81-34241

Development of a flight simulation capability in the dynamic environment simulator [AIAA 81-0978] p0415 A81-36566

Coming challenge - Integrating the technologies for forward-swept-wing fighters p0420 A81-37522

Goals of flight management system integration for a forward-swept-wing demonstrator aircraft p0421 A81-37524

Big 'R', little 'c', integrated data annotation and sensor control for long range oblique photography /LOROP/ --- increased reliability and reduced complexity p0462 A81-39435

Integrated sensor control system for RF-5E demonstrator p0462 A81-39438

The digital core avionics system p0472 A81-40132

Achieving the full benefits of integrated multiplex in the 1980's --- for military helicopter avionics [AHS 80-15] p0474 A81-40146

An approach to conformal inlet diffuser design for integrated propulsion systems [AIAA PAPER 81-1395] p0514 A81-42185

AFCS integration requirements --- Automatic Flight Control System [SAE PAPER 810580] p0519 A81-42743

The technical and managerial challenge of integrated flight/fire control [AIAA PAPER 81-1706] p0527 A81-43162

Aerodynamic integration of externally mounted engines on a long-range bomber [AIAA PAPER 81-1693] p0563 A81-44899

Avionics thermal integration for the Boeing 767 airplane p0570 A81-46478

Aircraft/avionics environmental integration program p0570 A81-46480

Future challenges in helicopter flight/propulsion control integration p0575 A81-46633

Supersonic Cruise Research 1979, part 2 --- airframe structures and materials, systems integration, economic analysis [NASA-CP-2108-PT-2] p0246 N81-18005

Demonstration Advanced Avionics System (DAAS) functional description --- Cessna 402B aircraft [NASA-CR-152405] p0389 N81-23080

New Navy programs for development of integrated inertial sensors p0485 N81-26108

Tactical navigation system testing p0544 N81-29066

Systems integration of automatic flight control, navigational calculations, and visual control (caravelle alis) p0544 N81-29068

SYSTEMS MANAGEMENT

Airport/environs plan making - Managing the planning process p0114 A81-18088

An analysis of Air Force management of Turbine Engine Monitoring Systems (TEMS) [AD-A089365] p0028 N81-10070

Annual report to the NASA Administrator by the Aerospace Safety Advisory Panel on the space shuttle program. Part 2: Summary of information developed in the panel's fact-finding activities

[NASA-TM-82252] p0198 N81-16114
Federal Radionavigation Plan. Volume 1: Radionavigation plans and policy
[AD-A093774] p0206 N81-17030
Federal Radionavigation Plan. Volume 4: Radionavigation research, engineering and development
[AD-A093777] p0207 N81-17033

SYSTEMS SIMULATION
Air traffic control using a microwave landing system
p0053 A81-13421
Increasing capacity with computer-assisted decision making --- airport planning
p0113 A81-18080
Modeling of the terminal area Air Traffic Management and Control
p0114 A81-18085
Airspace simulation in airport system planning
p0114 A81-18086
Air traffic simulation as a validation tool
p0172 A81-21718
A case study - Real time simulation and structured design
p0172 A81-21721
GPS receiver simulation
p0173 A81-21913
Low level, adverse attitude escape using a vertical seeking ejection seat
p0176 A81-22094
Civil aviation applications of Navstar/GPS through differential techniques
p0177 A81-22374
An objective method of assessing the realism of a simulation of a simple control system
p0284 A81-27898
Sensitivity reduction in aircraft control systems by double Perfect Model Following
p0299 A81-29205
Digital computer simulation of aircraft hydraulic systems
[SAE PAPER 801193] p0402 A81-34203
The Northrop F/A-18L Mission Simulator
[AIAA 81-0968] p0414 A81-36557
Versatile and economical real-time simulation for digital flight control systems
[AIAA 81-0974] p0415 A81-36563
Development of a generic airplane response simulation
[AIAA 81-0980] p0415 A81-36568
Dynamic simulation of hybrid video compression --- of airborne reconnaissance systems
p0463 A81-39555
Simulation model to evaluate maintenance strategies for large network of fielded systems
p0613 A81-48009
Function generation techniques --- in real time hybrid simulations
p0614 A81-48329
COMLINK - A communications/EW analytical and modeling tool
p0617 A81-48547
Engine noise source breakdown - Theory, simulation and results
[AIAA PAPER 81-2040] p0619 A81-48620
A digital-analog hybrid system and its application to the automatic flight control system simulation research
[NASA-TM-76457] p0377 N81-22060
MLS: Airplane system modeling
[NASA-CR-165700] p0386 N81-23059
A nonlinear propulsion system simulation tehnique for piloted simulators
[NASA-TM-82600] p0390 N81-23085
Tactical navigation system testing
p0544 N81-29066
Flight testing and instrumentation of aircraft navigation systems
p0544 N81-29067

SYSTEMS STABILITY
The distributed parameter system theory of the autopilot design of the slender vehicle
p0224 A81-23835

T

T-37 AIRCRAFT
Engine requirements for the T-37 trainer aircraft - A simulation study and analysis
p0616 A81-48379

T-38 AIRCRAFT
Initial development for a flutter analysis of damaged T-38 horizontal stabilators using NASTRAN
[AIAA PAPER 81-0365] p0166 A81-20784
Skin-stabilized horizontal stabilizer for the T-38 aircraft
p0559 A81-44398
Investigation of an improved flutter speed prediction technique for damaged T-38 horizontal stabilators using NASTRAN
[AD-A094769] p0273 N81-19109
Alternate T-38 transparency development. Part 1: Initial analysis and design
[AD-A103261] p0638 N81-33196
Alternate T-38 transparency development. Part 2: Baseline birdstrike testing
[AD-A103262] p0638 N81-33197

T-56 ENGINE
Fuel efficiency improvements to the T56 turboprop engine
[SAE PAPER 801158] p0399 A81-34178

TABLES (DATA)
Annual review of aircraft accident data, U.S. General aviation calendar year 1978
[PB80-203916] p0024 N81-10028
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 0.4 to 1.4
[NASA-TM-81234] p0140 N81-14981
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119

TABS (CONTROL SURFACES)
An experimental investigation of the effects of trailing-edge strips on the unsteady aerodynamic forces on tabs
[AD-A094989] p0263 N81-19028

TACAN
Integrated Flight and Weapon Control for improved tactical combat effectiveness
p0324 A81-30329
U.S. Navy/USAF development of Tactical Aircrew Combat Training System/Air Combat Maneuvering Instrumentation /TACTS/ACMI/
[SAE PAPER 801183] p0401 A81-34196
Energy maneuverability displays for air combat training
[SAE PAPER 801185] p0401 A81-34198
Analytic determination of interference thresholds for microwave landing system equipment and TACAN/DME equipment
[AD-A093448] p0266 N81-17025
Evaluation of the performance of the Remote Area Precision Positioning System (RAPPS)
[AD-A094169] p0250 N81-18036
The susceptibility of representative TACAN and DME equipments to a proposed, MLS L-band precision DME signal format
[AD-A096265] p0339 N81-21046

TACT PROGRAM
Boundary layer stability analysis of a natural laminar flow glove on the F-111 TACT airplane
p0238 A81-26503

TACTICAL AIR NAVIGATION
U TACAN

TACTICS
The Tactical Air Forces - Outlook for the next decade
[AIAA PAPER 81-0932] p0408 A81-34364

TAIL ASSEMBLIES
Control design for reduction of aerodynamic tail forces using quadratic synthesis
p0240 A81-26610
Experimental study of the snap-through oscillations of an empennage
p0299 A81-29313
Skin-stabilized horizontal stabilizer for the T-38 aircraft
p0559 A81-44398
Aircraft accident report: Allegheny Airlines, Inc., Nord 262, Mohawk/Frakes 298, N29824, Benedum Airport, Clarksburg, West Virginia, February 12, 1979
[NTSB-AAR-79-12] p0073 N81-12084
Application of linear quadratic control in reduction of aerodynamic forces on aircraft
p0332 N81-20061

Transonic wind tunnel measurements of tailplane and elevator effectiveness of the Jindivik 203B target aircraft
[AD-A098180] p0424 N81-24031

TAIL MOUNTINGS
U TAIL ASSEMBLIES

TAIL PLANES

TAKEOFF
NT VERTICAL TAKEOFF
Some aspects of advanced flight management systems and their application to modern transport aircraft
p0154 A81-20353
Simulated aircraft takeoff performance with frosted wings
[AIAA PAPER 81-0404] p0167 A81-20811
Airport activity statistics of certificated route air carriers, calendar year 1979
[AD-A089748] p0034 N81-11023
Pilatus porter: Provision of revised take-off and landing performance data
[AD-A089964] p0076 N81-12068
Visual confirmation (VICON) of voice take-off clearance cf cost-and-deployment analyses and strategies
[AD-A091007] p0091 N81-13038
Wind shear systems integration plan, VICON (visual confirmation) reliability analysis
[PB80-218233] p0128 N81-13949
Development of SCR Aircraft takeoff and landing procedures for community noise abatement and their impact on flight safety
p0245 N81-17994
Visual confirmation of voice takeoff clearance (VICON) operational evaluation, volume 1
[AD-A097756] p0425 N81-24041
Visual confirmation of voice takeoff clearance (VICON) operational evaluation. Volume 2: Operations and maintenance manual
[AD-A098093] p0425 N81-24042
A method for measuring take-off and landing performance of aircraft, using an inertial sensing system
p0545 N81-29088
Takeoff and missed approach under the influence of wind shear --- flight safety considerations
[TUBS/SFB-58-80-05-01] p0628 N81-32131

TAKEOFF RUNS
Reduction of the take-off ground run distance to a given set of atmospheric condition
p0010 A81-11634
Airline flight departure procedures - Choosing between noise abatement, minimum fuel consumption and minimum cost
p0101 A81-17044
Critical field length calculations for preliminary design
p0183 A81-23366
Airline flight departure procedures - Choosing between noise abatement, minimum fuel consumption and minimum cost
p0420 A81-37416
Optimization of takeoff flight paths with respect to FAR Part 36 noise using dynamic programming
p0569 A81-46371

A simulator study for the development and evaluation of operating procedures on a supersonic cruise research transport to minimize airport-community noise
[NASA-TP-1742] p0073 N81-12043

TAKEOFF SYSTEMS

Ejection experience in F/FB-111 aircraft - 1967-1978
p0176 A81-22098
Modern radar: Theory, operation and maintenance /2nd edition/ --- Book
p0223 A81-23372
Concepts and state of the art of the precision DME of the microwave landing system
p0233 A81-25376
Gas turbine engine emission abatement - Status and needed advancements
p0237 A81-26015
The impact of active controls on general aviation airplanes of the late 1980s
p0285 A81-28295
Optimization of finishing conditions --- metal cutting
p0319 A81-30163
V/STOL advanced technology rewards and risk --- aircraft design
[SAWE PAPER 1385] p0354 A81-31401
Airships - Transport of the future
p0355 A81-31699
Structural optimization - Past, present and future
[AIAA PAPER 81-0897] p0362 A81-32922
Army aviation - A perspective into the eighties
[AIAA PAPER 81-0931] p0363 A81-32935
Technology growth in mini-RPV systems
[AIAA PAPER 81-0936] p0363 A81-32937
Is it safe - The safety assessment of aircraft systems. IV - Methods, techniques, and organisation
p0366 A81-33789
Prop-Fan technical progress leading to technology readiness
[AIAA PAPER 81-0810] p0367 A81-33878
Methods for the verification and validation of digital flight control systems
[SAE PAPER 801134] p0397 A81-34165
Adhesive bonding of aircraft primary structures
[SAE PAPER 801209] p0404 A81-34217
The status of the expendable gasifier program --- gas generator for aircraft engine
[SAE PAPER 801151] p0406 A81-34242
Flight control and display computation - A 25-year perspective
[AIAA PAPER 81-0865] p0408 A81-34354
Manufacturing technology for aircraft structural components made of carbon-fiber reinforced plastics
p0449 A81-37637
Wing of new technology test specimen - Structural design and method of wing construction
p0450 A81-37639
Aerodynamic efficiency of the wing of new technology, a comparison of design expectation and flight test result
p0450 A81-37645
The state-of-the-art in avionics
p0451 A81-37649
New technologies for compressors of aviation engines
p0452 A81-37656
The new utility - Commuter-technology in the sky
p0457 A81-38801
Experimental-programme - Transonic wing-TST
p0457 A81-38804
New structural technologies for future fighters
p0458 A81-38805
Analysis and application of compliant rotor technology
p0467 A81-40086
An integrated performance and air data system for helicopters
p0470 A81-40110
Development of small fuel efficient aircraft engines
[AHS 80-38] p0477 A81-40167
Advanced composite structure repair
p0481 A81-40595
Some propeller developments in the United Kingdom
[AIAA PAPER 81-1566] p0507 A81-40949
Status report - Global Positioning System
p0511 A81-41752
Standard INS program status
p0511 A81-41753
Advanced technology engine studies /ATES/ - A status report
[AIAA PAPER 81-1502] p0516 A81-42205
The state of the art of general aviation autopilots - Now and in the future
[SAE PAPER 810582] p0520 A81-42744
An overview of general aviation propulsion research programs at NASA-Lewis Research Center
[SAE PAPER 810624] p0523 A81-42773
An assessment of advanced technologies for application to general aviation
[SAE PAPER 810630] p0524 A81-42782
On making things the best - Aeronautical uses of optimization /Wright Bros. lecture/
[AIAA PAPER 81-1738] p0528 A81-43175
Manufacture of cost-affordable high performance titanium components for advanced Air Force systems
p0530 A81-43624
Progress in supersonic cruise technology
[AIAA PAPER 81-1687] p0535 A81-43950
Military aircraft technology - Needs and trends for the 80's
[AIAA PAPER 81-1691] p0535 A81-43952
New technologies in future commercial aircraft
p0565 A81-45759
Soviet military air cushion vehicles - Mechanized amphibious assault
p0577 A81-46718
More fight for the Fighting Falcon
p0622 A81-49075
Comparisons of four alternative powerplant types for future general aviation aircraft
[NASA-TM-81584] p0028 N81-10067
The role of advanced technology of turbine engine life cycle cost
p0047 N81-11927
The development of the composite material engine nacelle
[AAAF-NT-79-38] p0083 N81-12180
NASA Research in aeropropulsion
p0089 N81-12980
A feasibility study for advanced technology integration for general aviation
[AD-A092437] p0185 N81-15975
A survey of computer simulations of digital avionics systems
[AD-A091943] p0195 N81-16049
The state of the art of general aviation autopilots
[NASA-CR-159371] p0197 N81-16066
Assessment of the impact of advanced air-transport technology
p0247 N81-18015

A family of supersonic airplanes: Technical and
economic feasibility
p0248 N81-18017
Rotor-bearing dynamics technology design guide.
Part 6: Status of gas bearing technology
applicable to aero propulsion machinery
[AD-A094167] p0257 N81-18394
Recent developments in aircraft engine noise
reduction technology
p0269 N81-19072
Historical overview of V/STOL aircraft technology
[NASA-TM-81280] p0272 N81-19100
Development of gas turbine components, using
silicon nitride --- forming techniques
[BMFT-FB-T-79-152] p0275 N81-19129
Visual system Technology: Status and problems ---
training simulators
p0336 N81-20099
Aircraft transparency optical quality: New
methods of measurement
[AD-A096183] p0341 N81-21070
Rotorcraft aviation icing research requirements:

p0170 A81-21197
Analysis of a symmetric transonic aerofoil with
the finite element method - A new upwinding
technique
p0183 A81-22984
On the unsteady wake-induced lift on a slotted
airfoil. II - The influence of displacement
thickness fluctuations
p0229 A81-24237
Influence of hinge line gap on aerodynamic forces
acting on a harmonically oscillating thin
profile in an incompressible flow. I, II
p0348 A81-30956
Steady flow and static stability of airfoils in
extreme ground effect
p0355 A81-31606
Oscillating airfoils in shock-free transonic flows
p0410 A81-35026
Isothermal forging of fan blades
[AIAA PAPER 81-1405] p0503 A81-40862
Evaluation of two-dimensional subsonic oscillatory
airforce coefficients and loading distributions
p0617 A81-4[illegible]

THIN FILMS
The application of liquid crystals in experimental
aerodynamics
p0238 A81-26123
Sputtering and ion plating for aerospace
applications
[NASA-TM-81726] p0337 N81-2642[illegible]

THIN PLATES
Influence of boundary-layer suction on the
emission spectrum on a thin plate performing
oscillations under the action of pressure
pulsations --- in aircraft noise reduction
p0054 A81-13573
Influence of boundary-layer suction on the
spectrum of radiation from a thin plate
vibrating under the action of pressure
fluctuations --- in aircraft noise reduction
p0238 A81-261[illegible]
Stability and ultimate strength of carbon fiber
reinforced plastic panels
p0481 A81-40521

THIN WALLED SHELLS
Finite element calculation of thin-wall reinforced
shells of the fuselage type with account for
physical nonlinearity and loss of stability of
certain elements

p0235 A81-25679
Application of hybrid schemes in analysis of
thin-wall structures by the displacement method
p0235 A81-25681
Application of the Semi-Loof thin shell element to
the analysis of aircraft engine structures
p0518 A81-42704
Calculation of natural vibrations for thin-walled
irregular reinforced shells of the helicopter
fuselage type using the finite-element work method
p0614 A81-48097

THIN WALLS
Geometrically nonlinear theory for calculating
thin rods of a wing profile
p0625 A81-49935
Strength calculation of thin-wall rods of
significant taper
p0625 A81-49937

THIN WINGS
NT INFINITE SPAN WINGS
Flow past a slender profile in a channel with
permeable walls
p0004 A81-10916
A finite-span wing in transonic flow
p0054 A81-13741
Calculation of the nonlinear aerodynamic
characteristics of finite-span wing
p0063 A81-15388
Determination of the effect of transverse cutouts
on the hydrodynamic characteristics of a
finite-span wing in the case of steady and
unsteady motion near a wall
p0119 A81-19335
On a linear theory of a supersonic flow past a
delta wing with subsonic leading edges
p0149 A81-19872
Unsteady subsonic motion of a wing near a screen
p0225 A81-23889
The effect of the aspect ratio of delta wings on
the structure of the near vortex wake
p0413 A81-36467
Calculation of the nonlinear aerodynamic
characteristics of a wing of finite span
p0417 A81-36738
Accuracy and application of a second-order theory
for three-dimensional supersonic and low
hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
Wing with finite span in a transonic flow
p0420 A81-37480
Calculation of the aerodynamic characteristics of
a deformable wing, moving near a screen
p0625 A81-49948
Some particular configuration effects on a thin
supercritical variable camber wing
p0188 N81-16005
Aerodynamic effects of nearly uniform slipstreams
on thin wings in the transonic regime
[NASA-CR-152351]
p0249 N81-18027
Experimental investigation of the flow on the
suction side of a thin Delta wing
[NASA-TM-75897]

THREE DIMENSIONAL BOUNDARY LAYER
Local properties of three-dimensional separation
lines --- in vortex layers
[DGLR PAPER 79-063]
p0016 A81-11780
Three-dimensional boundary layer transition via
the mechanisms of 'attachment line
contamination' and 'cross flow instability'
p0115 A81-18122
Three-dimensional wing boundary layer calculated
with eight different methods
p0171 A81-21555
Surface-oriented coordinates for boundary-layer
calculations in the case of general configurations
[DGLR PAPER 81-014]
p0608 A81-47557
Review of theoretical and experimental results on
three dimensional turbulent wakes and boundary
layers
[ONERA-NT-1980-4]
p0126 N81-13930
Core compressor exit stage study. Volume 2: Data
and performance report for the baseline
configuration
[NASA-CR-159498]
p0195 N81-16051
HADY-1, a FORTRAN program for the compressible
stability analysis of three-dimensional boundary
layers
p0586 N81-30388

THREE DIMENSIONAL FLOW
NT SECONDARY FLOW
Investigation of lateral forces and moments in the
case of asymmetric gas flows in nozzles
p0004 A81-10913
Review of numerical methods for the problem of the
supersonic flow around bodies at angle of attack
p0011 A81-11639
Experimental investigations to fully map the flow
field around a wind tunnel model of a transport
airplane
[SAE PAPER 800630]
p0063 A81-15345
Thin-layer approximation for three-dimensional
supersonic corner flows
p0067 A81-15900
The coordinate-deformation method in the problem
of a supersonic gas flow over an airfoil ---
delta wings
p0123 A81-19631
Body-fitted 3-D full-potential flow analysis of
complex ducts and inlets
[AIAA PAPER 81-0002]
p0156 A81-20527
Three-dimensional turbulent boundary layer
development and separation in V/STOL engine
inlets at incidence with small-cross flow and
curvature influences
[AIAA PAPER 81-0254]
p0163 A81-20703
3-D viscous analysis of ducts and flow splitters

p0163 A81-20720
Three-dimensional model of spray combustion in gas
turbine combustors
[AIAA PAPER 81-0324]
p0165 A81-20751
Flight experiments with a slender cone at angle of
attack
[AIAA PAPER 81-0337]
p0165 A81-20761
Calculation of supersonic gas flows about wings
p0170 A81-21201
Slightly blunted cone in a supersonic flow at
angle of attack
p0225 A81-23908
Transient three-dimensional flow along a porous
plate
p0231 A81-24815
Linearized analysis of the three-dimensional
compressible flow through a rotating annular
blade row
p0234 A81-25446
On the solution of Navier Stokes equations of the
flow in turbomachines
p0296 A81-29099
Numerical computation of compressible steady
cascade flows
p0296 A81-29100
Analysis of turbulent boundary layer on cascade
and rotor blades of turbomachinery
p0296 A81-29106
Three dimensional flow in annular diffusers with
two vortex distributions at entry
p0297 A81-29112
A diagonal form of an implicit
approximate-factorization algorithm
p0300 A81-29363
On the theory of a wing with small aspect ratio in
a hypersonic flow
p0309 A81-29860
Three-dimensional oscillatory piecewise
continuous-kernel function method. I - Basic
problems. II - Geometrically continuous wings.
III - Wings with geometrical discontinuities
p0411 A81-35631
Accuracy and application of a second-order theory
for three-dimensional supersonic and low
hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
Some recent applications of high-lift
computational methods at Boeing
[AIAA PAPER 81-1657]
p0534 A81-43940
Analysis of calculated three-dimensional inviscid
flow fields with embedded shock waves
(presentation of a field solution), part 1
[ESA-TT-558]
p0022 N81-10017
Unsteady three-dimensional subsonic flow in a
solid propellant rocket motor including the
effect of motor rotation
p0095 N81-13085

Full potential solution of transonic quasi-3-D
flow through a cascade using artificial
compressability
[NASA-TM-81637] p0140 N81-14980
Development of finite-volume methods for
three-dimensional transonic flows
[AD-A090829] p0141 N81-14986
Vortex methods for two- and three-dimensional flow
simulations p0145 N81-15313

Three dimensional internal flows in
turbomachinery, volume 1

p0395 A81-34121

An application of wake survey rakes to the
experimental determination of thrust for a
propeller driven aircraft
[NASA-CR-163920] p0186 N81-15986
An application of wake survey rakes to the
experimental determination of thrust for a
propeller driven aircraft
[NASA-CR-163967] p0251 N81-18046
Full-scale aerodynamic characteristics of a
propellar installed on a small twin-engine
aircraft wing panel
[NASA-TM-81285] p0385 N81-23039
Effect of a part-span variable inlet guide vane on
the performance of a high-bypass turbofan engine
[NASA-TM-82617] p0443 N81-25081

THRUST AUGMENTATION
Aircraft thrust augmentors of ejector type ---
Russian book
p0289 A81-28760

Technology pays off on the AV-8B
p0291 A81-29060

Noise attenuation and associated thrust increase
of turbojet engines through hyper-mixing ejector
shrouds
p0291 A81-29062

Air augmentation of rockets for low speed
application
p0292 A81-29068

Unsteady aerodynamic propulsion
[AIAA 81-0645] p0307 A81-29498
An experimental investigation of the thrust and
discharge characteristics of multinozzle
low-head ejectors
p0413 A81-35920

An overview of ejector theory
[AIAA PAPER 81-1678] p0534 A81-43947
Some ejector characteristics
[AIAA PAPER 81-1679] p0534 A81-43948
Graphite/polyimide augmentor and nozzle components
--- of advanced military gas turbine engines
[AIAA PAPER 81-1358] p0625 A81-49976
Prediction and evaluation of thrust augmenting
ejector performance at the conceptual design stage
[AD-A093953] p0216 N81-17094
Thrust augmented spin recovery device
[NASA-CASE-LAR-11970-2] p0275 N81-19130
Static tests of the J97 powered, external
augmenter V/STOL wind tunnel model
[NASA-CR-152403] p0337 N81-21010
A study of a VTOL thrusting ejector in low speed
flight, volume 1
[NASA-CR-166137-VOL-1] p0337 N81-21017
A study of a VTOL thrusting ejector in low speed
flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018

THRUST BEARINGS
Dynamic characteristics of a high-speed rotor with
radial and axial foil-bearing supports
[ASME PAPER 80-C2/LUB-35] p0117 A81-18683

THRUST CHAMBER PRESSURE
Pitch attitude stabilization system utilizing
engine pressure ratio feedback signals
[NASA-CASE-LAR-12562-1] p0490 N81-26152

THRUST CHAMBERS
An experimental investigation of the thrust and
discharge characteristics of multinozzle
low-head ejectors
p0413 A81-35920

THRUST CONTROL
NT THRUST VECTOR CONTROL

THRUST DISTRIBUTION
Investigation of a flight test method for the
measurement of propeller thrust
[SAE PAPER 810603] p0521 A81-42760
Supersonic wings with significant leading-edge
thrust at cruise
p0244 N81-17990

THRUST LOADS
Effect of simulated in-flight thrust reversing on
vertical-tail loads of F-18 and F-15 airplane
models --- conducted in the Langley 16-foot
transonic tunnel
[NASA-TP-1890] p0579 N81-30086

THRUST MEASUREMENT
An experimental investigation of the thrust and
discharge characteristics of multinozzle
low-head ejectors
p0413 A81-35920

Determination of thrust and throttle-dependent
drag for fighter aircraft
[AIAA PAPER 81-1692] p0617 A81-48417
Comparison of three thrust calculation methods
using in-flight thrust data
[NASA-TM-81360] p0581 N81-30111

THRUST POWER
U THRUST

THRUST REVERSAL
Comparisons of model and flight testing with
respect to hot gas reingestion and debris
ingestion during thrust reversal
p0297 A81-29113

Reverse thrust performance of the QCSEE variable
pitch turbofan engine
[SAE PAPER 801196] p0402 A81-34206
Effect of in-flight thrust reverser deployment on
tactical aircraft stability and control
[AIAA PAPER 81-1446] p0504 A81-40879
Axisymmetric approach and landing thrust reversers
[AIAA PAPER 81-1650] p0533 A81-43936
Time-constrained maximum-energy turns --- for
modern fighter aircraft
[AIAA PAPER 81-1886] p0561 A81-44570
Effect of simulated in-flight thrust reversing on
vertical-tail loads of F-18 and F-15 airplane
models --- conducted in the Langley 16-foot
transonic tunnel
[NASA-TP-1890] p0579 N81-30086

THRUST VECTOR CONTROL
Multi-mission V/STOL with vectored thrust engines
[AIAA PAPER 81-1363] p0502 A81-40883
Development of exhaust nozzle internal performance
prediction techniques for advanced aircraft
applications
[AIAA PAPER 81-1490] p0506 A81-40908
A compact installation for testing vectored-thrust
engines
[AIAA PAPER 81-1592] p0508 A81-40961
Two-axis, fluidically controlled thrust vector
control system for an ejection seat

[AD-A093868] p0204 N81-16996
Bench testing of a vectored thrust engine
p0432 N81-24093
Phase 2 and 3 wind tunnel tests of the J-97 powered, external augmentor V/STOL model --- conducted in Ames 40- by 80-foot wind tunnel
[NASA-CR-152380] p0483 N81-26076
Flight control system analysis and design for a remotely piloted vehicle with thrust vectoring unit
[AD-A100808] p0540 N81-28105
Investigation of the circulation control wing/upper surface blowing high-lift system on a low aspect ratio semispan model
[AD-A103090] p0627 N81-32128
THRUST-WEIGHT RATIO
The F100 engine
[SAE PAPER 801110] p0395 A81-34151
THRUSTORS
U ROCKET ENGINES
THUNDERSTORMS
Operational radar display of the structure of thunderstorm hail clouds
p0069 A81-16474
Design and preliminary tests of an IR-airborne LLWS remote sensing system --- Low Level Wind Shear
[AIAA PAPER 81-0239] p0163 A81-20694
Sources and detection of atmospheric wind shear
[AIAA PAPER 81-0391] p0167 A81-20801

Flight simulator: Use of spacegraph display in an instructor/operator station [AD-A101951] p0602 N81-31235
TRAINING EVALUATION
Application of signal detection theory to decision making in supervisory control - The effect of the operator's experience p0351 A81-31288
Improved G-Cueing System [AIAA 81-0987] p0416 A81-36572
Training effectiveness of platform motion: Review of motion research involving the advanced simulator for pilot training and the simulator for air-to-air combat [AD-A095930] p0343 N81-21089
TRAINING SIMULATORS
NT COCKPIT SIMULATORS
NT FLIGHT SIMULATORS
Visual cue augmentation in contact flight simulation p0064 A81-15696
Simulation techniques for new generation aircraft maintenance training devices p0324 A81-30331
Operator training systems/simulators p0349 A81-31109
A simulator to test compressor research facility control system software p0349 A81-31110
SIMCAT - A modular air traffic control simulator p0364 A81-33149
Simulated A-10 combat environment [SAE PAPER 801187] p0401 A81-34199
Flight Simulation Technologies Conference, Long Beach, Calif., June 16-18, 1981, Technical Papers p0414 A81-36554
Improved G-Cueing System [AIAA 81-0987] p0416 A81-36572
The evolution of real-time digital simulation of aircraft for training applications p0615 A81-48358
Microprocessor software applications for flight training simulators p0044 N81-11658
The problems with the interface system of the visual simulator as a cause of Pilot Induced Oscillations (PIO's) in flight simulators [MBB-UA-528-80-OE] p0276 N81-19140
Visual system Technology: Status and problems --- training simulators p0336 N81-20099
Learning guide for the terminal configured vehicle advanced guidance and control system mode select panel [NASA-CR-165751] p0580 N81-30098
TRAJECTORIES
NT DESCENT TRAJECTORIES
NT MISSILE TRAJECTORIES
NT PARTICLE TRAJECTORIES
The semi-operational evaluation of the trajectory prediction method for Signal Automatic Radar Processing (SARP) 2 --- air traffic control [NLR-MP-79038-U] p0332 N81-20059
TRAJECTORY ANALYSIS
Store separation trajectory analysis p0050 A81-13216
Dynamic errors of the Kalman filtering of trajectory parameters --- for radar tracking of aircraft maneuvers p0366 A81-33687
Investigation of a strapdown attitude and heading reference system utilizing ring laser gyros p0484 N81-26092
Minimum noise impact aircraft trajectories [NASA-CR-164719] p0594 N81-31159
TRAJECTORY CONTROL
NT TRAJECTORY OPTIMIZATION
Output predictive algorithmic control - Precision tracking with application to terrain following p0567 A81-46280
Flight termination receiver/decoders design, performance and certification [AD-A089746] p0037 N81-11045
TRAJECTORY MEASUREMENT
Laser-optic method for investigating the trajectories and bending-torsional deformations of lifting propeller blade models p0418 A81-36940
TRAJECTORY OPTIMIZATION
Aircraft performance optimization by forced singular perturbation p0014 A81-11667
Single-parameter terrain classification for terrain following p0066 A81-15882
Application of trajectory optimization principles to minimize aircraft operating costs p0155 A81-20466
Application of singular perturbation theory to onboard aircraft trajectory optimization --- for commercial jet transport aircraft [AIAA PAPER 81-0019] p0158 A81-20583
High altitude launch of the Cruise Missile p0179 A81-22600
Optimization of airplane time to reach a given flight altitude and speed p0235 A81-25685
Finite-difference gradients versus error-quadrature gradients in the solution of parameterized optimal control problems p0421 A81-37568
The improvement of aircraft specific range by periodic control [AIAA 81-1748] p0553 A81-44309
Fuel optimal aircraft trajectories with fixed arrival times [AIAA 81-1749] p0550 A81-44081
Effects of displacement and rate saturation on the control of statically unstable aircraft [AIAA 81-1752] p0554 A81-44082
Boost-glide range-optimal guidance [AIAA 81-1781] p0554 A81-44086

Time-constrained maximum-energy turns --- for modern fighter aircraft [AIAA PAPER 81-1686] p0561 A81-44578
Practical solutions to the aircraft minimum fuel, fixed-range, fixed time-of-arrival trajectory optimization problem p0563 A81-45515
Evaluation of a computer-generated perspective tunnel display for flight path following [NASA-TP-1736] p0129 N81-13958
Time-constrained maximum-energy turns [AD-A094733] p0273 N81-19107
Optimum maneuvers of supersonic aircraft, volumes 1 and 2 p0332 N81-20060
Maximum information trajectory for an air to air missile intercept [AD-A101497] p0505 N81-30160

TRANSCENDENTAL FUNCTIONS
NT EXPONENTIAL FUNCTIONS

TRANSDUCERS
NT ELECTROACOUSTIC TRANSDUCERS
NT ELECTRONIC TRANSDUCERS
NT MICROPHONES
NT PIEZOELECTRIC TRANSDUCERS
NT PRESSURE SENSORS
Transducer installation for the Sea King MK 50 mathematical model validation flight tests [AD-A089924] p0043 N81-11365

TRANSFER FUNCTIONS
Longitudinal equivalent systems analysis of Navy tactical aircraft [AIAA 81-1775] p0554 A81-44094
Low-order approaches to high-order systems - Problems and promises --- for analysis of aircraft pitch dynamics [AIAA 81-1774] p0556 A81-44134
Multivariable identification using centralized fixed modes p0079 N81-12091
Multivariable synthesis with transfer functions --- applications to gas turbine engines p0080 N81-12102
An investigation of the dynamic stalling characteristics of rotating axial-flow compressor blades p0093 N81-13054

TRANSFER OF TRAINING
Transfer and cost effectiveness of ground-based flight trainers p0064 A81-15693

TRANSFORMATION TENSORS
U TENSORS

TRANSFORMATIONS (MATHEMATICS)
NT COORDINATE TRANSFORMATIONS

TRANSFORMERS
Dynamic simulation of airborne high power systems [AD-A101316] p0552 N81-29362

TRANSIENT HEATING
Further studies of the influence of thermal effects on the predicted acceleration of gas turbines [ASME PAPER 81-GT-21] p0311 A81-29938
Stress analysis of first turbine vane using a 3-dimensional model with non linear material behavior subjected to transient temperatures [AIAA PAPER 81-1437] p0504 A81-40873

TRANSIENT LOADS
NT BLAST LOADS
NT GUST LOADS
NT IMPACT LOADS
NT LANDING LOADS
NT SHOCK LOADS

TRANSIENT OSCILLATIONS
Analysis of aircraft longitudinal handling qualities [AIAA 81-1771] p0554 A81-44092
Transient vibrations of elastic panels due to the impact of shock waves p0616 A81-48385

TRANSIENT RESPONSE
New techniques for the measurement of natural and simulated lightning phenomena p0057 A81-14268
Evaluation of lightning-induced transients in aircraft using high-voltage shock excitation techniques p0057 A81-14269
Prediction and experimental verification of transient airfoil motion in a small wind tunnel [AIAA PAPER 81-0052] p0159 A81-20568
Dielectric electrostatic charge reduction [SAE PAPER 810571] p0519 A81-42736
A method for the prediction of wing response to nonstationary buffet loads [AD-A093037] p0208 N81-17043
Extended frequency turbofan model [NASA-CR-165261] p0335 N81-20078
Gas turbine engine transient testing p0431 N81-24091
Blade loss transient dynamics analysis, volume 1. Task 1: Survey and perspective --- aircraft gas turbine engines [NASA-CR-165373-VOL-1] p0496 N81-27089
Blade loss transient dynamics analysis, volume 2. Task 2: Theoretical and analytical development. Task 3: Experimental verification [NASA-CR-165373-VOL-2] p0496 N81-27090
Blade loss transient dynamics analysis. Volume 3: User's manual for TETRA program [NASA-CR-165373-VOL-3] p0496 N81-27091

TRANSIENTS (SURGES)
U SURGES

TRANSISTOR AMPLIFIERS
An X-band power GaAs FET amplifier for military avionics radar applications p0350 A81-31122

TRANSISTORS
NT FIELD EFFECT TRANSISTORS

TRANSIT SATELLITES
An integrated Omega/satellite radio navigation system p0566 A81-45767

TRANSITION FLOW
Nonstationary method for the direct statistical modeling of rarefied-gas flows p0069 A81-16454
Dialogue on bridging some gaps in stability and transition research --- in external, internal and free-shear layer through-flow systems p0115 A81-18105
Transient three-dimensional flow along a porous plate p0231 A81-24815

TRANSITION METALS
NT COBALT
NT IRON ISOTOPES
NT SILVER
NT TITANIUM
NT TUNGSTEN
Procedure for pressure contact on high-power semiconductor devices free of thermal fatigue [NASA-TM-75733] p0376 N81-22054

TRANSLATIONAL MOTION
NT SECONDARY FLOW
NT THREE DIMENSIONAL FLOW
NT THREE DIMENSIONAL MOTION
Equivalent system analysis of translation rate command systems for hover and low speed flight [AIAA PAPER 81-1858] p0560 A81-44557
Experimental determination of unsteady blade element aerodynamics in cascades. Volume 2: Translation mode cascade [NASA-CR-165166] p0140 N81-14976
Probabilistic analysis of foundation forces for a class of unbalanced rotating machines p0145 N81-15362

NT POWER LINES
NT STRIP TRANSMISSION LINES
NT WAVEGUIDES
TRANSMISSION LOSS
Theoretical and experimental evaluation of
transmission loss of cylinders
[AIAA PAPER 81-1971] p0618 A81-48612
TRANSMISSIONS (MACHINE ELEMENTS)
An analytical method to calculate misalignment in
the journal bearing of a planetary gear system
p0004 A81-10839
Advanced transmission component development and
test program --- for helicopters
p0105 A81-17507
Drive system development for the 1980's ---
helicopter transmissions
p0105 A81-17508
Development of helicopter transmission components
for the 1980s
p0105 A81-17509
Water content of helicopter gear oils
[ASME PAPER 80-C2/DET-12] p0116 A81-18640
A low height 2300 kW helicopter transmission with
an enclosed planetary gear
[ASME PAPER 80-C2/DET-17] p0116 A81-18642
Approximation of gear transmission error by
standard gear errors
[ASME PAPER 80-C2/DET-71] p0117 A81-18646
Experience with advanced high performance gear steel
--- for CH-47
[ASME PAPER 80-C2/DET-77] p0117 A81-18648
Gear unit noise and transmission errors ---
helicopter system
p0150 A81-20060
Gear meshing action as a source of vibratory
excitation
p0150 A81-20061
Development and application of an analytical
method for predicting helicopter transmission
noise
p0150 A81-20062
Modelling techniques for the reduction of noise
and vibration in gearboxes
p0151 A81-20063
The reliability of helicopter reduction gears
p0287 A81-28473
Device for lubricant flow measurement and
conservation
p0288 A81-28743
Helicopter transmission fatigue life
p0291 A81-29058
Driving dynamics of a high-speed
positive-displacement pump and gas-turbine drive
during startup --- of flight vehicles
p0319 A81-30155
Drive system technology advancements ---
transmissions for CH-47D helicopter
p0356 A81-32015
Measuring dynamic stresses on helicopter
transmission gear teeth utilizing telemetry
p0361 A81-32859
Advanced generating system equipment for aircraft
p0420 A81-37414
Computerized gear grinding system development
[AHS 80-48] p0476 A81-40163
Advancements in dimensional inspection of
helicopter gearboxes and transmission cases
[AHS 80-36] p0476 A81-40165
Advanced transmission component development
p0575 A81-46634
Designing safety into helicopter transmissions
p0575 A81-46638
Advanced transmission components investigation
program: Bearing and seal development
[AD-A090675] p0076 N81-12075
Gas turbine engines and transmissions for bus
demonstration programs
[COO-4867-07] p0134 N81-14329
Compensating linkage for main rotor control
[NASA-CASE-LAR-11797-1] p0270 N81-19087
TRANSMITTERS
NT EMERGENCY LOCATOR TRANSMITTERS
NT OMNIDIRECTIONAL RADIO RANGES
NT RADIO BEACONS
NT RADIO TRANSMITTERS
NT RADIOSONDES
NT SONOBUOYS
Omega transmitter outages, January to December 1979
[AD-A093425] p0207 N81-17035
Investigation of low level aircraft nonavionic
nonlinear interference
[AD-A098784] p0491 N81-26349
TRANSOCEANIC FLIGHT
Solo navigation in a light aircraft
p0407 A81-34337
Aircraft operating efficiency on the North
Atlantic, a challenge for the 1980's
p0267 N81-19060
TRANSONIC AIRCRAFT
U SUPERSONIC AIRCRAFT
TRANSONIC AIRCRAFT TECHNOLOGY PROGRAM
U TACT PROGRAM
TRANSONIC COMPRESSORS
Comparison of experimental and computational shock
structure in a transonic compressor rotor
[ASME PAPER 80-GT-81] p0109 A81-17953
Analysis of the difficulties in high performance
compressor data reduction
[ONERA, TP NO. 1981-7] p0296 A81-29107
Measurements of aerodynamic damping in the MIT
transonic rotor
[NASA-CR-163988] p0274 N81-19122
TRANSONIC FLIGHT
Research on transonic wings at the National
Aerospace Laboratory, Japan
p0011 A81-11640
Qualitative calculations of transonic drag-rise
characteristics using the equivalence rule
p0058 A81-14393
Transonic axisymmetric bodies with minimal wave drag
p0102 A81-17048
The determination of the induced drag on slim
wings with high lift systems in the transonic
region
[MBB-FE122] p0121 A81-19400
Adaptive airfoils and wings for efficient
transonic flight
p0153 A81-20349
Delta canard configuration at high angle of attack
p0154 A81-20351
An evaluation of wind tunnel test techniques for
aircraft nozzle afterbody testing at transonic
Mach numbers
[AD-A091775] p0126 N81-13931
Transonic wing technology for transport aircraft
p0188 N81-16002
Design and experimental verification of a
transonic wing for a transonic aircraft
p0188 N81-16003
Some particular configuration effects on a thin
supercritical variable camber wing
p0188 N81-16005
TRANSONIC FLOW
Asymmetric flow of subsonic and sonic jets over an
infinite wedge
p0004 A81-10919
Flow computation around multi-element airfoils in
viscous transonic flow
p0011 A81-11641
Calculation of plane transonic flows using the
integral equation method and shock fitting
p0016 A81-11779
An example of the transonic flow past a body with
a discontinuity in the contour curvature
p0019 A81-12367
Transonic flow past a wing profile in channels
with permeable walls
p0054 A81-13533
A finite-span wing in transonic flow
p0054 A81-13701
Harmonically oscillating airfoil in transonic
stream of air
p0054 A81-13753

Study of a variable sweep wing in sub or transonic flow
[ONERA, TP NO. 1978-106] p0058 A81-14391
Design and analysis of slat systems in transonic flow
p0058 A81-14392
A simplified theory of oscillating aerofoils in transonic flow - Review and extension
p0060 A81-14945
Numerical solutions of transonic flows by parametric differentiation and integral equation techniques
p0067 A81-15896
The supercritical profile of the supercritical wing
p0107 A81-17522
Finite difference computation of the steady transonic potential flow around airplanes
p0107 A81-17802
An aerodynamic design method for transonic axial flow compressor stage
p0108 A81-17805
Numerical simulations of a segmented-plenum, perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20640
On the derivation of universal indicial functions --- for unsteady transonic flow
[AIAA PAPER 81-0328] p0165 A81-20753
Higher-accuracy finite-difference schemes for transonic airfoil flowfield calculations
[AIAA PAPER 81-0381] p0166 A81-20794
Numerical solution of transonic flow through a cascade with slender profiles
p0170 A81-21197
Analysis of a symmetric transonic aerofoil with the finite element method - A new upwinding technique
p0183 A81-22984
Transonic flow calculations over two-dimensional canard-wing systems
[AIAA PAPER 79-1565] p0183 A81-23367
Transonic flows of a multireacting gas mixture through a Laval nozzle
p0225 A81-23909
A contribution to the computation of transonic supersonic flows over blunt bodies
p0230 A81-24423
Plane transonic solution with shock by direct iteration
p0231 A81-24814
Numerical computation of transonic potential flow through nozzles
p0233 A81-25353
Recent developments in integral equation method in transonic flow
p0234 A81-25384
Some problems of modeling high-speed aerodynamics --- in wind tunnels and tubes
p0237 A81-26118
Transonic maneuver/cruise airfoil design employing active diffusion control
p0239 A81-26511
Evaluation of blade element performance of compressor rotor blade cascades in transonic and low supersonic flow range
p0296 A81-29102
The accuracy of mean-stream-line method in subsonic and transonic regions
p0296 A81-29105
A method for obtaining shockless transonic flows past two-dimensional airfoils whose profiles are partially modified from a given arbitrary profile
p0298 A81-29201
A diagonal form of an implicit approximate-factorization algorithm
p0300 A81-29363
Linear/nonlinear behavior in unsteady transonic aerodynamics
[AIAA 81-0643] p0[illegible]6 A81-29496
Transonic flutter and gust-response te[illegible] and analyses of a wind-tunnel model of a torsion-free-wing fighter airplane
[AIAA 81-0650] p0307 A81-29503
Finite element methods for transonic blade-to-blade calculation in turbomachines
[ASME PAPER 81-GT-5] p0310 A81-29930
Semi-inverse method of computation in inviscid transonic flows - Application to the design of turbomachines blades profiles
[ASME PAPER 81-GT-206] p0318 A81-30096

Subsonic and transonic flow on a wing at different sweep angles. I
p0351 A81-31249
Subsonic and transonic flow on a wing at different sweep angles. II
p0351 A81-31250
Transonic viscous-inviscid interaction over airfoils for separated laminar or turbulent flows
p0354 A81-31612
Oscillating airfoils in shock-free transonic flows
p0410 A81-35026
The influence of surface roughness on boundary layer flow and separation at transonic speeds
p0413 A81-36468
Wing with finite span in a transonic flow
p0420 A81-37480
A PANSONIC Navier-Stokes solver --- for two dimensional flow about arbitrary airfoil sections
[AIAA PAPER 81-1195] p0454 A81-38077
Experimental-programme - Transonic wing-TST
p0457 A81-38804
Transonic swept wings studied by the lifting-line theory
p0509 A81-41090
Transonic wing design using potential-flow codes - Successes and failures
[SAE PAPER 810565] p0518 A81-42730
The calculation of transonic blade tip flow at helicopter rotors
[DGLR PAPER 81-025] p0606 A81-47554
Vortex bursting on slender delta wings in transonic flow and its influence on missile aerodynamic characteristics
[DGLR PAPER 81-047] p0611 A81-47622
Comparison of computational and experimental jet effects
[AIAA PAPER 81-1492] p0626 A81-49979
An investigation of scale effects on the transonic flow over swept wings. Part 2: Measurements on a model of a variable-sweep strike-fighter configuration
[ARC-R/M-3842-PT-2] p0021 N81-10010
A comprehensive evaluation and analysis of transonic flow calculations on three related wing-body configurations
[FFA-TN-AU-1418-PT-1] p0022 N81-10013
A comparison of Newton-like methods for the transonic small disturbance equation
[AD-A090270] p0033 N81-11017
Component-adaptive grid embedding
p0137 N81-14697
An investigation into grid patching techniques
p0137 N81-14708
Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with underwing: Store
[AD-A077370] p0139 N81-14969
Full potential solution of transonic quasi-3-D flow through a cascade using artificial compressability
[NASA-TM-81637] p0140 N81-14980
A method for obtaining shockless transonic flows past airfoils, partially modified from a given arbitrary airfoil
[NAL-TR-602T] p0141 N81-14983
Development of finite-volume methods for three-dimensional transonic flows
[AD-A090829] p0141 N81-14986
Application of transonic potential calculations to aircraft and wind tunnel configurations
p0186 N81-15992
Study of transonic flow fields about aircraft: Application to external stores
p0187 N81-15998
Design of advanced technology transonic airfoils and wings
p0187 N81-16000
Aerodynamic interaction between a close-coupled canard and a sweptback wing in transonic flow
p0189 N81-16013
Some aerodynamic interference effects that influence the transonic performance of combat aircraft
p0189 N81-16014
Supercritical flow past symmetrical airfoils
[AD-A093300] p0203 N81-16984
An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NACA

64A010 airfoils
p0249 N81-18024
Aerodynamic effects of nearly uniform slipstreams on thin wings in the transonic regime
[NASA-CR-152351] p0249 N81-18027
Transonic flow studies
[NASA-CR-163965] p0249 N81-18029
Influence of free-stream Mach number on transonic shock-wave boundary-layer interaction
[NLR-MP-78013-U] p0256 N81-18325
Predicted and experimental steady and unsteady transonic flows about a biconvex airfoil
[NASA-TM-81262] p0258 N81-18742
Unsteady transonic small disturbance theory with strong shock waves
[NASA-CR-166157] p0261 N81-19020
A panel method to determine loads on oscillating airfoils in transonic flow with embedded shock waves
[NLR-MP-80005-U] p0330 N81-20039
Technical evaluation report on the Fluid Dynamic Panel Symposium on Subsonic/Transonic Configuration/Aerodynamics
[AGARD-AR-146] p0392 N81-23431
Civil component program Wing Section. New calculation methods for subsonic and transonic interference with planar and spatial flows
[BMFT-FB-W-80-022] p0424 N81-24034
Preliminary calibration of the transonic test section of the NIAST trisonic tunnel
[NIAST-80/19] p0435 N81-24116
Turbulent interactions on airfoils at transonic speeds: Recent developments
p0483 N81-26047
Some applications of aerodynamic formulations to problems in aircraft dynamics
p0592 N81-31121
Three-dimensional transonic flow analysis
[AD-A101944] p0593 N81-31153
On the spanwise uniformity of wind tunnel test data of transonic airfoils
[NAL-TR-665] p0627 N81-32118

TRANSONIC FLUTTER
Prediction of transonic flutter for a supercritical wing by modified strip analysis and comparison with experiment
[AIAA 81-0609] p0304 A81-29471
A wind-tunnel study of the flutter characteristics of a supercritical wing
p0308 A81-29504
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Transonic dip mechanism of flutter of a sweptback wing. II
p0559 A81-44447
Numerical study of transonic flutter of a two dimensional airfoil
[NAL-TR-617T] p0090 N81-13023
Effects of angle of attack and ventral fin on transonic flutter characteristics of an arrow-wing configuration
[NASA-TM-81914] p0145 N81-15397
Experimental and analytical study on the flutter and gust response characteristics of a torsion-free-wing airplane model --- in the Langley transonic dynamics tunnel
[NASA-CR-159283] p0340 N81-21059
Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport --- SCAT-15F model test in the Langley Transonic Dynamics Tunnel
[NASA-TM-81962] p0388 N81-23071
Transonic flutter and gust-response tests and analyses of a wind-tunnel model of a torsion free wing airplane
[NASA-TM-81961] p0388 N81-23072
Prediction of transonic flutter for a supercritical wing by modified strip analysis and comparison with experiment
[NASA-TM-83126] p0445 N81-25432

TRANSONIC INLETS
U SUPERSONIC INLETS

TRANSONIC NOZZLES
Subsonic/supersonic nonvectored aeropropulsive characteristics of nonaxisymmetric nozzles installed on an F-18 model
[AIAA PAPER 81-1445] p0504 A81-40878

TRANSONIC SPEED
Modification of wing sections to optimize transonic performance
p0226 A81-24011
Transonic rotor noise - Theoretical and experimental comparisons
p0364 A81-33049
Propellers for economic flight at high speeds
[AAAF PAPER NT 80-34] p0369 A81-33936
Acoustic shock waves generated by a transonic helicopter blade
[AHS 80-63] p0479 A81-40186
Calibration of a blowdown-to-atmosphere cryogenic wind tunnel
p0030 N81-11060
Characteristics and status of the US National Transonic Facility
p0038 N81-11065
Evaluation of aircraft interference effects on external stores at subsonic and transonic speeds
p0187 N81-15997
An investigation of a swept wing-body configuration with drooped leading edge at low and transonic speeds
p0189 N81-16012
Overview of advanced wing design --- Ames 12-Foot Pressure Tunnel and 11-Foot Transonic Wind Tunnel
p0260 N81-19012
Experimental studies of scale effects on oscillating airfoils at transonic speeds
p0386 N81-23054
Development for new laboratories for future testing
p0433 N81-24105

TRANSONIC TURBINES
U SUPERSONIC TURBINES

TRANSONIC WIND TUNNELS
A system for model access in tunnels with an unbreathable test medium
p0015 A81-11672
A simple laser interferometer for wind tunnel flow visualisation
p0018 A81-12078
Testing stand for the measurement of nonsteady aerodynamic forces in the transonic wind tunnel at Goettingen
p0065 A81-15703
Measurements of flow quality in the Ames 2 x 2ft transonic wind tunnel
[AIAA PAPER 81-0156] p0161 A81-20636
Investigation of transient processes in the perforated working section of a wind tunnel
p0237 A81-26122
Adaptive-wall wind-tunnel development for transonic testing
p0352 A81-31367
Measurement of recovery temperature on an airfoil in the Langley 0.3-m transonic cryogenic tunnel
[AIAA PAPER 81-1062] p0459 A81-39074
European transonic wind tunnel ETW - Status of the project at the end of the predesign phase
[DGLR PAPER 81-027] p0609 A81-47563
A fan pressure ratio correlation in terms of Mach number and Reynolds number for the Langley 0.3 meter transonic cryogenic tunnel
[NASA-TP-1752] p0021 N81-10005
An introduction to dynamic derivatives (3) methods of oscillating models in pitch and yaw in a 530 by 810 millimetre transonic wind tunnel
[ARL/AERO-NOTE-390] p0021 N81-10007
The European Transonic Wind tunnel ETW
p0038 N81-11064
Transonic cascade wind tunnel modification and initial tests
[AD-A091080] p0090 N81-13031
Further investigations of adaptive-wall wind tunnels
[AD-A091774] p0131 N81-13977
Transonic wind tunnel development (1940 - 1950)
p0185 N81-15971
Wind tunnel wall interference
[AD-A093301] p0217 N81-17104
Evaluation of the acoustic and aerodynamic characteristics of several slot-baffle configurations for transonic wind tunnel walls
[AD-A093957] p0217 N81-17106
Effects of window configuration on model pressure distribution in wind tunnels with perforated walls
[AD-A094213] p0277 N81-19192
Adaptive-wall wind-tunnel investigations
[AD-A096325] p0343 N81-21080

Description of 0.186-scale model of high-speed duct of national transonic facility
[NASA-TM-81949] p0377 N81-22061
High frequency drive mechanism for an active controls systems aircraft control surface
p0378 N81-22400
Description of recent changes in the Langley 6- by 28-inch transonic tunnel
[NASA-TM-81947] p0391 N81-23096
Transonic wind tunnel measurements of tailplane and elevator effectiveness of the Jindivik 203B target aircraft
[AD-A098180] p0424 N81-24031
Evaluation of turbulence reduction devices for the Langley 8-foot Transonic Pressure Tunnel
[NASA-TM-81792] p0434 N81-24114
Estimation of fan pressure ratio requirements and operating performance for the National Transonic Facility
[NASA-TM-81802] p0435 N81-24115
Considerations for the installation of honeycomb and screens to reduce wind-tunnel turbulence
[NASA-TM-81868] p0550 N81-29137
Guide for users of the National Transonic Facility
[NASA-TM-83124] p0550 N81-29139
Wall interference effects: Status review
p0592 N81-31141

Experimental determination of the circumferential drift of edge wakes of guide vanes in a turbine stage
p0466 A81-40022

Processing for an improved impact resistant composite blade --- for turbofan aircraft engines
[AIAA PAPER 81-1356] p0501 A81-40838

Comparative efficiency of penetrating steam and air cooling of gas turbine blades
p0509 A81-41003

An experimental study of heat transfer on turbine rotor blades
p0509 A81-41033

The effect of various factors on the vibration characteristics of composite blades of gas turbine engines
p0524 A81-42793

Projected power and specific fuel consumption development of the Rolls Royce Gem engine
p0575 A81-46637

Stability and flutter analysis of turbine blades at low speed
p0612 A81-47959

A process for protecting gas turbine blade cooling passages against degradation
p0622 A81-49209

Surface pyrometry in presence of radiation from other sources with application to turbine blade temperature measurement
[NASA-TP-1754] p0036 N81-11039

Performance of a steel spar wind turbine blade on the Mod-0 100 kW experimental wind turbine
[NASA-TM-81588] p0043 N81-11448

Definitive generic study for the effect of high lift airfoils on wind turbine effectiveness, executive summary
[SERI/TR-98003-2] p0043 N81-11493

Low-cost directionally-solidified turbine blades, volume 2 --- TFE731-3 turbofan engine
[NASA-CR-159562] p0078 N81-12088

Optimized pitch controller for load alleviation on wind turbines
[FFA-TN-HU-2189-PT-1] p0087 N81-12634

Application of model laws when determining the heat transfer coefficients by experiments on cooled turbine blades
p0089 N81-12998

Performance evaluation of a prototype noninterference technique for measurement of turbine engines compressor blade stress
[AD-A090566] p0094 N81-13061

Mean rotor wake characteristics of an aerodynamically loaded 0.5 m diameter fan
[NASA-TM-81657] p0195 N81-16053

JT8D-15/17 high pressure turbine root discharged blade performance improvement --- engine design
[NASA-CR-165220] p0214 N81-17080

The Shock and Vibration Digest, volume 12, number 11
[AD-A092384] p0257 N81-18403

Vibrations of turbine engine blades by shell analysis
p0257 N81-18404

Coupling of unsteady lift to acoustic duct modes in an axial flow fan
[AD-A095080] p0274 N81-19124

Design of turbine cascades with transitional profile boundary layers
p0278 N81-19456

Thermal and flow analysis of a convection air-cooled ceramic coated porous metal concept for turbine vanes
[NASA-TM-81749] p0376 N81-22056

Internal coating of air-cooled gas turbine blades
[NASA-CR-165337] p0429 N81-24068

Experimental verification of turboblading aeromechanics
p0432 N81-24092

Fabrication process development of boron/aluminum fan blades for high bypass engines
[NASA-CR-165252] p0442 N81-25076

Blade loss transient dynamics analysis, volume 1. Task 1: Survey and perspective --- aircraft gas turbine engines
[NASA-CR-165373-VOL-1] p0496 N81-27089

Blade loss transient dynamics analysis, volume 2. Task 2: Theoretical and analytical development. Task 3: Experimental verification
[NASA-CR-165373-VOL-2] p0496 N81-27090

Blade loss transient dynamics analysis. Volume 3: User's manual for TETRA program
[NASA-CR-165373-VOL-3] p0496 N81-27091

Wingtip vortex turbine
[NASA-CASE-LAR-12544-1] p0496 N81-27096

Turbojet engine blade damping
[NASA-CR-165406] p0549 N81-29130

Development and design of a large wind-turbine blade --- fiber reinforced composites
[MBB-UD-301/80-OE] p0586 N81-30198

Automated Plasma Spray (APS) process feasibility study
[NASA-CR-165418] p0597 N81-31193

TURBULENT BOUNDARY LAYER
An experimental investigation of the interaction
between a glancing shock wave and a turbulent
boundary layer
p0012 A81-11649
Influence of free-stream turbulence intensity on
heat transfer in the two-dimensional turbulent
boundary layer of an accelerated compressible flow
p0110 A81-17994
The influence of flow disturbances on the
laminar-turbulent transition in a supersonic
boundary layer
p0124 A81-19643
Scale effects on turbulent boundary layer
development and flow separation around V/STOL
inlets at high incidence
[AIAA PAPER 81-0014] p0157 A81-20538
Numerical simulations of a segmented-plenum,
perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20640

Three-dimensional turbulent boundary layer development and separation in V/STOL engine inlets at incidence with small-cross flow and curvature influences
[AIAA PAPER 81-0254] p0163 A81-20703

Three-dimensional wing boundary layer calculated with eight different methods
p0171 A81-21555

Fundamental studies on the control of turbulent boundary layers. I Theoretical and experimental analyses of velocity profiles and parameters with and without adverse pressure gradient, with uniform suction through a porous flat plate
p0228 A81-24079

An experimental investigation of separating flow on a convex surface
p0230 A81-24488

Electromagnetic precipitation and ducting of particles in turbulent boundary layers
p0239 A81-26506

Large-eddy breakup scheme for turbulent viscous drag reduction
p0239 A81-26507

Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
p0239 A81-26508

Hybrid suction surface for turbulent boundary layer flow
p0240 A81-26513

Compliant surfaces - Introduction
p0240 A81-26515

Analysis of turbulent boundary layer on cascade and rotor blades of turbomachinery
p0296 A81-29106

The displacement-thickness theory of trailing edge noise
p0348 A81-30785

Role of laminar separation bubbles in airfoil leading-edge stalls
p0354 A81-31613

A survey of heating and turbulent boundary layer characteristics of several hypersonic research aircraft configurations
[AIAA PAPER 81-1145] p0459 A81-39134

Pressure fluctuations on the surface of a small passenger aircraft. II - The effect of the turbulent boundary layer
p0562 A81-44618

Supercritical airfoil technology program wake experiments and modeling for fore and aft loaded compressor cascades
[AD-A091378] p0091 N81-13034

Review of theoretical and experimental results on three dimensional turbulent wakes and boundary layers
[ONERA-NT-1980-4] p0126 N81-13930

Mean-flow and turbulence measurements in the vicinity of the trailing edge of an NACA (63 sub 1)-012 airfoil
[NASA-TP-1845] p0392 N81-23410

Turbulent interactions on airfoils at transonic speeds: Recent developments
p0483 N81-26047

Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
[NASA-CR-3444] p0587 N81-30392

TURBULENT FLOW

NT CAVITATION FLOW

NT SUPERCAVITATING FLOW

Aerodynamic sound generated by a slotted trailing edge
p0066 A81-15798

Instantaneous velocity measurements in a periodically pulsed plane turbulent jet
p0066 A81-15895

Dialogue on bridging some gaps in stability and transition research --- in external, internal and free-shear layer through-flow systems
p0115 A81-18105

Plane vortex gas flows --- emphasizing supersonic case
p0123 A81-19634

Numerical investigation of a model of turbulent combustion of hydrocarbons
[AIAA PAPER 81-0039] p0158 A81-20559

The numerical solution of incompressible turbulent flow over airfoils
[AIAA PAPER 81-0047] p0158 A81-20563

Measurements of flow quality in the Ames 2 x 2ft transonic wind tunnel
[AIAA PAPER 81-0156] p0161 A81-20636

Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659

Eddy viscosity in accelerated and retarded cascade-wake flows
p0233 A81-25267

Miniature pressure probe for measuring the surface-shear-stress vector in turbulent flow
p0233 A81-25354

Some problems of modeling high-speed aerodynamics --- in wind tunnels and tubes
p0237 A81-26118

Drag characteristics of V-groove and transverse curvature riblets
p0239 A81-26510

Effects of Coriolis on the turbulent field inside centrifugal impellers
p0297 A81-29110

Transonic viscous-inviscid interaction over airfoils for separated laminar or turbulent flows
p0354 A81-31612

Analysis of total and static pressure fluctuations in an air intake at high incidence
[AAAF PAPER NT 80-61] p0370 A81-33950

Some applications of the turbulence amplifier to airborne systems
p0514 A81-42173

Turbulence modeling for application to V/STOL propulsion induced effects: Two dimensional formulation
[AD-A090331] p0072 N81-12026

Effects of axisymmetric contractions on turbulence of various scales
p0093 N81-13055

Effects of downstream distance on turbulence decay for the compressor research facility low conditioning system
[AD-A091543] p0133 N81-14276

Time dependent Navier-Stokes solution of a turbulent gas jet ejected from a rectangular orifice into a high-subsonic crossflow
p0138 N81-14964

Three-dimensional internal flows in turbomachinery, volume 2
[AD-A093130] p0215 N81-17090

La Recherche Aerospatiale, Bimonthly Bulletin no. 1980-2, March - April 1980
[ESA-TT-652] p0255 N81-18244

Physical and numerical aspects of shock boundary layer interactions
p0256 N81-18320

Comments on settling chamber design for quiet, blowdown wind tunnels
[NASA-TM-81948] p0335 N81-20085

Analysis of turbulent flow about an isolated airfoil using a time dependent Navier-Stokes procedure
p0385 N81-23053

Multiple-scale turbulence modeling of boundary layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23411

Fountain-jet turbulence
[AD-A098098] p0423 N81-24028

Analysis of laminar and turbulent symmetric blunt trailing-edge flows
[AD-A098703] p0439 N81-25046

TURBULENT HEAT TRANSFER

Influence of free-stream turbulence intensity on heat transfer in the two-dimensional turbulent boundary layer of an accelerated compressible flow
p0110 A81-17994

TURBULENT JETS

Non-isoenergetic turbulent jet mixing in a constant area duct --- in turbofan engines
[AIAA PAPER 81-0347] p0165 A81-20768

A computer simulation of turbulent jet flow
p0230 A81-24424

Partially confined multiple jet mixing
p0234 A81-25513

Experimental investigation of oscillating subsonic jets
p0360 A81-32777

Prediction of swirling reacting flow in ramjet combustors
[AIAA PAPER 81-1485] p0506 A81-40903

An acoustic source modelling technique to predict the near sound field of axisymmetric turbulent jets
[AIAA PAPER 81-2022] p0618 A81-48606

The role of the helical jet mode in aerodynamic noise generation
[AIAA PAPER 81-1963] p0618 A81-48607

Application of optical methods to the study of jet noise and turbulence
[ISL-CO-201/80] p0147 N81-15819

TURBULENT MIXING

Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model
p0228 A81-24078

Scramjet combustor wall boundary layer analysis
[AIAA PAPER 81-1434] p0504 A81-40871

Multiple-scale turbulence modeling of boundary layer flows for scramjet applications
[NASA-CR-3433] p0392 N81-23411

TURBULENT WAKES

NT PROPELLER SLIPSTREAMS

NT SLIPSTREAMS

An experimental investigation of the rotating stall, surge, and wake behind the rotor for a single stage axial compressor
p0109 A81-17826

Structure and decay characteristics of turbulence in the near- and far-wake of a moderately loaded compressor rotor-blade
[ASME PAPER 80-GT-95] p0109 A81-17954

Effects of design variables on spoiler control effectiveness, hinge moments, and wake turbulence
[AIAA PAPER 81-0072] p0159 A81-20581

Eddy viscosity in accelerated and retarded cascade-wake flows
p0233 A81-25267

A numerical study of vortex shedding from one and two circular cylinders
p0233 A81-25355

Supercritical airfoil technology program wake experiments and modeling for fore and aft loaded compressor cascades
[AD-A091378] p0091 N81-13034

Review of theoretical and experimental results on three dimensional turbulent wakes and boundary layers
[ONERA-NT-1980-4] p0126 N81-13930

The velocity induced by the wake of a wind turbine in a shear layer, including ground effect
[FFA-TN-HU-2189-PT-3] p0141 N81-14985

Unsteady wakes downstream from a profile oscillating in incidence --- aerodynamic flow tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989

The propeller tip vortex. A possible contributor to aircraft cabin noise
[NASA-TM-81768] p0380 N81-22838

Rotor wake characteristics relevant to rotor-stator interaction noise generation
[NASA-TM-82703] p0583 N81-30130

TURING MACHINES

The use of finite-state machines for describing and validating flight control systems
p0322 A81-30265

TURNING FLIGHT

The problem of the minimum-time turn of a maneuverable aircraft velocity vector to a specified course angle
p0413 A81-36472

Time-constrained maximum-energy turns --- for modern fighter aircraft
[AIAA PAPER 81-1806] p0561 A81-44578

Time-constrained maximum-energy turns
[AD-A094733] p0273 N81-19107

TURRET

Flow control for an airborne laser turret
[AIAA PAPER 81-1637] p0525 A81-43137

TVC (CONTROL)

U THRUST VECTOR CONTROL

TWISTED WINGS

How to improve the performance of transport aircraft by variation of wing aspect-ratio and twist /12th Daniel and Florence Guggenheim International Memorial Lecture/
p0006 A81-11602

Analysis and application of compliant rotor technology
p0467 A81-40086

The influence of leading-edge thrust on twisted and cambered wing design for supersonic cruise
[AIAA PAPER 81-1656] p0526 A81-43146

The aerodynamic influences of rotor blade airfoils, twist, taper and solidity on hover and forward flight performance
p0572 A81-46607

Basic research in wake vortex alleviation using a variable twist wing
p0267 N81-19058

TWISTING

Wind tunnel evaluation of aeroelastically conformable rotors
[AHS 80-23] p0475 A81-40153

Choice of the optimal angular velocity of the twist of a flight vehicle
p0625 A81-49946

A study of wing body blending for an advanced supersonic transport
p0244 N81-17987

TWO DIMENSIONAL BODIES

A method for obtaining shockless transonic flows past two-dimensional airfoils whose profiles are partially modified from a given arbitrary profile
p0298 A81-29201

The prediction of the bursting of laminar separation bubbles in the design of two dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12036

Extended frequency turbofan model
[NASA-CR-165261] p0335 N81-20078

TWO DIMENSIONAL BOUNDARY LAYER

Influence of free-stream turbulence intensity on heat transfer in the two-dimensional turbulent boundary layer of an accelerated compressible flow
p0110 A81-17994

Development of a large-scale wind tunnel for the simulation of turbomachinery airfoil boundary layers
[ASME PAPER 81-GT-6] p0310 A81-29931

Boundary layer measurements on a two-dimensional wing with flap
[NLR-TR-79009-U] p0022 N81-10014

TWO DIMENSIONAL FLOW

Calculation of plane transonic flows using the integral equation method and shock fitting
p0016 A81-11779

Instantaneous velocity measurements in a periodically pulsed plane turbulent jet
p0066 A81-15895

Plane vortex gas flows --- emphasizing supersonic case
p0123 A81-19634

Numerical study of a scramjet engine flow field
[AIAA PAPER 81-0186] p0162 A81-20659

Transonic flow calculations over two-dimensional canard-wing systems
[AIAA PAPER 79-1565] p0183 A81-23367

Numerical study on viscous shear flow past a circular cylinder
p0228 A81-24077

Subsonic cascade flow analysis by a finite element method
p0233 A81-25311

Numerical computation of compressible steady cascade flows
p0296 A81-29100

The axial velocity density ratio and the axial velocity density distribution in axial flow compressors and cascades
p0296 A81-29101

The accuracy of mean-stream-line method in subsonic and transonic regions
p0296 A81-29105

Flow separation in inlets at incidence angles
p0297 A81-29114

A diagonal form of an implicit approximate-factorization algorithm
p0300 A81-29363

Streamwise flow and heat transfer distributions for jet array impingement with crossflow
[ASME PAPER 81-GT-77] p0313 A81-29985

Adaptive-wall wind-tunnel development for transonic testing
p0352 A81-31367

Measurement of derivatives for an oscillating airfoil with flap
p0411 A81-35635

Modeling of 2D-nozzle plume for IR signature
prediction under static conditions
[AIAA PAPER 81-1108] p0459 A81-39107
Analysis of steady, two-dimensional, chemically
reacting nonequilibrium flow by an unsteady,
asymptotically consistent technique --- for
performance prediction of ramjet propulsion system
[AIAA PAPER 81-1432] p0504 A81-40869

[SAE PAPER 801136] p0397 A81-34167
The challenge of unsteady separating flows
p0411 A81-35647
Accuracy and application of a second-order theory
for three-dimensional supersonic and low
hypersonic unsteady flows aroung a thin wing
p0419 A81-37335
Application of unsteady airfoil theory to rotary
wings
p0465 A81-39874
Performance analysis of a family of planar pulse
generators
[AIAA PAPER 81-1590] p0507 A81-40965
Flow control for an airborne laser turret
[AIAA PAPER 81-1637] p0525 A81-43137
Numerical experiments on unsteady flows through
vibrating cascades
p0613 A81-47961
On the numerical analysis of stall flutter in
turbine cascade
p0613 A81-47963
Comparison of Unsteady Pressure Fields Computed
and Measured on the ZKP model
[AGARD-R-680] p0033 N81-11019
Reverse flow, pre-rotation and unsteady inlet flow
in centrifugal pumps
[VKI-PREPRINT-1979-15] p0085 N81-12433
Philosophy and results of steady and unsteady test
techniques on a large scale transport aircraft
model in the ONERA transonic tunnel S1 MA. Part
1: Philosophy and results of steady tests.
Part 2: Interest of large models in unsteady
aerodynamics
p0190 N81-16019
Unsteady wakes downstream from a profile
oscillating in incidence --- aerodynamic flow
tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989
Transonic flow studies
[NASA-CR-163965] p0249 N81-18029
Predicted and experimental steady and unsteady
transonic flows about a biconvex airfoil
[NASA-TM-81262] p0258 N81-18742
Unsteady transonic small disturbance theory with
strong shock waves
[NASA-CR-166157] p0261 N81-19020
Unsteady airloads on a harmonically pitching wing
with external store
[NLR-MP-80004-U] p0330 N81-20038
Unsteady pressure measurements during stall and
buffeting --- wind tunnel tests
[ESA-TT-641] p0339 N81-21041
Semi-actuator disk theory for compressor choke
flutter
[NASA-CR-3426] p0442 N81-25075
Overview: NASA/AF/Navy Symposium on
Aeroelasticity of Turbine Engines
[NASA-CR-164419] p0444 N81-25089
Pressure distribution computation on a nonlifting
symmetrical helicopter blade in forward flight
p0447 N81-26010
Flutter analysis fo two-dimensional and
two-degree-of-freedom MBB A-3, CAST 7, an TF-8A
supercritical airfoils in small-disturbance
unsteady transonic flow
[AD-A100334] p0540 N81-28104
Report of the panel on aeroelasticity and unsteady
aerodynamics
p0593 N81-31149

UNSTEADY STATE
The spectral analysis of nonstationary random

A discrete vortex method for the non-steady separated flow over an airfoil
p0179 A81-22568
Numerical simulation of gross structure of turbulent plane mixing layer by discrete-vortex model
p0228 A81-24078
A computer simulation of turbulent jet flow
p0230 A81-24424
Generation of vortex noise in flow past a profile in a channel
p0238 A81-26134
Aerodynamic study of flat turbine cascades with additional blades in blade passages
p0281 A81-27373
Three dimensional flow in annular diffusers with two vortex distributions at entry
p0297 A81-29112
A computer code for the calculation of aircraft trailing vortices
p0347 A81-30710
Factors which influence the behavior of turbofan forced mixer nozzles
[AIAA PAPER 81-0274] p0359 A81-32549
Vortex-flow aerodynamics - An emerging design capability
p0366 A81-33717
Aerodynamic features of designed strake-wing configurations
[AIAA PAPER 81-1214] p0454 A81-38084
Experimental and analytical studies of a model helicopter rotor in hover
p0465 A81-39898
Helicopter model scale results of blade-vortex interaction impulsive noise as affected by tip modification
[AHS 80-62] p0479 A81-40185
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
Damping of turbomachine blade variations by subsonic flow
p0612 A81-47957
Holographic investigation of slender body vortex wakes
[AD-A089496] p0021 N81-10008
Full scale visualization of the wing tip vortices generated by a typical agricultural aircraft
[NASA-CR-159382] p0071 N81-12019
Experimental study of supersonic viscous leeside flow over a slender delta wing
[NASA-TM-81248] p0133 N81-14265
Vortex methods for two- and three-dimensional flow simulations
p0145 N81-15313
Interference effects of concentrated blowing and vortices on a typical fighter configuration
p0188 N81-16009
Structures of flow separations over swept wings
p0255 N81-18244
Numerical computation of flows with rolled-up vortex sheets
p0255 N81-18256
Theoretical analysis of an augmentor wing for a VTOL fighter
[NASA-CR-152254] p0261 N81-19018
A higher-order trapezoidal vector vortex panel for subsonic flow
[AD-A094775] p0263 N81-19032
Wake vortex attenuation flight tests: A status report
p0267 N81-19057
An extension of the local momentum theory to a distorted wake model of a hovering rotor
[NASA-TM-81258] p0329 N81-20030
The propeller tip vortex. A possible contributor to aircraft cabin noise
[NASA-TM-81768] p0380 N81-22830
Investigation of aerodynamic characteristics of wings having vortex flow using different numerical codes
[NASA-CR-165706] p0384 N81-23834
Development of a nonlinear vortex method --- steady and unsteady aerodynamic loads of highly sweptback wings
[NASA-CR-164351] p0423 N81-24020
Basic studies of body vortices at high angles of attack and supersonic speeds
[AD-A102241] p0594 N81-31154
VORTICITY
Determination of the vorticity of a small-aspect-ratio wing in hypersonic flow
p0054 A81-13384
A one-dimensional analysis and performance prediction of subsonic radial turbines

p0228 A81-24086
Flow transition phenomena and heat transfer over
the pressure surfaces of gas turbine blades
[ASME PAPER 81-GT-107]
p0315 A81-30012
Determination of the vorticity on a wing of small
aspect ratio in a hypersonic stream

The microburst: Common factor in recent aircraft accidents p0136 N81-14571

Doctor Fujita's microburst analysis at Chicago p0136 N81-14572

Clean air turbulence. Citations from the International Aerospace Abstracts data base [NASA-CR-163863] p0146 N81-15649

An airport wind shear detection and warning system using Doppler radar: A feasibility study [NASA-CR-3379] p0202 N81-16681

Wind shear systems implementation plan, benefit/cost study [AD-A094168] p0253 N81-18055

Magnitude and frequency of wind speed shears and associated downdrafts p0267 N81-19055

An analytical study of the longitudinal response of airplanes to positive wind shear [NASA-TP-1765] p0335 N81-20082

Groundspeed/airspeed differences as a wind shear indicator and flight evaluation of a DME-derived system to determine groundspeed [AD-A097566] p0393 N81-23768

Flight evaluation of a simple total energy-rate system with potential wind-shear application [NASA-TP-1854] p0427 N81-24058

Determination of wind stress from water level fluctuations N81-30774

Takeoff and missed approach under the influence of wind shear --- flight safety considerations [TUBS/SFB-58-80-05-01] p0628 N81-32131

Simulator evaluation of the effects of reduced spoiler and thrust authority on a decoupled longitudinal control system during landings in wind shear [NASA-TM-83188] p0639 N81-33211

WIND TUNNEL APPARATUS

NT WIND TUNNEL DRIVES

Add fluorescent minitufts to the aerodynamicist's bag of tricks p0005 A81-11245

Three years of operation of the ONERA pressurized subsonic wind tunnel [ONERA, TP NO. 1980-129] p0014 A81-11669

A system for model access in tunnels with an unbreathable test medium p0015 A81-11672

A vaporizing combustor with double combustion spaces p0109 A81-17827

Some optimization problems of internal aerodynamics p0237 A81-26120

Test stand for the study of flow systems in wind tunnels p0409 A81-35009

Digital simulation for energy conservation in a large wind tunnel plant system p0613 A81-48003

A rotating, wind tunnel balance and associated experimental techniques [AAAF-NT-80-13] p0218 N81-17108

First results obtained with a rotating construction --- used in measuring flying qualities of wind tunnel aircraft models [AAAF-NT-80-14] p0218 N81-17109

Rotative balance of the I.M.F. Lille and associated experimental techniques [NASA-TM-75886] p0276 N81-19137

Comments on settling chamber design for quiet, blowdown wind tunnels [NASA-TM-81948] p0335 N81-20085

Application of superconducting coils to the NASA prototype magnetic balance [NASA-CR-165660] p0336 N81-20086

Description of 0.186-scale model of high-speed duct of national transonic facility [NASA-TM-81949] p0377 N81-22061

Evaluation of turbulence reduction devices for the Langley 8-foot Transonic Pressure Tunnel [NASA-TM-81792] p0434 N81-24114

A discussion document on the thermal design of force balances for cryogenic wind tunnels [OUEL-1321/80] p0435 N81-24119

Wind-tunnel measurement of aerodynamic derivatives using flexible-sting rigs p0591 N81-31110

Rotary and Magnus balances p0591 N81-31111

Support interference p0591 N81-31113

Wind Tunnels of NASA [NASA-SP-440] p0629 N81-32153

WIND TUNNEL BALANCES

U WEIGHT INDICATORS

U WIND TUNNEL APPARATUS

WIND TUNNEL CALIBRATION

Calibration of the high speed wind tunnel TVM 150 in the supersonic range p0016 A81-11778

A fan pressure ratio correlation in terms of Mach number and Reynolds number for the Langley 0.3 meter transonic cryogenic tunnel [NASA-TP-1752] p0021 N81-10005

A comparison of methods for calibration and use of multi-component strain gauge wind tunnel balances [AD-A090484] p0084 N81-12394

Evaluation of a subsonic cascade wind tunnel for compressor blade testing [AD-A093591] p0218 N81-17107

Validation of the Wright-Patterson vertical wind tunnel [AD-A094777] p0277 N81-19143

Preliminary calibration of the transonic test section of the NIAST trisonic tunnel [NIAST-80/19] p0435 N81-24116

Wall interference effects: Status review p0592 N81-31141

Report of the wind tunnel/flight correlation panel p0593 N81-31150

Supplemental calibration of the AEDC-PWT 16 ft transonic tunnel aerodynamic test section [AD-A102384] p0630 N81-32155

WIND TUNNEL DRIVES

Development of wind tunnel fan blade made of composite materials [MBB-UD-277-79-0] p0018 A81-12096

Estimation of fan pressure ratio requirements and operating performance for the National Transonic Facility [NASA-TM-81802] p0435 N81-24115

Analysis of the performance of the drive system and diffuser of the Langley unitary plan wind tunnel [NASA-TM-83168] p0635 N81-33158

WIND TUNNEL MODELS

High-lift investigations on some small aspect ratio wings p0011 A81-1168

Adaptable wind tunnel walls for 2D and 3D model tests p0014 A81-11671

A system for model access in tunnels with an unbreathable test medium p0015 A81-11672

Towing tank tests on model wind turbine rotors p0055 A81-1

Experimental investigations to fully map the flow field around a wind tunnel model of a transport airplane [SAE PAPER 800630] p0063 A81-1534

The practical application of the Wake Blocking Corrections according to Maskell --- for large wind tunnel models [DGLR PAPER 80-112] p0121 A81-1939

Model vibrations beyond low-speed stall [ONERA, TP NO. 1980-154] p0123 A81-19552

Laser measurement of angle of attack on wind-tunnel models p0150 A81-204

Wind tunnel model support, controlled by four microprocessors [ONERA, TP NO. 1980-149] p0174 A81-21917

Some aerodynamic properties of cones in viscous supersonic flow p0237 A81-26119

An experimental study of transmission, reflection and scattering of sound in a free jet flight simulation facility and comparison with theory p0289 A81-2894

Computation of wind tunnel model deflections --- for transport type solid wing [AIAA 81-0482] p0300 A81-293

Transonic flutter and gust-response tests and analyses of a wind-tunnel model of a torsion-free-wing fighter airplane [AIAA 81-0650] p0307 A81-295

Transonic flutter study of a wind-tunnel model of
an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Comparison of calculated and measured helicopter
rotor lateral flapping angles
p0357 A81-32018
An opto-electronic method for wind tunnel model
alignment
p0361 A81-32849
An apparatus for the simulation of an air intake
at high angle of attack in a compressor test
facility
[ONERA, TP NO. 1981-35] p0460 A81-39238
Advanced nozzle integration for supersonic strike
fighter application
[AIAA PAPER 81-1441] p0504 A81-40875
The half-model technique in the wind tunnel and
its employment in the development of the Airbus
family

Comparison of computational and experimental jet effects
[AIAA PAPER 81-1492] p0626 A81-49979
An introduction to dynamic derivatives (3) methods of oscillating models in pitch and yaw in a 530 by 810 millimetre transonic wind tunnel
[ARL/AERO-NOTE-390] p0021 N81-10007
Holographic investigation of slender body vortex wakes
[AD-A089496] p0021 N81-10009
An investigation of scale effects on the transonic flow over swept wings. Part 2: Measurements on a model of a variable-sweep strike-fighter configuration
[ARC-R/M-3842-PT-2] p0021 N81-1001

Boundary layer measurements on a two-dimensional
  wing with flap
  [NLR-TR-79009-U]   p0022 N81-10014
Flow measurements in the wake of a wing fitted
  with a leading-edge root extension (strake)
  [RAE-TR-79120]   p0022 N81-10015
Full scale wind tunnel investigation of a
  bearingless main helicopter rotor --- Ames 40 by
  80 foot wind tunnel test using the BO-105
  helicopter
  [NASA-CR-152373]   p0033 N81-11014
Wind tunnel investigation of the aerodynamic
  hysteresis phenomenon on the F-4 aircraft and
  its effects on aircraft motion
  [AD-A089851]   p0033 N81-11016
Low speed aerodynamic performance of
  50.8 centimeter-diameter noise-suppressing
  inlets for the Quiet, Clean, Short-haul
  Experimental Engine (QCSEE) --- Lewis 9- by
  15-foot low speed wind tunnel tests
  [NASA-TP-1178]   p0035 N81-11037
Calibration of a blowdown-to-atmosphere cryogenic
  wind tunnel
                    p0038 N81-11060
Low-speed aerodynamic characteristics of a 13
  percent thick medium speed airfoil designed for
  general aviation applications
  [NASA-TP-1498]   p0071 N81-12015
Influence of light aircraft architecture on its
  spin characteristics
  [AAAF-NT-80-11]   p0081 N81-12111
Wind tunnel test of a fighter aircraft wing/store
  flutter suppression system: An international
  effort
                    p0082 N81-12116
Wind tunnel tests on a fighter aircraft wing/store
  flutter suppression system: The B.Ae control law
                    p0083 N81-12119
Dynamic response of a forward-swept-wing model at
  angles of attack up to 15 deg at a Mach number
  of 0.9 --- Langley transonic dynamics tunnel tests
  [NASA-TM-81863]   p0085 N81-12448
Results of oscillatory pitch and ramp tests on the
  NACA 0012 blade section
  [ARA-MEMO-220]   p0090 N81-13024
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions ---
  Lewis 8 by 6-foot supersonic wind tunnel tests
  [NASA-CR-159818]   p0093 N81-13057
Wind-tunnel test of an articulated helicopter
  rotor model with several tip shapes
  [NASA-TM-80080]   p0125 N81-13918
Passive control of wing/store flutter
  [NASA-TM-81865]   p0125 N81-13922
Rotary balance data for a single-engine
  agricultural airplane configuration for an
  angle-of-attack range of 8 deg to 90 deg
  [NASA-CR-3311]   p0125 N81-13923
An evaluation of wind tunnel test techniques for
  aircraft nozzle afterbody testing at transonic
  Mach numbers
  [AD-A091775]
                    p0126 N81-13931
Evaluation of wind tunnel nozzle afterbody test
  techniques utilizing a modern twin engine
  fighter geometry at Mach numbers from 0.6 to 1.2
  --- YF-17 aircraft
  [AD-A091545]
                    p0126 N81-13932
Advanced ejection seat for high dynamic pressure
  escape. Wind tunnel test
  [AD-A091810]
                    p0127 N81-13940
Active control of an explosive wing-store flutter
  case
  [MBB-FE-17/S/PUB/25]   p0131 N81-13973
Laser-Raman/Rayleigh flow diagnostic techniques
  applied to subsonic flow
  [AD-A091695]
                    p0133 N81-14275
Transonic wind tunnel tests on an oscillating wing
  with external store. Part 4: The wing with
  underwing: Store
  [AD-A077370]
                    p0139 N81-14969
Wind-tunnel measurements and comparison with
  flight of the boundary layer and heat transfer
  on a hollow cylinder at Mach 3
  [NASA-TP-1789]
                    p0140 N81-14975
Experimental aerodynamic characteristics of two
  V/STOL fighter/attack aircraft configurations at
  Mach numbers from 0.4 to 1.4
  [NASA-TM-81238]
                    p0140 N81-14981
An investigation of support-interference effects
  [NAL-TR-622]   p0141 N81-14984
Development of finite-volume methods for
  three-dimensional transonic flows
  [AD-A090829]   p0141 N81-14986
Finite element method study of
  wing-fuselage-nacelle interactions of a Falcon
  20 type aircraft at Mach = 0.79
                    p0187 N81-15994
Design and experimental verification of a
  transonic wing for a transonic aircraft
                    p0188 N81-16003
Jet wing interference for an overwing engine
  configuration
                    p0188 N81-16008
Experimental study of the interaction between the
  wing of a subsonic aircraft and a nacelle of a
  high by-pass ratio engine
                    p0189 N81-16010
A wind tunnel investigation of the aerodynamic
  characteristics of forward swept wings ---
  supersonic cruise aircraft research
                    p0189 N81-16011
An investigation of a swept wing-body
  configuration with drooped leading edge at low
  and transonic speeds
                    p0189 N81-16012
Aerodynamic interaction between a close-coupled
  canard and a sweptback wing in transonic flow
                    p0189 N81-16013
P-3 Orion fuel-saving modification wind tunnel study
  [AD-A091906]   p0194 N81-16044
Gravimetric investigation of the particle number
  density distribution function in the high speed
  cascade wind tunnel for laser anemometry
  measurements
  [ESA-TT-625]   p0197 N81-16069
A theoretical method for the simulation of
  separation behavior of aircraft external stores
  --- applications to computerized wind tunnel tests
  [MBB-FE-122/S/PUB/16]   p0203 N81-16987
The effects of warhead-induced damage on the
  aeroelastic characteristics of lifting surfaces.
  Volume 2: Aerodynamic effects
  [AD-A093063]   p0209 N81-17046
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 1: Design
  layouts
  [NASA-CR-159819-VOL-1]   p0214 N81-17081
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 2: Tabulated
  aeroynamic data book 1
  [NASA-CR-159819-VOL-2-BK-1]   p0214 N81-17082
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 2: Tabulated
  aerodynamic data book 2
  [NASA-CR-159819-VOL-2-BK-2]   p0214 N81-17083
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 2: Tabulated
  aerodynamic data book 3
  [NASA-CR-159819-VOL-2-BK-3]   p0214 N81-17084
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 3: Graphical
  data book 1
  [NASA-CR-159819-VOL-3-BK-1]   p0214 N81-17085
Model aerodynamic test results for two variable
  cycle engine coannular exhaust systems at
  simulated takeoff and cruise conditions.
  Comprehensive data report. Volume 3: Graphical
  data book 2
  [NASA-CR-159819-VOL-3-BK-2]   p0214 N81-17086
Laser scattering applications development test in
  AEDC tunnel B at Mach number 8
  [AD-A093929]   p0217 N81-17105
The prediction of pressure distributions on an
  arrow-wing configuration including the effect of
  camber, twist, and a wing fin
                    p0243 N81-17984

WIND TUNNEL TESTS CONTD

Analytic development of improved supersonic cruise aircraft based on wind tunnel data
p0244 N81-17989

Flight and tunnel test results of the MDC mechanical jet noise suppressor nozzle
p0245 N81-18000

Technology development status at McDonnell Douglas
p0248 N81-18019

Multicyclic controllable twist rotor data analysis
[NASA-CR-152251] p0249 N81-18028

Development and wind tunnel investigation of three supercritical airfoil profiles for transport aircraft
[NASA-TM-75840] p0249 N81-18030

Improvements in the determination of convective transfers from infrared thermography --- in wind tunnel tests
p0255 N81-18258

Forward velocity effects on fan noise and the suppression characteristics of advanced inlets as measured in the NASA Ames 40 by 80 foot wind tunnel: Acoustic data report
[NASA-CR-152329] p0258 N81-18798

The EET Horizontal Tails Investigation and the EET Lateral Controls Investigation --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19009

Natural laminar flow flight experiment --- Langley 8-Foot Transonic Pressure Tunnel
p0260 N81-19010

KC-135 winglet flight results
p0260 N81-19011

Overview of advanced wing design --- Ames 12-Foot Pressure Tunnel and 11-Foot Transonic Wind Tunnel
p0260 N81-19012

Aeropropulsive characteristics of twin nonaxisymmetric vectoring nozzles installed with forward-swept and aft-swept wings --- in the Langley 16 Foot Transonic Tunnel
[NASA-TP-1778] p0261 N81-19019

Pressure distributions for the GA(W)-2 airfoil with 20% aileron, 25% slotted flap and 30% Fowler flap
[NASA-CR-2948] p0262 N81-19023

Effect of wing-transition location and slotted and unslotted flaps on aerodynamic characteristics of a fighter model at high subsonic speeds --- conducted in langley 8-foot transonic pressure tunnel
[NASA-TM-X-1849] p0262 N81-19024

Wind-tunnel investigation at Mach numbers from 0.25 to 1.01 of a transport configuration designed to cruise at near-sonic speeds --- conducted in langley 8-foot transonic pressure tunnel
[NASA-TM-X-2622] p0262 N81-19025

Experimental and theoretical study of flow fields and store forces in close proximity to a triple ejection rack at transonic speeds
[AD-A094751] p0263 N81-19030

Survey of aircraft icing simulation test facilities in North America
[NASA-TM-81707] p0269 N81-19078

Preliminary wind-tunnel investigation of the effects of engine nacelles on a transport configuration with high lift drag ratios to a Mach number of 1.00
[NASA-TM-82312] p0272 N81-19099

Wind tunnel tests to determine the behavior during ejection of exterior stores at high and low speeds
[DLGR-79-096] p0272 N81-19102

Aerodynamic characteristics of a hypersonic cruise aircraft concept with wing-mounted propulsion systems at Mach numbers of 2.96, 3.96 and 4.63 --- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025

The elaboration of a new family of helicopter blade profiles
[NASA-TM-75907] p0330 N81-20031

Recent progress in V/STOL aircraft technology
[NASA-TM-81281] p0333 N81-20066

Support interference of wind tunnel models: A selective annotated bibliography
[NASA-TM-81909] p0335 N81-20084

A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2] p0337 N81-21018

Low and high speed propellers for general aviation: Performance potential and recent wind tunnel test results
[NASA-TM-81745] p0338 N81-21028

Unsteady pressure measurements during stall and buffeting --- wind tunnel tests
[ESA-TT-641] p0339 N81-21041

Flight safety of Rogallo hang gliders. Theoretical and experimental study of the flight envelope --- wind tunnel tests for flight characteristics
[ESA-TT-634] p0339 N81-21046

Experimental and analytical study on the flutter and gust response characteristics of a torsion-free-wing airplane model --- in the Langley transonic dynamics tunnel
[NASA-CR-159283] p0340 N81-21059

High frequency drive mechanism for an active controls systems aircraft control surface
p0378 N81-22400

Two-dimensional aerodynamic characteristics of the NACA 0012 airfoil in the Langley 8 foot transonic pressure tunnel
[NASA-TM-81927] p0385 N81-23036

Full-scale aerodynamic characteristics of a propellar installed on a small twin-engine aircraft wing panel
[NASA-TM-81285] p0385 N81-23039

Oscillatory flows from shock induced separations on biconvex aerofoils of varying thickness in ventilated wind tunnels
p0386 N81-23056

Preliminary design study of advanced composite blade and hub and nonmechanical control system for the tilt-rotor aircraft. Volume 2: Project planning data
[NASA-CR-152336-2] p0387 N81-23065

Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52
[NASA-TM-81358] p0387 N81-23066

Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport --- SCAT-15F model test in the Langley Transonic Dynamics Tunnel
[NASA-TM-81962] p0388 N81-23071

Aerodynamics, aeroelasticity, and stability of hang gliders. Experimental results --- Ames 7- by 10-ft wind tunnel tests
[NASA-TM-81269] p0423 N81-24025

Comparison of selected lift and sideslip characteristics of the Ayres Thrush S2R-800, winglets off and winglets on, to full-scale wind-tunnel data
[NASA-CR-165710] p0423 N81-24026

A Jet-diffuser ejector for a V/STOL fighter
[NASA-CR-166161] p0428 N81-24064

Canadian studies of wind tunnel corrections for high angle of attack models
p0435 N81-24121

A review of the wall pressure signature and other tunnel constraint correction methods for high angle-of-attack tests
p0435 N81-24122

Expected improvements on high angle of attack model testing
p0436 N81-24123

German activities on wind tunnel corrections
p0436 N81-24124

Icing tunnel tests of a glycol-exuding porous leading edge ice protection system on a general aviation airfoil
[NASA-CR-164377] p0439 N81-25041

Wind tunnel tests of large- and small-scale rotor hubs and pylons
[AD-A098510] p0439 N81-25043

Energy efficient engine, low-pressure turbine boundary layer program
[NASA-CR-165338] p0442 N81-25077

Wind loads on flat plate photovoltaic array fields
[NASA-CR-164454] p0445 N81-25431

Phase 2 and 3 wind tunnel tests of the J-97 powered, external augmentor V/STOL model --- conducted in Ames 40- by 80-foot wind tunnel
[NASA-CR-152380] p0483 N81-26076

Subsonic tests of an all-flush-pressure-orifice air data system
[NASA-TP-1871] p0489 N81-26104

Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control

system
[NASA-TM-83144] p0491 N81-26496
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119] p0492 N81-27046
Aerodynamic investigation of C-141 leading edge modifications for cruise drag reduction, test 2
[AD-A099662] p0492 N81-27051
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[NASA-TM-83143] p0499 N81-27540
Unpowered aerodynamic characteristics of a 15-percent scale model of a twin-engine commuter aircraft
[NASA-TM-81284] p0537 N81-28055
From the civil component program 'IFAS': Fundamentals of engine simulation, using turbopowered simulator (TPS) technology in wind tunnel tests
[BMFT-FB-W-80-030] p0541 N81-28111
Experimental aerodynamic characteristics of two V/STOL fighter/attack aircraft configurations at Mach numbers from 1.6 to 2.0 --- Ames 9 by 7 foot supersonic wind tunnel
[NASA-TM-81286] p0579 N81-30083
Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-30085
Rotor wake characteristics relevant to rotor-stator interaction noise generation
[NASA-TM-82703] p0583 N81-30130
Subsonic pitch-up alleviation on a 74 deg delta wing
[NASA-CR-165749] p0584 N81-30137
Some experiences with active control of aeroelastic response
[NASA-TM-83179] p0587 N81-30469
Determination of aircraft dynamic stability and control parameters from flight testing
p0591 N81-31115
Aircraft design using the National Transonic Facility
p0593 N81-31143
Proposed aeroelastic and flutter tests for the National Transonic Facility
p0593 N81-31144
Preliminary user planning for the NASA National Transonic Facility
p0593 N81-31145
Report of the panel on fluid dynamics
p0593 N81-31146
High lift technology
p0593 N81-31147
Configuration aerodynamics
p0593 N81-31148
High Reynolds number research requirements for space vehicle design
p0593 N81-31151
Report of the panel on theoretical aerodynamics
p0593 N81-31152
Unsteady airloads on oscillating wings in post-stall condition
[DFVLR-FB-81-16] p0594 N81-31158
Wind-tunnel studies of advanced cargo aircraft concepts --- leading edge vortex flaps for drag reduction
[NASA-CR-164833] p0627 N81-32117
On the spanwise uniformity of wind tunnel test data of transonic airfoils
[NAL-TR-665] p0627 N81-32118
Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out of ground effect --- wind tunnel tests
[NASA-TM-80199] p0627 N81-32119
Sting interference effects on the static dynamic and base pressure measurements of the standard dynamics model aircraft at Mach numbers 0.3 through 1.3
[AD-A102612] p0627 N81-32124
Recent progress in V/STOL aircraft technology
p0633 N81-33144
Experimental and theoretical study of three interacting, closely-spaced, sharp-edged 60 deg delta wings at low speeds
[NASA-CR-3460] p0635 N81-33160
Wind tunnel testing of a windshield material or supersonic aircraft
[AD-A103383] p0635 N81-33163

WIND TUNNEL WALLS
Adaptable wind tunnel walls for 2D and 3D model tests
p0014 A81-11671
Wind tunnel wall interference in a test section with ventilated walls
p0015 A81-11673
Lift effect on transonic wind-tunnel blockage
p0066 A81-15883
A wall interference analysis --- in wind tunnels
p0104 A81-17472
The practical application of the Wake Blocking Corrections according to Maskell --- for large wind tunnel models
[DGLR PAPER 80-112] p0121 A81-19398
Numerical simulations of a segmented-plenum, perforated, adaptive-wall wind tunnel
[AIAA PAPER 81-0160] p0162 A81-20640
Studies on Thwaites' method for wind tunnel contraction
p0282 A81-27884
Low-speed wind tunnels with deformable walls
p0299 A81-29304
Adaptive-wall wind-tunnel development for transonic testing
p0352 A81-31367
Further investigations of adaptive-wall wind tunnels
[AD-A091774] p0131 N81-13977
The resonance frequencies of ventilated wind tunnels
[ARC-R/M-3841] p0144 N81-15009
Wind tunnel wall interference
[AD-A093301] p0217 N81-17104
Evaluation of the acoustic and aerodynamic characteristics of several slot-baffle configurations for transonic wind tunnel walls
[AD-A093957] p0217 N81-17106
Model and boundary aerodynamic data from high blockage two-dimensional airfoil tests in a shallow unstreamlined transonic flexible walled test section --- transonic self-streamlining wind tunnel
[NASA-CR-165685] p0343 N81-21087
Wind tunnel corrections for high angle of attack models
[AGARD-R-692] p0435 N81-24120
A review of research at NLR on wind-tunnel corrections for high angle of attack models
p0436 N81-24125
A review of some investigations on wind tunnel wall interference carried out in Sweden in recent years
p0436 N81-24126
Wind tunnel corrections for high angles of attack: A brief review of recent UK work
p0436 N81-24127
Wall interference effects: Status review
p0592 N81-31141

Application of a method for aerodynamic analysis and design of horizontal axis wind turbines, part 1
[FFA-TN-AU-1499-PT-1] p0086 N81-12633
Optimized pitch controller for load alleviation on wind turbines
[FFA-TN-HU-2189-PT-1] p0087 N81-12634
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467
Static deflection and eigenfrequency analysis of the Nibe wind turbine rotors. Theoretical background --- structural vibration
[RISOE-M-2199] p0279 N81-19497
Development and design of a large wind-turbine blade --- fiber reinforced composites
[MBB-UD-301/80-OE] p0586 N81-30158

WINDOWS (APERTURES)
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
Effects of window configuration on model pressure distribution in wind tunnels with perforated walls
[AD-A094213] p0277 N81-19142
Development of a CFC window frame, using short fiber pressing technology --- jet aircraft cabin windows
[BMFT-FB-W-80-032] p0499 N81-27208

WINDPOWER UTILIZATION
Wind speed measurement for wind turbine testing
p0055 A81-13873
Stability of large horizontal-axis axisymmetric wind turbines
[NASA-TM-81623] p0085 N81-12446
Rotor model for verification of computation methods
[ISD-262] p0145 N81-15467

WINDPOWERED GENERATORS
Towing tank tests on model wind turbine rotors
p0055 A81-13860
Stability of large horizontal-axis axisymmetric wind turbines
p0178 A81-22526
Wind tunnel tests of sailwings for Darrieus rotors
p0518 A81-42678
Performance of a steel spar wind turbine blade on the Mod-0 100 kW experimental wind turbine
[NASA-TM-81588] p0043 N81-11448
Definitive generic study for the effect of high lift airfoils on wind turbine effectiveness, executive summary
[SERI/TR-98003-2] p0043 N81-11492
Recent darrieus Vertical-Axis Wind Turbine aerodynamical experiments at Sandia National Laboratories
[SAND-81-1108C] p0588 N81-30615

WINDPOWERED PUMPS
Improving the mechanical load matching of wind energy converters
p0055 A81-13870

WINDS ALOFT
NT JET STREAMS (METEOROLOGY)

WINDSCREENS
U WINDSHIELDS

WINDSHIELDS
Use of similitude in analyzing aircraft windshield anti-icing performance
[AIAA PAPER 79-1022] p0051 A81-13218
Computer analysis of bird-resistant aircraft transparencies
p0175 A81-22087
Techniques for evaluation of aircraft windscreen optical distortion
p0358 A81-32507
Evaluation of the impact computer program as a linear design tool for bird resistant aircraft transparencies
[AD-A091051] p0091 N81-13039
Superhard transparent coating optimization program
[AD-A091083] p0092 N81-13048
F-111 windscreen machining
[Y-2232] p0142 N81-14995
Evaluation of bird load models for dynamic analysis of aircraft transparencies
[AD-A092909] p0204 N81-16995
Potential of optical Fourier analysis for measuring windscreen distortion
[AD-A094127] p0259 N81-18853
Aircraft transparency optical quality: New methods of measurement
[AD-A096183] p0341 N81-21076
Validation of a bird substitute for development and qualification of aircraft tranparencies
[AD-A097736] p0424 N81-24036
Study and evaluation of existing techniques for measuring aircraft windscreen optical quality: Development of new techniques for measuring aircraft windscreen optical distortion
[AD-A097731] p0426 N81-24049
Wind tunnel testing of a windshield material or supersonic aircraft
[AD-A103383] p0635 N81-32163

WING CAMBER
Mission Adaptive Wing research programme
p0227 A81-24057
Unsteady aerodynamic propulsion
[AIAA 81-0645] p0307 A81-29490
Analysis and application of compliant rotor technology
p0467 A81-40006
A study of wing body blending for an advanced supersonic transport
p0244 N81-17987

WING FLAPS
NT LEADING EDGE FLAPS
NT LEADING EDGE SLATS
NT TRAILING-EDGE FLAPS
NT VORTEX FLAPS
Leading-edge 'Vortex Flaps' for enhanced subsonic aerodynamics of slender wings
p0012 A81-11646
The aerodynamics of inverted leading edge flaps on delta wings
[AIAA PAPER 81-0356] p0165 A81-20775
Evaluation of the influence of local disturbances of flow past trailing and leading flaps from wind tunnel data on a rectangular wing section
p0299 A81-29307
Prediction method for aeroacoustic loads on under the wing blown flaps
[AIAA PAPER 81-2038] p0621 A81-48694
A design of multi-element aerofoils for high lift
[NAL-TR-631] p0337 N81-21012

WING FLOW METHOD TESTS
Add fluorescent minitufts to the aerodynamicist's bag of tricks
p0005 A81-11245
High-lift investigations on some small aspect ratio wings
p0011 A81-11643
Winglets development at Israel Aircraft Industries
p0012 A81-11645
Adaptable wind tunnel walls for 2D and 3D model tests
p0014 A81-11671
Transonic flow past a wing profile in channels with permeable walls
p0054 A81-13533
Wing-alone aerodynamic characteristics at high angles of attack
[AIAA PAPER 81-0068] p0157 A81-20532
Calculation of the flow pattern behind an aircraft wing
p0349 A81-31041
Philosophy and results of steady and unsteady test techniques on a large scale transport aircraft model in the ONERA transonic tunnel S1 MA. Part 1: Philosophy and results of steady tests. Part 2: Interest of large models in unsteady aerodynamics
p0190 N81-16019

WING LOADING
Weight optimization of wing structures according to the gradient method
p0012 A81-11650
Circulation Control Wing /CCW/ flight tests
p0122 A81-19469
Effect of transport aircraft wing loads spectrum variation on crack growth
p0172 A81-21738
Research on vortex bursting in compressible flow --- Thesis
p0230 A81-24477
Concerning the motion of a piloted aircraft
p0299 A81-29312
Fatigue sensitivity of composite structure for fighter aircraft
[AIAA 81-0495] p0300 A81-29383
Concepts for improving the damage tolerance of composite compression panels
p0360 A81-32825
Effects of truncation of a predominantly compression load spectrum on the life of a notched graphite/epoxy laminate
p0418 A81-37137
Aerodynamic characteristics of wings of arbitrary planform
p0461 A81-39267
Design, analyses, and model tests of an aeroelastically tailored lifting surface
[AIAA PAPER 81-1673] p0566 A81-45974
Active gust- and maneuver load control concepts, taking into account, as example, the Airbus A300. I - Design of a controller in the temporal domain for the alleviation of gust loads and the control of the effectiveness for stochastic gusts
[DGLR PAPER 81-065A] p0608 A81-47552
Active gust- and maneuver load reduction concepts, taking into account, as an example, the Airbus A300. II - Design of a controller for gust and maneuver load reduction in the frequency range
[DGLR PAPER 81-065B] p0608 A81-47553
Estimation of wing nonlinear aerodynamic characteristics at supersonic speeds
[NASA-TP-1718] p0021 N81-10004
An analytical technique for approximating unsteady aerodynamics in the time domain
[NASA-TP-1738] p0043 N81-11422
Assessment of variable camber for application to transport aircraft
[NASA-CR-158930] p0071 N81-12016
Effects of nonlinearities on wing store flutter
[MBB-FE-17/S/PUB/27] p0131 N81-13974
Transonic wind tunnel tests on an oscillating wing with external store. Part 4: The wing with underwing: Store
[AD-A077370] p0139 N81-14969
Feasibility study for C-141B reduction of wing loads by uprigging the ailerons
[AD-A094634] p0272 N81-19105
Unsteady airloads on a harmonically pitching wing with external store
[NLR-SP-80004-U] p0330 N81-20038
Experimental and analytical study on the flutter and gust response characteristics of a torsion-free-wing airplane model --- in the Langley transonic dynamics tunnel
[NASA-CR-159283] p0340 N81-21059
Additional information about Fighter Aircraft Loading Standard for Fatigue Evaluation (FALSTAFF)
[NLR-TR-79056-U] p0344 N81-21391
Comparison of theoretical predictions of orbiter airloads with wind tunnel and flight test results for a Mach number of 0.52
[NASA-TM-81358] p0387 N81-23066
Application of vortex lattice methods to calculate Lv (rolling moment due to sideslip)
[PB81-166167] p0487 N81-26123
A structural load alleviation control system for a large transport aircraft
[TT-8002] p0541 N81-28106
Fatigue crack growth in 7475-T7651 material under flight simulation loading. Information from a Douglas report --- effect of transport/bomber loads spectrum on crack growth
[VTH-M-392] p0542 N81-28493

WING NACELLE CONFIGURATIONS
Calculation of the flow field around engine-wing-configurations
p0007 A81-11613
Finite element method study of wing-fuselage-nacelle interactions of a Falcon 20 type aircraft at Mach = 0.79
p0187 N81-15994
Experimental study of the interaction between the wing of a subsonic aircraft and a nacelle of a high by-pass ratio engine
p0189 N81-16010
Theoretical and Experimental studies of aerodynamic interference effects --- aerodynamic forces on winglets and on wing nacelle configurations for the YC-14 and KC-135 aircraft
p0190 N81-16017
Aerodynamic characteristics of a hypersonic cruise aircraft concept with wing-mounted propulsion systems at Mach numbers of 2.96, 3.96 and 4.63 --- Langley unitary plan wind tunnel tests
[NASA-TM-81937] p0329 N81-20025
Analysis of Mach number 0.8 turboprop slipstream wing/nacelle interactions
[NASA-CR-166214] p0579 N81-30085

WING OSCILLATIONS
Active flutter suppression design and test - A joint U.S.-F.R.G. program
p0009 A81-11621
A nonlinear, discrete-vortex-perturbation method for unsteady lifting-surface problems with edge separations
p0058 A81-14394
A simplified theory of oscillating aerofoils in transonic flow - Review and extension
p0060 A81-14945
The method of superelements in the dynamics of complex structures
p0101 A81-16969
Experimental study of the snap-through oscillations of an empennage
p0299 A81-29313
Active control of forward swept wings with divergence and flutter aeroelastic instabilities
[AIAA 81-0637] p0306 A81-29491
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[AIAA 81-0639] p0306 A81-29493
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[AIAA 81-0567] p0306 A81-29494
Aerodynamic modeling of an oscillating wing with external stores
[AIAA 81-0648] p0307 A81-29501
Transonic flutter and gust-response tests and analyses of a wind-tunnel model of a torsion-free-wing fighter airplane
[AIAA 81-0650] p0307 A81-29503
A wind-tunnel study of the flutter characteristics of a supercritical wing
p0308 A81-29504

Transonic flutter study of a wind-tunnel model of an arrow-wing supersonic transport
[AIAA 81-0654] p0308 A81-29506
Flight test results of an active flutter suppression system installed on a remotely piloted research vehicle
[AIAA 81-0655] p0308 A81-29507
Application of a flight test and data analysis technique to flutter of a drone aircraft
[AIAA 81-0652] p0308 A81-29511
Influence of hinge line gap on aerodynamic forces acting on a harmonically oscillating thin profile in an incompressible flow. I, II
p0348 A81-30956
Measurement of the aerodynamic forces acting on a harmonically oscillating wing at high subsonic speeds
p0349 A81-31042
Comparison of computed and measured unsteady pressure fields on a supercritical wing
[ONERA, TP NO. 1981-12] p0359 A81-32541
A new method of airfoil flutter control
p0367 A81-33844
Three-dimensional oscillatory piecewise continuous-kernel function method. I - Basic problems. II - Geometrically continuous wings. III - Wings with geometrical discontinuities
p0411 A81-35631
Measurement of derivatives for an oscillating airfoil with flap
p0411 A81-35635
Concerning one self-similarity property in flutter analysis
p0413 A81-36464
A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings
[AIAA PAPER 81-1876] p0561 A81-44570
Evaluation of two-dimensional subsonic oscillatory airforce coefficients and loading distributions
p0617 A81-48480
Results of oscillatory pitch and ramp tests on the NACA 0012 blade section
[ARA-MEMO-220] p0090 N81-13024
Unsteady wakes downstream from a profile oscillating in incidence --- aerodynamic flow tests on helicopter rotor blade profiles
[AAAF-NT-80-10] p0204 N81-16989
An asymptotic unsteady lifting-line theory with energetics and optimum motion of thrust-producing lifting surfaces
[NASA-CR-165679] p0385 N81-23035
Experimental studies of scale effects on oscillating airfoils at transonic speeds
p0386 N81-23054
Some remarks on the unsteady airloads on oscillating control surfaces in subsonic flow
p0386 N81-23055
Airplane wing vibrations due to atmospheric turbulence
[NASA-CR-3431] p0438 N81-24679
Unsteady airloads on oscillating wings in post-stall condition
[DFVLR-FB-81-16] p0594 N81-31158

WING PANELS
Simulated aircraft takeoff performance with frosted wings
[AIAA PAPER 81-0404] p0167 A81-20811
Flow visualization through the use of the smoke-wire technique
[AIAA PAPER 81-0412] p0168 A81-20816
Graphite polyimide fabrication research for supersonic cruise aircraft
p0182 A81-22665
Vibrations of multispan stiffened plates via modified Bolotin method
p0241 A81-26954
Aerodynamic surface cooling for laminar flow control for hydrogen-fueled subsonic aircraft
[SAE PAPER 801155] p0407 A81-34245
The optimum design of non-moment laminated composite plate - According to static failure strength condition
p0480 A81-40449
A-7 composite outer wing service experience
p0530 A81-43617
Sliding-seal electron beam slot welding of an aircraft wing closure beam
p0614 A81-48142
The effect of the skewness of the skin panels on stresses in conical wings
p0625 A81-49930
Flight simulation environmental fatigue crack propagation in 2024-T3 and 7475-T761 aluminum --- wing panels for transport aircraft
[NLR-MP-80003-U] p0043 N81-11415

Transonic swept wings studied by the lifting-line
theory
p0509 A81-41090
Transonic wing design using potential-flow codes -
Successes and failures
[SAE PAPER 810565] p0518 A81-42730
Effects of wingtip modifications on handling
qualities of agricultural aircraft
[SAE PAPER 810606] p0522 A81-42763
Surface-oriented coordinates for boundary-layer
calculations in the case of general configurations
[DGLR PAPER 81-014] p0608 A81-47557
Geometrically nonlinear theory for calculating
thin rods of a wing profile
p0625 A81-49935
Measured pressure distributions and shock shapes
on a Butler wing
[CUED/A-AERO/TR-9] p0090 N81-13026
Development of finite-volume methods for
three-dimensional transonic flows
[AD-A090829] p0141 N81-14986
A system for aerodynamic design and analysis of
supersonic aircraft. Part 4: Test cases
[NASA-CR-3354] p0185 N81-15977
A constrained inverse method for the aerodynamic
design of thick wings with given pressure
distribution in subsonic flow
p0188 N81-16006
Design study for the inner wing of a transonic
wing-body combination of aspect ratio 8
p0190 N81-16015
Development and wind tunnel investigation of three
supercritical airfoil profiles for transport
aircraft
[NASA-TM-75840] p0249 N81-18030
The elaboration of a new family of helicopter
blade profiles
[NASA-TM-75907] p0330 N81-20031
Experimental flutter at high subsonic speeds and
its theoretical prediction, taking into account
wing thickness and Reynolds number
p0385 N81-23052
Civil component program Wing Section. Transonic
wing development --- for the european airbus
[BMFT-FB-W-80-021] p0426 N81-24052
Civil component program Wing Section. The design
of the transonic airfoil Va 2
[BMFT-FB-W-80-023] p0426 N81-24053
The supercritical profile of the supercritical wing
[NASA-TM-76605] p0494 N81-27075
WING ROOTS
Some characteristics of subsonic flow over the
root area of a sweptback wing
p0123 A81-19633
Effect of impact damage on the XFV-12A composite
wing box
p0182 A81-22676
Solar powered aircraft
[NASA-CASE-LAR-12615-1] p0620 N81-32138
WING SLATS
U LEADING EDGE SLATS
WING SLOTS
The performance of slotted blades in cascade
p0002 A81-10632
Determination of the effect of transverse cutouts
on the hydrodynamic characteristics of a
finite-span wing in the case of steady and
unsteady motion near a wall
p0119 A81-19335
On the unsteady wake-induced lift on a slotted
airfoil. II - The influence of displacement
thickness fluctuations
p0229 A81-24237
Effect of wing-transition location and slotted and
unslotted flaps on aerodynamic characteristics
of a fighter model at high subsonic speeds ---
conducted in langley 8-foot transonic pressure
tunnel
[NASA-TM-X-1849] p0262 N81-19026
WING SPAN
A finite-span wing in transonic flow
p0054 A81-13741
Steady flow past a rectangular wing with
circulation that is variable along the span
p0099 A81-16551
Spanwise distribution of control points in the
method of finite elementary solutions
[AIAA PAPER 79-1879] p0169 A81-21011
Vibrations of multispan stiffened plates via
modified Bolotin method
p0241 A81-26954
Wing with finite span in a transonic flow
p0420 A81-37480

WING TANKS
Report on a cooperative programme on Active Flutter Suppression
[AGARD-R-689] p0082 N81-12115
Wind tunnel test of a fighter aircraft wing/store flutter suppression system: An international effort
p0082 N81-12116
Active control of an explosive wing-store flutter case --- Langley Research Center
p0082 N81-12117
Wind tunnel tests on a fighter aircraft wing/store flutter suppression system: The B.Ae control law
p0083 N81-12119
A study of the effects of store aerodynamic on wing/store flutter
p0490 N81-26153

WING TIP VORTICES
Method for reducing the tangential velocities in aircraft trailing vortices
p0066 A81-15880
The static pressure in a vortex core
p0228 A81-24072
On a generalization of Kaden's problem --- of initially planar semi-infinite vortex sheet rollup
p0288 A81-28676
Co-axial rotor aerodynamics in hover
p0465 A81-39899
Vortex drag reduction by diffusing vanes - Design for the 'Thrush' agricultural aircraft
[SAE PAPER 810605] p0521 A81-42762
Investigations of vortex formation on wings with cropped leading edges
[DGLR PAPER 81-046] p0610 A81-47601

WING TIPS
Application of a tip-fin controller to the Shuttle Orbiter for improved yaw control
[AIAA PAPER 81-0074] p0159 A81-20582
Effects of wingtip modifications on handling qualities of agricultural aircraft
[SAE PAPER 810606] p0522 A81-42763
Full scale visualization of the wing tip vortices generated by a typical agricultural aircraft
[NASA-CR-159382] p0071 N81-12019
Wingtip vortex turbine
[NASA-CASE-LAR-12544-1] p0496 N81-27096

WING-FUSELAGE STORES
A study of the effect of store aerodynamics of wing/store flutter
[AIAA 81-0604] p0304 A81-29467
Evaluation of methods for prediction and prevention of wing/store flutter
[AIAA 81-0606] p0304 A81-29469
Flow phenomena along fuselages and wing-fuselage systems of gliders
[NASA-TM-75401] p0186 N81-15983
Demonstration of a method for determining critical store configurations for wing store flutter
[AD-A092257] p0197 N81-16068
A theoretical method for the simulation of separation behavior of aircraft external stores --- applications to computerized wind tunnel tests
[MBB-FE-122/S/PUB/16] p0203 N81-16987
A study of the effects of store aerodynamic on wing/store flutter
p0490 N81-26153

WINGLETS
Winglets development at Israel Aircraft Industries
p0012 A81-11645
Aeroelastic tailoring of a composite winglet for KC-135
[AIAA 81-0607] p0304 A81-29470
The calculation of lift and drag characteristics of subsonic wings with winglets
p0480 A81-40442
Flight evaluation of the effect of winglets on performance and handling qualities of a single-engine general aviation airplane
[NASA-TM-81892] p0071 N81-12012
Induced drag ideal efficiency factor of arbitrary lateral-vertical wing forms
[NASA-CR-3357] p0072 N81-12022
Theoretical and Experimental studies of aerodynamic interference effects --- aerodynamic forces on winglets and on wing nacelle configurations for the YC-14 and KC-135 aircraft
p0190 N81-16017
Advanced aerodynamics and active controls. Selected NASA research
[NASA-CP-2172] p0259 N81-19001
KC-135 winglet flight results
p0260 N81-19011
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119] p0492 N81-27046

Numerical optimization - An assessment of its role in transport aircraft aerodynamic design through a case study
p0006 A81-11606
Advanced combat aircraft wing design
p0007 A81-11608
Linear vortex theories of a profile and wing with air intake
p0019 A81-12703
Application of fracture mechanics in designing lower wing skin of transport aircraft
p0102 A81-17049
Adaptive airfoils and wings for efficient transonic flight
p0153 A81-20349
An analysis of gap effects on wing-elevon aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-20703
Damping of aircraft wing vibrations by automatically controlled internal forces
p0170 A81-21060
On the use of complex form of the Strouhal number in the study of nonlinear aeroelasticity
p0231 A81-24723
The Coronel Transverse Wing Flight system
p0231 A81-24748
Numerical study of stream surface structure near highly loaded wings
p0235 A81-25682
Wing flapping with minimum energy
p0283 A81-27809
The effect of jet non-uniformity on the lift of an augmentor wing
p0298 A81-29144
Aerodynamic efficiency of the wing of new technology, a comparison of design expectation and flight test result
p0450 A81-37645
Application of BFRP Crack Patching to Mirage III aircraft
p0481 A81-40506
Effect of engine noise on aircraft wing laminar boundary-layer stability
p0510 A81-41255
Evolution of transport wings - From C-130, C-141, and C-5 to C-XX
p0510 A81-41333
Composite Wing/Fuselage Program
p0530 A81-43629
Automatic damping of vibrations of an airplane wing by internal control forces
p0577 A81-46783
Model design and instrumentation for intermittent cryogenic wind tunnels
p0037 N81-11058

Low drag airfoil design utilizing passive laminar flow and coupled diffusion control techniques
[AD-A090778]
p0072 N81-12024
Aircraft accident report: Allegheny Airlines, Inc., Nord 262, Mohawk/Frakes 298, N29824, Benedum Airport, Clarksburg, West Virginia, February 12, 1979
[NTSB-AAR-79-12]
p0073 N81-12044
Optimal design studies on composite wings with static and dynamic constraints
[AAAF-NT-79-29]
p0077 N81-12077
Aeroelastic optimization with multiple constraints
[AD-A090775]
p0085 N81-12451
Jet wing interference for an overwing engine configuration
p0188 N81-16008
A method for the prediction of wing response to nonstationary buffet loads
[AD-A093037]
p0208 N81-17043
Comparison of flight load measurements obtained from calibrated strain gages and pressure transducers
[AD-A093758]
p0208 N81-17044
Continued development and correlation of analytically based weight estimation codes for wings and fuselages
[NASA-CR-152331]
p0251 N81-18044
Description of the HiMAT Tailored composite structure and laboratory measured vehicle shape under load
[NASA-TM-81354]
p0251 N81-18047
Investigation of EMAT Lamb system for the detection of bolt hole type cracks. Part 2: Reliability evaluation and system definition for detection of cracks under fasteners by EMATs
[AD-A094350]
p0258 N81-18420
Overview of advanced wing design --- Ames 12-Foot Pressure Tunnel and 11-Foot Transonic Wind Tunnel
p0260 N81-19012
Application of a structural optimization procedure for advanced wings
[AGARD-R-691]
p0333 N81-20064
A study of high-altitude manned research aircraft employing strut-braced wings of high-aspect-ratio
[NASA-CR-159262]
p0333 N81-20067
The prediction of normal force and rolling moment coefficients for a spinning wing
[NASA-CR-165680]
p0333 N81-20068
A study of a VTOL thrusting ejector in low speed flight, volume 1
[NASA-CR-166137-VOL-1]
p0337 N81-21017
A study of a VTOL thrusting ejector in low speed flight, volume 2
[NASA-CR-166137-VOL-2]
p0337 N81-21018
Structural flight loads simulation capability, volume 1
[AD-A096572]
p0374 N81-22044
Structural flight loads simulation capability. Volume 2: Structural analysis computer program user's manual
[AD-A096594]
p0375 N81-22045
The development of a theoretical and experimental model for the study of active suppression of wing flutter
p0376 N81-22058
An asymptotic unsteady lifting-line theory with energetics and optimum motion of thrust-producing lifting surfaces
[NASA-CR-165679]
p0385 N81-23035
Aircraft wing weight build-up methodology with modification for materials and construction techniques
[NASA-CR-166173]
p0387 N81-23068
Evaluation of a pneumatic boot deicing system on a general aviation wing model
[NASA-TM-82363]
p0441 N81-25065
Aerodynamic analysis of a fighter aircraft with a higher order paneling method
[AD-A099404]
p0483 N81-26082
Qualitative comparison of calculated turbulence responses with wind-tunnel measurements for a DC-10 derivative wing with an active control system
[NASA-TM-83144]
p0491 N81-26496
Design and wind tunnel tests of winglets on a DC-10 wing
[NASA-CR-3119]
p0492 N81-27046
The supercritical profile of the supercritical wing
[NASA-TM-76605]
p0494 N81-27075
Protection against wing icing for Airbus A300 and A310
[NASA-TM-76584]
p0494 N81-27079
Wing-alone aerodynamic characteristics for high angles of attack of supersonic speeds
[NASA-TP-1889]
p0579 N81-30087
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675]
p0580 N81-30091
Investigation of unsteady airloads on wings with oscillating control for active control purposes
[AGARD-R-699]
p0635 N81-33161
Evaluation of pressure and thermal data from a wind tunnel test of a large-scale, powered, STOL fighter model
[NASA-CR-166170]
p0635 N81-33162
A flight test evaluation of the Ball-Bartoe jetwing propulsive lift concept
[AD-A103579]
p0637 N81-33195

WIRE
Civil helicopter wire strike assessment study. Volume 2: Accident analysis briefs
[NASA-CR-152390]
p0023 N81-10019
Practical aspects of instrumentation installation in support of subsystem testing
p0546 N81-29090

WIRING
Electric installation work on aircraft --- Russian book
p0577 A81-46794

WIRING SYSTEMS
U WIRING

WORK CAPACITY
Maximizing the capacity of a single-runway airport
p0177 A81-22193

WORK HARDENING
NT STRAIN HARDENING
Increasing the strength properties of sheet parts by explosive forming of them with optimization of the production parameters
p0365 A81-33174

WORKING FLUIDS
Efficiency prediction for axial-flow turbines operating with nonconventional fluids
[ASME PAPER 81-GT-15]
p0310 A81-29937

WORKLOADS (PSYCHOPHYSIOLOGY)
An information-processing interpretation of air traffic control stress
p0053 A81-13416
RNAV benefits today - Today and future requirements
p0111 A81-18056
Investigation of control, display, and crew-loading requirements for helicopter instrument approach
[AIAA 81-1820]
p0555 A81-44110
Investigation of the physical working environment for cabin attendants within Scandinavian Airlines System /SAS/ --- noise conditions and aircraft vibration
p0568 A81-46357

WRAPAROUND CONTACT SOLAR CELLS
U SOLAR CELLS

X

X BAND
U SUPERHIGH FREQUENCIES

X RAY APPARATUS
X-ray pulse method for investigation of the internal structure of a fuel jet
p0059 A81-14592

X RAY FLUORESCENCE
X-ray fluorescence spectrometric analysis of wear metals in used lubricating oils
[AD-A097552]
p0390 N81-23087

X RAY INSPECTION
U. of Dayton uses X-rays to study impact patterns at ballistic ranges
p0453 A81-37798

X RAY SPECTROGRAPHY
U X RAY SPECTROSCOPY

X RAY SPECTROMETRY
U X RAY SPECTROSCOPY

X RAY SPECTROSCOPY
X-ray fluorescence spectrometric analysis of wear metals in used lubricating oils
[AD-A097552]
p0390 N81-23087

X WING ROTORS
Acoustics of rotors utilising circulation control

[AIAA PAPER 81-0092] p0160 A81-20596
Application of an aerodynamic configuration modeling technique to the design and analysis of X-Wing aircraft configurations
p0356 A81-32013
Recent progress in performance prediction of high advance ratio circulation controlled rotors
p0468 A81-40100
X-wing stability and control development and wind tunnel demonstration tests - Helicopter, conversion, and fixed wing flight
[AHS 80-27] p0475 A81-40157
A preliminary divergence and flutter evaluation of an X-wing aircraft
[AIAA PAPER 81-1671] p0534 A81-43945
XBQM-106A AIRCRAFT
U VATOL AIRCRAFT
XJ-79-GE-1 ENGINE
U J-79 ENGINE
XV-15 AIRCRAFT
The XV-15 tilt rotor research aircraft
p0100 A81-16588
The XV-15 - An initial Navy look
[AIAA PAPER 81-0155] p0161 A81-20635
In-flight structural dynamic characteristics of the XV-15 tilt rotor research aircraft
[AIAA 81-0612] p0304 A81-29474
An operational tilt-rotor this decade
p0309 A81-29774
Mission potential of derivatives of the XV-15 tilt rotor research aircraft
[AHS 80-11] p0474 A81-40144
The XV-15 tilt rotor research aircraft
[NASA-TM-81244] p0026 N81-10054
V/STOLAND digital avionics system for XV-15 tilt rotor
[NASA-CR-152320] p0375 N81-22047
Preliminary design study of advanced composite blade and hub and nonmechanical control system for the tilt-rotor aircraft. Volume 1: Engineering studies
[NASA-CR-152336-1] p0387 N81-23064
Preliminary design study of advanced composite blade and hub and nonmechanical control system for the tilt-rotor aircraft. Volume 2: Project planning data
[NASA-CR-152336-2] p0387 N81-23065

Y

YAW
Application of a tip-fin controller to the Shuttle Orbiter for improved yaw control
[AIAA PAPER 81-0074] p0159 A81-20582
Effects of yaw on leading edge vortex flap aerodynamics
[AIAA PAPER 81-1660] p0526 A81-43147
The flying qualities of aircraft with actively augmented pitch and yaw stability
[ARC-R/M-3848] p0082 N81-12113
Thrust augmented spin recovery device
[NASA-CASE-LAR-11970-2] p0275 N81-19130
Results of a feasibility study for determining the yaw angle of a landing aircraft
[AD-A099765] p0495 N81-27084
Influence of friction forces on the motion of VTOL aircraft during landing operations on ships at sea
[NASA-TM-81305] p0579 N81-30080
Generalized dynamic stability for linearized yawing motion --- The stability of spinning projectiles
[RMCS-80002] p0601 N81-31225
YAWING MOMENTS
An introduction to dynamic derivatives (3) methods of oscillating models in pitch and yaw in a £30 by 810 millimetre transonic wind tunnel
[ARL/AERO-NOTE-390] p0021 N81-10007
A piloted simulator investigation of static stability and stability/control augmentation effects on helicopter handling qualities for instrument approach
[NASA-TM-81188] p0029 N81-10077
Static and yawed-rolling mechanical properties of two type 7 aircraft tires
[NASA-TP-1863] p0437 N81-24471

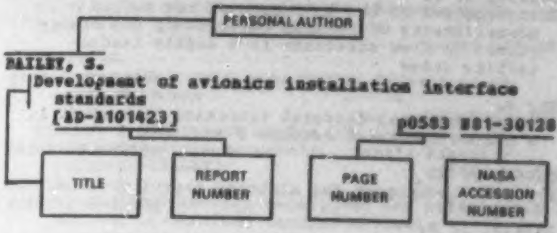
PERSONAL AUTHOR INDEX

AERONAUTICAL ENGINEERING/ *A Continuing Bibliography*
1981 Cumulative Index

JANUARY 1982

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g. NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e.g. p0261 N78-19125. Under any one author's name the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

A

AARON, J. D., JR.
Development and evaluation of a prototype in-flight instrument flight rules (IFR) procedures trainer
[NASA-TM-73292] p0490 N81-26156

ABBEY, H. J.
Design options study. Volume 1: Executive summary
[AD-A089536] p0027 N81-10056
Design options study. Volume 2: Approach and summary results
[AD-A089537] p0027 N81-10057
Design options study. Volume 3: Qualitative assessment
[AD-A089538] p0027 N81-10058
Design options study. Volume 4: Detailed analyses supporting appendices
[AD-A089539] p0027 N81-10059

ABBINK, F. J.
Navaids calibration evaluation with a computer-controlled avionics data acquisition system
p0383 N81-23020

ABBOTT, J. L.
Computer generated radar images for navigation
p0049 A81-12793

ABBOTT, J. M.
Low-speed aerodynamic performance of 50.8-centimeter-diameter noise-suppressing inlets for the Quiet, Clean, Short-haul Experimental Engine (QCSEE)
[NASA-TP-1178] p0035 N81-11037

ABBOTT, T. S.
Effect of display size on utilization of traffic situation display for self-spacing task
[NASA-TP-1885] p0586 N81-29109

ABDEL AZIM, A. F.
Particulate flow in centrifugal compressors used in helicopters
p0297 A81-29109

ABEL, I.
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[AIAA 81-0639] p0306 A81-29493
Application of a flight test and data analysis technique to flutter of a drone aircraft
[AIAA 81-0652] p0306 A81-29511
Langley Research Center contributions in advancing active control technology
p0259 N81-19002
Wind-tunnel evaluation of NASA developed control laws for flutter suppression on a DC-10 derivative wing
[NASA-TM-83143] p0499 N81-27580
Some experiences with active control of aeroelastic response
[NASA-TM-83179] p0587 N81-30469
A method for obtaining reduced-order control laws for high-order systems using optimization techniques
[NASA-TP-1876] p0589 N81-30851

ABELKIS, P. R.
Effect of transport aircraft wing loads spectrum variation on crack growth
p0172 A81-21738

ABELL, E. E.
Prediction of future test needs, test facilities and procedures
p0433 N81-24104

ABELSON, L. C.
Mobilization of trauma teams for aircraft disasters
p0053 A81-13514
Passenger survival in wide-bodied jet aircraft accidents vs. other aircraft - A comparison
p0054 A81-13515

ABERNATHY, J. M.
An analysis of gap effects on wing-elevon aerodynamic characteristics
[AIAA PAPER 81-0364] p0166 A81-20783
An aerodynamic analysis of deformed wings in subsonic and supersonic flow
[AD-A101675] p0580 N81-30091

ABRAHAM, N.
Analysis, design and simulation of line scan aerial surveillance systems
p0357 A81-32492

ABRAIMOV, N. V.
Mechanical properties of aluminum coatings on heat-resistant steels
p0355 A81-31668

ABRAMS, C. R.
New Navy programs for development of integrated inertial sensors
p0405 N81-26108

ABRAMS, R.
Supersonic aircraft test experience - Test techniques and data analysis methods
p0419 A81-37299

ABRAMSON, J.
Optimization theory applied to higher harmonic control of circulation controlled rotors
p0571 A81-46606

ABSHAEV, M. T.
Operational radar display of the structure of thunderstorm hail clouds
p0069 A81-16474

ACE, R. E.
Candidate CDTI procedures study
[NASA-CR-165673] p0373 N81-22032

ACKERMANN, J.
Robust control system design
p0042 N81-11275

ACKERMANS, P. E.
High-level languages in affordable aircraft simulators
p0154 A81-20410

ADACHI, T.
The effect of sound on the vortex-shedding from a circular cylinder - Acoustical vibrations directed along axis of cylinder
p0233 A81-25312
Study of the secondary flow in the downstream of a moving blade row in an axial flow fan
p0355 A81-31767

On the numerical analysis of stall flutter in turbine cascade p0613 A81-47963
ADAM, C. F.
Preliminary Airworthiness Evaluation (PAE 1) of the YCH-47D helicopter [AD-A092633] p0194 N81-16046
ADAM, E. C.
F/A-18 Hornet Crew Station p0327 A81-30355
ADAM, P.
Pilot installations for deposition techniques in the case of components exposed to heat and for diffusion joining of power plant components p0449 A81-37634
ADAMCZYK, J.
Full potential solution of transonic quasi-3-D flow through a cascade using artificial compressability [NASA-TM-81637] p0140 N81-14980
ADAMCZYK, J. J.
Inlet flow distortion in turbomachinery [ASME PAPER 80-GT-20] p0109 A81-17952
Supersonic stall flutter of high-speed fans [ASME PAPER 81-GT-184] p0317 A81-30078
Supersonic stall flutter of high speed fans [NASA-TM-81613] p0140 N81-14978
ADAMS, J. J.
Simulator study of conventional general aviation instrument displays in path-following tasks with emphasis on pilot-induced oscillations [NASA-TP-1776] p0142 N81-14997
Simulator evaluation of separation of display parameters in path-following tasks [NASA-TP-1915] p0638 N81-33203
ADAMS, J. W., JR.
Application of scheduling heuristics on the aircraft maintenance depot [AD-A094815] p0261 N81-19015
ADAMS, M. L.
Nonlinear rotor dynamics analysis p0257 N81-18405
ADAMS, R. J.
Multivariable control synthesis program: Control aspects of the F100 altitude demonstration of the multivariable control system [AD-A093868] p0216 N81-17095
National icing facilities requirements investigation [AD-A102520] p0602 N81-31238
ADAMS, W. M., JR.
A digital program for calculating the interaction between flexible structures, unsteady aerodynamics and active controls [NASA-TM-80040] p0498 N81-27115
ADAMSON, W. M.
Prop-Fan technical progress leading to technology readiness [AIAA PAPER 81-0810] p0367 A81-33878
ADCOCK, J. B.
Measurement of recovery temperature on an airfoil in the Langley 0.3-m transonic cryogenic tunnel [AIAA PAPER 81-1062] p0459 A81-39074
A fan pressure ratio correlation in terms of Mach number and Reynolds number for the Langley 0.3 meter transonic cryogenic tunnel [NASA-TP-1752] p0021 N81-10005
ADDY, A. L.
Effects of axisymmetric sonic nozzle geometry on Mach disk characteristics p0110 A81-18022
ADICOFF, A.
Vanadium trineodecanoate promoter for fiberglass-polyester soil surfacings [AD-A091785] p0132 N81-14084
ADKINS, A.
Active beacon collision avoidance logic evaluation. Volume 1: Mode C equipped (ATCRBS) threat phase [AD-A102163] p0595 N81-31181
ADKINS, L. A.

Integrated noise model - The Federal Aviation Administration's computer program for predicting noise exposure around an airport
p0568 A81-46354

CONNOR, T. H.
Evaluation of safety programs with respect to the causes of general aviation accidents. Volume 2:

Appendices
[AD-A089181] p0023 N81-10023
CONRAD, R. W.
Reliability assurance of electronic engine controls
[AIAA PAPER 81-1499] p0506 A81-40911
CONSTANT, E. W., II
The origins of the turbojet revolution
p0068 A81-16248

CONTI, D. K.
Model-based scene matching
p0461 A81-39349

CONVERSE, G. L.
Turbine modeling technique to generate off-design performance data for both single and multistage axial-flow turbines
[NASA-CR-165244] p0213 N81-17078
COOK, C. R.
Isothermal forging of fan blades
[AIAA PAPER 81-1405] p0503 A81-40862
COOK, F.
Staring infrared mosaic observation of an F-15 aircraft
p0463 A81-39636

COOK, F. J.
The reconstruction/refiltering approach to Kalman filter evaluation
p0326 A81-30339

COOK, J. P.
Sealing joints and cracks, thin resurfacing, and locating voids under concrete slabs
[PB80-215635] p0132 N81-14182
COOK, R. S.
Heat pipe avionic cooling
p0326 A81-30343

COOLES, H. D.
Critical research issues and visual system requirements for a V/STOL training research simulator
[AD-A092561] p0198 N81-16072
COOLEY, D. E.
Evaluation of methods for prediction and prevention of wing/store flutter
[AIAA 81-0606] p0304 A81-29469
COOMBS, M. G.
New developments in compact plate-fin heat exchangers
p0613 A81-48062

COONAN, J. R.
Visual confirmation (VICON) of voice take-off clearance of cost-and-deployment analyses and strategies
[AD-A091007] p0091 N81-13038
COONEY, D. E.
Lear fan propulsion system
[SAE PAPER 800699] p0062 A81-15332
COONROD, J.
Flat panel display technology review
p0211 N81-17065

COOPER, G. C.
Combustion in high speed air flows
[AD-A102336] p0602 N81-31320
COOPER, G. K.
A FANSONIC Navier-Stokes solver
[AIAA PAPER 81-1195] p0454 A81-38077
An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NACA 64A010 airfoils
p0249 N81-18024

COOPER, L. P.
Supercritical fuel injection system
[NASA-CASE-LEW-12990-1] p0549 N81-29129
COOPER, W. C.
Nonhoneycomb composite skin stabilization - A solution to high costs of maintenance
p0559 A81-44396

COPES, R. E., III
En route discrete address beacon system/air traffic control (Build 1) technical testing
[AD-A103894] p0636 N81-33183
COPLIN, J. F.
The future of civil turbo-fan engines
[PNR-90034] p0130 N81-13964
COPPI, CH.
The Grumman Aerospace and Gulfstream American Gulfstream III case study in aircraft design
p0101 A81-16720

COPPS, E. M.
Optimal processing of GPS signals
p0512 A81-41761

CORAZZA, G.
Precision DME for microwave landing system
p0578 A81-47125

CORBETTA, G.
Dynamics and calculations for an aircraft landing gear pneumatic shock absorber system
p0417 A81-36718

CORBIN, J. C., JR.
Electrical/electromagnetic concerns associated with advanced composite materials in aerospace systems
p0530 A81-43630

Observing lightning from ground-based and airborne stations
p0136 N81-14566

CORD, T. J.
IFFC flying qualities simulation
[AIAA 81-1821] p0555 A81-44111
CORDA, S.
Numerical lifting line theory applied to drooped leading-edge wings below and above stall
p0066 A81-15881

CORDELL, T. M.
Fiber-reinforced composites - The future for aeropropulsion
[AIAA PAPER 81-1713] p0527 A81-43164
CORDIE, F.
Design to cost and new technologies
p0120 A81-19347

Design-to-cost and new technologies
p0046 N81-11913

CORDING, R. W.
Reliability assurance of electronic engine controls
[AIAA PAPER 81-1499] p0506 A81-40911
CORIAT, H.
Status report - Global Positioning System
p0511 A81-41752

CORKE, T. C.
Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
p0239 A81-26508

Modification in drag of turbulent boundary layers resulting from manipulation of large-scale structures
[NASA-CR-3444] p0587 N81-30392
CORLISS, L. D.
A flight investigation of static stability, control augmentation, and flight director influences on helicopter IFR handling qualities
p0574 A81-46623

A preliminary flight investigation of cross-coupling and lateral damping for nap-of-the-earth helicopter operations
p0574 A81-46626

CORLISS, W. R.
Wind Tunnels of NASA
[NASA-SP-440] p0629 N81-32153
CORMERY, G.
Contribution of technological progress to energy savings and conservation to the design of new aircraft
p0464 A81-39695

CORN, P. B.
Aircraft and environmental factors influencing lightning strike
[AIAA PAPER 81-0084] p0160 A81-20589
CORNETT, J. E.
Integrated control system for a gas turbine engine
[NASA-CASE-LEW-12594-2] p0274 N81-19116
CORNETTE, W. M.
Test facility for the measurement of infrared radiation from jet engine exhaust systems
p0462 A81-39503

CORNEY, J. M.
The development of multiple redundant flight control systems for high integrity applications
p0284 A81-27983

CORONEL, P. D.
The Coronel Transverse Wing Flight system
p0231 A81-24788

CORREA, S. M.
Inflight aircraft vibration modes and their effect on aircraft radar cross section
p0352 A81-31370

CORREGE, G.
Quality in design
[SNIAS-802-111-108] p0427 N81-24

CORSIGLIA, V. R.
Full-scale study of the cooling system aerodynamics of an operating piston engine installed in a light aircraft wing panel
[SAE PAPER 810623] p0523 A81-42777
Full-scale aerodynamic characteristics of a propellar installed on a small twin-engine aircraft wing panel
[NASA-TM-81285] p0385 N81-23039

CORT, A.
Flight evaluation of a helmet mounted LED matrix display in a Lynx helicopter

Use of atmospheric electric fields for vertical stabilization and terrain avoidance
[AIAA 81-1848] p0556 A81-44126

WIBERLEY, S. E.
Composite structural materials
[NASA-CR-163946] p0207 N81-17039
Composite structural materials
[NASA-CR-164634] p0541 N81-28176

WICHMANN, S.
Requirements, technology and configuration evaluation for Crash Survivable Flight Data Recording (CSFDR) system
[AD-A097863] p0427 N81-24059

WICKEL, E.
Design to cost and systems, LCC
p0047 N81-11920

WICKENHEISER, T. J.
Comparisons of four alternative powerplant types for future general aviation aircraft
[NASA-TM-81584] p0028 N81-10067

WIDING, E.
A study of the air inlet efficiency of a combat aircraft concept with dorsal inlet
p0008 A81-11615

WIDMANN, L.
Advanced composite aircraft electromagnetic design and synthesis
[AD-A096291] p0341 N81-21069

WIDNER, N.
Analyst/IAP interface and interactive graphics
p0057 A81-14270

WIENER, E. L.
Midair collisions - The accidents, the systems, and the Realpolitik
p0052 A81-13413
Human Factors of Flight-deck Automation: NASA/Industry Workshop
[NASA-TM-81260] p0191 N81-16022

WILBECK, J. S.
The development of a substitute bird model
[ASME PAPER 81-GT-23] p0311 A81-29939

WILBY, E. G.
Analytical prediction of the interior noise for cylindrical models of aircraft fuselages for prescribed exterior noise fields. Phase 1: Development and validation of preliminary analytical models
[NASA-CR-159363] p0258 N81-18799

WILBY, J. F.
Noise abatement technology options for conventional turboprop airplanes
[AD-A101828] p0589 N81-30910

WILBY, P. G.
The aerodynamic characteristics of some new RAE blade sections, and their potential influence on rotor performance
p0004 A81-10769

WILCOX, R. T.
Real-time fluoroscopic imaging system for honeycomb bond structures
p0529 A81-43563

WILCZYNSKI, J.
Eddy viscosity in accelerated and retarded cascade-wake flows
p0233 A81-25267

WILDERMUTH, E.
A new helicopter map display device BKG-5
p0418 A81-36967

WILDGOOSE, P.
Metallurgical aspects of materials processing and manufacturing for aero-engine components
[PNR-90019] p0084 N81-12209

WILES, J. A.
Air-to-air gunnery systems test and evaluation
p0544 N81-29073

WILHELM, K.
DFVLR-dynamic model testing in wind tunnels for active controls research
p0014 A81-11670
An analytical study of landing flare
[DFVLR-FB-79-40] p0027 N81-10062
Investigation of landing flare in the presence of wind shear
[ESA-TT-631] p0077 N81-12080

WILHITE, A. W.
The Aerospace Vehicle Interactive Design system
[AIAA PAPER 81-0233] p0234 A81-25475

WILKINSON, S. P.
Hybrid suction surface for turbulent boundary layer flow
p0240 A81-26513

WILLEKENS, A. J. L.
A method for measuring take-off and landing performance of aircraft, using an inertial sensing system
p0545 N81-29088
WILLETT, F. M., JR.
ATC simulation of helicopter IFR approaches into major terminal areas using RNAV, MLS, and CDTI
[NASA-TM-81301] p0492 N81-27061
WILLIAMS, B. R.
The prediction of the bursting of laminar separation bubbles in the design of two dimensional high-lift aerofoils
[RAE-TR-80060] p0073 N81-12038
WILLIAMS, D. L.
Testing model rotorcraft for overwater operations
p0111 A81-18058
WILLIAMS, E. A.
Structural applications for titanium castings
p0510 A81-41637
WILLIAMS, J.
The influence of helicopter operating conditions on rotor noise characteristics and measurement repeatability
p0468 A81-40095
Comparative acoustic wind-tunnel measurements and theoretical correlations on subsonic aircraft propellers at full-scale and model-scale
[AIAA PAPER 81-2004] p0620 A81-48634
WILLIAMS, J. E., JR.
Wing-body carryover at supersonic speeds with finite afterbodies
p0354 A81-31622
WILLIAMS, J. G.
Concepts for improving the damage tolerance of composite compression panels
p0360 A81-32825
Application of BFRP Crack Patching to Mirage III aircraft
p0481 A81-40586
Structural tests on space shuttle thermal protection system constructed with nondensified and densified Li 900 and LI 2200 tile
[NASA-TM-81903] p0257 N81-18410
WILLIAMS, J. W.
Improving surface current injection techniques via one- and two-dimensional models
p0149 A81-19940
WILLIAMS, K. E.
Coast Guard airship development
[AIAA 81-1311] p0455 A81-38528
WILLIAMS, L. J.
Design for supercommuters
p0227 A81-24048
Can advanced technology improve future commuter aircraft
[AIAA PAPER 81-1729] p0536 A81-43959
WILLIAMS, M.
Comparison of selected lift and sideslip characteristics of the Ayres Thrush S2R-800, winglets off and winglets on, to full-scale wind-tunnel data
[NASA-CR-165710] p0423 N81-24026
WILLIAMS, M. H.
Linear/nonlinear behavior in unsteady transonic aerodynamics
[AIAA 81-0643] p0306 A81-29496
WILLIAMS, M. J.
ASW helicopter/sonar dynamics mathematical model
p0470 A81-40115
WILLIAMS, M. S.
Determination of crash test pulses and their application to aircraft seat analysis
